1. ENGLISH LANGUAGE CURRICULUM

1.1. THE BASIC APPROACH AND SPECIFIC AIMS OF THE ENGLISH LANGUAGE CURRICULUM

The Ultimate Goal of The English Language Curriculum

The fundamental goal and target of the English Language Curriculum of the Century of Türkiye Education Model is to enable and empower learners to acquire competence in the use of English language so that they can communicate effectively, competently, confidently, authentically, and naturally in all Communities of Practice (CoPs) and contexts that require the use of English, by supporting them according to their needs, ages, levels, interests, styles and aptitudes.

In this perspective, the aims and objectives of the English Language Curriculum are to support learners in acquiring and using all the knowledge and skills effectively and successfully so as to express themselves and understand others accurately and appropriately in all social and cultural contexts that require the use of English. In this way, it aims to support learners in successful use of English as a tool, medium, and means to make positive and progressive contributions to life in their own society, to life in the world, and to life in the future.

The Position of English for Türkiye

Spoken by billions of people around the world and used in science, education, the arts, the environment, health, tourism, business, etc., English covers a large geography as a mother tongue, second-administrative/ official language and foreign language. Therefore, it is considered to be the most common language in the world in terms of the number of individuals who speak it, the third most common language in terms of the number of its native speakers, and the most widespread language being used in a geography covering almost 90 countries and regions. This situation facilitates ease of communication at international level.

The global status and role of English are undergoing a significant change. Once regarded and viewed as a culturally dominant language, English now serves as an international medium that can help countries to convey their unique circumstances, cultures, and lived experiences from their own socio-cultural perspectives. In the English Language Curriculum, the term “foreign language” is preferred for the English language. This term is based on the three concentric “Language Circles/Circle Model” which summarises the use of English around the world. According to this model, the “Inner Circle”, includes countries such as the United Kingdom and the United States of America, where English is used as a “mother tongue/first language/ native language”. They are known as the countries that set the standard criteria for the English language, and as countries where people learn and use it as a “second language”. These countries are home to various people and communities whose first language is not English. The “Outer Circle” are former British colonies where English is used as a “second/official/administrative language”. The “Expanding Circle” countries where English is learnt and used as a “foreign language” and it is not the native language of the learners and users in these countries. According to this classification, Türkiye is in the “Expanding Circle” and is a country where English is taught as a “foreign language”.

The Attributes that Constitute the Character of the English Language Curriculum

There are several attributes which give the English Language Curriculum its unique character as described below.

The Focus on the Aspects and Factors of Language Learning

The learners’ learning types, resulting from their cognitive, emotional, physical, social and learning culture aspects, and also factors of learning such as “age, aptitude, learning styles, motivation level, and personality”, were taken into account in each dimension of the English Language Curriculum such as “field skills”, “learning outcomes”, “learning- teaching experiences and practices”, and differentiated learning practices”. In the English Language Curriculum for 2-8, the “four core and three supportive foreign language skills”, “learning outcomes”, and “learning-teaching experiences and practices” were designed and developed according to a “holistic and recognition-based” approach for years 2-4, a “semi holistic-semi inductive (discovery)” approach for years 5-6, and an “inductive (discovery) approach for years 7-8.

Alignment of the English Language Curriculum with the Common European Framework of Reference for Languages (CEFR)

The English Language Curriculum was aligned with the Common European Framework of Reference for Languages (CEFR) by comparing and matching the curriculum's content and learning outcomes with the CEFR descriptors. The alignment process took into account the target main and sub-themes, vocabulary, language structures, and social language content, in line with course hours, the socio-cultural context, and the aim of preparing for the future of foreign language education in Türkiye.

CEFR level A1 has been adapted as A1.1, A1.2, A1.3 in Years 2, 3 and 4 for Primary Education. CEFR level A2 has been adapted as A2.1, A2.2, A2.3, A2.4 in Years 5, 6, 7, and 8 for Lower Secondary Education. CEFR Level B1 has been adapted as B1.1, B1.2, B1.3, B1.4 in Years 9, 10, 11, and 12 for Upper Secondary Education. The English Language Curriculum for the Multilingual Foreign Language Education Model includes CEFR Levels A2+B1 in Year 5. CEFR Level B2 has been adapted as B2.1, B2.2, B2.3 levels in Years 6, 7 and 8 for Lower Secondary Education. The Upper Secondary School Preparatory Programme has been adapted to A2+ B1 levels. CEFR Level B2 has been adapted as B2.1, B2.2, B2.3, B2.4 levels in Years 9, 10, 11, and 12 for Upper Secondary Education after Preparatory Programme.

Four Field Skills and Three Supportive Skills in the English Language Curriculum

The English Language Curriculum is based on four field language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression) and additionally three supportive language skills (grammaring: selection-use, vocabulary: selection-use, and pronunciation: selection-use). Most of the time, "grammar knowledge, vocabulary knowledge, and knowledge of phonological aspects (pronunciation)" have been accepted as content knowledge in the language skills literature because they are based on the "recognition" stage of the receptive language skills. However, the "selection and use stages" of these skills should be clearly defined, and it should also be emphasised that they relate to the production stage of language. Otherwise, this gap in the literature may lead to confusion and misunderstandings. Once target grammatical items, target vocabulary and phonological aspects have been receptively recognised and identified in context as part of linguistic competence, they need to be selected and used accurately, appropriately, and efficiently in the interaction or communication phases involved in acquiring productive skills. This always happens in the natural flow of language practice however has not been precisely and openly named and defined in the foreign language literature. In the English Language Curriculum, the position, place, and application of these skills are clearly named, defined, and described to be consciously used in practise. The English Language Curriculum emphasises their importance without changing the status and importance of four field language skills recognising that all those field skills and these supportive skills have an interdependent, reciprocal, and effective relationship for language acquisition, learning, and development.

Terminology for Language Skills

When referring to language skills, the listening skill is described and used as "listening/watching-comprehension (meaning making) skill" rather than simply "listening"; while the reading skill is described as "reading-comprehension (meaning making) skill" rather than simply "reading" as receptive skills. Similarly, the writing skill is described as "writing-expression skill" instead of just "writing" and speaking skill is described as "speaking-expression skill" instead of just "speaking" as productive skills. The selection and use of grammar, vocabulary and pronunciation as supportive skills are described as "grammaring: selection-use skill, vocabulary: selection-use skill, and pronunciation: selection-use skill" in the English Language Curriculum.

Infographic: Field Skills and Supportive Skills

Reducing the Number of Themes

The English Language Curriculum has been simplified by considering the number of the weekly lessons by reducing the number of themes (units) It is organised in such a way so as to confirm that the themes are covered in greater depth and that all the skills activities are implemented effectively by allocating sufficient time. In addition, “consolidation, differentiation, and reflection” activities are integrated into this thematic structure. Since the number of themes has been reduced, the content of each theme might appear dense, however, this is due to the revisional and consolidating nature of the whole programme. Even though there are fewer themes and they may seem dense, they actually include less content compared to previous programmes.

Simultaneous and Common Revision Programme

In the English Language Curriculum, a four or three-week revision programme at the beginning of each academic year has been planned and designed for all years and levels. This revision programme has been prepared by merging eight themes in each year into two themes to be taught at the beginning of the year. Lesson materials are to be designed for this situation for the revision of the previous level before each new level in the programme. Thus it is aimed to regulate all levels of English by providing that they are revised simultaneously and with the same content in each level in every part of our country. There is also an orientation programme for one or two weeks at the beginning of the school year to be applied in all schools nationwide.

The Unique Thematic Model

The thematic sequence of the English Language Curriculum is based on eight main themes covering eight major concepts of life in all years and at all levels. Then, each main theme is divided into sub-themes which cover the main concepts in more detail and in smaller units. The sub-themes of the main themes are organised in a structure that complements each other but gradually deepens and becomes more comprehensive as years and levels progress. However, sub-topics change across all years and levels and are not the same in any year or level. In this way, the aim is to cover all life-related subjects and concepts throughout learners’ language education and to equip them with the ability to understand, express and communicate their knowledge, thoughts, and feelings in English.

Vocabulary Sequence and Distribution

In the English Language Curriculum, the lexical items belonging to each sub-theme are carefully clustered and arranged according to the specific sub-theme content and the sequence of the programmes from A1 to B2. A vocabulary target has been set for each programme and these targets have been carefully arranged to be implemented both in terms of international standards and in terms of the originality and uniqueness of

the English Language Curriculum prepared for the Turkish context. For the selection and distribution of the vocabulary, the frequency lists and categories from English corpora in dictionaries, as well as the content produced by leading publishers and international exams, have been reviewed, analysed, and studied. Vocabulary clusters have been listed according to each sub-theme in the programme. These clusters have been examined multiple times discreetly, and word lists have been created for the entire English Language Curriculum.

Background Grammar

The English Language Curriculum adopts a contextual and continuous approach to grammar learning that previously learnt structures are reused in the context of new themes. A revision programme, implemented at the beginning of each academic year, is designed to reuse all grammatical knowledge from earlier years by recalling and consolidating them in context. In addition to this, it provides opportunities for students to encounter and reuse earlier content, supporting the acquisition of new target structures. Rather than reteaching these prior elements explicitly, they are embedded naturally within the context of some theme, functioning as supportive features alongside new grammatical targets as context and meaning makers. New or previously learned, grammar is not taught through isolated or direct instruction, instead, students are encouraged to understand and internalise grammar through meaningful use and contextual exposure by exploring and discovering its functions, meaning, and use.

Integration of Idiomatic Everyday Social Language Expressions

The aim of including “idiomatic social language expressions” used in real-life situations in the English Language Curriculum is to build a connection, appropriate to the students’ age, between the language learned in the classroom and the language used in real life. The goal of using everyday idiomatic social language expressions in every theme and year of the English Language Curriculum is to add “currency (up-to-dateness), relevance, fluency, authenticity (realness), and meaningfulness” to the language. In this way, it is intended to develop students’ ability to use the language in different social contexts, to understand and learn about different socio-cultural uses of language, to communicate with speakers of the language through these different socio-cultural uses, to develop respect for diverse socio-cultural uses, to activate emotional and social intelligence during language use, and to use the foreign language in its natural form. The aim is for students to enrich, internalise, and use the foreign language they are learning more naturally.

Differentiated Learning

Differentiated Learning is one of fundamental components of the English Language Curriculum of the Century of Türkiye Education Model. In the English Language Curriculum, differentiation activities which are held as expanding and supporting activities have been designed by taking the main activities in “learning-teaching experiences” section as central. They are designed by considering the diverse needs of learners to provide a fair and equal learning opportunities to all learners in harmony with their pace and capacity. The design and modification of differentiated activities has been organised in terms of their content and process. Expectations for the end products have been varied since learners’ performance could be different. The environment of learning has also been considered to provide a physically and socially convenient and comfortable milieu for learners. Activities have been carefully graded to achieve the provision of effective and appropriate techniques for a variety of learners with diverse needs.

Integration of Technology into the English Language Curriculum

Technological Pedagogical Content Knowledge (TPACK) is known as a framework to integrate technology into educational programmes in an effective way for teachers to be aware of three major knowledge types: technological, pedagogical, and content knowledge. A significant part of the technological stance of the English Language Curriculum has been designed around the three pillars of this framework: helping teachers recognise what they already know about the language (grammar, vocabulary, phonological aspects, etc.); recognising how much they know about how to facilitate learners’ learning (lesson planning, techniques, etc.) and how they can use educational technologies and tools (AI based tools, Internet platforms, etc.); to

expand learners' engagement, and deepen their understanding. The conscious use of technology to improve learning-teaching experiences and practices are supported in this way through several apps for designing materials such as digital stories, summaries, picture strip stories, documentaries, songs, poems and so on throughout the themes.

"Blended Learning" has been taken as the second conceptual and theoretical framework for the use of technology in the English Language Curriculum since it combines up-to-date online and face-to-face teaching methods with technological tools, media, and techniques. In terms of the amount of technology and the types of techniques, ways, and means of the technology integration into the learning-teaching process in all years. In the English Language Curriculum, the use of technology refers to the integration of technology into the materials, teaching and learning process of lessons inside and outside the classroom for facilitating, enriching, and expanding learning, using English and communicating in English. Theoretically, it is derived from "Active Learning" which aims to use the technology to help learners think and learn more deeply by facilitating their learning process in an enjoyable way, in appropriate contexts through technological means by using real, natural, and authentic language.

Incorporating the Cultural and Moral Foundations of the Century of Türkiye Education Model into the English Language Curriculum

In line with the Century of Türkiye Education Model, the English Language Curriculum gives importance to enabling students to develop sensitivity towards national and spiritual values and to recognise their own cultural identities. These aspects have been given particular attention in the curriculum. In designing the sub-themes and the contexts within these themes, care has been taken to ensure that the content aligns with students' cultural identities and these core values. To this end, the programme incorporates activities related to sports, arts, literature along with moral values and traditions, national and religious days, celebrations, and events.

This approach aims to both strengthen students' connection with their own national, cultural, and global worlds and enable them to express their national and cultural elements while learning English. In this way, the English Language Curriculum demonstrates consistency with the national, cultural, and pedagogical framework of the Century of Türkiye Education Curriculum model. In this line, some examples to the national, religious, traditional and cultural celebrations and days are presented below.

National Celebrations and Important Days
18 March Çanakkale Victory and Martyrs' Day
23 April National Sovereignty and Children's Day
19 May The Commemoration of Atatürk, Youth and Sports Day
15 July Democracy and National Unity Day
30 August Victory Day
29 October Republic Day

10 November Atatürk Memorial Day
24 November Teachers' Day
Religious Celebrations
Eid al-Fitr (Eid-al-Ramadan)
Festival of Sacrifice (Eid-al-Adha)
Traditional and National Sports Events in Türkiye
Archery
Oil Wrestling
Mounted Javelin Game
Handkerchief Grab Sack Race Tug of War
Cultural Days and Weeks
26 September Turkish Language Day
20 November Children's Rights Day
Last week of March Library Week
Customs and Traditions
Visiting Elders on Religious Holidays
Ramadan Iftar Meals
Hospitality

Philosophical, Theoretical, and Methodological Stance of the English Language Curriculum

Philosophical Approach to Learning and Teaching

In the English Language Curriculum, the philosophical background does not refer to a background that defines foreign language education as the transfer of structures to the student, but to a background that aims at the individual, cultural and social perception, formation and development of the learner. In the English Language Curriculum, as in any field of education, the teaching of English as a foreign language is based on a number of philosophical approaches. This foundation includes the basic principles that reveal the goals, nature, organisation, and teaching processes of foreign language education. The theoretical approaches of applied linguistics, which establish the theoretical framework of teaching English as a foreign language, are also positioned on this philosophical background. In addition, the design, implementation, and evaluation of the curriculum are also shaped on this background.

The components of the philosophical foundation of the English Language Curriculum can be considered as “the aims and objectives of learning English”, “the process of learning English”.

a) The Aims and Objectives of Learning English

Individual formation and development goals that describe English language learning as a phenomenon contributes to cognitive, emotional and spiritual development and supports individual development not only for communication but also as a means of thinking and perceiving.

Cultural goals and objectives that describe the phenomenon of English language learning as contributing to learners’ awareness of and respect for their own culture, awareness of the existence of other cultures in the world, and understanding and respect for people from their and other cultures.

Social aims which recognise that learning English is about first expressing oneself effectively and accurately, then understanding other people accurately and communicating effectively with them in contexts such as school, family, neighbourhood, country, the world and so on.

b) The Process of Learning English

In the English Language Curriculum, the process of learning English refers to individual formation, growth, and development. The process dimension is reflected in the English Language Curriculum through various “Applied Linguistics” approaches. This theoretical background has been synthesised in the teaching of English as a foreign language in all English classes and themes of the programme, and this synthesised theoretical background has formed the background and framework for defining the content and implementation of the English Language Curriculum.

Action-Oriented Approach to Foreign Language Learning-Teaching Process in the English Language Curriculum

One of the major principles of the Action-Oriented Approach (AOA) is described as enabling learners to perform for succeeding in communication in real-life socio-cultural contexts as stated in the 2020 version of the CEFR Handbook. Learners’ involvement in the learning process and their awareness on the social nature and use of language learning is of great importance in AOA. Learners are expected to be aware of their own individual learning and also of the relationship between the consequences of their personal learning and the social life. These principles are in harmony with the academic stance of the English Language Curriculum which is based on these autonomous, purposeful, communicative, and collaborative learning in socio-cultural contexts in and out of the school. These characteristics of the English Language Curriculum direct the attention from the language itself to “how to learn and how to use it” perspective in the AOA as stated in the CEFR. Linguistic elements are the means of English language learning to be able to use them autonomously and collaboratively with peers and other people in social and cultural contexts. In the English Language Curriculum, the aim for learners is to interact and communicate successfully, but then to transfer their knowledge and skills as successful communicators contributing to their own development, to their own society in which they live in and also to the whole world through English as their foreign language, wherever the use of English language is needed.

To bring these ideas to life, each sub-theme of the main theme in the English Language Curriculum is used to build up a micro socio-cultural context with all possible real-life situations through relevant materials and bring them into the classroom. Learners first learn what these concepts in the sub-themes are about with

the help of linguistics elements such as words, phrases, sentences, use of grammatical items and so on. Then they understand and learn how these linguistic elements function in creating semantic meanings in English. They learn how to use them in communicating with other people to express their own understandings through their knowledge, thoughts, ideas, and feelings, and then to understand the perspective of other people in English. Ultimately, the aim of the English Language Curriculum for learners is to transform their communicative competence, capacity, and ability to be good communicators and contributors in their community, in different (multilingual) societies, and in the world to make it a better place.

In the English Language Curriculum, this transformation is processed through several communicative activities, tasks, projects, assignments, and performances throughout the themes. Learners work on many activities and tasks to learn how to interact and communicate, then they transfer this knowledge and skills to where they work both individually and collaboratively on real-life topics and socio-cultural contexts of each theme of the English Language Curriculum to access issues, challenges, problems and their remedies about the facts and situations in their immediate or distant environment.

Post-Method Approach

The English Language Curriculum does not rely on and adhere to a single language teaching method but synthesises various English language teaching approaches, methods defined and described by different approaches and theories, combining them by selecting and using appropriate techniques from them in a meaningful way. This combination has been designed in line with the basic objectives in all years of the English Language Curriculum. The aim of this combination is to facilitate learners' learning processes so that they can develop their basic language skills, gain communicative competence and use English effectively, naturally, and competently in real and natural life contexts. This synthesis has been adopted in the English Language Curriculum and explains the methodological stance of it.

This stance in the English Language Curriculum, is not based on a specific and single teaching method; it defines and describes the selection of the appropriate and suitable techniques and activities for the appropriate and suitable learner, place, time, context, situation and purpose, with an emphasis on factors affecting language acquisition and learning, such as learners' age, learning styles, motivation levels, aptitudes, and personality traits, as described in the Post-Method Era Approach to teaching languages.

In the "Post-Method Era" perspective of the programme, various up-to-date and traditional methods such as "the Action-Oriented Method of CEFR", "the Communicative Method", "Blended Learning", "Flipped Classroom", "Situating Learning", "Digital-Artificial Intelligence Supported Learning", "Contextual and Authentic Learning", "Social Learning", "Collaborative Learning", "Learning Through Drama", "Task-Based Language Learning Design", "Total Physical Response", "Community-Language Learning", "Multiple Intelligence Theory", and "Suggestopedia", are considered as part of the approach. "Field skills", "learning outcomes" and "learning-teaching experiences" sections in the English Language Curriculum have been organised in accordance with this methodological background. The practical implementation of the English Language Curriculum is planned according to this theoretical and academic stance by taking learners' ages; cognitive, emotional, physical, social, cultural aspects; learning styles; and interests into account.

Socio-Cultural Approach and the Communicative Approach

In the design and formation of the English Language Curriculum, one of the basic foundations is the "Socio-Cultural Approach" which posits that language acquires meaning within social and cultural contexts, and that language learning enables individuals to interact with different cultures while maintaining their own cultural identity. This approach is based on the interaction between language and culture and fosters intercultural understanding. This approach has been proposed and developed by many applied linguists and has been adopted as one of the central conceptual and theoretical foundations of foreign language education.

English can make important contributions to both individuals and societies in terms of their personal development, access to information, various personal, educational, professional and business opportunities, their ability to understand and convey cultural differences, and participation in universal communication. Today, it is widely used as a global means of communication among individuals and societies in a number of fields such as education, science, the arts, technology, business, media, and diplomacy.

Through different forms and varieties of English, it can enable speaking communities by articulating speaking communities to express their own identities and can allow different individual and local voices to be heard in

global communication contexts rather than dominating with its culture and nativeness through its changing role in the world. In creating themes and course contents of the English Language Curriculum, the "Socio-Cultural Approach" has been adopted as part of the conceptual and theoretical framework, emphasising that English can serve as a common means for people to express their social and cultural voices.

Approaches to Learning and Teaching in the English Language Curriculum

The English Language Curriculum is based on the General Aims of Turkish National Education and the Basic Principles of Turkish National Education as expressed in Article 2 of the National Education Basic Law No. 1739. In this curriculum, students are seen as "active participants", "active observers", "responsible learners", "discoverers", "context members", "communicators", "explorers", "problem solvers", "members of learning communities", "receivers and providers of feedback", "reflectors of thoughts and emotions", "innovative practitioners and producers", "competent language users", "co-facilitators" and "social agents". Within this scope, the objectives concerning students are as follows:

- 1) They are expected to:
 - a) *recognise, perceive, identify, understand, and interpret oral/verbal (auditory) and written (visual) content, which contains the language with target language structures, vocabulary and social language correctly and efficiently.*
 - b) *apply this knowledge and related skills to their own lives and use it effectively in oral/verbal or written communication in English.*
 - c) *use this knowledge and related skills to understand social and cultural differences to communicate with other people effectively in English.*
- 2) They are expected to find remedies for the problems and issues in the content by recognising, perceiving, and making sense of the functions of the language with the target language structures, words and social language that they are learning, and to express these remedies.
- 3) In case of a language communication problem with others, they are expected to share the solution with a content that includes the language with the target language structures, words and social language functioning well and can contribute to healthy communication.
- 4) They are expected to understand and respect the content including rules, principles, situations, thoughts, feelings, and values of other cultures.
- 5) In situations that require provision of information and/or discussion of content, they are expected to be able to convey this information in a language that includes target language structures, words and social language in a form that they function accurately, and others perceive and understand it.
- 6) When discussing ideas and opinions, they are expected to justify their ideas and opinions in a consistent and valid way in communication with others by using understandable, accurate and appropriate English.
- 7) They are expected to use the content in English automatically, authentically, naturally and appropriately in the necessary and appropriate contexts at school and in their personal and social lives outside school.
- 8) They are expected to have a holistic perspective in understanding different information, emotions, thoughts and justifications with the help of language skills, the accumulation of knowledge, thoughts, and opinions they have gained as a result of understanding, perceiving, analysing, synthesising and evaluating the content, and to reflect this perspective in communicative exchanges and discussions they have with others in English.
- 9) They are expected to acquire social-emotional skills, literacy skills, higher-order thinking skills and values by integrating them with English language learning skills.
- 10) They are expected to use all the language skills and other skills integrated with English language skills that they have acquired to improve and develop their own and others' living conditions; to use them for the benefit and development of their country; to use them to develop living conditions in the world and in nature; to play an active role in designing and shaping the future by using these skills to develop innovative and creative ideas.

Infographic: The English Language Curriculum

1.2. PRINCIPLES FOR THE IMPLEMENTATION OF THE ENGLISH LANGUAGE CURRICULUM

- The English Language Curriculum has been structured in alignment with the “Common Document of the Century of Türkiye Education Model”. This document should be taken into consideration in planning English lessons; designing and preparing course materials; planning assessment and evaluation processes (both for formal and alternative and process-based assessment and evaluation), designing and preparing assessment and evaluation materials; designing and preparing the contents of coursebooks and other supplementary teaching materials. All educational activities should be planned and carried out to ensure that the learner profile in the Common Document of the Century of Türkiye Education Model is achieved.
- As the English Language Curriculum will be implemented gradually, the deficiencies and problems in the prior learning processes related to the existing level in English should be determined by the teachers in English departments of the schools. The content to address these deficiencies and problems should be determined in the departmental meetings at the beginning of the academic year and should be implemented throughout the educational process. There is a revision programme in the English Language Curriculum for each year (grade), to be implemented simultaneously throughout Türkiye. This revision programme consists of the content of the previous level for each new level and/or year (grade). There will be two or four revision themes according to the type of the programme before the first theme of the syllabus prepared for each level and/or year (grade) which will take place in the teaching materials. In this way, learners can both remember the content of the previous level and also can be prepared for the themes of the new level. The revision programmes of English lessons for all years (grades) in Türkiye will contribute to standardisation throughout the country.
- Field skills are used as the basis for creating the learning outcomes in the English Language Curriculum. Process components are identified for each field skill, as well as for each learning outcome. These process components are the basic elements that provide access to the learning outcomes. Accordingly, each process component needs to be experienced by learners in the English language classroom.
- The English Language Curriculum is structured on “foreign language field skills and supportive skills” included in the Common Document of the Century of Türkiye Education Model.
- In the English Language Curriculum, activities and applications have been designed by considering most appropriate approaches, methods, and techniques according to their ages, and language levels. In line with the Post-Method Era Approach to teaching English as a foreign language, the emphasis is on selecting the accurate, appropriate, suitable, and effective techniques and activities for the right place, time, context, material, situation and purpose, according to the age and level of the learners, rather than a specific and single teaching method. Factors that affect language acquisition and learning such as the learners’ age, learning styles, motivation levels, aptitudes, interests, and personality traits are given significant consideration. This strand should be considered and used in an accurate, meaningful and effective way in lesson planning and implementation. Appropriate techniques that can respond to learners’ ages, learning styles, aptitudes, language levels, areas of interest, motivation levels and communication needs and also physical conditions they are in, should be considered, and necessary activities should be designed and implemented accordingly. In this way, they can be supported to acquire and develop their language competence in English. The activities based on techniques from different methods should not be designed in an aimless and ordinary way but in a way that helps learners discover their own learning purposes, ways, situations, and desires. Opportunities needed to be provided for learners to reflect on their learning in this way and to improve their own learning through their own reflection. Individual and collaborative reflection has a great importance in the English Language Curriculum, and has taken place as the last component of each field skill and learning outcome.
- The first of the two Receptive Skills in the English Language Curriculum is the “Listening/Watching-Comprehension Skill”, through which an individual develops to perceive and make sense of the oral-verbal language content produced by a speaker or other source. These sources include the structural

features of the language such as the accent, stress, speed, rhythm and also include content and semantic features (related to the theme) such as idioms, terms, words, phrases, clauses, sentences and social and cultural reflections in the context. Learners perceive and understand these with the help of a variety of visuals while learning English during the noticing and recognition stages. "Reading-Comprehension Skill" is a skill that is developed to perceive and make sense of the written content (text) which is produced with the help of the text type, visual support, use of grammar, use of vocabulary, use of idiomatic language, and the use of all semantic features in this content. Similarly, reading is very important for students to 'identify, notice, and interpret' the content and semantic features (related to the theme) such as idioms, terms, words, expressions, phrases, sentences, and the social and cultural reflections in the context. The structural and semantic features of the language are of great importance for both reception and comprehension.

- "Listening/Watching-Comprehension Skill" is a real time, highly fluid and rapid process therefore requires fluid, instant reception and understanding and also rapid and meaningful response and feedback. "Reading-Comprehension", on the other hand, is a more static, controlled and slower process. In both "receptive skills", the content conveyed to the learner and learner's perception of the meaning of the message are based on her/his personal and social relationship to that content. In the English Language Curriculum "Listening- Comprehension and Reading-Comprehension" skills, which comprise the reception, interpretation, and comprehension process in communication, have been organised with this factual information in mind. In the lesson planning and implementation phases of the English Language Curriculum, activities in which these skills are used need to be carefully planned, created, and arranged with meaningful contextual designs. Learners need to be supported to use these skills in a natural, realistic, effective, efficient, and meaningful way within the context to communicate with others.
- "Speaking-Expression Skill", is one of the two "Productive Skills" defined, described, and used in the English Language Curriculum. "Speaking-Expression Skill" is a verbal skill that learners develop while learning a language so as to have the competence to communicate with other people by using the content that includes the target sounds, grammatical items, vocabulary, and semantic expressions of that language effectively and meaningfully. The main elements of "Speaking-Expression Skill" are planning, interaction, and communication. In speaking, the learner develops the ability to achieve social interaction and communicative competence by using proper and meaningful content appropriate to the context, situation, place and time; by producing and using the correct sounds and pronunciation; by expressing information, thoughts and feelings correctly, meaningfully, appropriately, clearly and fluently; and by transferring cultural content and messages appropriately and correctly.
- The second of the "Productive Skills", the "Writing-Expression Skill", is the learner's ability and capability to express and convey his/her own knowledge, thoughts, experiences, and feelings in a meaningful and written form by using the content which contains target grammatical items, vocabulary, various forms of self-expression, types of writing, and rules of the language. The acquisition of "Writing-Expression Skill", which focuses on transfer, expression and production, begins with the "noticing-recognition-comprehension" of relevant input in the content in the English Language Curriculum. The transfer and understanding of information in input is processed through the use of receptive skills such as listening, watching, and reading. The ability and skill to write, express, and explain involves many processes that require planning, implementation and rewriting (by considering the feedback given), and developing the text that allows the development of creativity. This skill is strengthened through different types of writing studies. Activities, plans, and practices in which productive skills are used in the English Language Curriculum, need to be carefully planned, designed, and created in a contextual and meaningful way. Learners need to be supported to develop their communicative competence by using their English "Speaking-Expression" and "Writing-Expression" skills in a natural, authentic, automatic, realistic, effective, efficient and meaningful way within the context.
- "Supportive Skills", as defined and described in the English Language Curriculum, are processed with all the other language skills. There is a spiral, interdependent, and reciprocal relationship between the field skills and supportive skills therefore all the skills are used in an integrated, unified, spiral, and

interconnected manner. Grammatical, lexical (vocabulary) and phonological aspects of a language are most often taken as content knowledge even if their selection and use are mentioned in the relevant literature without positioning and naming them in a specific way as they are related to learners' "linguistic competence". In the recognition stage of language learning, language learners encounter, perceive and recognise grammatical items, lexical items (vocabulary) and phonological aspects (pronunciation, intonation, etc.) and are expected to begin to acquire their "linguistic competence" which will later be linked to productive skills. This recognition stage is present in the processing of "Receptive Skills". It may therefore be necessary to divide the learning of grammar, vocabulary and pronunciation into two stages: recognition stage and selection-use stage. The "use" stage takes place in the processing of "Productive Skills" in language learning through the skills of "Speaking-Expression" and "Writing-Expression".

- This determination about supportive skills in the English Language Curriculum is not for producing new information. It is rather for positioning the information about the selection and use of grammatical, lexical, and phonological aspects as "Supportive Skills" that take place in theory and practice in a vague way and that leads to considering how to empower learners in acquiring their "pragmatic, strategic, communicative, and sociolinguistic competences".
- "Grammaring: Selection-Use Skill" is the first of the three "Supportive Skills" in the English Language Curriculum. It is one of the language skills that is approached in the same way as other language skills by using the appropriate methodology and context. For Years 7-8 of lower secondary school, "inductive" learning techniques based on "conscious awareness" are used for this skill. For supporting learners to acquire the functions of this competence, appropriate, and correct activities should be selected in contexts that are natural and authentic. These activities should aim to contribute to the acquisition and development of learners' communication competence by using English grammar as naturally, correctly, authentically, and automatically as possible.
- Grammar "acquisition" is the situation in which children naturally pick up, adopt, and use the grammatical items and forms (and other elements of the language) of their mother tongue, in a realistic and natural environment and context, without conscious focus, without being aware of it, in an automatic, natural and real way. In the case of foreign language education provided at school, it is described as "language learning" (including grammar and other elements of the language). The elements that define language learning are the artificial environment, planning, conscious learning of rules and short-term goals. In the English Language Curriculum, teaching grammaring aims to build an environment where learners can communicate by using the language with correct grammar in a natural, realistic and meaningful way in context and on a correct and appropriate methodological basis that can make this possible in a natural, realistic, automatic, and meaningful way. This can only be achieved to a certain extent, and the necessary condition for this, is building a continuous, natural and authentic environment in the classroom where grammar is not taught as a subject by the teacher but through the use of appropriate methods, techniques, materials, and activities. For this reason, the process should be supported by a plenty of natural and realistic repetition, revision, interaction, storytelling, role-playing, and communication activities. In the English Language Curriculum, the grammar learning process of primary school pupils (Years 2, 3, 4) is described with the "Holistic Approach", where the functions of the right hemisphere of the brain are found to be more effective, as explained in the relevant literature, helping them see, hear, and use grammar automatically without being aware of its rules, and where features and activities such as visuals, rhythm, music, movement, drama, and storytelling are used through all aspects affecting learning (physical, cognitive, affective, cultural, and social) together. The process of learning grammar in Years 5 and 6 of lower secondary school is described as the "Semi-Holistic/Semi-Inductive Approach", using features and activities such as visuals, rhythm, music, movement, drama, and storytelling, which still allow the functions of the right hemisphere of the brain to be effective. At the same time, the functions of the left hemisphere of the brain, which provides awareness, natural and simple inferences, and very simple discoveries, are gradually activated, but there is a condition that grammar should not be taught as a subject by the teacher. Noticing and awareness activities are the most important activities of this approach and do not involve teacher explanation or conscious discovery tasks. For learners in

Years 7, 8 of lower secondary school and Years 9, 10, 11, 12 of upper secondary school the “Inductive Approach” is described to learn grammar in a meaningful and appropriate context by discovering the rules themselves. The functions of the left hemisphere of the brain are more effective in this discovery process, by being aware of their meaning, function, usage, form, by using higher-level thinking skills such as examining, comparing and classifying, and by making inferences based on their meaning without using terminology or formulations. In this approach, the functions of the right hemisphere of the brain can still be activated through the activities such as visuals, music, movement, drama, and storytelling in the created course content. In the learning process, it is necessary to create continuous, natural, authentic, and realistic contexts and environments where grammar is not taught as a subject by the teacher in the school classroom but is facilitated to help learners use the language by selecting and using grammar with appropriate techniques and activities in these natural and realistic contexts. In the English Language Curriculum, activating the functions of both hemispheres of the brain as much as possible in all lessons is encouraged so all the activities need to be carefully planned, designed and created in a contextual and meaningful way in lesson planning and practice so that learners can and use English grammar in a natural, authentic, automatic, realistic, effective, efficient, and meaningful way according to the context, and thus can acquire and develop their communicative competence.

- In English Language Curriculum, one of the three “Supportive Skills”, “Vocabulary: Selection-Use Skill” is based on the learner’s positioning and using the target words after recognising, perceiving, and understanding them through “Receptive Skills” in the target content in a way that is appropriate for the context, situation, place and time. They also remember, recall and add previously learned vocabulary that are appropriate for the situation and context, to the context, and select and use them correctly, effectively and meaningfully. These stages have been identified, revealed and applied in the “process components” of the “field skills” and then transferred to the “learning outcomes”, and finally to the “learning-teaching experiences” sections of the themes in the English Language Curriculum.
- “Vocabulary acquisition” is the situation in which children pick up and adopt words without noticing and analysing them in their mother tongue. “Vocabulary learning” on the other hand, is the process that takes place in the artificial environment of the classroom, not in the natural contexts and environments of second/foreign language. In order to be sure that words are used naturally, authentically, correctly, meaningfully, and effectively in learners’ interaction and communication processes, it is necessary to practise them by being aware of their meaning in a way that is appropriate to the context, their form, pronunciation and uses. Activities in which this skill is used should be carefully planned, designed, and created in a contextual and meaningful way in the lesson planning and implementation process included in the English Language Curriculum so that learners can use English vocabulary in a natural, authentic, automatic, realistic, effective, efficient and meaningful way in context and thus gain communicative competence.
- The third of the three “Supportive Skills” in the English Language Curriculum is the “Pronunciation: Selection and Use Skill”. Phonological skills help learners to use the sounds, accents, rhythms, tones, intonation, and pronunciation of the language correctly; to reflect the content of the speech correctly; and to interact and communicate efficiently and effectively. This skill is supported with activities through listening practice including listening exercises, repetition, imitation, pronunciation exercises, listening to peer recordings and giving individual feedback, listening to individual voice recordings and reflecting individually during automatic selection, use and reflection sessions. As with other skills, the correct and appropriate use of pronunciation facilitates learners’ language learning experience by giving meaning to the content. This content should support the provided verbal information and make the content of the verbal information meaningful. In lesson planning and implementation, activities that use this skill need to be planned, designed, and built in a contextual and meaningful way where learners are expected to use English pronunciation naturally, authentically, efficiently, automatically, and meaningfully.
- The English Language Curriculum also aims to support learners to develop their “sociolinguistic and pragmatic competence” through communicative and collaborative activities relevant to different cultural content and contexts. The “social language expressions” used in all the themes are part of

this, as learners can access the real- world language by learning them inside the classroom and using them inside or outside the classroom in their personal lives. For supporting learners to acquire “social competence” through meaningful oral/verbal and in written contexts in a way that is appropriate to their English language levels, it is necessary to provide opportunities for them to use English effectively, meaningfully correctly, naturally, authentically, realistically, and fluently in their social communication, inside and outside school. This need to be considered in the design and implementation of all course contents very carefully.

- As described in the English Language Curriculum, it is essential that all processes written for “learning outcomes” and “process components” need to be considered and implemented in the lessons. In addition to this, in recommended practice, lesson planning activities should be carried out counting all related and integrated programme components, especially the “learning outcomes and process components” of the relevant theme. All the applications can be differentiated accordingly.
- In the English language classroom, it is necessary to create a learning environment that encourages the active participation of learners. Similarly, a classroom climate in which personal ideas can be shared independently and the development of social and emotional skills is supported should be created.
- Activities such as questioning, researching, observing and experimenting should be carried out with an interdisciplinary and contextual approach, based on the language level of learners in the class. They should be planned and implemented by the teachers of English departments carefully.
- In the English Language Curriculum, “establishing links” section has been described and designed as an important part before moving on to the “learning-teaching experiences” section of the themes. The first stage of the three-stages of “establishing links”, should provide the necessary preliminary information to facilitate the processing of the theme. The second stage should summarise what needs to be done to be ready to process the “learning-teaching practices” section. In the last stage, it should be indicated how the learners can use the knowledge, experience, and skills they develop throughout the themes, or to which disciplines they can transfer them and especially in which areas they can use them in their real lives.
- The “learning-teaching experiences” section in the themes is presented in a comprehensive framework to provide learners with a holistic perspective. This holistic perspective is seen as a supportive element for learners. The section guides the teacher to use different teaching approaches, methods, techniques, and activities to facilitate learners to become aware of their own learning and individual learning strategies they can use, to achieve constant learning, to perceive their own learning process, to be aware of the spiral flow and interdisciplinary relationships in the learning process within this holistic perspective along with the social use of the language in social contexts.
- “Reflection” is a significant component of the English Language Curriculum. Learning-teaching experiences are organised in a way that “field and supportive skills” and “learning outcomes” gain meaning together within the course flow and facilitate learners to reflect on their learning about the activities. Both individual and collaborative reflection takes place in the flow of “learning-teaching” process as described in the “field skills” and “learning outcomes” sections.
- The English Language Curriculum has been prepared by taking into consideration “field skills and supportive skills”, “conceptual skills”, “dispositions”, “inter-curricular components (social-emotional learning skills, values, literacy skills)”, “inter-disciplinary relationships”, “inter-skills”, “content frame”, “generalisations and key concepts”, “indicators for learning”, “learning-teaching experiences (basic acceptations, pre-evaluation process, establishing links, learning-teaching practices)”, “differentiation (expansion and supporting)”, and “teacher reflections”. Therefore, learning outcomes should be addressed in accordance with the principles of progression, spirality, and sequentiality as specified in the themes.
- In the process and flow of “learning-teaching experiences” section, all language skills have been followed from easy to difficult, from known to unknown, from more controlled to more open-ended and communicative, according to the relevant language level. Branching learning has been

attempted throughout these processes. Collaborative, interactive, and communicative activities have been suggested throughout the themes constantly. The main aim of foreign language learning, “to communicate by filling information gaps through reciprocal and mutual interaction, sharing, and exchanging ideas”, has been included in the flow of “learning-teaching experiences” section by using all language skills. This flow and methodological stance should be followed in the classroom to facilitate learners’ learning experiences.

- One of the principal aspects of the English Language Curriculum is field and supportive skills which are pursued, processed, and developed in a holistic, integrated, spiral and recycling manner within the themes. To provide and maintain this, each theme begins with a holistic introductory story, as a context for teaching and learning the language. The introductory story is planned to be a digital film with a script presenting the linguistic and semantic elements such as target grammar, vocabulary, phonological aspects (pronunciation, intonation, etc.), and social language expressions, appropriate to the language level, needed to learn the theme. The perception of the general topic of the theme is provided with the visuality and movement of the digital introductory story (film). The target grammatical structures, words, pronunciation, and social language expressions in the story are presented both visually and verbally. With the flow of language skills, this introductory story is revisited several times for grammar, vocabulary and social language content to understand the general topic first. This rich content is used as the basic context throughout the theme. These returns/revisits involve the use of skills beginning with reception and gradually turns into production. By using all skills in an integrated and spiralling way, the learner is enabled to bring the theme into real life and use it in communication.
- The English Language Curriculum includes different contents that are consistent with the learning outcomes, taking into account the learners’ readiness and learning styles and strategies in a way appropriate to their language levels. Written materials such as puzzles, paragraphs, reading passages, short stories, novels, poems, articles, worksheets, magazines, reviews; visual materials such as illustrated-cartoon-anime-continuous stories, posters, picture cards; preparation and verbal/audio/visual materials such as rhymes, songs, dialogues, games, simple story recitals, podcasts, documentaries, interviews, radio programmes, educational videos, story videos, short films, presentation contents, chat groups, simulations, animations, etc. have been suggested as sources for learning experiences. While preparing such learning-teaching materials, cooperation and collaboration should be provided by department teachers and other branch teachers.
- After the introduction of each theme is provided with a contextual and introductory digital introductory story (film), the flow of all the language skills are given a place in an integrated way. There is a unified design in the “Speaking-Expression” skill to accompany other skills throughout the theme. “Grammaring: Selection-Use, Vocabulary: Selection-Use, Pronunciation: Selection-Use” skills are used and practised with the “gamification” techniques and aimed to be used effectively in communication. The impact of such practice activities on learning should be taken into consideration.
- In the English Language Curriculum, the reading skill is of great importance because reading texts create a written context providing input and providing reception of the language. In primary school classes, group, vocal and fun “pyramid reading” and “radio reading” techniques, which are also used for pronunciation are preferred. In secondary school, “silent jigsaw reading” techniques, which are especially useful and effective for crowded classes are suggested. It should not be forgotten that reading should be vocal for pronunciation and silent for meaning. It should also be remembered that aloud reading in turns serves neither purpose and wastes time. Reading skills in the English Language Curriculum are studied through reading sections that include the written version of the digital introductory story and also various other reading passages.
- “Content and Language Integrated Learning (CLIL)” is one of the methodological components of English Language Curriculum. In CLIL, English is taught through other disciplines. The main aim is to teach both the content and the language together in a simultaneous way. Culture is also an important part of CLIL. Local, target, and international cultures can be learned through several contents by integrating them into CLIL activities. All language skills are proposed to be used for “CLIL” in the English Language

Curriculum. Information processing, problem solving, researching, collaboration, critical thinking, and discussion techniques need to be used while working in CLIL. It must be seen as an important means of learning about one's own and other people's cultures, developing awareness of them; seeing new contextual uses of English created with other disciplines, and understanding and explaining content related to other cultures and disciplines in English.

- Consolidation is a significant process in English Language Curriculum. Content covering all grammatical items, target vocabulary, and social language is consolidated on a regular basis through enjoyable and meaningful activities. Ongoing cartoon-anime-picture-photo strip stories with resident characters are suggested to consolidate the content of the themes in a vivid context. All language skills are used to consolidate the content and to provide communication by producing new contents and contexts while revising the knowledge and skills acquired and remembered.
- "Performance Assignments" are also important part of English Language Curriculum, which are based on searching (research), constructing (creating), and presenting real-life productions and remedies several issues. As part of the "Action-Oriented Approach, the Communicative Approach and Task-Based Approach" to teaching and learning, they are processed with versatile activities such as drama, narration, role-play, presentation, gamification, etc. in English Language Curriculum to support learner autonomy, "differentiated learning", and collaborative learning. They are used in order to reconstruct the content covering the language including all the target language items, grammar, vocabulary, and social language expressions. In each theme there are many tasks also there is a performance assignment in which students can apply and expand what they have learnt in the theme collaboratively in a new context to strengthen their "productive and supportive skills". Learners prepare performance assignments to remember, revise, consolidate, use, and produce new and meaningful contexts for all theme contents according to their language levels. Digital means and tools are also recommended to be used in the production of written and visual content with the guidance of the teacher. It is very important that these performance assignments which should be original, creative, versatile, meaningful, revisional, and consolidating should also reflect the perspectives of the learners about learning. The teacher's and peers' feedback and individual and collaborative reflection are very significant part of the performance assignments in the English Language Curriculum.
- In the English Language Curriculum "values" are presented according to the target content in the theme, the process of learning-teaching experiences, and learning outcomes. Learners are expected to internalise these values and reflect them in their daily lives. For this, learners needed to be provided with the opportunity to apply the value they realise during the process of examining and understanding the content in the activities in the themes.
- In the studies conducted in the English Language Curriculum or in the products such as projects, portfolios, poems, songs, articles, stories, reviews, etc., attention should be paid to issues related to copyright and protection of personal data. Content should be created that complies with the constitution and laws, considers the sensitivities of individuals or society, reflects national and moral values, and respects the rights and freedoms of individuals. Learners should be made aware of their legal rights and responsibilities when creating and sharing content.
- In the English Language Curriculum, the activities included in the expansion and supporting sections in the "differentiation" section do not take place in teaching materials. However, some e-contents are prepared by the material developers for the implementation of their contents. All practices and activities within the scope of differentiation should be planned and implemented by teachers, taking into account the interests, needs, and requests of the learners.
- It is important to include reading texts that broaden students' horizons, inspire and encourage them, and reflect Türkiye's achievements to date, its internationally renowned works, its visibility, vision, and recent successes, as well as texts, including digital content, that explain the significant and unique contributions of our country's institutions and people in the English Language Curriculum. It is essential that the selected reading texts align with national, spiritual, cultural, and moral values of our country. Reading materials should be chosen to support the idea that students learn about the values of our

history, culture, and civilisation accurately.

- In the English Language Curriculum, the aims, objectives, methods, criteria and tools of assessment/evaluation based on the learners' English levels have been included as an essential part. An alternative assessment/evaluation scheme has been designed to assess/evaluate English-related knowledge and skills in creating new meaningful content and communicating through it. The components of the English Language Curriculum have been made a meaningful part of learning and evaluation. Instead of assessing/evaluating "values, dispositions, literacy skills and social-emotional learning skills" with marks and scores, some alternative evaluation tools including classroom-based and/or out-of-classroom activities such as performance tasks, portfolios, projects, diaries, interviews, drama studies, etc. have been used to evaluate their development together. These components are also among the criteria taken into consideration in the evaluation tools and marking/scoring keys of such performances and achievements. These alternative evaluation techniques have been included in the English Language Curriculum to evaluate language skills, collaborative activities such as pair and group work, and creative, productive, and communicative activities according to language levels. The evaluation criteria for each skill are listed as "purposes, indicators, application, frequency of use, evaluation tools, and evaluation focus" and are defined and described according to learners' language level. This list is provided in the entry section of the English Language Curriculum. It is not compulsory to assess/evaluate every skill in every lesson. Teachers can choose any of the assessment/evaluation tools for the skills on the assessment/evaluation list according to the needs and learning outcomes of the theme. In school practice, these forms of assessment/evaluation should be varied according to language levels, dispositions, abilities, needs, and special situations of the learners and the context. The measurement and evaluation of performance development, which include knowledge and skills, should contain activities about situations, problems, and solutions that are interesting, related to everyday life. These activities should also be about situations, problems, and solutions that can be encountered in distant or close environments when using English in communication with others. Performance and proficiency in the use of the language should be assessed/evaluated according to these criteria. Learners should be provided with feedback on the linguistic, cultural, and social formation of their performance which is non-judgemental, motivational, supportive, and facilitative of their learning. Throughout the whole assessment/evaluation process, digital technologies can be used to make the applications and implementation more practical and functional.

Assessment and Evaluation Scheme for Years 2, 3 and 4

Alternative assessment and evaluation techniques and activities for **primary school lessons** are given below. There are different assessment and evaluation applications for each language skill. Teachers do not have to use all of the items in every lesson. They can be selected and used according to the needs and flow of the lesson.

- 1) **Evaluating listening/watching and comprehension: Objective:** To listen/watch efficiently for comprehension to be able to engage in spoken language from people or technology-based digital audio-visual materials to be able to respond appropriately and meaningfully by using various strategies and techniques such as listening for/and imitating, repeating, saying, colouring, drawing, matching, underlining, circling, doing, imitating, listening for gist, for scanning, and so on. **Indicators:** Accurate understanding of the spoken content, responses to closed, semi-closed or open ended-questions in comprehension activities, successful participation and turn-taking in various listening activities. **Frequency:** At least once in a month, on a regular basis. **Evaluation tools:** An observation checklist and/or observation grids for monthly monitoring sessions. **Evaluation/Assessment focus:** Evaluation is based on effective comprehension, inference skills, understanding of the main idea, attention to details, general interpretation skills and successful engagement in communication by encoding and decoding the messages accurately and meaningfully.

- 2) **Evaluating the use of pronunciation: Objective:** To pronounce the target sounds, words, and phrases accurately and appropriately in context. **Indicators:** Clarity in articulation of target sounds, and phrases, appropriate and correct intonation and stress patterns and improvement in pronunciation over time. **Frequency:** Regularly, once in a month. **Evaluation tools:** An observation checklist and/or observation grids for monthly monitoring sessions. **Evaluation/Assessment focus:** Evaluation is based on accurate pronunciation of words, phrases and sentences, accurate use of intonation and stress patterns when speaking to/with others in the communication process, by using a checklist with descriptors such as "clear", "moderate", "needs to improve" and by giving oral feedback or through written notes for observation and monitoring sessions.
- 3) **Evaluating the use of the target vocabulary: Objective:** To select and use the target vocabulary accurately, meaningfully, and communicatively in context. **Indicators:** Accurate word choice, accurate and appropriate use of words, integration of vocabulary in speaking and writing tasks accurately and appropriately in context. **Frequency:** During or after observation and monitoring on a regular basis, every two months. **Evaluation/Assessment tools:** A checklist, a rating scale, and/or rubrics. **Evaluation/Assessment focus:** Evaluation is based on the performance in using the target vocabulary in collaborative and communicative activities such as role play, dialogues, show and tell presentations or individual activities such as talking about and/or writing words, phrases, and sentences taking part in vocabulary jigsaws etc.
- 4) **Evaluating vocabulary recording: Objective:** To create personalised paper or digital dictionaries with word-related information, including very short definitions, pictures and example sentences about the target vocabulary in context. **Indicators:** Regular entries with accurate spelling, meaningful explanations, and suitable pictures in relevance to the target content, organisation, meaningful content, continuity and order. **Frequency:** Every two months on a regular basis. **Evaluation/Assessment tools:** Oral and/or written feedback and a rubric scheme given to students in advance. **Evaluation/Assessment focus:** Evaluation is based on the categories such as accuracy, creativity, effort, completeness and organisation of the entries/submissions.
- 5) **Evaluating the use of target grammar: Objective:** Automatic selection and authentic, meaningful, and accurate use of the target language chunks in context. **Indicators:** Accurate and meaningful sentence structures in speaking and writing tasks, accurate and meaningful use of language chunks in communicative activities. **Frequency:** During and after observation and monitoring on a regular basis. **Evaluation/Assessment tools:** A checklist, rating scale, and/or rubrics. **Evaluation/Assessment focus:** Evaluation is based on categories and criteria created in evaluation tools as in the following examples: An example of a checklist could be as follows: a) Sentences are complete: YES /NO. b) Word order is logical and clear: Yes/No etc. An example of a rating scale with a 1-5 Likert scale could be as follows: (1) Errors interfere with meaning (2) Frequent errors, meaning is unclear (3) Errors are noticeable but do not interfere with meaning, (4) Minor errors, meaning is clear (5) Almost no errors. (An example language chunk (grammar) rubric table might include the following criteria and scores: 5 criteria could be used: accuracy, variety, consistency, structural control, appropriateness in the rubrics. They can be scored on 4 levels: (1) poor, (2) needs improvement, (3) good, (4) excellent. For instance, there may be items such as (1) inconsistent use of target language chunks (grammar), (2) inconsistencies distract from clarity, (3) few inconsistencies in the use of the target language chunks (grammar) use, (4) using of target language chunks (grammar) is consistent throughout the task).
- 6) **Evaluating reading and comprehension skills: Objective:** To read efficiently for comprehension by using various strategies such as reading aloud, speed reading, and silent reading. **Indicators:** Accurate understanding of texts and context, successful participation in various reading activities, responses to closed (display), semi-closed and open-ended questions in comprehension activities, increasing performance in comprehension, recognition, and awareness skills. **Frequency:** At least once in a month, on a regular basis. **Evaluation/Assessment tools:** An observation checklist and/or monitoring grids, a rating scale, and/or rubrics, closed, semi-closed and open-ended/communicative asking-answering

exercises and activities on comprehension, recognition, and awareness. **Evaluation/Assessment focus:** Evaluation will be based on reading fluency, effective comprehension, ability/capability to infer meaning from the text, to be able to deduce ideas from the text.

- 7) **Evaluating speaking skills: Objective:** To talk or give very short oral presentations and perform show and tell sessions on the current content by using meaningful and appropriate language in context. **Indicators:** Effective use of relevant and appropriate target vocabulary, pronunciation and target grammar; fluency; clear organisation; rapport with the audience and delivery. **Frequency:** During observation of speaking sessions. **Evaluation/Assessment tools:** Rubrics, a rating scale, and/or a checklist for observation and monitoring. **Evaluation/Assessment focus:** Evaluation will be based on fluency, coherence, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, audience engagement and successful participation in communication by encoding and decoding the messages accurately and meaningfully.
- 8) **Evaluating participation and engagement in dialogues: Objectives:** To take turns in dialogues meaningfully and efficiently by using relevant and appropriate target vocabulary and target language chunks (grammar) in context. **Indicators:** Proper and accurate use of language with target vocabulary and language chunks in context, effective turn-taking, engagement and participation in teacher-student and student-peer dialogues, correct and meaningful responses, clear explanations, engaging in effective and meaningful communication, **Frequency:** Regularly, during classroom activities. **Evaluation/Assessment tools:** An observation checklist and/or rubrics for observation and monitoring. **Evaluation focus:** Evaluation is based on observed and monitored pair-work interactions, collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context and successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.
- 9) **Evaluating participation and engagement in group work: Objective:** To collaborate and participate in group work activities meaningfully and efficiently by using relevant and appropriate target vocabulary, pronunciation, and language chunks in context. **Indicators:** Effective performance of roles, participation, contribution to group outcomes, efficient and effectively and meaningfully. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/Assessment tools:** An observation checklist, a rating scale, and/or rubrics. **Evaluation/Assessment focus:** Evaluation is based on collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, and successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.
- 10) **Evaluating participation and engagement in drama work and games: Objectives:** To present, engage in and participate in drama activities such as pantomime stories, role plays, plays and presentations by using effective and meaningful language with target vocabulary and/or the target language chunks through acting. **Indicators:** Engagement, creativity, rapport with the audience, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/Assessment tools:** Rubrics, a rating scale, and/or a checklist. **Evaluation/Assessment focus:** Evaluation is based on collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, presentation skills, successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.
- 11) **Evaluating self-productions: Objective:** To prepare and produce personal products such as paper/digital diaries/journals, voice recordings, visual recording, projects, portfolios, short films, documentaries, scenarios, blogs, vlogs and so on related to the target theme including the use of target vocabulary, pronunciation, and language chunks at school and at home, and to present them to the class at school. **Indicators:** Content relevance, meaningful and accurate use of language with target vocabulary, pronunciation, and language chunks in context, accurate, efficient and effective use of supplementary materials. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/**

Assessment tools: Rubrics, a rating scale, a written feedback report and/ or a checklist. **Evaluation/Assessment focus:** Evaluation is based on material preparation skills, creativity, organisation, content relevance, coherence, presentation skills, effort, originality, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks, and effective communication process.

- 12) **Evaluating writing skills: Objective:** To produce written tasks by developing portfolios including phrases, sentences, short texts, notes, paragraphs, simple fact files, emails, messages, plans, timetables, projects, reflective diaries/journals, posters, etc., by using target vocabulary and language chunks meaningfully and accurately. **Indicators:** Engagement, creativity, coherence, content relevancy, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, effective presentation skills. **Frequency:** Every two weeks. **Evaluation/Assessment tools:** Rubrics or a marking scheme. **Evaluation/Assessment focus:** Evaluation will be based on organisation, creativity, originality, effort, content relevance, accurate and meaningful use of language with target vocabulary and language chunks, and presentation skills.

Assessment and Evaluation Scheme for Years 5 and 6

Alternative assessment and evaluation techniques and activities **for lower secondary lessons (Years 5 and 6)** are given below. There are different assessment and evaluation applications for each language skill. Teachers do not have to use all of the items in every lesson. They can be selected and used according to the needs and flow of the lesson.

- 1) **Evaluating listening/watching and comprehension: Objective:** To listen/watch efficiently for comprehension to be able to engage in spoken language from people or technology-based digital audio-visual materials to be able to respond appropriately and meaningfully by using various strategies and techniques such as listening for/and imitating, repeating, saying, matching, underlining, circling, doing, listening for gist, for scanning, for answering, for asking, for conversing and so on. **Indicators:** Accurate understanding of the spoken content, responses to closed, semi-closed or open ended-questions in comprehension activities, successful participation and turn-taking in various listening activities. **Frequency:** At least once in a month, on a regular basis. **Evaluation tools:** An observation checklist and/ or observation grids for monthly monitoring sessions. **Evaluation/Assessment Focus:** Evaluation is based on effective comprehension, inference skills, understanding of the main idea, attention to details, general interpretation skills and successful engagement in communication by encoding and decoding the messages in collaborative environments accurately and meaningfully.
- 2) **Evaluating the use of pronunciation: Objective:** To pronounce the target sounds, words, and phrases accurately and appropriately in context. **Indicators:** Clarity in articulation of target sounds, and phrases, appropriate and correct intonation and stress patterns and improvement in pronunciation over time. **Frequency:** Regularly, once in a month. **Evaluation tools:** An observation checklist and/or observation grids for monthly monitoring sessions. **Evaluation/Assessment Focus:** Evaluation is based on accurate pronunciation of words, phrases and sentences, accurate use of intonation and stress patterns when speaking to/with others in the communication process, by using a checklist with descriptors such as "clear", "moderate", "needs to improve" and by giving oral feedback or through written notes for observation and monitoring sessions.
- 3) **Evaluating the use of the target vocabulary: Objective:** To select and use the target vocabulary accurately, meaningfully, and communicatively in context. **Indicators:** Accurate word choice, accurate and appropriate use of words, integration of vocabulary in speaking and writing tasks accurately and appropriately in context. **Frequency:** During or after observation and monitoring on a regular basis, every two months. **Evaluation/Assessment tools:** A checklist, a rating scale, and/or rubrics. **Evaluation/Assessment Focus:** Evaluation is based on the performance in using the target vocabulary in collaborative and communicative activities such as role play, dialogues, show and tell presentations or individual activities such as talking about and/or writing words, phrases, and sentences taking part in vocabulary jigsaws etc.

- 4) **Evaluating vocabulary recording: Objective:** To create personalised paper or digital dictionaries with word-related information, including words, short definitions, pictures and example sentences about the target vocabulary in context. **Indicators:** Regular entries with accurate spelling, meaningful explanations, and suitable pictures in relevance to the target content, organisation, meaningful content, continuity and order. **Frequency:** Every two months on a regular basis. **Evaluation/Assessment tools:** Oral and/or written feedback and a rubric scheme given to students in advance. **Evaluation/Assessment Focus:** Evaluation is based on the categories such as accuracy, creativity, effort, completeness and organisation of the entries/submissions.
- 5) **Evaluating the use of target grammar: Objective:** Automatic selection and authentic, meaningful, and accurate use of the target language chunks through recognition in context. **Indicators:** Accurate and meaningful sentence structures in speaking and writing tasks, accurate and meaningful use of language chunks in communicative activities. **Frequency:** During and after observation and monitoring on a regular basis. **Evaluation/Assessment tools:** A checklist, rating scale, and/or rubrics. **Evaluation/Assessment Focus:** Evaluation is based on categories and criteria created in evaluation tools as in the following examples: An example of a checklist could be as follows: a) Sentences are complete: YES / NO. b) Word order is logical and clear: Yes/No etc. An example of a rating scale with a 1-5 Likert scale could be as follows: (1) Errors interfere with meaning (2) Frequent errors, meaning is unclear (3) Errors are noticeable but do not interfere with meaning, (4) Minor errors, meaning is clear (5) Almost no errors). (An example language chunk (grammar) rubric table might include the following criteria and scores: 5 criteria could be used: accuracy, variety, consistency, structural control, appropriateness in the rubrics. They can be scored on 4 levels: (1) poor, (2) needs improvement, (3) good, (4) excellent. For instance, there may be items such as (1) inconsistent use of target language chunks (grammar), (2) inconsistencies distract from clarity, (3) few inconsistencies in the use of the target language chunks (grammar) use, (4) using of target language chunks (grammar) is consistent throughout the task).
- 6) **Evaluating reading and comprehension skills: Objective:** To read efficiently for comprehension by using various strategies such as reading aloud, speed reading, silent reading, and jigsaw reading. **Indicators:** Accurate understanding of texts and context, successful participation in various reading activities, responses to closed (display), semi-closed and open-ended questions in comprehension activities, increasing performance in comprehension, recognition, and awareness skills. **Frequency:** At least once in a month, on a regular basis. **Evaluation/Assessment tools:** An observation checklist and/monitoring grids, a rating scale, and/or rubrics, closed, semi-closed and open-ended/communicative asking-answering exercises and activities on comprehension, recognition, and awareness. **Evaluation/Assessment Focus:** Evaluation will be based on reading fluency, effective comprehension, ability/capability to infer meaning from the text, to be able to deduce ideas from the text.
- 7) **Evaluating speaking skills: Objective:** To talk or give short oral presentations and perform show and tell sessions on the current content by using meaningful and appropriate language in context. **Indicators:** Effective use of relevant and appropriate target vocabulary, pronunciation and target grammar; fluency; clear organisation; rapport with the audience and delivery. **Frequency:** During observation of speaking sessions. **Evaluation/Assessment tools:** Rubrics, a rating scale, and/or a checklist for observation and monitoring. **Evaluation/Assessment Focus:** Evaluation will be based on fluency, coherence, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, audience engagement and successful participation in communication by encoding and decoding the messages accurately and meaningfully.
- 8) **Evaluating participation and engagement in dialogues: Objectives:** To take turns in dialogues meaningfully and efficiently by using relevant and appropriate target vocabulary and target language chunks (grammar) in context. **Indicators:** Proper and accurate use of language with target vocabulary and language chunks in context, effective turn-taking, engagement and participation in teacher-student and student-peer dialogues, correct and meaningful responses, clear explanations, engaging in effective and meaningful communication, **Frequency:** Regularly, during classroom activities.

Evaluation/Assessment tools: An observation checklist and/or rubrics for observation and monitoring.
Evaluation Focus: Evaluation is based on observed and monitored pair-work interactions, collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context and successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.

- 9) **Evaluating participation and engagement in group work:** **Objective:** To collaborate and participate in group work activities meaningfully and efficiently by using relevant and appropriate target vocabulary, pronunciation, and language chunks in context. **Indicators:** Effective performance of roles, participation, contribution to group outcomes, efficient and effectively and meaningfully. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/Assessment tools:** An observation checklist, a rating scale, and/or rubrics. **Evaluation/Assessment Focus:** Evaluation is based on collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, and successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.
- 10) **Evaluating participation and engagement in drama work:** **Objectives:** To present, engage in and participate in drama activities such as pantomime stories, role plays, plays and presentations by using effective and meaningful language with target vocabulary and/or the target language chunks through acting. **Indicators:** Engagement, creativity, rapport with the audience, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/Assessment tools:** Rubrics, a rating scale, and/ or a checklist. **Evaluation/Assessment Focus:** Evaluation is based on collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, presentation skills, successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.
- 11) **Evaluating self-productions:** **Objective:** To prepare and produce personal products such as posters, digital e-books, cartoons, audio recordings, paper/digital diaries/journals, voice recordings, visual recording, projects, portfolios, short films, documentaries, scenarios, blogs, vlogs and so on related to the target theme including the use of target vocabulary, pronunciation, and language chunks at school and at home, and to present them to the class at school. **Indicators:** Content relevance, meaningful and accurate use of language with target vocabulary, pronunciation, and language chunks in context, accurate, efficient and effective use of supplementary materials. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/Assessment tools:** Rubrics, a rating scale, a written feedback report and/ or a checklist. **Evaluation/Assessment Focus:** Evaluation is based on material preparation skills, creativity, organisation, content relevance, coherence, presentation skills, effort, originality, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks, and effective communication process.
- 12) **Evaluating writing skills:** **Objective:** To produce written tasks by developing portfolios including phrases, sentences, short texts, notes, paragraphs, simple fact files, emails, messages, plans, timetables, projects, reflective diaries/journals, poems, acrostics, posters, etc., by using target vocabulary and language chunks meaningfully and accurately. **Indicators:** Engagement, creativity, coherence, content relevancy, accurate and meaningful use of language with target vocabulary, pronunciation, and language chunks in context, effective presentation skills. **Frequency:** Every two weeks. **Evaluation/Assessment tools:** Rubrics or a marking scheme. **Evaluation/Assessment Focus:** Evaluation will be based on organisation, creativity, originality, effort, content relevance, accurate and meaningful use of language with target vocabulary and language chunks, and presentation skills.

Assessment and Evaluation Scheme for Years 7 and 8

Alternative assessment and evaluation techniques and activities **for lower secondary lessons (Years 7 and 8)** are given below. There are different assessment and evaluation applications for each language skill. Teachers do not have to use all of the items in every lesson. They can be selected and used according to the needs and flow of the lesson.

- 1) **Evaluating listening/watching and comprehension: Objective:** To listen/watch efficiently for comprehension to be able to engage in spoken language from people or technology-based digital audio-visual materials to develop critical thinking skills by using various strategies and techniques such as listening for gist, listening for scanning, dictation, listening and note taking, collaborative discussions and so on. **Indicators:** Accurate understanding of the spoken content, responses to closed, semi-closed or open-ended questions in comprehension activities, successful participation and turn taking in various listening activities. **Frequency:** At least once in a month, on a regular basis. **Evaluation tools:** An observation checklist and/or observation grids for monthly monitoring sessions. **Evaluation/Assessment focus:** Evaluation is based on effective comprehension, inference skills, understanding of the main idea, attention to details, interpretation skills and successful engagement in communication by encoding and decoding the messages accurately and meaningfully.
- 2) **Evaluating the use of pronunciation: Objective:** To pronounce the target sounds, words, and phrases accurately and appropriately in context. **Indicators:** Clarity in articulation of target sounds, and phrases, appropriate and correct intonation and stress patterns and improvement in pronunciation over time. **Frequency:** Regularly, once in a month. **Evaluation tools:** An observation checklist and/or observation grids for monthly monitoring sessions. **Evaluation/Assessment focus:** Evaluation is based on accurate pronunciation of words, phrases and sentences, accurate use of intonation and stress patterns when speaking to/with others in the communication process, by using a checklist with descriptors such as "clear", "moderate", "needs to improve" and by giving oral feedback or through written notes for observation and monitoring sessions.
- 3) **Evaluating the use of the target vocabulary: Objective:** To select and use the target vocabulary accurately, meaningfully, and communicatively in context. **Indicators:** Accurate word choice, accurate and appropriate use of word types such as antonyms, synonyms, and word forms, integration of vocabulary in speaking and writing tasks accurately and appropriately in context. **Frequency:** During or after observation and monitoring on a regular basis, every two months. **Evaluation/Assessment tools:** A checklist, a rating scale, and/or rubrics. **Evaluation/Assessment focus:** Evaluation is based on the performance in using the target vocabulary in collaborative and communicative activities such as role play, dialogues, discussions, debates, presentations or individual activities such as writing paragraphs, stories, poems, summaries, fact files and taking part in vocabulary jigsaws, etc.
- 4) **Evaluating vocabulary recording: Objective:** To create personalised paper or digital dictionaries with word-related information, including definitions, antonyms, synonyms, word structure, etc. about the target vocabulary in context. **Indicators:** Regular entries with accurate definitions, antonyms, synonyms, relevance to the target content, organisation, meaningful content, continuity and order. **Frequency:** Every two months on a regular basis. **Evaluation/Assessment tools:** Oral and/or written feedback and a rubric scheme given to students in advance. **Evaluation/Assessment focus:** Evaluation is based on the categories such as accuracy, creativity, effort, completeness and organisation of the entries/submissions.
- 5) **Evaluating the use of target grammar: Objective:** Selecting and using the target grammar accurately and meaningfully in context. **Indicators:** Accurate and meaningful sentence structures in speaking and writing tasks, accurate and meaningful use of grammar in communicative activities. **Frequency:** During and after observation and monitoring on a regular basis. **Evaluation/Assessment tools:** A checklist, rating scale, and/or rubrics. **Evaluation/Assessment focus:** Evaluation is based on categories and criteria created in evaluation tools as in the following examples: An example of a checklist could be as follows: a) Sentences are complete: YES /NO. b) Word order is logical and clear: Yes/No etc. An example of a rating

scale with a 1-5 Likert scale could be as follows: (1) Errors interfere with meaning (2) Frequent errors, meaning is unclear (3) Errors are noticeable but do not interfere with meaning, (4) Minor errors, meaning is clear (5) Almost no errors). (An example grammar rubric table might include the following criteria and scores: 5 criteria could be used: accuracy, variety, consistency, structural control, appropriateness in the rubrics. They can be scored on 4 levels: (1) poor, (2) needs improvement, (3) good, (4) excellent. For instance, there may be items such as (1) inconsistent use of grammar, (2) inconsistencies distract from clarity, (3) few inconsistencies in grammar use, (4) grammar is consistent throughout the task).

- 6) **Evaluating reading and comprehension skills: Objective:** To read efficiently for comprehension by using various strategies such as reading aloud, speed reading, silent reading, and jigsaw reading. **Indicators:** Accurate understanding of texts and context, successful participation in various reading activities, responses to closed (display), semi-closed and open-ended questions in comprehension activities, increasing performance in paraphrasing, summarising, interpreting, deducing and critical thinking skills. **Frequency:** At least once in a month, on a regular basis. **Evaluation/Assessment tools:** An observation checklist and/monitoring grids, a rating scale, and/or rubrics, closed, semi-closed and open-ended/communicative asking-answering exercises and activities, paraphrasing, summarising and deducing sessions. **Evaluation/Assessment focus:** Evaluation will be based on reading fluency, effective comprehension, ability/capability to infer meaning from the text, to interpret text, and to generate critical thinking from the text.
- 7) **Evaluating speaking skills: Objective:** To talk or give oral presentations on the current content by using meaningful and appropriate language in context. **Indicators:** Effective use of relevant and appropriate target vocabulary, pronunciation and target grammar; fluency; clear organisation; rapport with the audience and delivery. **Frequency:** During observation of presentation sessions. **Evaluation/Assessment tools:** Rubrics, a rating scale, and/or a checklist for observation and monitoring. **Evaluation/Assessment focus:** Evaluation will be based on fluency, coherence, accurate and meaningful use of language with target vocabulary, pronunciation, and grammar in context, audience engagement and successful participation in communication by encoding and decoding the messages accurately and meaningfully.
- 8) **Evaluating participation and engagement in dialogues: Objectives:** To take turns in dialogues meaningfully and efficiently by using relevant and appropriate target vocabulary and grammar in context. **Indicators:** Proper and accurate use of language with target vocabulary and grammar in context, effective turn-taking, engagement and participation in teacher-student and student-peer dialogues, correct and meaningful responses, clear explanations, engaging in effective and meaningful communication. **Frequency:** Regularly, during classroom activities. **Evaluation/Assessment tools:** An observation checklist and/or rubrics for observation and monitoring. **Evaluation/Assessment focus:** Evaluation is based on observed and monitored pair work interactions, collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and grammar in context and successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.
- 9) **Evaluating participation and engagement in group work: Objective:** To collaborate and participate group work activities meaningfully and efficiently by using relevant and appropriate target vocabulary, pronunciation, and grammar in context. **Indicators:** Effective performance of roles, participation, contribution to group outcomes, efficient and effectively and meaningfully. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/Assessment tools:** An observation checklist, a rating scale, and/or rubrics. **Evaluation/Assessment focus:** Evaluation is based on collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and grammar in context, and successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.
- 10) **Evaluating participation and engagement in drama work: Objectives:** To present, engage in and participate in drama activities such as pantomime stories, role plays, plays and presentations by using effective and meaningful language with target vocabulary and/or the target grammar through acting.

Indicators: Engagement, creativity, rapport with the audience, accurate and meaningful use of language with target vocabulary, pronunciation, and grammar in context. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/Assessment tools:** Rubrics, a rating scale, and/ or a checklist. **Evaluation/Assessment focus:** Evaluation is based on collaboration, content relevance, accurate and meaningful use of language with target vocabulary, pronunciation, and grammar in context, presentation skills, successful engagement in communication process by encoding and decoding the messages accurately and meaningfully.

- 11) **Evaluating self-productions: Objective:** To prepare and produce personal products such as digital diaries/ journals, voice recordings, visual recording, projects, portfolios, short films, documentaries, scenarios, blogs, vlogs and so on related to the target theme including the use of target vocabulary, pronunciation, and grammar at school and at home, and to present them to the class at school. **Indicators:** Content relevance, meaningful and accurate use of language with target vocabulary, pronunciation, and grammar in context, accurate, efficient and effective use of supplementary materials. **Frequency:** Monthly during and after observation and monitoring sessions. **Evaluation/ Assessment tools:** Rubrics, a rating scale, a written feedback report and/ or a checklist. **Evaluation/Assessment focus:** Evaluation is based on material preparation skills, creativity, organisation, content relevance, coherence, presentation skills, effort, originality, accurate and meaningful use of language with target vocabulary, pronunciation, and grammar, and effective communication process.
- 12) **Evaluating writing skills: Objective:** To produce written tasks by developing portfolios including sentences, short texts, notes, paragraphs, essays, letters, reviews, response papers, fact files, emails, messages, plans, programmes, timetables, projects, reflective diaries/journals, posters, etc., by using target vocabulary and grammar meaningfully and accurately. **Indicators:** Engagement, creativity, coherence, content relevancy, accurate and meaningful use of language with target vocabulary, pronunciation, and grammar in context, effective presentation skills. **Frequency:** Every two weeks. **Evaluation/Assessment tools:** Rubrics or a marking scheme. **Evaluation/Assessment focus:** Evaluation will be based on organisation, creativity, originality, effort, content relevance, accurate and meaningful use of language with target vocabulary and grammar, and presentation skills.

1.3. THE ENGLISH LANGUAGE CURRICULUM: THEMES, LEARNING OUTCOMES, AND TIMETABLES

THE ENGLISH LANGUAGE CURRICULUM FOR PRIMARY EDUCATION

YEAR 2 (LEVEL: A1.1)

Basic Themes	Sub-themes	Number of Learning Outcomes	Time	
			Class Hours	Percentages (%)
1. SCHOOL LIFE	- Greetings and introductions at school - People and places at school - Days of the week - National and religious days and celebrations	23	11	15.28
2. CLASSROOM LIFE	- Classroom instructions and language - Classroom furniture, devices, and objects - Colours	23	11	15.28
3. PERSONAL LIFE	- Parts of the body and physical features - Clothes - Days of the week, ages, and birthdays - Weather conditions	23	11	15.28
4. FAMILY LIFE	- Family members and family members' physical appearances and physical features	23	11	15.28
5. HOMES & HOUSES & NEIGHBOURHOODS	- Parts, rooms, and furniture in the house - Pets in the house	23	11	15.28
6. LIFE IN THE CITY & THE WORLD	- Basic food types, items, and meals	23	11	15.28
ORIENTATION		-	2	2.78
REVISION PROGRAMME		-	-	-
EVALUATION AND ASSESSMENT		-	-	-
SCHOOL-BASED PLANNING*		-	4	5.56
TOTAL		138	72	100

YEAR 3 (LEVEL: A1.2)

Basic Themes	Sub-themes	Number of Learning Outcomes	Time	
			Class Hours	Percentages (%)
1. SCHOOL LIFE	- Greetings and introductions at school: People and places at school - Months of the year - Ages and birthday celebrations - National days and celebrations	23	10	13.89
2. CLASSROOM LIFE	- Classroom instructions and language - Classroom furniture, objects, and devices - School subjects - Seasons of the year	23	10	13.89
3. PERSONAL LIFE	- Parts of the body and physical features - Personal characters - Weather conditions - Clothing according to seasons and weather conditions - Preferences for clothing	23	10	13.89
4. FAMILY LIFE	- Family members - Ages of family members - Daily routines and chores of family members - Hobbies and abilities of family members	23	10	13.89
5. HOMES & HOUSES & NEIGHBOURHOODS	- Life in the countryside - Farmhouses and farm animals - Activities and chores on a farm	23	10	13.89
6. LIFE IN THE CITY & THE WORLD	- Food items and meals - Eating outside and ordering food	23	10	
ORIENTATION		-	4	5.56
REVISION PROGRAMME		-	4	5.56
EVALUATION AND ASSESSMENT		-	-	-
SCHOOL-BASED PLANNING*		-	4	5.56
TOTAL		138	72	100

YEAR 4 (LEVEL: A1.3)

Basic Themes	Sub-themes	Number of Learning Outcomes	Time	
			Class Hours	Percentages (%)
1. SCHOOL LIFE	- People at school - Daily routines and activities at school - Activities at present and favourite activities - Favourite months - National days and celebrations	23	10	13.89
2. CLASSROOM LIFE	- School subjects and classroom activities - Favourite school subjects and classroom activities now and in the past - Time, seasons of the year, favourite seasons	23	10	13.89
3. PERSONAL LIFE	- Physical appearances and personality - Clothing and clothing preferences - Hobbies and abilities now and in the past - Weather - Comparisons	23	10	13.89
4. FAMILY LIFE	- Family members' jobs - Family members' long-lasting habits - Family members' errands (now and in the past) - Places for services in the neighbourhood - Comparisons	23	10	13.89
5. HOMES & HOUSES & THE NEIGHBOURHOOD	- Life on the seaside - Sea/marine animals and their habitats - Activities of sea/marine animals - Dangers for sea/marine animals - Types of houses by the water	23	10	13.89
6. LIFE IN THE CITY & THE WORLD	- Healthy and unhealthy food - National and international dishes - Countries - Holidays	23	10	13.89
ORIENTATION		-	4	5.56
REVISION PROGRAMME		-	4	5.56
EVALUATION AND ASSESSMENT		-	-	-
SCHOOL-BASED PLANNING*		-	4	5.56
TOTAL		138	72	100

- This is the amount of time for the studies (out-of-school learning activities, research and observation, social activities, project studies, local studies, reading studies, etc.) decided to be carried out within the scope of the course by the English Language Departments. The time allocated for these studies is planned during the academic year and displayed in yearly plans. Within the scope of school-based planning, the lesson hours determined at the relevant class level are used to guide students to be able to do plans and carry out studies to contribute to their academic and personal development.

THE ENGLISH LANGUAGE CURRICULUM FOR LOWER SECONDARY EDUCATION

YEAR 5 (LEVEL: A2.1)

Basic Themes	Sub-themes	Number of Learning Outcomes	Time	
			Class Hours	Percentages (%)
1. SCHOOL LIFE	- People, places, and rules at school - School clubs - Countries - National days and celebrations	23	10	9.26
2. CLASSROOM LIFE	- Classroom rules and language - School subjects - Timetables - Classroom objects - Days of the week - Time	23	10	9.26
3. PERSONAL LIFE	- Basic body parts and physical features - Clothes - Daily routines and activities	23	10	9.26
4. FAMILY LIFE	- Family members' routines - Family members' hobbies and activities	23	10	9.26
5. LIFE IN THE NEIGHBOURHOOD & CITY	- Places for recreation and attractions in the neighbourhood and city - Different types of houses	23	10	9.26
6. LIFE IN THE WORLD	- Basic food types - Ordering in a restaurant - Food events in the city	23	10	9.26
7. LIFE IN NATURE	- Types of animals in nature - Wild animals in nature - Their habitats	23	10	9.26
8. LIFE IN THE UNIVERSE & FUTURE	- Planet Earth - Holidays - School holidays, places, activities, and plans for holidays	23	10	9.26
ORIENTATION		-	4	3.70
REVISION PROGRAMME		-	4	11.11
EVALUATION AND ASSESSMENT		-	6	5.56
SCHOOL-BASED PLANNING*		-	6	5.56
TOTAL		138	108	100

YEAR 6 (LEVEL: A2.2)

Basic Themes	Sub-themes	Number of Learning Outcomes	Time	
			Class Hours	Percentages (%)
1. SCHOOL LIFE	- Roles and responsibilities at school - School routines - National days and celebrations	23	10	9.26
2. CLASSROOM LIFE	- Daily and study routines - Learning activities in the classroom - Cardinal numbers 100-500 - Ordinal numbers 1-50	23	10	9.26
3. PERSONAL LIFE	- Body parts, physical appearance and clothes - Personality and character	23	10	9.26
4. FAMILY LIFE	- Family members' jobs, working places, and job routines - Different types of family homes and houses	23	10	9.26
5. LIFE IN THE NEIGHBOURHOOD & CITY	- Festivals and events in the neighbourhood and city - Transportation in the neighbourhood and the city	23	10	9.26
6. LIFE IN THE WORLD & CULTURE	- Countries, nationalities, and languages in the world, food types and events from different parts of the world	23	10	9.26
7. LIFE IN NATURE & GLOBAL PROBLEMS	- Activities in nature - Environmental problems in the world and solutions	23	10	9.26
8. LIFE IN THE UNIVERSE & FUTURE	- Planets and the Earth as a planet - Life on Earth in the future	23	10	9.26
ORIENTATION		-	4	3.70
REVISION PROGRAMME		-	12	11.11
EVALUATION AND ASSESSMENT		-	6	5.56
SCHOOL-BASED PLANNING*		-	6	5.56
TOTAL		184	108	100

YEAR 7 (LEVEL: A2.3)

Basic Themes	Sub-themes	Number of Learning Outcomes	Time	
			Class Hours	Percentages (%)
1. SCHOOL LIFE & EDUCATION	- Extra-curricular activities at school - Competitions and celebrations at school - National days and celebrations	24	14	9.72
2. CLASSROOM LIFE & LEARNING	- Technological tools for learning - Learning activities in the classroom - Cardinal numbers (500-1000) - Ordinal numbers 50-100	24	14	9.72
3. PERSONAL LIFE & WELL-BEING	- Body parts, illnesses, and keeping good health - The place of technology in people's lives	24	14	9.72
4. FAMILY LIFE & HOME	- Family members' hobbies (sports, books, films, music, cooking) - Generation gap in the family: problems and solutions	24	14	9.72
5. LIFE IN THE NEIGHBOURHOOD & CITY AND SOCIAL LIFE	- Public services in the neighbourhood and city - Life in different kinds of cities	24	14	9.72
6. LIFE IN THE WORLD & CULTURE	- Capitals, landmarks, famous places, and activities in capitals - Sports events in different parts of the world	24	14	9.72
7. LIFE IN NATURE	- Animals and natural resources in nature - Protecting animals and nature	24	14	9.72
8. LIFE IN THE UNIVERSE & FUTURE	- Space technology - Life in the future with robots	24	14	9.72
ORIENTATION		-	4	2.78
REVISION PROGRAMME		-	16	11.11
EVALUATION AND ASSESSMENT		-	6	4.17
SCHOOL-BASED PLANNING*		-	6	4.17
TOTAL		192	144	100

YEAR 8 (LEVEL: A2.4)

Basic Themes	Sub-themes	Number of Learning Outcomes	Time	
			Class Hours	Percentages (%)
1. SCHOOL LIFE & EDUCATION	- School events and celebrations (sports, music, drama) - Developing the environment - National days and celebrations	24	14	9.72
2. CLASSROOM LIFE & LEARNING	- Preferences for different learning activities - Preferences for different learning technologies	24	14	9.72
3. PERSONAL LIFE & WELL-BEING	- Mobile phones and their impact on health and social life - Personal preferences for films and visual arts	24	14	9.72
4. FAMILY LIFE & HOME	- Relationships, problems, and solutions in the family - Different houses and living styles	24	14	9.72
5. LIFE IN THE NEIGHBOURHOOD & CITY & SOCIAL LIFE	- Sports events in the city and rural areas - Pros and cons of living in rural areas and in the city	24	14	9.72
6. LIFE IN THE WORLD AND CULTURE	- Different cooking styles and preferences in the world - Different food cultures in the world	24	14	9.72
7. LIFE IN NATURE & GLOBAL PROBLEMS	- Natural disasters and their damage on animals and nature - Natural disasters and their damage on people's lives	24	14	9.72
8. LIFE IN THE UNIVERSE & FUTURE	- Transport in the future - Self-driving cars - Flying vehicles in the future	24	14	9.72
ORIENTATION		-	4	2.78
REVISION PROGRAMME		-	16	11.11
EVALUATION AND ASSESSMENT		-	6	4.17
SCHOOL-BASED PLANNING*		-	6	4.17
TOTAL		192	144	100

- The time allocated for the studies (out-of-school learning activities, research and observation, social activities, project studies, local studies, reading studies, etc.) decided to be carried out within the scope of the course by the English Language Departments. The time allocated for studies is planned during the academic year and displayed in yearly plans. Within the scope of school-based planning, the lesson hours determined **at all levels of English Language Programme for Lower Secondary Education** are used to guide students to be able to do plans and carry out studies to contribute to their academic and personal development.

1.4. ENGLISH COURSEBOOKS FOR PRIMARY EDUCATION/SCHOOLS- FORM NUMBERS AND BOOK SIZES

COURSEBOOKS	PAGE NUMBERS FOR EACH THEME	FORM NUMBERS *	BOOK SIZES
COURSEBOOK ENGLISH-YEARS 2-3-4	16 X 6	10-14	19,5 cm X 27,5 cm
WORKBOOK ENGLISH-YEARS 2-3-4	8 X 6	3-7	19,5 cm X 27,5 cm
TEACHER'S BOOK ENGLISH-YEARS 2-3-4	16 X 6	10-14	19,5 cm X 27,5 cm

- The number of forms here indicates the minimum and maximum limits but they can be changed.

1.5. ENGLISH COURSEBOOKS FOR LOWER SECONDARY EDUCATION/SCHOOLS- FORM NUMBERS AND BOOK SIZES

COURSEBOOKS	PAGE NUMBERS FOR EACH THEME	FORM NUMBERS *	BOOK SIZES
COURSEBOOK ENGLISH-YEARS 5-6-7-8	14 X 8	10-14	19,5 cm X 27,5 cm
WORKBOOK ENGLISH-YEARS 5-6-7-8	6 X 8	4-8	19,5 cm X 27,5 cm
TEACHER'S BOOK ENGLISH-YEARS 5-6-7-8	14 X 8	10-14	19,5 cm X 27,5 cm

- The number of forms here indicates the minimum and maximum limits but they can be changed.

1.6. STRUCTURE OF THE ENGLISH LANGUAGE CURRICULUM

The English Language Curriculum has a theme-based foundation and has been designed to be applied in these programmes: Primary Education, years 2-3-4; Lower Secondary Education, years 5-6-7-8; Upper Secondary Education, years 9-10-11,12; Multilingual Foreign Language Education Model, Lower Secondary Education, years 5-6-7-8; Upper Secondary Education with Preparatory Year and years 9-10-11-12. The thematic sequence of The English Language Curriculum is based on 8 main themes and each main theme is divided into at least three or two sub-themes and the content details are constructed accordingly. The structure of the themes and the explanations related to this structure are presented below in a systematic nature.

Refers to the knowledge, skills, and process components of skills that are intended to be acquired by the student at the end of learning-teaching experiences.

→ LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.2.1.L1. Pupils can

- a) Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.

CONTENT FRAME

SCHOOL LIFE:

Sub-themes: Greetings and introductions at school; places, and people at school; days of the week; national and religious days and celebrations.

Refers to the set of information covered in the learning process (boundaries of the section/topic/sub-theme).

Refers to the main generalisation, principles and key concepts of the discipline.

→ Generalisations/Principles/Key Concepts

Generalisations

This theme is based on the pupils' knowledge of the school, its parts, places, and people, and how to introduce and greet people there in English. As Year 2 Primary school pupils, they can know what a school is, what its parts and places are, and what kind of people are in it, and how to introduce and greet people in it.

Refers to the evaluation of learning outcomes and appropriate measurement and evaluation tools.

Refers to the implementation of learning-teaching experiences that are aligned with the targeted student profile and fundamental learning approaches.

→ LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on pupils' knowledge of "school life" with its components such as greetings and introductions at school; people and places at school; days of the week; national days and celebrations in their own language.

Refers to the knowledge and skills that are assumed to be brought from previous learning-teaching processes.

Refers to the evaluation of the prior knowledge and skills required to learn new information and skills and the determination of interests and needs in the learning process.

→ Pre-Evaluation Process

It is expected that the physical, cognitive, affective, and social factors are appropriate and suitable for pupils to learn about the concept of "school" and to gain the knowledge of "what a school is, what parts and places it can have, and what kind of people are in it" in English.

Refers to establishing a relationship between existing knowledge and skills and newly acquired knowledge and skills, and thus establishing a connection between newly acquired knowledge and skills and daily life experiences.

Establishing Links

Pupils recall the concepts and associations related to the topic/theme "school life" by using their pre-existing background knowledge about it (imaginatively through thinking) to make links with the present activities in the theme in English without translating anything and without speaking any Turkish.

Refers to learning-teaching experiences related to various expansion and support for students with different learning profiles.

→ DIFFERENTIATION

Expansion

Objective: To practise the concept of "school" and develop reading skills by focusing on the target vocabulary

Activity 1: Limited Reading and Writing Practice

Pupils are given a worksheet with visuals related to the concept of "school".

Refers to learning-teaching experiences that provide students who are more advanced than their peers with expanded and in-depth learning opportunities and develop their knowledge and skills.

Refers to learning-teaching experiences adapted in terms of environment, content, process and product for students who need more time and repetition in the learning process.

Supporting

Objective: To practise the concept of "school" and develop reading skills by focusing on the target vocabulary

Activity 1: Reading and Writing Practice

Pupils are given a worksheet containing visuals related to the concept of "school", with each visual having the English equivalent of the word written in dots underneath.

Refers to the evaluation by teachers themselves of the strengths and improvement needs of the teacher and the curriculum.

TEACHER REFLECTIONS

2. THE THEMES IN THE ENGLISH LANGUAGE CURRICULUM

PRIMARY-YEAR 2 (LEVEL: A1.1)

THEME 1: SCHOOL LIFE

Sub-themes: Greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations

This theme is centred on the concept of “school life” and covers the sub-themes of “greetings and introductions at school; people and places at school; days of the week; national days and celebrations”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 11

FIELD SKILLS AND SUPPORTIVE SKILLS FLFS1. Listening/Watching-Comprehension
FLFS2. Reading-Comprehension
FLFS3. Speaking-Expression
FLFS4. Writing-Expression
FLSS1. Gramming: Selection and Use
FLSS2. Vocabulary: Selection and Use
FLSS3. Pronunciation: Selection and Use

Year 2 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.2.1.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures, and context.*

ENG.2.1.L2. Pupils can bring information about the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.2.1.L3. Pupils can make meaning of/derive meaning from the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.2.1.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.2.1.P1. Pupils can select and use the target phonological elements of the current content about “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups, and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously, and effectively when communicating with others.*

ENG.2.1.R1. Pupils can get ready for the reading-comprehension process about the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences, and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.2.1.R2. Pupils can bring information about the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.2.1.R3. Pupils can make meaning of/derive meaning from the current content about “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.2.1.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.2.1.V1. Pupils can select and use the target vocabulary of the current content about “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group, and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.2.1.G1. Pupils can select and use the language including target grammatical elements of the current content about “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*

- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.2.1.W1. Pupils can get ready for the writing-expression process about the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.2.1.W2. Pupils can copy the model/example on the writing task about the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.2.1.W3. Pupils can organise and form a content for the assigned writing task on the current content “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.2.1.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “greetings and introductions at school; people and places at school; days of the week; national days and celebrations”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.2.1.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully, and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.2.1.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.2.1.S1. Pupils can get ready for speaking-expression process about the current content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” with the help of supplementary audio-visual materials.

- a) Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.2.1.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations”.

- a) Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.2.1.S3. Pupils can organise simple new verbal content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” by speaking accurately, efficiently, and authentically.

- a) Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.2.1.S4. Pupils can form a simple new verbal content on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” through reconstruction by speaking accurately, efficiently, and authentically.

- a) Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) Pupils express messages in a concrete, simple, and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.2.1.S5. Pupils can reorganise and use information about the current theme on “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*

- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.2.1.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “greetings and introductions at school; people and places at school; days of the week; national days and celebrations” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

SCHOOL LIFE:

Sub-themes: Greetings and introductions at school; places, and people at school; days of the week; national and religious days and celebrations.

Target Vocabulary in Use (with revisional vocabulary):

People in the school: A teacher, a pupil (pupil), a headmaster/headmistress (principal-AmE.), a friend, a boy, a girl, a kid.

Places in the school: A classroom, a lunch hall (lunchroom), a canteen, a library, a sports hall, a garden, a playground, a teacher's room.

***National and religious days, festivals, and celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Language Chunks ("To be-present"): What's/is it/this? It's/is a/an...

Function: Asking what things and places are.

Language Chunks ("To be-present"): Who's she/he? She's Mr Aras. He's my English teacher. This is Mr/Mrs/ Miss Hopkins. She/He is a teacher/headmaster., etc.

Where is she? She is in the garden.

Function: Introductions and telling names.

Preposition: in.

Language Chunks ("To be-present"): What's your name? I'm/ am... / My name is...

Function: Introductions, asking and telling names.

Language Chunks (Imperatives): Come here, please.

Function: Giving commands, making requests (polite or firm) and giving instructions or directions.

Language Chunks ("To be-present"): What day of the week is it? What day is it today? It's/is Monday today.

Function: Asking and answering days of the week.

Personal Pronouns: I, he, she, it, we, you, they.

Function: Referring to the speaker as the subject.

Demonstrative pronoun: This.

Function: Referring to something specific that is close to the speaker in space, time, or context.

WH-question words: What, who, where.

Function: Asking what a thing is, who a person is.

Greetings:

Good morning! Hello!, Hi!..

How are you? I'm fine, thanks! And you?

Target Social Language in Use:

Excuse me!, Sorry!, That's OK!, Sure! Goodbye!, Bye!, See you tomorrow!, Hurray!, Welcome!, Well done!,

Thank you!, Nice!, Really!, That's great!, Let's start!, Look!, Good morning everybody!, Can I sit here?, Nice to meet you!

Target Phonological Sounds in Use:

a, b

Vowel a:

a: (/ae/, /aei/, /ə/, /a:/, /ei/, /a:/, /a/, /ɔ:/, /eə/)

Consonant: b

b: (/b/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

This theme is based on the pupils' knowledge of the school, its parts, places, and people, and how to introduce and greet people there in English. As Year 2 Primary school pupils, they can know what a school is, what its parts and places are, and what kind of people are in it, and how to introduce and greet people in it. Pupils will know these and be able to express such situations in their own language but will not know how to say these things in another language if this has not yet been covered in the curriculum. The knowledge about the concept of "school" that they have in their own language would prepare them to identify the same concepts later in their foreign language, English in which they are assumed to be zero beginners.

Principles

School is presented as a place where certain parts, places, and people in it function as important components. School is an important context where initial social interactions of social communication such as greetings, salutations, and introductions are practised naturally and authentically in EFL.

Key Concepts

Greetings, introductions, people, places, greetings at school, introductions at school, people at school, places at school, days of the week, national days, celebrations and religious days.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils draw a school picture or make a cardboard model and stick the pictures of models of some places and people in it. They copy the words that go with the pictures and do a show-and-tell to introduce them to the class. This performance will be evaluated using rubrics.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on pupils' knowledge of "school life" with its components such as "greetings and introductions at school; people and places at school; days of the week; national days and celebrations" in their own language. Pupils' experience as being a pupil in a primary school is accepted as a basis for this theme. As the pupils are seven-year-old children, they can know greetings and introductions at school; people and places at school; days of the week; national days and celebrations are in their own language, Turkish.

In the classroom, a fun warm-up activity which is not related to the theme "school" can be conducted as an ice-breaking session to help learners be ready for the whole learning process in the class with positive feelings for their well-being. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that the physical, cognitive, affective, and social factors are appropriate and suitable for pupils to learn about the concept of “school” and to gain the knowledge of “what a school is, what parts and places it can have, and what kind of people are in it” in English. As they are accepted as zero-beginners, there is nothing to remind them of English, but they can be supported to have a link for this concept in their own language, Turkish, without speaking it but thinking and imagining through it yet.

Before classroom activities, a tour of the school could be carried out with the pupils to help them recall their background knowledge about the concept of “school” in their own language, Turkish in relation to school, that is, places, people, and parts of the school without mentioning any English words just to remember what a school is and what the parts/places/people of it are. They can draw pictures of what they have seen during the tour when they go back to their classrooms. The activity can be evaluated with verbal praise.

Establishing Links

Pupils recall the concepts and associations related to the current topic/theme (concept) “school life” by using their pre-existing background knowledge about it (imaginatively through thinking) to make links with the present activities in the theme in English without translating anything and without speaking any Turkish. It is only thinking about the presented visuals in their own language about the current concept. It is assumed that pupils are suitable for learning about it in English, taking into account their age, level of interest, aptitude for foreign language acquisition and learning, attitudes towards foreign language learning, and learning styles. It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the current concept and related words and language chunks in English as a foreign language. Many activities may apply to calling the background knowledge of pupils. For example, they can point correctly to a visual such as a picture, poster, cartoon etc. of the current concepts in the theme in it correctly when they are given instructions by the teacher with English, Turkish and/or with mimics and gestures. Pupils give responses by pointing out relevant so-called pictures without speaking any English and/or Turkish. Any other similar activities could be used to activate students’ background knowledge and to establish links.

In this way, connections are made between pre-existing knowledge about the current content (in their minds) in their own language and the present information about the current content through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.2.1.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “school life” in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, V14.3, V18.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of a school can also be created using Web 2.0 programmes.) They can guess the sub-concepts of school life, so they can easily understand that the current theme will be “school life” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, V14.3, V18.2, LS1, LS2, LS4, LS5, CS2.10, CS2.17**).

ENG.2.1.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “school life with greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V14.3, V19.1, V19.2, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.2.1.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about school life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for school life with greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V14.3, V18.2, V19.1, V19.2, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “school life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “school life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “school life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V14.3, V4.2, V18.2, LS1, LS2, LS5**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.2.1.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.2.1.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V14.3, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about school to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2 CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the school and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “school life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, V14.3, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.1.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are

limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually **(V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3)**. For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations" **(V3.3, V14.3, V18.2, V19.1, V19.2, LS2, LS4, LS5, CS2.8)**. At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know **(SELS1.1, V3.4, LS1, CS2.16.2)**. She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later **(D3.2, D3.6, V12.1, CS2.10, CS2.12)**.

ENG.2.1.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "school life" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus **(D2.3, SELS1, V3.4, V4.2, V14.3, V20.4, LS1, LS2, LS4, LS5, CS2.12)**.

ENG.2.1.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts **(V3.4, V7.2)**. After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1, V3.3, LS1, LS4, CS2.14)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations" **(SELS3.1, SELS3.2, V14.3, V18.2, V19.1, V19.2, LS5)**. During this process pupils work collaboratively to exchange information, thoughts, and feelings **(SELS2.2, V4.2, CS2.6)**. This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.1.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer pupils express what they

think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.2.1.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.2.1.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V14.3, V18.2, V19.1, V19.2, LS5**). Pupils circle or tick the ones that they have heard, seen, and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “school life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V19.1, V19.2, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, V14.3, V18.2, LS1, LS2, LS4, LS5**).

ENG.2.1.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “school”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “school life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “school life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “school” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “school life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “school life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard,

decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, V14.3, V18.2, LS1, LS2, LS4, LS5, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of “school life”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.1.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations” **(D3.2, V14.3, V18.2, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.2.1.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V10.3, V14.3, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils’ further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.2.1.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V14.3, V18.2, V19.1, V19.2, LS1, LS4, LS5**).

ENG.2.1.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items about “greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations” next to their drawings on the model related to school life. The teacher asks them to look at the Smart Board screen with the model related to school life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.4, V7.3, V14.3, V18.2, V19.1, V19.2, LS4, LS5**).

ENG.2.1.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “school life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, V14.3, V18.2, LS1, LS4, LS5, CS2.20**).

ENG.2.1.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.2.1.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V14.3, V15.1, V18.2, V19.1, V19.2, LS1, LS4**,

LS5, CS2.20). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.1.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.2.1.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations" (**V3.2, V4.2, V14.3, V18.2, V19.1, V19.2, LS1, LS4, LS5**).

ENG.2.1.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.2.1.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.2.1.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations" (**SELS2.2, SELS3.2, V4.2, V11.1, V14.3, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.2.1.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities (**SELS2.3, CS2.20**). Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "school life" and its components such as "greetings and introductions at school; people and places at school; days of the week; national and religious days and celebrations" (**SELS2.2, SELS3.2, V4.2, V7.2, V14.3, V18.2, LS4, LS5, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.2.1.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION**Expansion**

Objective: To practise the concept of "school" and develop reading skills by focusing on the target vocabulary

Activity 1: Limited Reading and Writing Practice

Pupils are given a worksheet with visuals related to the concept of "school". The teacher asks them to write the English equivalents of each visual underneath. The English words corresponding to the visuals are not provided; pupils are required to write them from memory. They say the words aloud as a whole class after finishing the writing session. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Interactive Vocabulary Games

The teacher prepares an anagram game related to the school theme using a Web2.0 tool. The letters of the English word corresponding to the visual are given in a scrambled form beneath the picture. Pupils are asked to arrange the letters correctly. They say the words after they finish unscrambling. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To practise the concept of “school” and develop reading skills by focusing on the target vocabulary

Activity 1: Reading and Writing Practice

Pupils are given a worksheet containing visuals related to the concept of “school”, with each visual having the English equivalent of the word written in dots underneath. Pupils connect the dots to form the word and grasp the complete word. They say the words aloud as a whole class after they finish the writing session.

Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Interactive Vocabulary Games

The teacher prepares a matching game with pictures and target words related to the concept of “school” using a Web2.0 tool. Pupils match the visuals with their English equivalents. They say the words aloud as the whole class after finishing the matching session. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 2: CLASSROOM LIFE

Sub-themes: Classroom instructions and language; classroom furniture, devices and objects; colours

This theme is centred on the concept of “classroom life” and covers the sub-themes of “classroom instructions and language; classroom furniture, devices and objects; colours”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 11

FIELD SKILLS AND SUPPORTIVE SKILLS	FLFS1. Listening/Watching-Comprehension
	FLFS2. Reading-Comprehension
	FLFS3. Speaking-Expression
	FLFS4. Writing-Expression
	FLSS1. Grammmaring: Selection and Use
	FLSS2. Vocabulary: Selection and Use
	FLSS3. Pronunciation: Selection and Use

Year 2 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.2.2.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures, and context.*

ENG.2.2.L2. Pupils can bring information about the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.2.2.L3. Pupils can make meaning of/derive meaning from the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.2.2.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.2.2.P1. Pupils can select and use the target phonological elements of the current content about “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups, and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously, and effectively when communicating with others.*

ENG.2.2.R1. Pupils can get ready for the reading-comprehension process about the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.2.2.R2. Pupils can bring information about the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.2.2.R3. Pupils can make meaning of/derive meaning from the current content about “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.2.2.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.2.2.V1. Pupils can select and use the target vocabulary of the current content about “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.2.2.G1. Pupils can select and use the language including target grammatical elements of the current content about “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*

- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.2.2.W1. Pupils can get ready for the writing-expression process about the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.2.2.W2. Pupils can copy the model/example on the writing task about the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.2.2.W3. Pupils can organise and form a content for the assigned writing task on the current content “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.2.2.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.2.2.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully, and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.2.2.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.2.2.S1. Pupils can get ready for speaking-expression process about the current content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.2.2.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.2.2.S3. Pupils can organise simple new verbal content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.2.2.S4. Pupils can form a simple new verbal content on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple, and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.2.2.S5. Pupils can reorganise and use information about the current theme on “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*

- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.2.2.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “classroom life with classroom instructions and language; classroom furniture, devices and objects; colours” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

CLASSROOM LIFE:

Sub-themes: Classroom instructions and language; classroom furniture, devices and objects; colours.

Basic Classroom Instructions and classroom language (Not to teach as target language chunks with structural rules but to be used constantly by the teacher as meta-language):

Come here, please!

Look at me! Look here!

Open/Close your book!

Open the door, please! Close the door, please!

Stand up, please! Sit down, please!

Listen! Be quiet, please!

Repeat, please!

Point to..., please!

Pass the pencil/rubber etc. please!

Put your pencils/rubbers etc. in the box/bag, please!

Colour it, please!

Draw it, please!

Say... please!

Look at the board, please!

Raise your hand, please!

Come to the board, please!

Show your picture, please!

Good job!

Are you ready?

Classroom language:

Good!

Well done!

(Can I go to the bathroom/toilet?) Yes, you can!

Here you are!

Thanks!

Hurry up!

It's break time now!

Time's up!

Do you need help?

Not yet!

Can I come in?

Can you pass the blue crayon, please?

I'm sorry, I'm late.

Target Vocabulary in Use (with revisional vocabulary):

Classroom furniture: A desk, a table, a Smart Board, a blackboard/whiteboard, a chair, a bookcase, a clock (classroom features: a door, a window, a wall).

Classroom objects: A pencil, a coloured pencil, a rubber (an eraser-AmE.), a notebook, a book, a crayon, a pencil case, a sharpener, a (piece of) chalk, a glue, scissors.

Classroom devices: A computer, a tablet, Smart Board.

Basic colours: Red, white, black, pink, blue, purple, yellow, brown, green, orange.

Numbers: 1-20

The alphabet (song):

***National and religious days, festivals, and celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

***Local Cultural, Social, and Moral Considerations of the Theme**

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

"To be-present": (What's/is it? It's/is a chair).

Function: Telling names, what things are, what colour things are.

"To be-present": (What colour is it? It's/is blue. What colour is the chair? The chair is blue. It's blue).

Function: Telling the colours of things and objects.

"To be-present": (How many chairs? Five chairs).

Function: Asking the number of things, objects, and people very simply.

Possessive adjectives: My, his, her, its, our, your, their.

Function: Modifying a noun to show ownership and describing the object.

Can for permission: (Can I go outside? Can I go to the bathroom, please? Yes, you can).

Function: Asking for and giving permission.

Target Social Language in Use:

What's next?

Good luck!

Of course!

You're right!

It's her/my/his turn!

I see!

Target Phonological Sounds in Use:

Consonants: c, d

c: (/si/, /k/); d: (/d/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

This theme is based on the pupils' knowledge of the classroom, the furniture and objects in it and colours of objects. Primary school pupils in Year 2 can know what a classroom is, what furniture and objects are in it and what are colours in Turkish. Pupils will know these and be able to express such situations in their own language but will not know how to say these things in a foreign language if this has not yet been covered in their curriculum. The knowledge of the concept of "classroom" that they have in their own language would prepare them to identify the same concepts later in their foreign language, English, in which they are assumed to be zero beginners.

Principles

A classroom is introduced as a place where there are certain furniture and objects that function as important components of it. A classroom is an important context where initial social interactions of social communication such as classroom instructions, are practised naturally and authentically in EFL.

Key Concepts:

Instructions, language, classroom, classroom instructions, classroom language, objects, devices, furniture, classroom objects, classroom devices, classroom furniture, conditions, colours.

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Pupils draw a classroom picture or make a cardboard model or a 3D digital model and stick pictures of models of some furniture and objects in it. They copy the words that go with the pictures and do a show-and-tell to introduce them to the class. This performance will be evaluated using rubrics.

LEARNING-TEACHING EXPERIENCES**Basic Acceptations: Preparedness/ Readiness**

This theme is based on pupils' knowledge of "classroom life" with its components such as "classroom instructions and language; classroom furniture, devices and objects; colours" in their own language. As the pupils are seven-year-old children, they can know what classroom instructions and language; classroom furniture, devices and objects; colours are in their own language, Turkish. Pupils' experiences as being a pupil and a part of people in a classroom (so far) is taken as a basis for this theme/topic. Pupils, they can know what a classroom is, what a classroom context is like, what the components of a classroom are, how the teachers lead and facilitate them with classroom instructions, how they understand him/her, and follow and carry out the instructions (which they already know as concepts in Turkish) and also there will not be a need to speak Turkish.

In the classroom, a fun warm-up activity which is not related to the theme "classroom" can be conducted as an ice-breaking session to help learners be ready for the whole learning process in the class with positive feelings for their well-being. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that the physical, cognitive, affective, and social factors are appropriate and suitable for the pupils to learn about the concept of "classroom life" and to gain knowledge of "what a classroom is, what furniture and objects are in it and what and colours are in English. As they are accepted as zero-beginners, there is nothing to remind them of English, but they can be supported to have an imaginary association for this concept in their own language, Turkish, without speaking it in class.

Before the main activities, the teacher could show them a classroom picture and ask them to say "yes" or "no" in English if they know what it is in Turkish. She/He could ask them to draw the picture of the place (classroom) they are in Turkish and ask them to keep the pictures for later. The activity can be evaluated with verbal praise.

Establishing Links

Pupils recall the concepts and associations related to the topic/theme "classroom life" by calling their pre-existing background knowledge about it (imaginatively through thinking) to make links with the current activities in the theme in English without translating anything and without speaking any Turkish until they start learning the target words in the current (new) concept, "classroom life".

It is only thinking about the presented visuals in their own language and, if necessary, and when asked using any words about the concept of "classroom" that they have already learnt/known in English at the very beginning of the process of learning about the current (new) theme/topic "classroom life". The vocabulary about the concept of "school" and the language chunks "What's/is it/this? It's/is /This is...." in English from the previous theme could help them understand the present theme more easily.

Connections between pre-existing knowledge regarding school (in their minds/heads) and the present information about the concept of "classroom" are made through meaningful and contextualised activities

with visuals. The teacher could ask them to look around and think where they are and what kind of a place it is in Turkish to recall their background knowledge (in Turkish) about a classroom and what they can have in it without mentioning any English words. They do not talk or translate anything from Turkish into English as this is just a thinking exercise.

An example practice could be done to point correctly to a picture of classroom and pictures of classroom furniture, devices and objects in it and also “colours” correctly when they are given instructions by the teacher in English and/or with mimics and gestures. Pupils give responses by pointing out relevant so-called pictures without speaking any English and/or Turkish.

In this way, connections are made between pre-existing knowledge about school (in their minds) in their own language and the present information about the concept of “classroom life” through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.2.2.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “classroom life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, V14.3, V18.2, LS1, CS2.11, CS2.16.2)**. For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of a school can also be created using Web 2.0 programmes.) They can guess the sub-concepts of school life, so they can easily understand that the current theme will be “classroom life” **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, V13.4, V14.1, V18.2, LS1, LS2, LS4, CS2.10, CS2.17).**

ENG.2.2.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier **(CS2.11)**. The introductory digital story is watched to identify the target theme “classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours” as a whole, without stopping the video at any point, so that the pupils can understand the theme/ topic holistically **(D3.2, SELS1.1, V3.3, V13.4, V14.1, V18.2, LS1, LS2, LS4, CS2.14, CS2.16.2)**.

ENG.2.2.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about classroom life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story **(V3.3, V13.4, V14.1, V18.2, LS1)**. When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum **(D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8)**. After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “classroom life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “classroom life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “classroom life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils **(SELS2.2, V3.4, V4.2, V13.4, V14.1, V18.2, LS1, LS2)**. When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard **(SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10)**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories **(D1.2, D1.6, D2.3, CS2.12)**.

ENG.2.2.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V7.2)**. Some volunteer pupils express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG.2.2.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each

picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class **(V3.4, V13.4, V14.1, V18.2, LS1, LS4, CS2.16.3)**. The teacher could offer variations with some techniques, such as showing the picture of the target words about school to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing **(D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2 CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the classroom and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him **(SELS2.1, CS2.6)**. Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out **(V3.4, V4.2, V15.1, LS4)**. These “classroom life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques **(SELS2.3, V11.1, V12.2, V14.3, LS5, CS2.9)**. Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not **(D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.2.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils’ language and communicative competence improve gradually **(V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3)**. For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on “classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours” **(V3.3, V13.4, V14.1, V18.2, LS2, LS4, CS2.8)**. At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know **(SELS1.1, V3.4, LS1,**

CS2.16.2). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.2.2.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of “classroom life” (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.2.2.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about “classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours” (**SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, V13.4, V14.1, V18.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.2.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.2.2.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.2.2.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “classroom life with classroom instructions and language; classroom furniture, devices and objects;

weather conditions; colours”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V13.4, V14.1, V18.2, LS1, LS2, LS4**). Pupils circle or tick the ones that they have heard, seen, and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “classroom life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, CS2.10, V13.4, V14.1**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, V18.2, LS1, LS2, LS4**).

ENG.2.2.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “school”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “classroom life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “classroom life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “school” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “classroom life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “classroom life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, LS5, CS2.5**). To consolidate the meanings of the new vocabulary items for the concept of “school”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. (**SELS2.2**). These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities (**D2.5, SELS3.1, V4.2, V7.2, LS5**). This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/Smart Board (**SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4**). This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.2.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils' attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme "classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours" (**D3.2, V13.4, V14.1, V18.2, CS2.2**). While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same (**CS2.14**). She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils' identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say "Stop!" when they see a scene in the picture strips with the target chunk that the teacher has just said (**SELS3.1, CS2.7**). The teacher stops if the pupils are correct, but not if they are not (**V3.3, V4.1, V7.1, LS1, LS2, LS4**).

ENG.2.2.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme "classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group (**SELS2.2, V3.1, V10.3, V13.4, V14.1, V18.2, LS1, LS4, CS2.4**). Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems (**D2.5**). To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum (**CS2.13**). There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context (**SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2**). For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them (**V4.4, V7.2**).

ENG.2.2.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V13.4, V14, V14.1, V18.2, LS1, LS2, LS4**).

ENG.2.2.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language **(D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3)**. To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups **(SELS2.1, SELS2.2)** (of two, three, four etc.) and to write the names of the vocabulary items about “classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours” next to their drawings on the model related to classroom life. The teacher asks them to look at the Smart Board screen with the model related to classroom life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum **(V4.4, V7.3, V13.4, V14.1 V18.2, LS2, LS4)**.

ENG.2.2.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “classroom life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level **(D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20)**.

ENG.2.2.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings **(D2.5, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level **(V3.4, V7.2, LS1, LS4)**.

ENG.2.2.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours” from simple to more expanded versions in their writing **(SELS2.2, SELS2.3, V4.2, V13.4, V14.1, V15.1, V18.2, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20)**. These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.2.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols,

drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15)**. Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4)**.

ENG.2.2.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours" **(V3.2, V4.2, V13.4, V14.1, V18.2, LS1, LS4, LS5)**.

ENG.2.2.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4)**. The spoken content of the model becomes a path for them to follow.

ENG.2.2.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13)**.

ENG.2.2.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "classroom life with classroom instructions and language; classroom furniture, devices and objects; weather conditions; colours" **(SELS2.2, SELS3.2, V4.2, V11.1, V13.4, V14.1, V18.2, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20)**.

ENG.2.2.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "classroom life" and its components such as "classroom instructions and language; classroom furniture,

devices and objects; weather conditions; colours" (**SELS2.2, SELS3.2, V4.2, V7.2, V13.4, V14.1, V18.2, LS4, LS5, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.2.2.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To practise and improve knowledge and skills for talking about classroom, classroom furniture, objects and instructions in English.

Activity 1: Interactive vocabulary game

One set of cards is made with pictures of objects in the classroom and another set with their names. Pupils work in pairs to match the pictures with the correct words. An interactive word wall is set up where pictures of basic classroom instructions can be drawn or target language chunks can be written under the picture using basic classroom instructions, such as "Come here!, Look at me!, Look here!, Open the door!, Close the door! etc...". Then working in pairs, one pupil says the instruction correctly and the other pupil acts it out and repeats the chunk. Then they do the action and say the chunk together. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Bingo

Bingo cards are made with pictures of classroom objects and furniture in different colours. Colours are called out, and pupils mark their cards that are only colours. After marking, they use the colour in a target language chunk and say it. The first pupil to complete a row shouts "Bingo!" and then they repeat as a whole class. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 3: Hop and say

A number line is created on the floor with tape. A number is called out, and the pupils have to hop to that number. When they hop, they have to say the number correctly. To increase the level of difficulty, basic Maths problems are called out (e.g., "Hop to $5 + 3$ "). They repeat the numbers as a whole class. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 4: Song

A song consisting of the basic short classroom instructions (Stand up! /Sit down! /Listen! /Come here! / Be quiet! /Open the door! /Close the door!) can be used as a consolidation activity. The pupils can repeat the song after the tape to remember and revise the classroom instructions. Pupils choose a peer and sing a part of the song at random and have her/his peer act it out. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To practise and improve knowledge and skills for talking about classroom, classroom furniture, objects and instructions in English.

Activity 1: Interactive vocabulary game

One set of cards is made with pictures of objects in the classroom and another set with their names. Pupils work in pairs to match the pictures with the correct words. An interactive word wall is set up where pictures of basic classroom instructions can be drawn or target language chunks can be written under the picture using basic classroom instructions, such as "Come here!, Look at me!, Look here!, Open the door!, Close the door! etc...". Then they repeat the words as a whole class. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 3: PERSONAL LIFE

Sub-themes: Parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions

This theme is centred on the concept of “personal life” and covers the sub-themes of “parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 11

FIELD SKILLS AND SUPPORTIVE SKILLS	FLFS1. Listening/Watching-Comprehension
	FLFS2. Reading-Comprehension
	FLFS3. Speaking-Expression
	FLFS4. Writing-Expression
	FLSS1. Gramming: Selection and Use
	FLSS2. Vocabulary: Selection and Use
	FLSS3. Pronunciation: Selection and Use

Critical Thinking Skill

Year 2 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.2.3.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions”

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures, and context.*

ENG.2.3.L2. Pupils can bring information about the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.2.3.L3. Pupils can make meaning of/derive meaning from the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.2.3.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.2.3.P1. Pupils can select and use the target phonological elements of the current content about “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups, and individually.*
- c) Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously, and effectively when communicating with others.*

ENG.2.3.R1. Pupils can get ready for the reading-comprehension process about the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions”.

- a) Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences, and clues to the current content.*
- c) Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.2.3.R2. Pupils can bring information about the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.2.3.R3. Pupils can make meaning of/derive meaning from the current content about “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” by reading it carefully.

- a) Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*

- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.2.3.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.2.3.V1. Pupils can select and use the target vocabulary of the current content about “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic, and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family, and other people outside the school by being aware of their differences.*

ENG.2.3.G1. Pupils can select and use the language including target grammatical elements of the current content about “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*

- d) Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.
- e) Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically, and by pointing.
- f) Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.
- g) Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.
- h) Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.
- i) Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.

ENG.2.3.W1. Pupils can get ready for the writing-expression process about the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” in an age- and level-appropriate way.

- a) Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.
- b) Pupils understand correctly what the current writing task is as guided and assigned.

ENG.2.3.W2. Pupils can copy the model/example on the writing task about the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” based on the model/example provided to practise for further writing activities.

- a) Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.

ENG.2.3.W3. Pupils can organise and form a content for the assigned writing task on the current content “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays” based on the model/example provided.

- a) Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.

ENG.2.3.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays”.

- a) Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.
- b) Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.
- c) Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.

ENG.2.3.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully, and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.2.3.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.2.3.S1. Pupils can get ready for speaking-expression process about the current content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.2.3.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.2.3.S3. Pupils can organise simple new verbal content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.2.3.S4. Pupils can form a simple new verbal content on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*

- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple, and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.2.3.S5. Pupils can reorganise and use information about the current theme on “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate, and necessary way by reorganising it individually and verbally.*
- b) *Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.2.3.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “personal life with basic parts of the human body, physical features, clothes, days of the week, ages, and birthdays; weather conditions” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

PERSONAL LIFE:

Sub-themes: Parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions

Target Vocabulary in Use (with revisional vocabulary):

Parts of the body: A body, a leg(s), a hand(s), an arm(s) a head, a face, an ear(s), an eye(s), a nose, a mouth, hair.

Adjectives: Big, short, long, small, tall, blond, dark.

Clothes: Tops: A shirt, a T-shirt, Bottoms: trousers (pants-AmE.), Dresses: a dress, Outwear: a coat, Footwear: shoes, Accessories: a hat, a scarf, glasses, gloves, an umbrella.

Ages: I'm seven.

A gift, a birthday.

Days of the week for birthdays: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday.

Weather: Cold, hot, it's raining (rainy-AmE.), it's snowing (snowy-AmE.)

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Language Chunks ("To be-present): (+), (-), (?):

How old are you? I'm/am 7.

Is it your birthday today? Yes, it is.

What's/is it? / It/This is a nose/ a shirt.

What colour is it? (pointing to the nose) It's/is pink.

Is she tall? Yes, she is. No, she isn't/is not. What day is it today? It's/is Monday today.

How's the weather? It's cold.

Functions: Asking and answering about ages of people, their birthdays, parts of their body, physical features, days of the week, describing weather conditions.

Have got/ Has got: (+)(-)(?):

What have you got? I've got a nose. How many ears have you got? I've got two ears. What have you got? I've got blue trousers. I've got a purple shirt.

Function: Talking about possession, body parts and clothes.

Articles: a/an

Function: It is taught without its logic; automatic use is expected.

Preposition: on

Function: It is used for describing where things are.

Target Social Language in Use:

Wow!

Great!

That looks great!

Nice eyes/ hair! etc.

Cheer up, everybody!

Not now!
 I'm OK!
 You are welcome!
 Let's play together!
 It's late.
 Time to sleep!
 I see!
 Time for school!
 See you after school!
 That sounds great!
 It's break time!
 It's your turn!

Target Phonological Sounds in Use:

Vowels: e, i

Consonants: f, g, h, j

Vowels: e: (/e:/, /i:/, /ə/); i: (/aɪ/, /ɪ/, /i:/)

Consonants: f: (/f/), g: (/g/, /dʒ/), h: (/h/), j: (/dʒeɪ/, /dʒ/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

It is assumed that pupils have the knowledge of their body parts such as body, leg(s), hand(s), arm(s) head, face, ear(s), eye(s), nose, mouth, and hair and also ages, clothes, and days of the week in their own language. This inner knowledge prepares them to identify the same concepts in another language, in this case English.

Key Concepts

Parts, body, parts of the body, features, physical features, clothes, days, week, days of the week, ages, birthdays, and weather conditions.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils draw a body picture or make a cardboard model of a sweet monster or a fancy character sticking the pictures the parts of body on it. (A digital 3D model can also be made). They copy the words that go with the pictures and do a show-and-tell to introduce them to the class. This performance will be evaluated using rubrics.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on pupils' knowledge of "personal life" with its components such as "parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions" in their own language. As the pupils are seven-year-old children, they can know what the parts of the body and physical features are; what clothes are; what the days of the week are, what ages and birthdays are in their own language, Turkish. Pupils know the most basic language chunks "What's/is it? It's/is -This is a...", "What colour ...?" which could help them ask and answer questions about many things about "the parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions". The basic colours in English (black, white, pink, red, yellow, blue, and green) learnt in the previous theme can also be helpful in describing some body parts such as "I've got blue eyes" and clothes.

In the classroom, a fun warm-up activity which is not related to the theme "personal life" can be conducted as an ice-breaking session to help learners be ready for the whole learning process in the class with positive feelings for their well-being. This can be an activity such as a short game, a physical activity, listening to a

song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is assumed that pupils are suitable for learning about their “parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions”. In English, taking into account their age, level of interest, aptitude for foreign language acquisition and learning, attitudes towards foreign language learning, and learning styles. It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about this concept and related words and chunks in English (as a foreign language). A sample practice could be applied asking them to point to their body parts correctly when they are given instructions in Turkish or with mimics and gestures without speaking any English and not saying anything in Turkish.

For pre-evaluation, the teacher could show a body (picture or real) with clothes then she/he could say in Turkish “Show me a face! Show me a head!”. The appropriate physical response is expected from the pupils, who show the so-called body parts. They do not speak Turkish or English during this activity. They just show the part of the body that the teacher says with physical responses and the teacher checks whether they know it in their own language. This can be evaluated by an observation scheme.

Establishing Links

Pupils are asked to recall the concept of “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions” by remembering their pre-existing background knowledge about them (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current (new) concept “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions” in English. To remind them of the pre-existing background knowledge (they already have in their own language) about the current concept, some related pictures are displayed on the walls of the classroom or on the Smart Board before the main teaching/learning flow begins in the class. The pictures could be of a doll’s body. All the body parts to be taught in the theme are coloured and highlighted separately. The pictures are shown to the pupils and they are asked if they know what they are about in Turkish without giving their English equivalents, as it is only a matter of thinking about the visuals presented in their own language as a whole and reflecting that they know what they are saying yes or no or nodding their heads. They do not translate anything from Turkish into English or vice versa, and it is a short conversation to familiarise them with the concept of body parts.

Some questions can be asked in Turkish:

Have you understood what these are? (The answer is yes or no in Turkish or nodding their heads)

Do you know these words in Turkish? (The answer is yes or no in Turkish or nodding their heads without saying the words in Turkish)

An example practice could be done to point correctly to a picture of a body and/or pictures of body parts in it correctly when they are given instructions by the teacher with English, Turkish and/or with mimics and gestures. Pupils give responses physically by pointing out relevant so-called pictures without speaking any English and/or Turkish.

In this way, connections are made between pre-existing knowledge about body parts (in their minds) in their own language and the present information about the concept of “body parts” through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection, and use skills.

ENG.2.3.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “personal life” in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of the components of personal life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of personal life, so they can easily understand that the current theme will be “personal life” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.2.3.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V10.1, V14.2, V15.5, V18.1, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.2.3.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about personal life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for personal life with parts of the body, physical features, clothes, days of the week, ages, and birthdays and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V10.1, V14.2, V15.5, V18.1, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital

story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “personal life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “personal life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “personal life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils **(SELS2.2, V3.4, V4.2, LS1, LS2)**. When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard **(SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10)**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories **(D1.2, D1.6, D2.3, CS2.12)**.

ENG.2.3.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V7.2)**. Some volunteer pupils express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG.2.3.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class **(V3.4, V10.1, V14.2, V15.5, V18.1, LS1, LS4, LS5, CS2.16.3)**. The teacher could offer variations with some techniques, such as showing the picture of the target words about personal life to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing **(D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the theme and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him **(SELS2.1, CS2.6)**. Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out **(V3.4, V4.2, V15.1, LS4)**. These “personal life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques **(SELS2.3, V11.1, V12.2, LS5, CS2.9)**. Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played

where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.3.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading, and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays" (**V3.3, V10.1, V14.2, V15.5, V18.1, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.2.3.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "personal life" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.2.3.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1,**

V3.3, LS1, LS4, CS2.14). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about “personal life with parts of the body and physical features; clothes; days of the week, ages, and birthdays” (**SELS3.1, SELS3.2, V10.1, V14.2, V15.5, V18.1, LS5**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.3.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.2.3.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.2.3.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V10.1, V14.2, V15.5, V18.1, LS5**). Pupils circle or tick the ones that they have heard, seen, and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “personal life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, V10.1, V14.2, V15.5, V18.1, LS1, LS2, LS4, LS5**).

ENG.2.3.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “personal life”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “personal life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “personal life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to

remember them **(CS2.4)**. She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions **(CS2.5)**. When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “personal life” to the correct empty boxes on the screen **(SELS1.2, CS2.5)**. In this way, images/pictures that are relevant to the concept of the theme “personal life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “personal life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of “personal life”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.3.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays” **(D3.2, V10.1, V14.2, V15.5, V18.1, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.2.3.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2,**

V3.1, V10.3, V10.1, V14.2, V15.5, V18.1, LS1, LS4, LS5, CS2.4). Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.2.3.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded **(V3.2, V3.4, V10.1, V14.2, V15.5, V18.1, LS1, LS4, LS5)**.

ENG.2.3.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language **(D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3)**. To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups **(SELS2.1, SELS2.2)** (of two, three, four etc.) and to write the names of the vocabulary items "personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays" next to their drawings on the model related to personal life. The teacher asks them to look at the Smart Board screen with the model related to personal life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum **(V4.4, V7.3, V10.1, V14.2, V15.5, V18.1, LS4, LS5)**.

ENG.2.3.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of "personal life" in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils' age and language level **(D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20)**.

ENG.2.3.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.2.3.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme "personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays" from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V10.1, V14.2, V15.1, V15.5, V18.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.3.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.2.3.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays" (**V3.2, V4.2, V10.1, V14.2, V15.5, V18.1, LS1, LS4, LS5**).

ENG.2.3.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.2.3.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.2.3.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “personal life with parts of the body and physical features; clothes; days of the week, ages and birthdays” (**SELS2.2, SELS3.2, V4.2, V11.1, V10.1, V14.2, V15.5, V18.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.2.3.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities (**SELS2.3, CS2.20**). Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “personal life” and its components such as “parts of the body and physical features; clothes; days of the week, ages and birthdays; weather conditions” (**SELS2.2, SELS3.2, V4.2, V7.2, V10.1, V14.2, V15.5, V18.1, LS4, LS5, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.2.3.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils’ learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Activity: "My Funny Puppet"

Objective: To consolidate and improve pupils' knowledge and skills about parts of the body in English.

Activity 1: Flashcard game

The teacher uses pictures and flashcards to introduce body parts (head, arms, legs, eyes, ears, etc.). Pupils repeat these words together, and the teacher shows and points to each part. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Puppet game

Pupils are introduced to the "My Funny Puppet" activity. Each pupil will draw a funny puppet from their imagination and label its body parts. Pupils are asked to draw their own puppet and label the body parts. In addition to the drawing, pupils are asked to make their puppet talk by using self-introduction phrases learned in the first theme along with body parts (e.g., "My name is ... I have a pink nose; I have two yellow ears"). For presentation and sharing, the puppets are shown to the classmates, and the puppets with labelled body parts are displayed on the class bulletin board. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 3: Dialogue game

A flashcard is shown, the word is said, and it is repeated by the pupils. Then, the pupils are asked to point to the corresponding body part on themselves. Additionally, high achiever pupils are asked to use the word in a sentence describing the body part and its colour. They are also encouraged to create a short dialogue with a peer. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To consolidate and improve pupils' knowledge and skills on talking about parts of the body in English.

Activity 1: Flashcard game

The teachers show a flashcard, say the word and have the pupils repeat it. Then, the pupils are asked to point to the corresponding part of their body. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Puppet game

A simple puppet template is given to the pupils. The positions of the body parts (e.g., head, arms, legs, eyes) are shown on the template. The template is coloured by the pupils, and the names of the body parts are written with the help of the teacher. The template is then cut out and the puppet is made. They repeat the words as a whole class. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 4: FAMILY LIFE

Sub-theme: Family members and family members' physical appearances and physical features

This theme is centred on the concept of "family life" and covers the sub-themes of "family members and family members' physical appearances and physical features". These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners' developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.2.4.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “family life with family members and family members’ physical appearances and physical features”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.2.4.L2. Pupils can bring information about the current content on “family life with family members and family members’ physical appearances and physical features” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.2.4.L3. Pupils can make meaning of/derive meaning from the current content on “family life with family members and family members’ physical appearances and physical features” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.2.4.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “family life with family members and family members’ physical appearances and physical features” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.2.4.P1. Pupils can select and use the target phonological elements of the current content about “family life with family members and family members’ physical appearances and physical features” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups, and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously, and effectively when communicating with others.*

ENG.2.4.R1. Pupils can get ready for the reading-comprehension process about the current content on “family life with family members and family members’ physical appearances and physical features”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences, and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.2.4.R2. Pupils can bring information about the current content on “family life with family members and family members’ physical appearances and physical features” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.2.4.R3. Pupils can make meaning of/derive meaning from the current content about “family life with family members and family members’ physical appearances and physical features” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.2.4.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “family life with family members and family members’ physical appearances and physical features” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.2.4.V1. Pupils can select and use the target vocabulary of the current content about “family life with family members and family members’ physical appearances and physical features” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group, and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.2.4.G1. Pupils can select and use the language including target grammatical elements of the current content about “family life with family members and family members’ physical appearances and physical features” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*

- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.2.4.W1. Pupils can get ready for the writing-expression process about the current content on “family life with family members and family members’ physical appearances and physical features” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.2.4.W2. Pupils can copy the model/example on the writing task about the current content on “family life with family members and family members’ physical appearances and physical features” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.2.4.W3. Pupils can organise and form a content for the assigned writing task on the current content “family life with family members and family members’ physical appearances and physical features” based on the model/example provided.

- a) *Pupils organise very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.2.4.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “family life with family members and family members’ physical appearances and physical features”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.2.4.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “family life with family members and family members’ physical appearances and physical features” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.2.4.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “family life with family members and family members’ physical appearances and physical features” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.2.4.S1. Pupils can get ready for the speaking-expression process about the current content on “family life with family members and family members’ physical appearances and physical features” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.2.4.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “family life with family members and family members’ physical appearances and physical features”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.2.4.S3. Pupils can organise simple new verbal content on “family life with family members and family members’ physical appearances and physical features” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.2.4.S4. Pupils can form a simple new verbal content on “family life with family members and family members’ physical appearances and physical features” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.2.4.S5. Pupils can reorganise and use information about the current theme on “family life with family members and family members’ physical appearances and physical features” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate, and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.2.4.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “family life with family members and family members’ physical appearances and physical features” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

FAMILY LIFE:

Sub-theme: Family members and family members' physical appearances and physical features

Target Vocabulary in Use (with revisional vocabulary):

Family members: A family, a father, a mother, a sister, a brother, a grandfather, a grandmother, a baby, a son, a daughter, a friend, mum, dad.

Physical appearances (Descriptive adjectives): Nice, beautiful, blond, tall, short, handsome.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks:

- "To be-present (+), (-), (?)":

Language Chunks: Who is he? Who is she? He's/is my father. She's/is my mother.

Function: Asking and identifying people

-Have/has got:

Chunks: What colour eyes has your mother got? My mother's/has got blue eyes. She's/has got blue eyes (Description with eye colour is used to describe family members but the question form as "What colour eyes has she got? is NOT taught at this stage).

Function: Describing physical features

Target Social Language in Use:

I'm sorry!

I'm sorry, Mum! Dad! Grandma! Grandpa!

That's fine!

It's/That's all right! All right!

What about me?

You look great!

It's very lovely!

Look!

Over there!

It's lunchtime!

I'm hungry!

Target Phonological Sounds in Use:

Vowel: o

Consonants: k, l, m, n, p

Vowel: ɒ: (/əʊ/, /ɒ/, /əʊ/)

Consonants: k: (/k/); l: (/ɛl/, /l/); m: (/ɛm/, /m/); n: (/ɛn/, /n/); p: (/pi:/, /p/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

Knowledge of family is present in all languages in the world. Anyone who begins to learn a new language brings with them their pre-existing knowledge and transfers it into their new language learning. Therefore, a primary school pupil will know what a family is as a concept but will not know its equivalents in a foreign language. However, this existing knowledge will help her recognise, understand, and learn it.

Key Concepts:

Appearance, physical appearances, features, physical features, members, family, family members, family members' physical appearances, family members' physical features.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils are asked to make self-recordings (visual, audio) at school/ about their family members and their physical features such as the colour of their eyes or hair, or saying whether their noses or ears are big or small or whether their legs are short or long etc. They can present their work to the class by using Fact Files and avatars that they have made. They can use both digital resources and papers/cardboard. Then they can give feedback to each other using emoticons.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils' knowledge of family members in their own language. As Year 2 Primary school pupils, they can know what a family is and what its members are. It is also assumed that they know how to describe their physical traits such as the colour of their eyes or hair, in their own language, Turkish. They know some language chunks such as "This is ... What colour...?" as well as the basic colours (black, white, pink, red, yellow, blue, and green) in English, that they learned in the previous themes, which could help them ask and answer questions about family members and their physical traits such as "My mother's/ has got blue eyes" in this theme.

As an initial start, a fun non-theme warm-up activity is done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme and so on that does not require any knowledge of English and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is assumed that pupils have the knowledge of their family members such as their father, mother, sister, brother, grandmother, and grandfather in their own language. This knowledge prepares them to identify the same concept in English as their foreign language. Besides, they could use some additional language elements such as colours (blue, green...), numbers (1-2) and basic adjectives (small, big...) to describe the physical features of family members in a simple way. It is expected that pupils' physical, cognitive, affective, and social factors are appropriate and suitable for learning about family members and related physical descriptions using basic colours to talk about their eye colours or using adjectives such as small, big, long, and short in English. An example of an exercise might be to point correctly to family members in a picture by giving instructions in Turkish without speaking any English without letting the pupils speak Turkish or English. Instructions such as "Show me the father in this family! Show me the grandfather in this family!" are given in Turkish and pupils can respond physically by pointing to the relevant family members without speaking.

Establishing Links

Pupils are asked to recall the concept of "family and family members" by remembering their pre-existing background knowledge about them (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current (new) concept, "family" in English.

To remind them of the pre-existing background knowledge about the concept of “family”, a very short cartoon film of a very famous and popular family known to the pupils is shown on the Smart Board before the main teaching/learning flow in the class begins.

The teacher asks pupils to watch the film and they do it. When they have finished watching the film, the teacher asks them in Turkish what the film was about and wants the answer aloud in chorus as the whole class in Turkish: “... family!”

The teacher asks them to think about this until they watch the next film, which is the main entry material of the theme, the digital story, without asking any further questions in Turkish or English.

An example practice could be done to point correctly to a picture of a family and pictures of family members in it correctly when they are given instructions by the teacher with English, Turkish and/or with mimics and gestures. Pupils give responses by pointing out relevant so-called pictures without speaking any English and/or Turkish.

In this way, connections are made between pre-existing knowledge about school (in their minds) in their own language and the present information about the concept of “family” through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.2.4.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “family life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2)**. For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme

at the same time. (A 3-D model of family members can also be created using Web 2.0 programmes.) They can guess the sub-concepts of family life, so they can easily understand that the current theme will be “family life” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V2.1, V2.3, V3.4, V8.3, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.2.4.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “family life with family members and family members’ physical appearances and physical features” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V2.1, V2.3, V3.3, V8.3, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.2.4.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about family life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for family life with family members and family members’ physical appearances and physical features and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V2.1, V2.3, V3.3, V8.3, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “family life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “family life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “family life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.2.4.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.2.4.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “family life with family members and family members’ physical appearances and physical features”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V2.1, V2.3, V3.4, V8.3, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about family to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the family life and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “family life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.4.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils’ language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory

story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on “family life with family members and family members’ physical appearances and physical features” (**V2.1, V2.3, V3.3, V8.3, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.2.4.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of “family life” (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.2.4.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about “family life with family members and family members’ physical appearances and physical features” (**SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V2.1, V2.3, V4.2, V8.3, LS5, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.4.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.2.4.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.2.4.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “family life with family members and family members’ physical appearances and physical features”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V2.1, V2.3, V3.3, V3.4, V8.3, LS5**). Pupils circle or tick the ones that they have heard, seen, and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “family life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the family life with family members and family members’ physical appearances and physical features, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V2.1, V2.3, V8.3, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.2.4.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “family life”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “family life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “family life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “family life” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “family life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “family life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5**). To consolidate the meanings of the new vocabulary items for the concept of “family”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. (**SELS2.2**).

These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities (**D2.5, SELS3.1, V4.2, V7.2, LS5**). This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling using the words written on the model school on the blackboard/ Smart Board (**SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4**). This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.4.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils' attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme "family life with family members and family members' physical appearances and physical features" (**D3.2, V2.1, V2.3, V8.3, LS5, CS2.2**). While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same (**CS2.14**). She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils' identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say "Stop!" when they see a scene in the picture strips with the target chunk that the teacher has just said (**SELS3.1, CS2.7**). The teacher stops if the pupils are correct, but not if they are not (**V3.3, V4.1, V7.1, LS1, LS2, LS4**).

ENG.2.4.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme "family life with family members and family members' physical appearances and physical features", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group (**SELS2.2, V2.1, V2.3, V3.1, V8.3, V10.3, LS1, LS4, LS5, CS2.4**). Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems (**D2.5**). To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum (**CS2.13**). There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context (**SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2**). For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them (**V4.4, V7.2**).

ENG.2.4.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “family life with family members and family members’ physical appearances and physical features” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V2.1, V2.3, V3.2, V3.4, V8.3, LS1, LS4, LS5**).

ENG.2.4.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “family life with family members and family members’ physical appearances and physical features” next to their drawings on the model related to family life. The teacher asks them to look at the Smart Board screen with the model related to family life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V2.1, V2.3, V4.4, V7.3, V8.3, LS4, LS5**).

ENG.2.4.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “family life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.2.4.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.2.4.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “family life with family members and family members’ physical appearances and physical features” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V2.1, V2.3, V4.2, V8.3, V15.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2,**

V11.1, LS2, CS2.20). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.4.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15).** Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2).** The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4).**

ENG.2.4.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "family life with family members and family members' physical appearances and physical features" **(V2.1, V2.3, V3.2, V4.2, V8.3, LS1, LS4, LS5).**

ENG.2.4.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6).** They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4).** The spoken content of the model becomes a path for them to follow.

ENG.2.4.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13).**

ENG.2.4.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "family life with family members and family members' physical appearances and physical features" **(SELS2.2, SELS3.2, V2.1, V2.3, V4.2, V8.3, V11.1, LS1, LS4, LS5, CS2.20).** AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20).**

ENG.2.4.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20).** Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created

are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "family life" and its components such as "family members and family members' physical appearances and physical features" (**SELS2.2, SELS3.2, V2.1, V2.3, V4.2, V7.2, V8.3, LS4, LS5, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.2.4.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To consolidate and improve their knowledge and skills about their family members in English.

Activity 1: Family Tree

The teacher explains to the pupils that they are going to make a "Family Tree". Flashcards with pictures and words (e.g., "mother" with a picture of a mother) are provided for vocabulary practice and/or each pupil will draw or bring pictures of their family members. A template of a family tree with labels for each family member is provided with the pupils. The names of family members such as father, mother etc... are provided as a list on the blackboard / whiteboard / Smart Board screen. Pupils look at the family tree and paste the cut-out pictures on the right branches of the tree and also copy the names of family members by copying from the board. They write complete chunks next to the pictures. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To help and support pupils practise and improve their knowledge and skills about using the related to their family members and their physical traits in English.

Activity 1: Family Album

The teacher explains to the pupils that they are going to make a "Family Album". Each pupil will draw or bring pictures of their family members and put them in an album. The teacher provides the pupils with a blank album template. Each page is dedicated to one family member. Pupils colour and paste in the pictures of family members (mother, father, sister, brother) provided or bring photos of their own family members to paste in the album template. With the help of the teacher, the pupils copy the names of their family members

under each picture (e.g., “This is my mother”) from the models. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

TEACHER REFLECTIONS

THEME 5: HOMES & HOUSES & NEIGHBOURHOODS

Sub-theme: Parts, rooms and furniture in the house; pets in the house

This theme is centred on the concept of “homes, houses, and neighbourhoods” and covers the sub-themes of “parts, rooms and furniture in the house; pets in the house”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 11

FIELD SKILLS AND SUPPORTIVE SKILLS	FLFS1. Listening/Watching-Comprehension
	FLFS2. Reading-Comprehension
	FLFS3. Speaking-Expression
	FLFS4. Writing-Expression
	FLSS1. Gramming: Selection and Use
	FLSS2. Vocabulary: Selection and Use
	FLSS3. Pronunciation: Selection and Use

Critical Thinking Skill

Year 2 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.2.5.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.2.5.L2. Pupils can bring information about the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.2.5.L3. Pupils can make meaning of/derive meaning from the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.2.5.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.2.5.P1. Pupils can select and use the target phonological elements of the current content about “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously, and effectively when communicating with others.*

ENG.2.5.R1. Pupils can get ready for the reading-comprehension process about the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.2.5.R2. Pupils can bring information about the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.2.5.R3. Pupils can make meaning of/derive meaning from the current content about “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.2.5.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.2.5.V1. Pupils can select and use the target vocabulary of the current content about “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group, and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.2.5.G1. Pupils can select and use the language including target grammatical elements of the current content about “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*

- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.2.5.W1. Pupils can get ready for the writing-expression process about the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.2.5.W2. Pupils can copy the model/example on the writing task about the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.2.5.W3. Pupils can organise and form a content for the assigned writing task on the current content “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.2.5.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.2.5.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully, and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.2.5.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.2.5.S1. Pupils can get ready for speaking-expression process about the current content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.2.5.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.2.5.S3. Pupils can organise simple new verbal content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.2.5.S4. Pupils can form a simple new verbal content on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.2.5.S5. Pupils can reorganise and use information about the current theme on “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate, and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.2.5.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

HOMES & HOUSES & NEIGHBOURHOODS

Sub-themes: Parts, rooms and furniture in the house; pets in the house

Target Vocabulary in Use (with revisional vocabulary):

Parts of the house: A bedroom, a bathroom, sitting-room (living room-AmE.), a kitchen, a garden, a dining room, a balcony, a doorbell, a dollhouse.

House furniture: A bed, a sofa, a coffee table.

Pets in the house: A pet, a dog, a cat, a rabbit, a bird, a (gold)fish.

Parts of the body of a pet: A tail, whiskers, a claw, a paw, a beak.

Preposition of a place: In, on.

Verbs: to dance.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks:

"Have got/has got": (We've/have got a house. We've got two pets).

Function: Expressing possession or ownership of objects.

"To be" - present: (Where's/is the bed? The bed is in the bedroom. Where's/is the cat? The cat is in the kitchen).

Function: Describing the location of objects.

"There is/there are": (There are five cats in the sitting room).

Function: Describing the existence or presence of objects.

Target Social Language in Use:

Here's a...!

Come and see!

Let's look at...!

Come on!

Hold on.

Really?

That looks great!

Look around!

Listen to music!

Target Phonological Sounds in Use:

q, r, s, t, v, w

Consonants: q: (/kju:/); r: (/ɑ:/ (Br), /r/ (AmE.)); s: (/s/, /ɛs/, /z/); t: (/ti:/, /t/); v: (/vi:/, /v/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of “house” is present in all languages because people live in different types of houses in different parts of the world. People who start to learn a new language bring with them their pre-existing knowledge and transfer it to their new language learning. Therefore, Year 2 Primary school pupils will know what a house is as a concept but will not know its equivalents in another language. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Principles

Houses and homes are presented as spaces with specific parts, rooms, furniture, and pets that play significant roles in shaping daily routines and comfort. Neighbourhoods add an external layer of social interaction and shared community life.

Houses serve as essential contexts for practising basic social communication in EFL, such as identifying rooms, describing furniture, and talking about pets. Pupils engage in authentic and natural interactions by describing their homes and pets, asking questions about others’ living spaces, and sharing details about their neighbourhoods.

Key Concepts:

Parts, rooms, furniture, pets, house, parts in the house, rooms in the house, furniture in the house, pets in the house.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils make self-recordings (visual, audio) at school/ at home of their house, their rooms, the furniture in their houses, and their pets by presenting the models that they can make by cardboard or Web 2.0 programmes. This performance will be evaluated using rubrics.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of homes & houses & neighbourhoods with its components such as a house and its parts, rooms, and furniture in it in their own language. As the pupils are 7 years old, they can know what a house is and what we have in it. They are also expected to know that pets are animals that live with families in houses. Besides, they know how to describe the location of furniture, people, and pets (if there are any) in a house in their own language, Turkish. This knowledge would prepare them to identify the same concepts in their foreign language, English as well. It is assumed that as they have learnt how to ask what things/people are and how to introduce them using language chunks such as “What’s/is it/ this? This is a ...”; “What colour...? It’s/is blue” in English from the previous themes. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. In the classroom, a fun warm-up activity which is not related to the theme “home & houses & neighbourhood” can be conducted as an ice-breaking session to help learners be ready for the whole learning process in the class with positive feelings for their well-being. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about a house and the rooms, furniture and pets that live in it as well as their numbers, locations and very simple descriptions. Recalling and practising with basic colours (white, black etc...), simple adjectives (small, big etc...) and body parts (ears, noses etc...) in English which they have learnt in the previous themes would be helpful as a basis for moving on and learning the current content about the concept of “house”. Therefore, a dialogue game can be played to revise colours, simple adjectives for physical descriptions

(small, big, short, long), body parts (ears, nose, legs, eyes), and language chunks such as “What’s/is it? This is a...” “What colour is it? It’s/is blue”, and “I’ve/have got a ... She’s/has got a ...” (since they are going to learn “We’ve/have got...” in the current theme)” by giving instructions in English as a preparation practice. In this way, their performance can be taken into consideration by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme.

Establishing Links

Pupils are asked to recall the concept of “house” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current (new) concept, “house” in English. To remind them of the pre-existing background knowledge they already have about the concept of a house, a short cartoon or animated story that is well known to the, with very well-known characters from a well-known cartoon is shown on the blackboard/Smart Board before the main teaching/learning flow of the class begins. The cartoon shows a house with rooms inside. (To prepare the short cartoon or animated story, some Web 2.0 programmes can be used).

The pupils are asked to watch the cartoon, and they do. When they have finished watching it, the teacher asks them in Turkish if they have understood what it is in the cartoon. She/He wants them to nod yes or to indicate whether they understood what it was about or not. The teacher asks them to think about it until they watch the next film, which is the main entry material of the theme, the digital story, without asking any further questions in Turkish or English. An example practice could be done to point correctly to a picture of a house and pictures of parts of the house in it correctly when they are given instructions by the teacher with English, Turkish and/or with mimics and gestures. Pupils give responses by pointing out relevant so-called pictures without speaking any English and/or Turkish.

In this way, connections are made between pre-existing knowledge about school (in their minds) in their own language and the present information about the concept of “house” through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.2.5.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “homes, houses and neighbourhoods” in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model homes, houses and neighbourhoods can also be created using Web 2.0 programmes.) They can guess the sub-concepts of homes, houses and neighbourhoods, so they can easily understand that the current theme will be “homes, houses, and neighbourhoods” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V2.1, V2.3, V3.4, V8.3, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.2.5.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V5.2, V9.3, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.2.5.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about homes, houses, and neighbourhoods and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V5.2, V9.3, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “homes, houses, and neighbourhoods” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “homes, houses, and neighbourhoods” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “homes, houses, and neighbourhoods” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.2.5.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.2.5.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “homes, houses, and neighbourhoods with parts, rooms, and furniture in the house; pets in the house”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V5.2, V9.3, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about homes, houses and neighbourhoods to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the homes, houses, and neighbourhoods and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “homes, houses, and neighbourhoods” related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.5.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading, and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house" (**V3.3, V5.2, V9.3, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.2.5.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "homes, houses, and neighbourhoods" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.2.5.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house" (**SELS3.1, SELS3.2, V5.2, V9.3, LS5**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.5.R4.**REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:**

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.2.5.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.2.5.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V5.2, V9.3, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “homes, houses and neighbourhoods” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V5.2, V9.3, V14.1, LS1, LS2, LS4, LS5**).

ENG.2.5.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “homes, houses, and neighbourhoods”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “homes, houses, and neighbourhoods”. She/He prepares three boxes on one side of the screen and mixed images/ pictures for target vocabulary related to the “homes, houses, and neighbourhoods” on the other side. She/He asks the pupils to look at the mixed pile of images/ pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding

images/pictures as the components of the theme “homes, houses, and neighbourhoods” to the correct empty boxes on the screen **(SELS1.2, CS2.5)**. In this way, images/pictures that are relevant to the concept of the theme “homes, houses, and neighbourhoods” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “homes, houses, and neighbourhoods” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of “homes, houses, and neighbourhoods”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.5.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house” **(D3.2, V5.2, V9.3, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.2.5.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V5.2, V9.3, V10.3, LS1, LS4, LS5, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if

there are technological/technical problems **(D2.5)**. To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.2.5.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded **(V3.2, V3.4, V5.2, V9.3, LS1, LS4, LS5)**.

ENG.2.5.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language **(D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3)**. To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups **(SELS2.1, SELS2.2)** (of two, three, four etc.) and to write the names of the vocabulary items "homes, houses and neighbourhoods with parts, rooms and furniture in the house; pets in the house" next to their drawings on the model related to homes, houses, and neighbourhoods. The teacher asks them to look at the Smart Board screen with the model related to homes, houses, and neighbourhoods that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum **(V4.4, V5.2, V9.3, V7.3, LS4, LS5)**.

ENG.2.5.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of "homes, houses, and neighbourhoods" in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils' age and language level **(D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20)**.

ENG.2.5.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings **(D2.5, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level **(V3.4, V7.2, LS1, LS4)**.

ENG.2.5.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V5.2, V9.3, V15.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.5.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.2.5.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils’ learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about “homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house” (**V3.2, V4.2, V5.2, V9.3, LS1, LS4, LS5**).

ENG.2.5.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.2.5.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.2.5.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “homes, houses, and neighbourhoods with parts, rooms and furniture in the house; pets in the house” (**SELS2.2, SELS3.2, V4.2, V5.2, V9.3, V11.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic

materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20)**.

ENG.2.5.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "homes, houses, and neighbourhoods" and its components such as "parts, rooms and furniture in the house; pets in the house" **(SELS2.2, SELS3.2, V4.2, V5.2, V7.2, V9.3, LS4, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.2.5.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V4.2)**. Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V4.3, V10.3)**.

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To consolidate and improve their knowledge and skills about the language for the vocabulary of a house, its parts and pets living in it in English.

Activity 1: Acting out and guessing

A guessing-acting out game could be played. Pupils are paired up and take turns to act out the target words of the theme while their peers guess and describe the actions in detail. They repeat the words and chunks when they have finished guessing. A time limit for acting out and describing can be added to increase difficulty. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Pelmanism

The Pelmanism game could be made more challenging by using a larger set of flashcards with the vocabulary of the target theme and adding a time limit. Pupils can also create their own flashcards to include in the game. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 3: King's game

They could play the King's Game with more flashcards with additional details, and pupils can be asked to describe the missing cards. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 4: Categorising

A list of categories or themes (e.g., different rooms in a house or pets) could be given by the teacher, but no specific words are provided. The vocabulary related to these themes/categories are selected by the pupils and written in their picture dictionaries. As well as drawing or finding pictures, the pupils should write relevant language chunks using the target words. For instance, for a target word such as "garden", a target language chunk such as "The rabbit is in the garden" could be written. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 5: Interactive Map

A digital tool could be used by pupils to create an interactive map of a house. Pupils write target language chunks about what they have learned from this theme are written by the pupils after they have completed their maps. They can then present their maps to the class. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 6: Digital game

To make the learning processes of pupils more enjoyable for the pupils, various digital games can be played on a Web 2.0 for differentiated learning activities. Teachers can create this digital content themselves following the coursebook or use pre-existing digital content that is aligned with the coursebook.

How to play the Word Soup Game on a Web 2.0 tool?

Create a word pool: First, choose words related to the theme and appropriate for the pupils' age and level. Write these words in a mixed order to create the word soup.

Prepare the game: Create a 'Word Soup' game via a Web 2.0 tool. Add the selected words to the game in a mixed order.

Set the rules: Explain to the pupils that they have to use the mixed words to form meaningful and correct language chunks that they have learnt in the theme. Give a specific number of points for each correct language chunk. The pupil or the group that forms the most correct sentences wins the game.

Play the game: Give the pupils a set amount of time. At the end of the time, check the sentences formed by each pupil or group. Give points for correct and meaningful sentences. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To consolidate and improve their knowledge and skills about the language for the vocabulary of a house, its parts and pets living in it according to their own pace in English.

Activity 1: Pelmanism

The Pelmanism game could be adapted by using a smaller set of flashcards with target vocabulary related to the house and including pictures to help with recognition. Pupils could work in pairs, with one turning over the cards and the other calling out the names, and the teacher could provide clues or gestures to help with recall. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: King's game

King's Game could also be adapted with fewer flashcards to be used with extended viewing time. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 3: Picture dictionary

The teacher gives the pupils a list of target words and corresponding pictures. The pupils copy the words and paste or draw pictures next to each word in their picture dictionaries. A template with blank spaces for words and pictures is used to guide pupils on where to place each element. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 4: Digital game

Pupils use a digital tool with pre-defined house templates where the rooms are already outlined. Pupils drag and drop images associated with parts of the house into the correct places on the map. They can then

present their maps to the class. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 5: Digital game

To make the learning process of pupils more enjoyable for the pupils, digital games are used for differentiated learning activities. Teachers can create this digital content themselves, following the coursebook, or use pre-existing digital content that matches the coursebook. They can play the matching game on a Web 2.0 tool, where they have to match the item displayed on the screen with its English equivalent. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

TEACHER REFLECTIONS

THEME 6: LIFE IN THE CITY & THE WORLD

Sub-themes: Basic food types, items, and meals

This theme is centred on the concept of “life in the city and the world” and covers the sub-themes of “basic food types, items, and meals”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 2 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.2.6.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “life in the city and the world with basic food types, items, and meals”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures, and context.*

ENG.2.6.L2. Pupils can bring information about the current content on “life in the city and the world with basic food types, items, and meals” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.2.6.L3. Pupils can make meaning of/derive meaning from the current content on “life in the city and the world with basic food types, items, and meals” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.2.6.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “life in the city and the world with basic food types, items, and meals” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.2.6.P1. Pupils can select and use the target phonological elements of the current content about “life in the city and the world with basic food types, items, and meals” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups, and individually.*
- c) Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously, and effectively when communicating with others.*

ENG.2.6.R1. Pupils can get ready for the reading-comprehension process about the current content on “life in the city and the world with basic food types, items, and meals”.

- a) Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences, and clues to the current content.*
- c) Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.2.6.R2. Pupils can bring information about the current content on “life in the city and the world with basic food types, items, and meals” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.2.6.R3. Pupils can make meaning of/derive meaning from the current content about “life in the city and the world with basic food types, items, and meals” by reading it carefully.

- a) Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.2.6.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “life in the city and the world with basic food types, items, and meals” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.2.6.V1. Pupils can select and use the target vocabulary of the current content about “life in the city and the world with basic food types, items, and meals” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.2.6.G1. Pupils can select and use the language including target grammatical elements of the current content about “life in the city and the world with basic food types, items, and meals” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*

- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.2.6.W1. Pupils can get ready for the writing-expression process about the current content on “life in the city and the world with basic food types, items, and meals” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.2.6.W2. Pupils can copy the model/example on the writing task about the current content on “life in the city and the world with basic food types, items, and meals” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.2.6.W3. Pupils can organise and form a content for the assigned writing task on the current content “life in the city and the world with basic food types, items, and meals” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.2.6.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “life in the city and the world with basic food types, items, and meals”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.2.6.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “life in the city and the world with basic food types, items, and meals” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully, and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.2.6.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the city and the world with basic food types, items, and meals” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*

- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.2.6.S1. Pupils can get ready for the speaking-expression process about the current content on “life in the city and the world with basic food types, items, and meals” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.2.6.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “life in the city and the world with basic food types, items, and meals”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.2.6.S3. Pupils can organise simple new verbal content on “life in the city and the world with basic food types, items, and meals” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.2.6.S4. Pupils can form a simple new verbal content on “life in the city and the world with basic food types, items, and meals” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.2.6.S5. Pupils can reorganise and use information about the current theme on “life in the city and the world with basic food types, items, and meals” by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate, and necessary way by reorganising it individually and verbally.*
- b) *Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.2.6.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the city and the world with basic food types, items, and meals” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

LIFE IN THE CITY & THE WORLD

Sub-themes: Basic food types, items, and meals

Target Vocabulary in Use (with revisional vocabulary):

Liquids: Water, milk, ayran, tea, coffee.

Fruits: Tomatoes, bananas, apples, oranges, pears, strawberries, grapes, cherries.

Vegetables: Potatoes, carrots, beans, peppers, lettuce, cucumbers, spinach, broccoli, garlic, cauliflower, courgette.

Basic food: Chicken, fish, bread, meat, eggs.

Quantifiers: Some (to be used naturally and automatically with all food items, without explaining its grammatical function, with language chunks "I've/have got some beans. She's/has got some bread".

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Structures will be introduced and used through language chunks rather than explicit rule teaching (no rules will be taught).

"The Simple Present Tense":

Do you like bread? Yes, I do.

Do you like beans? No, I don't.

Function: Telling preferences for food.

"There is/ There are" (with only countable nouns):

(Is there a banana in the kitchen?) Yes, there is. No, there isn't).

(Are there any bananas in the kitchen? Yes, there are. No there aren't).

Function: Talking about the existence of food.

Can for possibility: Can I have bread? Yes, you can. No, you can't.

Function: Making polite requests.

Target Social Language in Use:

I'm hungry!

I'm thirsty!

Yummy!

It's delicious!

Time for breakfast/lunch/dinner!

Thanks for breakfast/lunch/dinner!

Enjoy your meal!

Let's go and meet them!

Target Phonological Sounds in Use:

Vowels: u

Consonants: w, x, y, z

Vowel: u: (/ju:/, /ʌ/, /ju:/)

w: (/w/); x: (/ɛks/, /ks/, /gz/); y: (/waɪ/, /j/, /ɪ/, /i:/); z: / (zed/ (Br), /zi:/ (AmE.), /z/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of “food” is present in all languages because it is one of the most basic human needs and all people in different parts of the world eat some kind of food. People who start to learn a new language bring with them their pre-existing knowledge and transfer it to their new language learning. So, Year 2 Primary school pupils will know what food means as a concept but will not know its equivalents in another language. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Principles

Basic food items are presented as a topic where certain categories, items, and related actions function as important components.

Basic food items serve as an essential context where foundational social interactions of expressing preferences, asking for items, and making polite requests are practiced naturally and authentically in EFL.

Key Concepts:

Items, food, basic food, basic food items, food types, meals.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils work on self-recordings (visual, audio) at school/ at home presenting an interview with a classmate/friend/family member about their preferences for food with pictures and/or realia. The assignment is evaluated using rubrics.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of the food and preferences related to it in their own language. As the pupils are 7 years old, they can know what food is and what preferences for it mean. They are also expected to understand other people’s and their own preferences for food and to be able to express them in their own language. This knowledge would prepare them to identify the same concepts in their foreign language, English, as well. It is assumed that they will have learnt how to ask what things are and how to introduce them using language chunks such as “What’s/is it/this? This is a ...”; and also their colours “What colour...? It’s/is red” in English from the previous themes. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn.

In the classroom, a fun warm-up activity which is not related to the theme “basic food items” can be conducted as an ice-breaking session to help learners be ready for the whole learning process in the class with positive feelings for their well-being. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the food as well as other people’s and their own food preferences. Recalling and practising with basic colours (white, black etc...) and simple adjectives (small, big etc...) in English that they have learnt in the previous themes would be helpful as a basis for moving on and learning the current content on the concept of “food”. Therefore, a dialogue game can be played to revise colours, simple adjectives for physical descriptions (small, big, short, long), and language chunks such as “What’s/is it? This is a...” “What colour is it? It’s/is red”, and “I’ve/have got ... She’s/has got ... They’ve/have got ...” With the vocabulary from the previous

themes by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics.)

Establishing Links

Pupils are asked to recall the concept of “food” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current (new) concept, “food” in English.

To remind them of the pre-existing background knowledge they already have about the concept of “food”, a short animated scene can be prepared and shown (it can be a paper picture format if there are technological problems) on the blackboard/Smart Board before the main teaching/learning flow of the class begins. The animated scene shows a fridge with food inside (To prepare the animated page, some Web 2.0 programmes can be used). The pupils are asked to look at the animated page. When they have finished looking at it, the teacher asks them in Turkish if they have understood what was on the page. She/He wants them to nod yes or to indicate whether they understood what it was about or not.

The teacher asks them to think about it until they see the next visual, which is the main entry material of the theme, the digital entry story, without asking any further questions in Turkish or English.

An example practice could be done to point correctly to a picture of a basket and pictures of basic food types, items, and meals in it correctly when they are given instructions by the teacher with English, Turkish and/or with mimics and gestures. Pupils give responses by pointing out relevant so-called pictures without speaking any English and/or Turkish.

In this way, connections are made between pre-existing knowledge about school (in their minds) in their own language and the present information about the concept of “food” through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.2.6.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “life in the city and the world” in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of life in the city and the world can also be created using Web 2.0 programmes.) They can guess the sub-concepts of life in the city and the world, so they can easily understand that the current theme will be “life in the city and the world” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.2.6.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “life in the city and the world with basic food types, items and meals” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V13.1, V14.3, V17.1, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.2.6.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about life in the city and the world and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for life in the city and the world with basic food types, items and meals and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V13.1, V14.3, V17.1, LS1, LS5**)). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “life in the city and the world” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “life in the city and the world” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “life in the city and the world” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/ He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**)). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.2.6.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.2.6.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “life in the city and the world with basic food types, items and meals”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V13.1, V14.3, V17.1, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about life in the city and the world to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the life in the city and the world and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “life in the city and the world” related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.6.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and

speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually **(V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3)**. For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "life in the city and the world with basic food types, items and meals" **(V3.3, V13.1, V14.3, V17.1, LS2, LS4, LS5, CS2.8)**. At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know **(SELS1.1, V3.4, LS1, CS2.16.2)**. She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later **(D3.2, D3.6, V12.1, CS2.10, CS2.12)**.

ENG.2.6.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "life in the city and the world" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus **(D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12)**.

ENG.2.6.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts **(V3.4, V7.2)**. After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1, V3.3, LS1, LS4, CS2.14)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "life in the city and the world with basic food types, items and meals" **(SELS3.1, SELS3.2, V13.1, V14.3, V17.1, LS5)**. During this process pupils work collaboratively to exchange information, thoughts, and feelings **(SELS2.2, V4.2, CS2.6)**. This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.6.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer pupils express what they think and feel about them **(V20.4, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1)**. The

teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.2.6.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.2.6.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “life in the city and the world with basic food types, items and meals”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V13.1, V14.3, V17.1, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “life in the city and the world” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the life in the city and the world with basic food types, items and meals, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V13.1, V14.3, V17.1, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.2.6.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “life in the city and the world”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “life in the city and the world”. She/He prepares three boxes on one side of the screen and mixed images/ pictures for target vocabulary related to the “life in the city and the world” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “life in the city and the world” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “life in the city and the world” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “life in the city and the world” on the blackboard/ whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1,**

SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5). To consolidate the meanings of the new vocabulary items for the concept of “life in the city and the world”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2).** These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5).** This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4).** This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.6.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “life in the city and the world with basic food types, items, and meals” **(D3.2, V13.1, V14.3, V17.1, LS5, CS2.2).** While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14).** She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7).** The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4).**

ENG.2.6.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “life in the city and the world with basic food types, items and meals”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V10.3, V13.1, V14.3, V17.1, LS1, LS4, LS5, CS2.4).** Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5).** To organise the pupils’ further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13).** There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2).** For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2).**

ENG.2.6.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “life in the city and the world with basic food types, items and meals” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V13.1, V14.3, V17.1, LS1, LS4, LS5**).

ENG.2.6.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “life in the city and the world with basic food types, items and meals” next to their drawings on the model related to life in the city and the world. The teacher asks them to look at the Smart Board screen with the model related to life in the city and the world that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.4, V7.3, V13.1, V14.3, V17.1, LS4, LS5**).

ENG.2.6.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “life in the city and the world” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.2.6.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.2.6.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “life in the city and the world with basic food types, items and meals” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V13.1, V14.3, V15.1, V17.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.2.6.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15)**. Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4)**.

ENG.2.6.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "life in the city and the world with basic food types, items and meals" **(V3.2, V4.2, V13.1, V14.3, V17.1, LS1, LS4, LS5)**.

ENG.2.6.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4)**. The spoken content of the model becomes a path for them to follow.

ENG.2.6.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13)**.

ENG.2.6.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "life in the city and the world with basic food types, items and meals" **(SELS2.2, SELS3.2, V4.2, V11.1, V13.1, V14.3, V17.1, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20)**.

ENG.2.6.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school

by using the language including the target words, language grammar in use, and the social language for the theme “life in the city and the world” and its components such as “basic food types, items, and meals” (**SELS2.2, SELS3.2, V4.2, V7.2, V13.1, V14.3, V17.1, LS4, LS5, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.2.6.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To form a creative menu in English by using target vocabulary.

Activity 1: Creating a menu

Pupils work in pairs or small groups to create a menu for an imaginative restaurant. Different food items and drinks are written down, using the vocabulary and language chunks that have been learnt. The menus are then presented to the class. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Foodie Adventure Game

The teacher creates a large poster or a printable game board with a winding path. Food cards with pictures and names (water, milk, bread, chicken, fish, eggs, tomatoes, bananas, apples, potatoes, carrots, beans) and preference cards with language chunks like “Do you like [food item]?” and “Yes, I do.” / “No, I don't.” are provided. The game board is designed with a start and finish, and a winding path with spaces is drawn by the teacher. Food cards and preference cards are placed in separate piles. Spaces on the board are marked where players must draw a card from the food or preference pile. Players take turns rolling the cube and moving their token along the path. If they land on a space with a food symbol, they draw a food card, and use the vocabulary in a sentence, e.g., “I've got some beans”. When landing on a space with a preference symbol, a preference card is drawn, and the question is answered, e.g., “Do you like chicken?” with “Yes, I do” or “No, I don't”. Social language expressions like “I'm hungry!” or “It's delicious!” are used when a card with these language chunks are drawn. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 3: Drama – Role Play

A market stall is set up by pupils. Pupils work in pairs. One pupil from the expansion group can be the seller and the other pupils can be the customer. They can have a dialogue like the one given below.

CUSTOMER: Hello!

SELLER: Hi, welcome!

CUSTOMER: What is your name?

SELLER: My name is

CUSTOMER: I am I am thirsty.

SELLER: Milk? Do you like milk?

CUSTOMER: No, I don't like milk.

SELLER: Do you like water?

CUSTOMER: Yes, I like water.

SELLER: Here you are!

CUSTOMER: Thank you!

SELLER: Do you like apples?

CUSTOMER: Red apples?

SELLER: No, green apples.

CUSTOMER: No! I don't like green apples.

Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 4: Introducing yourself

Pupils are asked to prepare a video. In this video, one of the animals they have previously learnt about will be the main character. They can use a toy or a picture of the animal they have chosen. They can introduce the animal by animating it (to introduce itself) talking about its colour and body parts. Immediately afterward, they should also show and introduce food/drink in the video and say whether the animal likes them or not. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To help pupils talk about food, basic food items, and their preferences for food in English by using target vocabulary.

Activity 1: Foodie Adventure Game

The game board is simplified with fewer spaces and the focus is placed on basic language use. Turns are made by rolling the cube and moving tokens along the path. If they land on a space with a food symbol, a food item card is drawn, and the vocabulary is used in a simple sentence, e.g., "I've got some milk". When landing on a space with a preference symbol, a preference card is drawn, and the question is answered with a simple response, e.g., "Do you like chicken?" with "Yes, I do" or "No, I don't". Social language expressions such as "Yummy!" or "I'm thirsty!" are used when prompted by the cards. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Activity 2: Matching

Pupils are told that there will be an activity related to the food they learnt in the theme and they are asked to bring food or drink (milk etc.) from home that matches the words they have learnt. A table is placed in front of the board. Each pupil stands up and introduces the food/drink they have brought and says whether they like it or not. Then they put the food or drink on the table. At the end of the activity, a market stall will have been created.

e.g.: This is a banana. I like bananas.

Low achievers (pupils) can make a video where they show foods/drinks and say whether they like it or not. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

TEACHER REFLECTIONS

FOR MORE TEACHER REFLECTIONS SCAN THE QR CODE.

PRIMARY-YEAR 3 (LEVEL: A1.2)

THEME 1: SCHOOL LIFE

Sub-themes: Greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations

This theme is centred on the concept of “school life” and covers the sub-themes of “greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS FLFS1. Listening/Watching-Comprehension
FLFS2. Reading-Comprehension
FLFS3. Speaking-Expression
FLFS4. Writing-Expression
FLSS1. Gramming: Selection and Use
FLSS2. Vocabulary: Selection and Use
FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS

Year 3 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.3.1.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”.

- a) Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.3.1.L2. Pupils can bring information about the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” together with key details and main components while listening/watching it.

- a) Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.3.1.L3. Pupils can make meaning of/derive meaning from the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” through details by listening/watching it carefully.

- a) Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) Pupils locate the components of the current content within the whole by listening and watching it.*
- c) Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.3.1.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” in a very simple way.

- a) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.3.1.P1. Pupils can select and use the target phonological elements of the current content about “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.3.1.R1. Pupils can get ready for the reading-comprehension process about the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”.

- a) Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.3.1.R2. Pupils can bring information about the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.3.1.R3. Pupils can make meaning of/derive meaning from the current content about “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” by reading it carefully.

- a) Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*

- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.3.1.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.3.1.V1. Pupils can select and use the target vocabulary of the current content about “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.3.1.G1. Pupils can select and use the language including target grammatical elements of the current content about “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*

- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.3.1.W1. Pupils can get ready for the writing-expression process about the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.3.1.W2. Pupils can copy the model/example on the writing task about the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.3.1.W3. Pupils can organise and form a content for the assigned writing task on the current content “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.3.1.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.3.1.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.3.1.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.3.1.S1. Pupils can get ready for speaking-expression process about the current content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.3.1.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.3.1.S3. Pupils can organise simple new verbal content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.3.1.S4. Pupils can form a simple new verbal content on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*

- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.3.1.S5. Pupils can reorganise and use information about the current theme on “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) *Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.3.1.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “school life with greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

SCHOOL LIFE

Sub-themes: greetings and introductions at school; people and places at school; months of the year; ages and birthday celebrations; national days and celebrations

-Greetings:

How are you? I'm good, thanks!

Good evening!

Good afternoon!

Good night!

Whose birthday is in October?

Do you need help?

Why not?

What's the matter?

Be careful!

Who wants to tell me...?

Maybe!

I have an idea!

Let's talk about.....

It sounds great!

You must be quiet!

Target Vocabulary in Use (with revisional vocabulary):

-People at school: A classmate, a librarian, a school nurse, a headteacher, a caretaker.

-Places at school: An art room, a music room, a meeting room, an office, a sports field, a corridor, a gym.

-Birthday celebrations: Birthday, a birthday party, a candle, a cake, a balloon, a gift, summer holiday, a surprise.

Months of the year: January, February, March, April, May, June, July, August, September, October, November, December.

Verbs: To prepare, to decorate, to bring, to play the guitar, write a song, to ask, to find, to run, to help.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

("To be-present")(am, is, are): (+), (-), (?)

Who's/is this/she/he? This is Mr. Blue.

Where is Daphne? She's/is in the library.

What month is it now? It's/is September.

How old are you? I'm 8 years old.

When's/is your birthday? It's/is in July.

Function: Telling who people are, where people and things are, what month it is.

-There is / There are (+), (-), (?) (Only countable nouns with numbers will be used).

Is there a nurse at school? Yes, there is a nurse at school.

How many caretakers (are there at school)? (There are) two caretakers (at school).

Function: Describing the presence and quantity of countable nouns.

-Must/ mustn't (for obligation): (+), (-), (?)

You must follow the rules at school. You mustn't run in the corridor/at school.

Function: Expressing obligations and prohibitions clearly.

-Personal Pronouns: I, you, we, they, he, she, it

Function: Referring to the speaker as the subject.

-Prepositions: in, on, at

Function: Describing locations, time, and positions.

-WH-question words: what, where, who, when

Function: Asking what a thing is, where a place is, who a person is, when a time is.

-Question words: how

Function: Asking how a thing is.

-Demonstrative pronouns: this, that

Function: "this": Referring to something specific that is close to the speaker in space, time, or context; and "that": referring to something specific that is farther away in space, time, or context from the speaker.

Target Social Language in Use:

See you later!

Have a nice/good day!

Have a nice/good weekend!

It's great/nice/good to see you.

Take care!

Cool!

Happy Birthday!

Target Phonological Sounds in Use:

a, b

Vowel a:

a: (/a:/, /aeɪ/, /ə/, /ɑ:/, /eɪ/, /a:/, /ɑ/, /ɔ:/, /eə/)

Consonant: b

b: (/b/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of "school life" is present in almost all languages because it is one of the most basic parts of human beings' lives and all children in different parts of the world go to different types of schools. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 3 will know what "a school and school life" mean as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Principles

School is presented as a place where people, places, and activities function as key components.

School is an important context where initial social interactions, such as greetings, introductions, and celebrations, are naturally and authentically practiced in EFL.

Key Concepts:

Greetings, introductions, people, places, greetings at school, introductions at school, people at school, places at school, months, year, months of the year, ages, birthdays, ages and birthdays, national days, celebrations, national days and celebrations.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils write and design “a diary page” writing about people they meet, places they go and routines they have at school by using photos they take and pictures they draw. They will present it to the class and ask the other pupils to guess who the people and places they will present in their diary/journal page. The class will make guesses about them and their guesses will be checked after the presentations. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of the “school life” with its components such as “greetings and introductions at school; people and places at school; months of the year; ages and birthday celebrations; national days and celebrations” in their own language. As the pupils are 8-year-old primary school children, they can know what “greetings and introductions at school; people and places at school; months of the year; ages and birthday celebrations; national days and celebrations” mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as “What’s/is it/this? This is a”; “Who is this/...? This is Mr Jackson” in English from the previous themes and/or year. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about “school life” as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of “greetings and introductions at school; people and places at school; months of the year; ages and birthday celebrations; national days and celebrations”. Therefore, a dialogue game can be played to revise “school life with greetings, people and places” they learnt before. Some language chunks such as “What’s/is it? This is a...” “Who’s this? This is Mrs. Willis” are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of “school life” and its components such as “greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”, by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of

the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.3.1.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “school life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2)**. For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of school life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of school life, so they can easily understand that the current theme will be “school life” **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17)**.

ENG.3.1.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier **(CS2.11)**. The introductory digital story is watched to identify the target theme “school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically **(D3.2, SELS1.1, V3.3, V4.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2)**.

ENG.3.1.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about school life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story **(V3.3, V4.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS1, LS5)**. When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum **(D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8)**. After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “school life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “school life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “school life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils **(SELS2.2, V3.4, V4.2, LS1, LS2)**. When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard **(SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10)**. This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories **(D1.2, D1.6, D2.3, CS2.12)**.

ENG.3.1.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V7.2)**. Some volunteer pupils express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG.3.1.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0

programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V4.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about school to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the school and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “school life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG. 3.1.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils’ language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on “school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” (**V3.3, V4.2, V14.1, V14.3, V15.5, V18.2, V19.1, V19.2, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds

them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later **(D3.2, D3.6, V12.1, CS2.10, CS2.12)**.

ENG.3.1.6.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "school life" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus **(D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12)**.

ENG.3.1.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts **(V3.4, V7.2)**. After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1, V3.3, LS1, LS4, CS2.14)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations" **(SELS3.1, SELS3.2)**. During this process pupils work collaboratively to exchange information, thoughts, and feelings **(SELS2.2, V4.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS5, CS2.6)**. This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.1.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer pupils express what they think and feel about them **(V20.4, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V4.4, V10.3)**.

ENG.3.1.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions **(SELS1.1, V3.2, LS1, LS2, LS4)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.3.1.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V4.2, V14.1, V14.3, V15.5, V18.2, V19.1, V19.2, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “school life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V4.2, V14.1, V14.3, V15.5, V18.2, V19.1, V19.2, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.3.1.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “school”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “school life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “school life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “school” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “school life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “school life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5**). To consolidate the meanings of the new vocabulary items for the concept of “school”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. (**SELS2.2**). These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities (**D2.5, SELS3.1, V4.2, V7.2, LS5**). This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and

check each other's spelling using the words written on the model school on the blackboard/Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.1.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils' attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme "school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations" **(D3.2, V4.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils' identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say "Stop!" when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.3.1.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme "school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V4.2, V10.3, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, V14.1 14.3, V15.5, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.3.1.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "school life with (extended) greetings and introductions at school, people and places at school,

months of the year, ages and birthday celebrations; national days and celebrations” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V4.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS1, LS4, LS5**).

ENG.3.1.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” next to their drawings on the model related to school life. The teacher asks them to look at the Smart Board screen with the model related to school life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V4.4, V7.3, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS4, LS5**).

ENG.3.1.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “school life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.3.1.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.3.1.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V14.1 14.3, V15.1, V15.5, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.1.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15)**. Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4)**.

ENG.3.1.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations" **(V3.2, V4.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS1, LS4, LS5)**.

ENG.3.1.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4)**. The spoken content of the model becomes a path for them to follow.

ENG.3.1.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13)**.

ENG.3.1.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "school life with (extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations" **(SELS2.2, SELS3.2, V4.2, V11.1, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20)**.

ENG.3.1.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation

and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "school life" and its components such as "(extended) greetings and introductions at school, people and places at school, months of the year, ages and birthday celebrations; national days and celebrations" (**SELS2.2, SELS3.2, V4.2, V7.2, V14.1 14.3, V15.5, V18.2, V19.1, V19.2, LS4, LS5, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.3.1.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To talk about the roles at school and places at school in English by using target vocabulary items through interactive activities.

Activity 1: Pantomime

The teacher hangs pictures of places at school on the whiteboard and asks the whole class to repeat the words. The teacher splits the class into two teams (Team A and Team B). A pupil from Team A draws a role card without showing it to others.

The pupil pantomimes the role (e.g., pretending to read a book for "a librarian" or sweeping the floor for "a cleaner"). Team B, guessing the role, says the correct place and matches the places at school on the board with the role cards by hanging them on the board. When matching is over, pupils can say both the name of the place and the name of the roles at school. The teacher supports the correct pronunciation of target words. They repeat every word in a sentence as the whole class. Teams switch roles, repeating the steps until all pupils have participated or all cards have been used. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To talk about the roles and places at school in English by using target vocabulary items through interactive activities.

Activity 2: Pantomime

The teacher hangs pictures of places at school on the whiteboard and asks the whole class to repeat the words. The teacher splits the class into two teams (Team A and Team B). A pupil from Team A draws a role card without showing it to others.

The pupil pantomimes the role (e.g., pretending to read a book for “a librarian” or sweeping the floor for “a cleaner”). Team B matches the school places on the board with the role cards by hanging them on the board. They repeat every word (or in a sentence) as the whole class. Teams switch roles, repeating the steps until all pupils have participated or all cards have been used. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

TEACHER REFLECTIONS

FOR MORE TEACHER REFLECTIONS SCAN THE QR CODE.

THEME 2: CLASSROOM LIFE

Sub-theme: Classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year

This theme is centred on the concept of “classroom life” and covers the sub-themes of “classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 3 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.3.2.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.3.2.L2. Pupils can bring information about the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.3.2.L3. Pupils can make meaning of/derive meaning from the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.3.2.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.3.2.P1. Pupils can select and use the target phonological elements of the current content about “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.3.2.R1. Pupils can get ready for the reading-comprehension process about the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.3.2.R2. Pupils can bring information about the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.3.2.R3. Pupils can make meaning of/derive meaning from the current content about “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*

- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.3.2.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.3.2.V1. Pupils can select and use the target vocabulary of the current content about “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.3.2.G1. Pupils can select and use the language including target grammatical elements of the current content about “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*

- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.3.2.W1. Pupils can get ready for the writing-expression process about the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.3.2.W2. Pupils can copy the model/example on the writing task about the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.3.2.W3. Pupils can organise and form a content for the assigned writing task on the current content “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.3.2.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.3.2.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*

- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.3.2.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.3.2.S1. Pupils can get ready for speaking-expression process about the current content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.3.2.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.3.2.S3. Pupils can organise simple new verbal content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.3.2.S4. Pupils can form a simple new verbal content on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.3.2.S5. Pupils can reorganise and use information about the current theme on “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.3.2.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “classroom life with classroom instructions and language; classroom furniture, objects, and devices, school subjects, seasons of the year” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

CLASSROOM LIFE

Sub-themes: Classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year

Target Vocabulary in Use (with revisional vocabulary):

Classroom instructions and classroom language (Not to teach as target language chunks with structural rules but to be used constantly by the teacher as meta-language)

Open/ Close your book, please!

Open page....in your books, please!

Take your seat, please!

Say it again, please!

Listen and repeat, please!

Repeat after me, please!

Watch the video, please!

May/Can I come in?

Colour it, please!

Circle it, please!

Work in pairs, please!

Match the words, please!

Try again, please!

Answer the question, please!

Speak louder, please!

Spell the word, please!

Classroom language:

Let's start the lesson!

That's correct!

Have you finished?

Last five minutes!

Nice/great job!

Thank you!

You're welcome!

Time's over!

It's on time!

Perfect!

Look outside!

Turn on the lights!

Answer the question!

Try again!

Classroom furniture: A teacher's desk, a student's desk, a bookshelf, a teacher's chair, a locker, a basket

Classroom features: lights.

Classroom objects: A pen, a ruler, a coursebook, a workbook, an exercise book (notebook-AmE.), a map, a school bag, a paintbrush, a bin (trash can-AmE.), a white-blackboard, a duster, a flashcard, a card.

Classroom devices: A keyboard, a mouse, a microphone.

School subjects: A lesson (class-AmE.), Life Study, Maths, Turkish, English, Music, Sports, PE.

Nouns: A word, a letter, a point, a winner, a prize

Colours: Dark, light: (red, white, black, pink, grey, blue, purple, yellow, brown, green)

Weather: Sunny, (it's) raining (rainy-AmE.), (it's) snowing (snowy-AmE.), warm, windy.

Cardinal Numbers: 20-50

The alphabet (song)

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

***Local Cultural, Social and Moral Considerations of the Theme**

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

-Language Chunks "To be" (present): (+), (-), (?):

What time is it? It's five o'clock.

What lesson is it now? It's/is Maths.

How's/is the weather today/now? It's/is raining today .(It's rainy (AmE.) today).

Function: Telling what things are, what colour things are, existence of lessons, number of things and people, what people are wearing, how the weather is.

-Countable nouns: a ruler- rulers

What are they? They are rulers.

Function: Describing countable nouns builds understanding of singular and plural forms.

-There is/there are: (only for countable nouns)

Is there a Maths lesson on Monday?

(Yes, there's/is a Maths lesson on Monday). Yes, there is.

Function: Expressing the existence of things and people.

-How many rulers are there on the table?

There are two rulers on the table. There are two rulers. Two rulers.

Function: Counting and describing quantities.

-Have got/has got: (+)(?)(only with countable nouns and with numbers)

How many pencils have you got? I've/have got two pencils.

Function: Describing possession of objects.

-Possessive adjectives: my, his, her, its, our, your, their

Function: Describing ownership by modifying a noun to show ownership

-Question words: what time, how many

Function: Asking time and quantity.

-Time expressions: today, now

Function: Describing the present.

Target Social Language in Use:

You look great!

What nice weather!

It's freezing!

Everything is all right!

That's right!

Target Phonological Sounds in Use:

Consonants: c, d,

Consonants: c: (/si/, /k/); d: (/d/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of “classroom life” is present in almost all languages because it is one of the most basic parts of human beings’ lives and all children in different parts of the world go to different types of schools. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 3 will know what “a classroom and classroom life” mean as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Principles

Classroom is presented as a place where classroom instructions, furniture, objects, and devices function as important components.

Classroom is an important context where initial social interactions, such as understanding classroom language and exploring school subjects, are naturally and authentically practiced in EFL.

Key Concepts:

Instructions, language, objects, devices, furniture, classroom, classroom instructions, classroom language, classroom objects, classroom devices, classroom furniture, school, school subjects, seasons, year, seasons of the year.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils will design a Picture Dictionary titled “Classroom Life”, including vocabulary related to classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year”. They will organise the dictionary into sections, such as instructions (“Open your books”), furniture (“a teacher’s desk”), objects (“a pen”), devices (“a keyboard”), school subjects (“English, Maths”), and seasons (“winter, spring”). Each word will be paired with a drawing or printed picture and labelled correctly. Pupils will copy simple example sentences for each word, such as “There is a pen on the desk.” They are encouraged to design their dictionaries creatively with colours and decorations. Finally, pupils will present 5-7 selected words and sentences to the class. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of the “classroom life” with its components such as “classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year” in their own language. As the pupils are 8-year-old primary school children, they can know what classroom life, classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as “What’s/is it? It’s/is a chair. What colour is it? It’s/is blue. What colour is the chair? The chair is blue. It’s blue.” in English from the previous themes and/or year. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils' physical, cognitive, affective, and social factors are appropriate and suitable for learning about "classroom life" as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of "classroom life, classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year". Therefore, a dialogue game can be played to revise "classroom life, classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year" they learnt before. Some language chunks such as "What's/is it? It's/is a chair. What colour is it? It's/is blue. What colour is the chair? The chair is blue. It's blue." are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of "classroom life" and its components such as "classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year", by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are

combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.3.2.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “classroom life” in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of classroom life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of classroom life, so they can easily understand that the current theme will be “classroom life” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, V5.3, V14.1, V18.2, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.3.2.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V5.3, V14.1, V18.2, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.3.2.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about classroom life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V5.3, V14.1, V18.2, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “classroom life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “classroom life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “classroom life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the

Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while **(CS2.3)**. She/ He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils **(SELS2.2, V3.4, V4.2, LS1, LS2)**. When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard **(SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10)**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories **(D1.2, D1.6, D2.3, CS2.12)**.

ENG.3.2.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V7.2)**. Some volunteer pupils express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG.3.2.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class **(V3.4, V5.3, V14.1, V18.2, LS1, LS4, LS5, CS2.16.3)**. The teacher could offer variations with some techniques, such as showing the picture of the target words about classroom life to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing **(D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the classroom life and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him **(SELS2.1, CS2.6)**. Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out **(V3.4, V4.2, V15.1, LS4)**. These “classroom life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques **(SELS2.3, V11.1, V12.2, LS5, CS2.9)**. Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not **(D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.2.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year" (**V3.3, V5.3, V14.1, V18.2, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.3.2.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "classroom life" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.3.2.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year" (**SELS3.1, SELS3.2, V5.3, V14.1, V18.2, LS5**). During this process pupils work collaboratively to exchange

information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.2.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.3.2.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.3.2.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V5.3, V14.1, V18.2, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “classroom life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V5.3, V18.2, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.3.2.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “classroom life”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “classroom life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “classroom life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask

each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “classroom life” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “classroom life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “classroom life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5**). To consolidate the meanings of the new vocabulary items for the concept of “classroom life”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. (**SELS2.2**). These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities (**D2.5, SELS3.1, V4.2, V7.2, LS5**). This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board (**SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4**). This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.2.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year” (**D3.2, V5.3, V14.1, V18.2, LS5, CS2.2**). While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same (**CS2.14**). She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said (**SELS3.1, CS2.7**). The teacher stops if the pupils are correct, but not if they are not (**V3.3, V4.1, V7.1, LS1, LS2, LS4**).

ENG.3.2.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group (**SELS2.2, V3.1, V5.3, V10.3, V14.1, V18.2, LS1, LS4, LS5, CS2.4**). Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8),

and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.3.2.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded **(V3.2, V3.4, V5.3, V14.1, V18.2, LS1, LS4, LS5)**.

ENG.3.2.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language **(D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3)**. To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups **(SELS2.1, SELS2.2)** (of two, three, four etc.) and to write the names of the vocabulary items "classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year" next to their drawings on the model related to classroom life. The teacher asks them to look at the Smart Board screen with the model related to classroom life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum **(V4.4, V5.3, V7.3, V14.1, V18.2, LS4, LS5)**.

ENG.3.2.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of "classroom life" in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils' age and language level **(D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20)**.

ENG.3.2.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written

products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings **(D2.5, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level **(V3.4, V7.2, LS1, LS4)**.

ENG.3.2.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme "classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year" from simple to more expanded versions in their writing **(SELS2.2, SELS2.3, V4.2, V5.3, V14.1, V15.1, V18.2, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20)**. These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.2.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15)**. Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4)**.

ENG.3.2.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year" **(V3.2, V4.2, V5.3, V14.1, V18.2, LS1, LS4, LS5)**.

ENG.3.2.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4)**. The spoken content of the model becomes a path for them to follow.

ENG.3.2.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13)**.

ENG.3.2.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “classroom life with (extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year” (**SELS2.2, SELS3.2, V4.2, V5.3, V11.1, V14.1, V18.2, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.3.2.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities (**SELS2.3, CS2.20**). Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “classroom life” and its components such as “(extended) classroom instructions and language; classroom furniture, objects, and devices; school subjects; seasons of the year” (**SELS2.2, SELS3.2, V4.2, V5.3, V7.2, V14.1, V18.2, LS4, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.3.2.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn’t work in teaching the theme and pupils’ learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To identify classroom objects in English by using target vocabulary and target language chunks.

Activity 1: What's Missing

The teacher gathers 8-10 common classroom objects. After clearly naming each item and demonstrating it, the teacher asks the whole class to repeat. Before starting, the teacher ensures that the pupils understand the material. The teacher covers the items with a cloth, then secretly removes one object while ensuring the pupils are not watching. Uncover the remaining items and ask the class, "What's missing?". Encourage pupils to raise their hands or call out the answer by using "there is, there are, there isn't, there aren't" forms. If a student answers correctly, they receive a point or a sticker as a reward. After the student's answer, the teacher repeats the sentence to the whole class once more. This activity helps to improve memory, vocabulary recall, and speaking confidence in a fun and interactive way. The teacher gives them encouraging remarks to boost their confidence. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To practice the language for classroom objects in English by guessing and using target vocabulary.

Activity 2: What's Missing

The teacher gathers 8-10 common classroom objects. After clearly naming each item and demonstrating each one one at a time, the teacher asks the whole class to repeat. Before starting, the teacher ensures that the pupils understand the material. The teacher covers the items with a cloth, then secretly removes one object while ensuring the pupils are not watching. Uncover the remaining items and ask the class, "What's missing?". Encourage pupils to raise their hands or call out the answer. If a student answers correctly, they receive a point or a sticker as a reward. After the pupil's answer, the teacher repeats the target word to the whole class once more. This activity helps to improve memory, vocabulary recall, and speaking confidence in a fun and interactive way. The teacher gives them encouraging remarks to boost their confidence. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 3: PERSONAL LIFE

Sub-themes: Parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing

This theme is centred on the concept of “personal life” and covers the sub-themes of “parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 3 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.3.3.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.3.3.L2. Pupils can bring information about the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.3.3.L3. Pupils can make meaning of/derive meaning from the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.3.3.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*

- b) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.

ENG.3.3.P1. Pupils can select and use the target phonological elements of the current content about “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.
- b) Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.
- c) Pupils recognise the target phonological elements of the current content when they are heard in different contexts.
- d) Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.
- e) Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.

ENG.3.3.R1. Pupils can get ready for the reading-comprehension process about the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing”.

- a) Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.
- b) Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.
- c) Pupils make simple preliminary predictions about the current content based on recognised relationships.

ENG.3.3.R2. Pupils can bring information about the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.
- b) Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.
- c) Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.

ENG.3.3.R3. Pupils can make meaning of/derive meaning from the current content about “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” by reading it carefully.

- a) Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.
- b) Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.
- c) Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.

- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.3.3.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.3.3.V1. Pupils can select and use the target vocabulary of the current content about “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.3.3.G1. Pupils can select and use the language including target grammatical elements of the current content about “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*

- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.3.3.W1. Pupils can get ready for the writing-expression process about the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.3.3.W2. Pupils can copy the model/example on the writing task about the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.3.3.W3. Pupils can organise and form a content for the assigned writing task on the current content “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.3.3.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*

- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.3.3.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.3.3.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.3.3.S1. Pupils can get ready for speaking-expression process about the current content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” with the help of supplementary audio-visual materials.

- a) *ENG.3.1.PC1. Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.3.3.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.3.3.S3. Pupils can organise simple new verbal content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.3.3.S4. Pupils can form a simple new verbal content on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” through reconstruction by speaking accurately, efficiently, and authentically.

- a) Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.3.3.S5. Pupils can reorganise and use information about the current theme on “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.3.3.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “personal life with parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

PERSONAL LIFE

Sub-themes: Parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing

Target Vocabulary in Use (with revisional vocabulary):

Parts of the body: A foot, feet, back, a tooth, teeth, a chin, an eyelash(es), an eyebrow(s).

Adjectives: Hair: Blond(e), curly, straight; physical features: little, strong, weak, beautiful, pretty, nice, handsome, fat, ugly; personal characters: nice, good, bad, happy, sad, lazy, hardworking, young, old.

Weather: Sunny, (it's) raining (rainy- AmE.), (it's) snowing (snowy- AmE.), warm, windy.

Verbs for feelings about body parts: To like, to dislike.

Clothes: Tops: A sweatshirt, a jumper (a sweater- AmE.); Bottoms: jeans, a skirt; Dresses: a dress Outwear: a jacket, a coat, a uniform Footwear: boots, shoes; Accessories: a necklace, an earring, a bag, sunglasses, socks.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

(Background and) Target Language Chunks in Use:

Language Chunk: ("To be"): (What's your name? I'm/ am... / My name is...).

(What does she look like? She's tall and beautiful).

Function: Asking and answering about ages of people, talking about birthdays and celebrating birthdays, talking about physical features.

Language Chunks: ("Have got/ Has got: (+)(-)(?)"):

(Have you got a big or small nose? I've/have got a small nose).

(Have you got any T-shirts? Yes, I've/have got some T-shirts).

(What colour hair has she got? She's/has got blonde hair).

(How is her hair? What's her hair like? She's/has got curly hair).

Function: Describing possession of clothes and body parts.

Language Chunks: ("Like/dislike"): (I like/hate/dislike/love big sunglasses).

Function: Expressing personal preferences and opinions about clothing.

Language Chunk: ("Possessive 's')": (Whose dress is this? This is Jasmine's dress).

Function: Indicating ownership or relationships between people and objects.

Language Chunks ("Present Progressive"): (What are you wearing today? I'm/am wearing a T-shirt today. I'm wearing a coat. It's winter and it's cold).

Function: Describing what people are wearing

Countable and uncountable nouns with some, any, much, many.

(Have you got any shirts? Yes, I've got some shirts).

Function: Asking and answering questions about quantity and availability.

Question words: Whose, what...like.

Function: Asking about ownership, characteristics, or descriptions of people or objects.

Conjunctions: and, or.

Function: Connecting similar ideas, options, or items in a sentence.

Target Social Language in Use:

You look great!
 Anytime!
 It's my pleasure!
 Go on , please!
 Nice shirt/T-shirt/etc.!
 I'm so excited!
 Come on!
 Calm down!
 Don't forget to.....
 Be careful!

Target Phonological Sounds in Use:

Vowels: e, i
 Consonants: f, g ,h, j
 Vowels: e: (/e:/, /i:/, /ə/); i: (/a:/, /ɪ/, /i:/)
 Consonants: f: (/f/); g: (/g/, /dʒ/); h: (/h/); j: (/dʒeɪ/, /dʒ/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts**Generalisations**

The concept of “personal life” is present in almost all languages because it is one of the most basic parts of human beings’ lives and all children in different parts of the world some knowledge on “parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing”. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 3 will know what “a person and personal life” mean as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum . However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Parts, body, parts of the body, features, physical features, characters, personal characters, weather, conditions, weather conditions, clothing, seasons, clothing according to seasons, clothing according to weather conditions, preferences, clothing preferences.

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Pupils will write a project about “Personal Life” to talk about themselves and what they like. In their project, they will write about four things: physical features and descriptions, preferences for physical features, clothing, and birthday celebrations. First, they will write about their physical features, like their hair colour, eye colour, height, or other things that make them special. They can also describe someone in their family or a friend. Next, they will write about what physical features they like or prefer. For example, maybe they like long hair or colourful eyes. Then, they will talk about the clothes they wear every day or on special occasions. Finally, they will share what they do on their birthday. They can draw pictures, add stickers, or make a small booklet. When their project is ready, they will present it to the class and talk about it. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils' knowledge of the "personal life" with its components such as "parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing" in their own language. As the pupils are 8-year-old primary school children, they can know what parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as "What does she look like? She's tall and beautiful. Have you got a big or small nose? I've/have got a small nose. I like/hate/dislike/love big sunglasses. What are you wearing today? I'm/am wearing a T-shirt today. Have you got any shirts? Yes, I've got some shirts" in English from the previous themes and/or year. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils' physical, cognitive, affective, and social factors are appropriate and suitable for learning about "personal life" as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of "parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing". Therefore, a dialogue game can be played to revise "personal life, parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing" they learnt before. Some language chunks such as "What's/ is it? It's/is a chair. What colour is it? It's/is blue. What colour is the chair? The chair is blue. It's blue" are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of "personal life" and its components such as "parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing", by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures. In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.3.3.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “personal life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2)**. For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of personal life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of personal life, so they can easily understand that the current theme will be “personal life” **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17).**

ENG.3.3.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier **(CS2.11)**. The introductory digital story is watched to identify the target theme “personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically **(D3.2, SELS1.1, V3.3, V13.4, V14.2, V15.2, V18.1, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2).**

ENG.3.3.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils' attention to the content about personal life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V13.4, V14.2, V15.2, V18.1, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word "personal life" several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme "personal life" is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the "personal life" in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.3.3.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.3.3.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme "personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing", the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V13.4, V14.2, V15.2, V18.1, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about personal life to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for personal life and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him **(SELS2.1, CS2.6)**. Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out **(V3.4, V4.2, V15.1, LS4)**. These “personal life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques **(SELS2.3, V11.1, V12.2, LS5, CS2.9)**. Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not **(D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.3.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils’ language and communicative competence improve gradually **(V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3)**. For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on “personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” **(V3.3, V13.4, V14.2, V15.2, V18.1, LS2, LS4, LS5, CS2.8)**. At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know **(SELS1.1, V3.4, LS1, CS2.16.2)**. She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later **(D3.2, D3.6, V12.1, CS2.10, CS2.12)**.

ENG.3.3.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of “personal life” (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites

volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.3.3.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing" (**V13.4, V14.2, V15.2, V18.1, LS5, SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.3.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.3.3.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.3.3.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme "personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing", the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V13.4, V14.2, V15.2, V18.1, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to "personal life" is mentioned, the teacher stops the video and asks a question in the form of two options by

showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V13.4, V14.2, V15.2, V18.1, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.3.3.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “personal life”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “personal life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “personal life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “personal life” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “personal life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “personal life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5**). To consolidate the meanings of the new vocabulary items for the concept of “personal life”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. (**SELS2.2**). These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities (**D2.5, SELS3.1, V4.2, V7.2, LS5**). This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board (**SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4**). This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.3.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” (**D3.2, V13.4, V14.2, V15.2, V18.1, LS5, CS2.2**). While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same (**CS2.14**). She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils

to ask and answer by using the target chunks. To check the pupils' identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say "Stop!" when they see a scene in the picture strips with the target chunk that the teacher has just said (**SELS3.1, CS2.7**). The teacher stops if the pupils are correct, but not if they are not (**V3.3, V4.1, V7.1, LS1, LS2, LS4**).

ENG.3.3.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme "personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group (**SELS2.2, V3.1, V10.3, V13.4, V14.2, V15.2, V18.1, LS1, LS4, LS5, CS2.4**). Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems (**D2.5**). To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum (**CS2.13**). There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context (**SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2**). For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them (**V4.4, V7.2**).

ENG.3.3.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V13.4, V14.2, V15.2, V18.1, LS1, LS4, LS5**).

ENG.3.3.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.)

and to write the names of the vocabulary items “personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” next to their drawings on the model related to personal life. The teacher asks them to look at the Smart Board screen with the model related to personal life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum **(V4.4, V7.3, V13.4, V14.2, V15.2, V18.1, LS4, LS5)**.

ENG.3.3.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “personal life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level **(D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20)**.

ENG.3.3.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings **(D2.5, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level **(V3.4, V7.2, LS1, LS4)**.

ENG.3.3.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” from simple to more expanded versions in their writing **(SELS2.2, SELS2.3, V4.2, V13.4, V14.2, V15.1, V15.2, V18.1, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20)**. These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.3.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15)**. Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4)**.

ENG.3.3.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils’ learning and help them produce and display meaningful language for personal expression and communication with others by using the language

including the target words, grammatical structures, and the social language expressions of the theme about “personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” (**V3.2, V4.2, V13.4, V14.2, V15.2, V18.1, LS1, LS4, LS5**).

ENG.3.3.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.3.3.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.3.3.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “personal life with (extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” (**SELS2.2, SELS3.2, V4.2, V11.1, V13.4, V14.2, V15.2, V18.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.3.3.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities (**SELS2.3, CS2.20**). Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “personal life” and its components such as “(extended) parts of the body and physical features; personal characters; weather conditions; clothing according to seasons and weather conditions; preferences for clothing” (**SELS2.2, SELS3.2, V4.2, V7.2, V13.4, V14.2, V15.2, V18.1, LS4, LS5, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.3.3.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4 CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION**Expansion**

Objective: To talk about basic body parts in English by using the target vocabulary and target chunks.

Activity 1: Teacher shows pictures of the body parts and adjectives (neck, shoulders, knees, toes, foot, back, tongue, teeth, fingers, chin, blond, curly, straight, round, little, strong, weak, beautiful). Pupils repeat each word after the teacher. Teacher divides the class into small groups and each pupil in the groups begins to make sentences using the target words and structures. They are asked to use unusual sentences such as "I have got three eyes. I have got four fingers". While each pupil in the group makes these sentences in turn, all group members draw according to these sentences. While fun drawings emerge, target words and structures are used. Then they reflect on the activity with emoticons. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To talk about basic body parts in English by using the target vocabulary and target chunks.

Activity 2: Teacher shows pictures of the body parts and adjectives (neck, shoulders, knees, toes, foot, back, tongue, teeth, fingers, chin, blond, curly, straight, round, little, strong, weak, beautiful). Pupils repeat each word after the teacher. Teacher divides the class into small groups and begins to make sentences using target words and structures. These sentences can be unusual sentences such as "I have got three eyes. I have got four fingers". Pupils make their own drawings based on the sentences they hear from the teacher. While fun drawings emerge, target words and structures are used. Then they reflect on the activity with emoticons. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 4: FAMILY LIFE

Sub-themes: Family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members

This theme is centred on the concept of “family life” and covers the sub-themes of “family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS FLFS1. Listening/Watching-Comprehension
FLFS2. Reading-Comprehension
FLFS3. Speaking-Expression
FLFS4. Writing-Expression
FLSS1. Gramming: Selection and Use
FLSS2. Vocabulary: Selection and Use
FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS

DISPOSITIONS D1.1. Curiosity, D1.2. Independence, D1.3. Perseverance and Determination, D1.5. Self-Confidence, D1.6. Selectivity, D2.3. Assertiveness, D2.4. Trust, D2.5. Playfulness, D3.1. Reasoning, D3.2. Focus, D3.3. Creativity, D3.5. Open-Mindedness, D3.6. Analyticalness, D3.7. Being Systematic

INTERCURRICULAR COMPONENTS

Social-Emotional Learning Skills

SELS1.1. Self-Awareness Skill, SELS1.2. Self-Regulation Skill, SELS1.3. Self-Reflection Skill, SELS2.1. Communication Skill, SELS2.2. Cooperation Skill, SELS2.3. Social Awareness Skill, SELS3.1. Adaptability Skill, SELS3.2. Flexibility Skill, SELS3.3. Responsible Decision-Making Skill

Values V2. Family Integrity, V3. Diligence, V4. Friendship, V6. Honesty, V7. Aesthetics, V8. Privacy, V10. Modesty, V11. Independence, V12. Patience, V14. Respect, V15. Love and Affection, V20. Benevolence

Literacy Skills LS1. Information Literacy, LS2. Digital Literacy, LS4. Visual Literacy, LS5. Cultural Literacy, LS6. Civic Literacy

INTERDISCIPLINARY**RELATIONS**

Turkish, Maths, Life Study/ Science of Life, Visual Arts, Music, Physical Education and Games

INTERSKILLS

CS2.2. Observation Skill, CS2.3. Summarising Skill, CS2.4. Analysis Skill, CS2.5. Classification Skill, CS2.6. Information Gathering Skill, CS2.7. Comparison Skill, CS2.8. Inquiry Skill, CS2.9. Generalisation Skill, CS2.10. Inference Skill, CS2.11. Observation-Based Prediction Skill, CS2.12. Data-Based Prediction Skill, CS2.13. Structuring Skill, CS2.14. Interpretation Skill, CS2.15. Reflective Thinking Skill, CS2.16.1. Inductive Reasoning Skill, CS2.16.2. Deductive Reasoning Skill, CS2.16.3. Analogical Reasoning Skill, CS2.17. Evaluation Skill, CS2.20. Synthesis Skill, CS3.1. Decision-Making Skill, CS3.3. Critical Thinking Skill

Year 3 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.3.4.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.3.4.L2. Pupils can bring information about the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.3.4.L3. Pupils can make meaning of/derive meaning from the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.3.4.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.3.4.P1. Pupils can select and use the target phonological elements of the current content about “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.3.4.R1. Pupils can get ready for the reading-comprehension process about the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.3.4.R2. Pupils can bring information about the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.3.4.R3. Pupils can make meaning of/derive meaning from the current content about “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*

- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.3.4.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.3.4.V1. Pupils can select and use the target vocabulary of the current content about “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.3.4.G1. Pupils can select and use the language including target grammatical elements of the current content about “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*

- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.3.4.W1. Pupils can get ready for the writing-expression process about the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.3.4.W2. Pupils can copy the model/example on the writing task about the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.3.4.W3. Pupils can organise and form a content for the assigned writing task on the current content “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.3.4.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.3.4.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*

- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.3.4.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.3.4.S1. Pupils can get ready for speaking-expression process about the current content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.3.4.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.3.4.S3. Pupils can organise simple new verbal content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.3.4.S4. Pupils can form a simple new verbal content on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.3.4.S5. Pupils can reorganise and use information about the current theme on “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.3.4.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “family life with family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

FAMILY LIFE:

Sub-themes: Family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members

Target Vocabulary in Use (with revisional vocabulary):

Family members: A cousin, an aunt, an uncle, a parent, a grandparent, a grandson, a granddaughter, a girl, a boy, a child, children, a man, men, a woman, women, dad, mum (mom-AmE.), a kid.

Daily routines: To wake up, to wash face, to brush teeth, to put on (a dress), to have breakfast, to go to school, to work, to study, to have lunch, to go home, to have dinner, to watch TV, to read a book, to play games, to do homework, to go to bed.

Hobbies: To swim, to play basketball/football, to play the guitar/piano/violin, to play chess.

Chores /housework: To cook, to prepare, to clean, to iron, to wash (the dishes), to make (the bed), to help (mother/family/ etc.), to put the garbage out (to take out the trash-AmE.).

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Language Chunks: ("To be Present"): (How old is your mother? She's/is thirty-five years old. Is this her birthday today? Yes, it's/is her birthday today).

Function: Asking and answering about ages, birthdays and celebrations.

Language Chunks: ("The Simple Present Tense"): (What does she do every morning? She prepares breakfast every morning. What do you do at home? I clean my room every morning).

Function: Describing habitual actions and routines.

Language Chunks: ("Can/can't"): (My father can cook. My father can't cook)

Function: Describing ability for personal life.

Language Chunks: ("Could"): (Could you help me, please?)

Function: Asking for requests.

Question word: How often?

Function: Asking about frequency of actions.

Adverbs of time: Every, sometimes, always, often, never.

Function: Indicating the frequency of actions or events.

Adverbs of manner: Well

Function: Describing how an action is performed.

Conjunctions: But

Function: Connecting contrasting ideas or statements.

Target Social Language in Use:

Can I have some water, please?

Let's eat together!

That's so cool.

Do me a favour!

Give me a hand!

No problem!
I hope you will.....
It's my pleasure!
Follow me!

Target Phonological Sounds in Use:

Vowel: o

Consonants: k, l, m, n, p

Vowel: o: (/əʊ/, /ɒ/,)

Consonants: k: (/k/); l: (/ɛl/ /l/); m: (/ɛm/, /m/); n: (/ɛn/, /n/); p: (pi:/ /p/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of “family life” is present in almost all languages because it is one of the most basic parts of human beings’ lives and almost all children in different parts of the world have families. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 3 will know what “a family and family life” mean as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Ages, routines, chores, daily routines and chores, hobbies, abilities, members, family, family members, ages of family members, daily routines of family members, chores of family members, daily routines and chores of family members, hobbies of family members, abilities of family members, hobbies and abilities of family members.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils will write a project about “Family Life” to share details about their family members and daily routines. In their project, they will write about four things: family members and their physical features, daily routines, hobbies and interests, and chores. First, they will introduce their family members, such as their parents, siblings, or extended family like grandparents or cousins. They will describe each family member using descriptive words, such as their height, hair colour, or special traits. Next, they will write about the daily routines of at least three family members. For example, they can describe what time someone wakes up, goes to school or work, and other activities like having meals or watching TV. Then, they will talk about their family’s hobbies and interests. For example, a family member might enjoy playing basketball, cooking, or playing a musical instrument. Finally, they will describe the chores different family members do at home, such as cooking, washing dishes, or taking out the garbage. They can draw pictures, create a family tree, or add stickers to make their project more creative. When their project is ready, they will present it to the class and talk about their family. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of the “family life” with its components such as “family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” in their own language. As the pupils are 8-year-old primary school children, they can know what family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members mean in their own language and to be able to express them in their own language.

However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as “How old is your mother? She’s/is thirty-five years old. Is this her birthday today? Yes, it’s/is her birthday today. What does she do every morning? She prepares breakfast every morning. What do you do at home? I clean my room every morning” in English from the previous themes and/or year. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about “family life” as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of “family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”. Therefore, a dialogue game can be played to revise “family life, family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” they learnt before. Some language chunks such as “Can I have some water, please? Let’s eat together! That’s so cool. Do me a favour! Give me a hand! No problem!” are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of “family life” and its components such as “family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”, by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures. In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. This is done only for fun and relaxation **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.3.4.L1

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “family life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2)**. For instance, the teacher could bring into the classroom and show a cardboard model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of family life can also be created using Web 2.0 programmes. They can guess the sub-concepts of family life, so they can easily understand that the current theme will be “family life” **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17)**).

ENG.3.4.L2

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier **(CS2.11)**. The introductory digital story is watched to identify the target theme “family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically **(D3.2, SELS1.1, V2.1, V2.4, V3.3, V8.3, V15.2, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2)**.

ENG.3.4.L3

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils' attention to the content about family life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings necessary number of large boxes for the pictures (some symbols are stuck on the boxes for family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V2.1, V2.4, V3.3, V8.3, V15.2, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section "Indicators for Learning (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**).

After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word "family life" several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme "family life" is introduced to the pupils in English.

To remember the sequence of the scenes with the parts, places, and people in the "family life" in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/pictures of these scenes for a while (**CS2.3**). She/he then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.3.4.L4

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.3.4.P1

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme "family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members", the teacher puts on the table the pictures and boxes that she has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V2.1, V2.4, V3.4, V8.3, V15.2, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about school to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2 CS2.14**).

ENG.3.4.P2

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the school and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “family life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played, such as Simon says, where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section “Indicators for Learning”.

ENG.3.4.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils’ language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**).

For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on “family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” (**V2.1, V2.4, V3.3, V8.3, V15.2, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.3.4.R2

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of “family life” (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points

to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12).

ENG.3.4.R3

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/smartboard. She/he asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (V3.4, V7.2). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (SELS2.1, V3.3, LS1, LS4, CS2.14). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about “family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” (SELS3.1, SELS3.2, V2.1, V2.4, V8.3, V15.2, LS5). During this process pupils work collaboratively to exchange information, thoughts, and feelings (SELS2.2, V4.2, CS2.6). This is evaluated as described in items (6), (7), (8), and (9) in the section “Indicators for Learning”.

ENG.3.4.R4

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (SELS1.3). Some volunteer pupils express what they think and feel about them (V20.4, CS2.15). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (V4.4, V10.3).

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (SELS1.1, V3.2, LS1, LS2, LS4). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.3.4.V1

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (V2.1, V2.4, V3.3, V3.4, V8.3, V15.2, LS5). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (D3.2, D3.6, CS2.4, CS2.6, CS2.7). Then, from the beginning, whenever an item related to “family life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (CS2.16.1, CS2.6). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (D1.1, V2.1, V2.4, V8.3, V15.2, LS5, CS2.10). This

is done in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)**(3) and (8) in the section "Indicators for learning" **(V4.2, V14.1, LS1, LS2, LS4)**.

ENG.3.4.V2

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme "school", the teacher prepares an activity using the Web 2.0 program with images/pictures of components of "family life". She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the theme "family life" on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them **(CS2.4)**. She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions **(CS2.5)**. When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme "school" to the correct empty boxes on the screen **(SELS1.2, CS2.5)**. In this way, images/pictures that are relevant to the concept of "family life" are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for "family life" on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of "school", the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King's game, Odd One out, Simon Says etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section "Indicators for learning".

The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling using the words written on the model school on the blackboard/smartboard **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section "Indicators for Learning".

ENG.3.4.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils' attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme "family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members" **(D3.2, V2.1, V2.4, V8.3, V15.2, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils' identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say "Stop!" when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.3.4.G2

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme, "family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group (**SELS2.2, V2.1, V2.4, V3.1, V8.3, V10.3, V15.2, LS1, LS4, LS5, CS2.4**). Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section "Indicators for Learning". The same game can be played with pictures on the blackboard if there are technological/technical problems (**D2.5**). To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section "Indicators for learning" (**CS2.13**). There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context (**SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2**). For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them (**V4.4, V7.2**).

ENG.3.4.W1

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V2.1, V2.4, V3.2, V3.4, V8.3, V15.2, LS1, LS4, LS5**).

ENG.3.4.W2

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model school in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items about "family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members" next to their drawings on the model related to family life. The teacher asks them to look at the Smart Board screen with the model related to family life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section "Indicators for Learning" (**V2.1, V2.4, V4.4, V7.3, V8.3, V15.2, LS4, LS5**).

ENG.3.4.W3

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “family life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20).

ENG.3.4.W4

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (D2.5, SELS3.2, CS2.13). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (V3.4, V7.2, LS1, LS4).

ENG.3.4.W5

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” from simple to more expanded versions in their writing (SELS2.2, SELS2.3, V2.1, V2.4, V4.2, V8.3, V15.1, V15.2, LS1, LS4, LS5, CS2.20). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section “Indicators for Learning”.

ENG.3.4.W6

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (D1.5, SELS1.3, V4.2, LS1, CS2.15). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (D2.4, D3.5, V12.1, V15.1, SELS2.2). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (V10.3, LS4).

ENG.3.4.S1

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils’ learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about “family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” (V2.1, V2.4, V3.2, V4.2, V8.3, V15.2, LS1, LS4, LS5).

ENG.3.4.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (CS2.6). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4). The spoken content of the model becomes a path for them to follow.

ENG.3.4.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13).

ENG.3.4.S4

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “family life with (extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” (SELS2.2, SELS3.2, V2.1, V2.4, V4.2, V8.3, V11.1, V15.2, LS1, LS4, LS5, CS2.20). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20).

ENG.3.4.S5**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities (SELS2.3, CS2.20). Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (V3.4, V15.1, LS1). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “school life” and its components such as “(extended) family members; ages of family members; daily routines and chores of family members; hobbies and abilities of family members” (SELS2.2, SELS3.2, V2.1, V2.4, V4.2, V7.2, V8.3, V15.2, LS4, LS5, CS3.1, CS2.20). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section “Indicators for Learning”. Then they can expand their language use and practise by communicating with others.

ENG.3.4.S6

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (SELS1.3, V4.2). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4 CS2.15). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (V4.3, V10.3).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn’t work in teaching the theme and pupils’ learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To talk about family members and physical appearances in English by using the target vocabulary and target chunks.

Activity 1: The teacher hangs the flashcards of the family members and physical characteristics in two separate groups on the board. After hanging them on the board, the teacher says each word in a normal voice and asks the pupils to repeat it. In the next round, if she/he whispers the word, she/he asks the pupils to repeat it loudly, and if she/he says it loudly, she/he asks them to repeat it in a whisper. When the word repetitions are completed, she/he asks one of the pupils to come to the board and throw the ball first to the family member pictures and then to the pictures related to physical appearances. She/He asks the pupil to make sentences about the words that the ball lands on. Example: "My cousin is young". Then they reflect on the activity by clapping loudly or softly. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To talk about family members and physical appearances in English by using the target vocabulary and target chunks.

Activity 2: The teacher hangs the flashcards of the family members and physical characteristics in two separate groups on the board. After hanging them on the board, the teacher says each word in a normal voice and asks the pupils to repeat it. In the next round, if she/he whispers the word, she/he asks the pupils to repeat it loudly, and if she/he says it loudly, she/he asks them to repeat it in a whisper. When the word repetitions are completed, she/he asks one of the pupils to come to the board and throw the ball first to the family member pictures and then to the pictures related to physical appearances. She/He asks the pupil to say the words that the ball lands on. Example: "cousin" "young". Then they reflect on the activity by clapping loudly or softly. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 5: HOMES & HOUSES & THE NEIGHBOURHOOD

Sub-themes: Life in the countryside; farmhouses and farm animals; activities and chores on a farm

This theme is centred on the concept of “homes, houses and the neighbourhood” and covers the sub-themes of “life in the countryside; farmhouses and farm animals; activities and chores on a farm”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS FLFS1. Listening/Watching-Comprehension
FLFS2. Reading-Comprehension
FLFS3. Speaking-Expression
FLFS4. Writing-Expression
FLSS1. Gramming: Selection and Use
FLSS2. Vocabulary: Selection and Use
FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS

Decision-Making Skill, CS3.3. Critical Thinking Skill

Year 3 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.3.5.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.3.5.L2. Pupils can bring information about the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.3.5.L3. Pupils can make meaning of/derive meaning from the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.3.5.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.3.5.P1. Pupils can select and use the target phonological elements of the current content about “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.3.5.R1. Pupils can get ready for the reading-comprehension process about the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.3.5.R2. Pupils can bring information about the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.3.5.R3. Pupils can make meaning of/derive meaning from the current content about “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*

- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.3.5.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.3.5.V1. Pupils can select and use the target vocabulary of the current content about “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.3.5.G1. Pupils can select and use the language including target grammatical elements of the current content about “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*

- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.3.5.W1. Pupils can get ready for the writing-expression process about the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.3.5.W2. Pupils can copy the model/example on the writing task about the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.3.5.W3. Pupils can organise and form a content for the assigned writing task on the current content “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.3.5.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.3.5.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*

- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.3.5.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.3.5.S1. Pupils can get ready for speaking-expression process about the current content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.3.5.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.3.5.S3. Pupils can organise simple new verbal content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.3.5.S4. Pupils can form a simple new verbal content on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.3.5.S5. Pupils can reorganise and use information about the current theme on “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) EPupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.3.5.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “homes, houses and the neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

HOMES, HOUSES & THE NEIGHBOURHOOD:

Sub-themes: Life in the countryside; farmhouses and farm animals; activities and chores on a farm

Target Vocabulary in Use (with revisional vocabulary):

Farm animals: A cow, a donkey, chicken(hen), a goat, a horse, a sheep, a duck, a turkey, a rabbit.

Vocabulary for the house types in the countryside: A farmhouse, a cottage, a barn.

Vocabulary for the countryside: A village, a farm, a field, a tractor, grass, a plant.

Activities/chores on a farm: To feed (animals), to bake, to water (flowers, vegetables, plants), to milk (cows), to garden, to plant (trees, vegetables, flowers), to grow (plants, vegetables, flowers), to collect (eggs).

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Language Chunks ("There is/There are"): (What is there on your farm? There's/is a farmhouse on our farm).

(How many cows are there on your farm? There are five cows on our farm).

Function: Describing existence and quantity of objects or entities in a specific location.

Language Chunks ("The Simple Present Tense"): (What do you do on your farm every day? I milk our cows every day).

Function: Describing habitual actions or routines.

Language Chunks ("The Present Progressive Tense"): (What is the farmer doing now? He's/is watering the vegetables now).

Function: Describing actions happening at the moment of speaking.

Adverbs of time: Now, at present, today

Target Social Language in Use:

No way!

No idea.

Fantastic!

Help me!

Why not?

What a surprise!

How beautiful!

Let me...

Cute!

Target Phonological Sounds in Use:

Consonants: q, r, s, t, v

Consonants: q: /kju:/; r: /ɑ:/ (Br), /r/ (AmE.); s: (/s/, /ɛs/, /z/); t: (/ti:/, /t/); v: (/vi:/, /v/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of “homes, houses and the neighbourhood” is present in almost all languages because it is one of the most basic parts of human beings’ lives and all children in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 3 will know what “homes, houses and the neighbourhood” mean as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Farmhouses, animals, farm animals, activities, chores, farm, activities and chores on a farm, countryside, life, life in the countryside.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils will create a brochure about “Homes, Houses & The Neighbourhood” with a focus on life in the countryside. In their brochure, they will describe different types of houses such as farmhouses, cottages, and barns, explaining their features and the rural setting around them very simply with pictures and drawings.. They will also simply write about various farm animals like cows, chickens, and goats, detailing their appearance and roles on the farm. The brochure will include very simple information on common farm activities such as feeding animals, milking cows, and planting vegetables, as well as daily chores like watering plants and collecting eggs. To make the brochure visually appealing, pupils will include illustrations or images representing these elements of farm life. Finally, they will present their brochure to the class, sharing their knowledge of the countryside and its way of life. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of homes, houses & the neighbourhood with its components such as “life in the countryside; farmhouses and farm animals; activities and chores on a farm” in their own language. As the pupils are 8-year-old primary school children, they can know what life in the countryside; farmhouses and farm animals; activities and chores on a farm mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as “What is there on your farm? There’s/is a farmhouse on our farm. How many cows are there on your farm? There are five cows on our farm. What do you do on your farm every day? I milk our cows every day. What is the farmer doing now? He’s/is watering the vegetables now” in English from the previous themes and/or year. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about “homes, houses and the neighbourhood” as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of “life in the countryside; farmhouses and farm animals; activities and chores on a farm”. Therefore, a dialogue

game can be played to revise “homes, houses and the neighbourhood, life in the countryside; farmhouses and farm animals; activities and chores on a farm” they learnt before. Some language chunks such as “No way! No idea. Fantastic! Help me! Why not? What a surprise? How beautiful!” are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of “homes and houses and the neighbourhood” and its components such as “life in the countryside; farmhouses and farm animals; activities and chores on a farm”, by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able to remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension

and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.3.5.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “homes, houses and the neighbourhood” in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of homes, houses and neighbourhood can also be created using Web 2.0 programmes.) They can guess the sub-concepts of homes, houses and neighbourhood, so they can easily understand that the current theme will be “homes, houses and neighbourhood” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.3.5.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V5.2, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.3.5.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about homes, houses and neighbourhood and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V5.2, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “homes, houses and neighbourhood” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “homes, houses and neighbourhood” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “homes, houses and neighbourhood” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2,**

V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.3.5.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.3.5.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V5.2, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about homes, houses and neighbourhood to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the homes, houses and neighbourhood and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “homes, houses and neighbourhood”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.5.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm" (**V3.3, V5.2, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.3.5.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "homes, houses and neighbourhood" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.3.5.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm" (**SELS3.1, SELS3.2, V5.2, LS5**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.5.R4.**REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:**

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.3.5.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.3.5.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V5.2, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “homes, houses and neighbourhood” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V5.2, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.3.5.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “homes, houses and neighbourhood”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “homes, houses and the neighbourhood”. She/He prepares three boxes on one side of the screen and mixed images/ pictures for target vocabulary related to the “homes, houses and neighbourhood” on the other side. She/He asks the pupils to look at the mixed pile of images/ pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding

images/pictures as the components of the theme “homes, houses and neighbourhood” to the correct empty boxes on the screen **(SELS1.2, CS2.5)**. In this way, images/pictures that are relevant to the concept of the theme “homes, houses and neighbourhood” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “homes, houses and neighbourhood” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of “homes, houses and neighbourhood”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.5.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” **(D3.2, V5.2, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.3.5.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V5.2, V10.3, LS1, LS4, LS5, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if

there are technological/technical problems **(D2.5)**. To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.3.5.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded **(V3.2, V3.4, V5.2, LS1, LS4, LS5)**.

ENG.3.5.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language **(D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3)**. To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups **(SELS2.1, SELS2.2)** (of two, three, four etc.) and to write the names of the vocabulary items "homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm" next to their drawings on the model related to homes, houses and neighbourhood. The teacher asks them to look at the Smart Board screen with the model related to homes, houses and neighbourhood that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum **(V4.4, V5.2, V7.3, LS4, LS5)**.

ENG.3.5.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of "homes, houses and neighbourhood" in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils' age and language level **(D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20)**.

ENG.3.5.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings **(D2.5, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level **(V3.4, V7.2, LS1, LS4)**.

ENG.3.5.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V5.2, V15.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.5.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.3.5.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils’ learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” (**V3.2, V4.2, V5.2, LS1, LS4, LS5**).

ENG.3.5.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.3.5.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.3.5.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “homes, houses and neighbourhood with life in the countryside; farmhouses and farm animals; activities and chores on a farm” (**SELS2.2, SELS3.2, V4.2, V5.2, V11.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.3.5.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "homes, houses and neighbourhood" and its components such as "life in the countryside; farmhouses and farm animals; activities and chores on a farm" **(SELS2.2, SELS3.2, V4.2, V5.2, V7.2, LS4, LS5, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.3.5.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V4.2)**. Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V4.3, V10.3)**.

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION**Expansion**

Objective: To talk about farm animals in English by using the target vocabulary and target chunks.

Activity 1: The teacher draws a farm on the board and asks the pupils to guess what it is. She sticks the word "farm" on the board and plays the sounds of farm animals. She asks the children to guess which farm animal it is. For each correct guess, she hangs the picture of that animal on the farm and asks the pupils to repeat the target words while hanging it. After hanging the photos of all the farm animals, she asks the children to close their eyes. She takes one of the pictures on the board and hides it behind her. She asks, "What's missing?" and waits for an answer. After the pupils answer, she says the word and asks them to repeat it. Finally, she asks the pupils to match the farm animal words on the edge of the board. Then they reflect on the activity with emoticons. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To talk about farm animals in English by using the target vocabulary and target chunks.

Activity 2: The teacher draws a farm on the board and asks the pupils to guess what it is. The teacher sticks the word “farm” on the board and plays the sounds of farm animals. The teacher asks the children to guess which farm animal it is. For each correct guess, the teacher hangs the picture of that animal on the farm and asks the pupils to repeat the target words while hanging it. After hanging the photos of all the farm animals, the teacher asks the children to close their eyes. The teacher takes one of the pictures on the board and hides it behind her. The teacher asks, “What’s missing?” and waits for an answer. After the pupils answer, she says the word and asks them to repeat it. Then they reflect on the activity with emoticons. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 6: LIFE IN THE CITY & THE WORLD

Sub-themes: Food items and meals, eating outside and ordering food

This theme is centred on the concept of “life in the city and the world” and covers the sub-themes of “food items and meals, eating outside and ordering food”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS FLFS1. Listening/Watching-Comprehension
FLFS2. Reading-Comprehension
FLFS3. Speaking-Expression
FLFS4. Writing-Expression
FLSS1. Grammaring: Selection and Use
FLSS2. Vocabulary: Selection and Use
FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS

DISPOSITIONS D1.1. Curiosity, D1.2. Independence, D1.3. Perseverance and Determination, D1.5. Self-Confidence, D1.6. Selectivity, D2.3. Assertiveness, D2.4. Trust, D2.5. Playfulness, D3.1. Reasoning, D3.2. Focus, D3.3. Creativity, D3.5. Open-Mindedness, D3.6. Analyticalness, D3.7. Being Systematic

INTERCURRICULAR COMPONENTS

Social-Emotional Learning Skills

SELS1.1. Self-Awareness Skill, SELS1.2. Self-Regulation Skill, SELS1.3. Self-Reflection Skill, SELS2.1. Communication Skill, SELS2.2. Cooperation Skill, SELS2.3. Social Awareness Skill, SELS3.1. Adaptability Skill, SELS3.2. Flexibility Skill, SELS3.3. Responsible Decision-Making Skill

Values V3. Diligence, V4. Friendship, V6. Honesty, V7. Aesthetics, V10. Modesty, V11. Independence, V12. Patience, V13. Healthy Living, V14. Respect, V15. Love and Affection, V17. Thriftiness, V20. Benevolence

Literacy Skills LS1. Information Literacy, LS2. Digital Literacy, LS3. Financial Literacy, LS4. Visual Literacy, LS5. Cultural Literacy, LS6. Civic Literacy

INTERDISCIPLINARY RELATIONS

Turkish, Maths, Life Study/ Science of Life, Visual Arts, Music, Physical Education and Games

Evaluation Skill, CS2.20. Synthesis Skill, CS3.1. Decision-Making Skill, CS3.3. Critical Thinking Skill

Year 3 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.3.6.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “life in the city and the world with food items and meals, eating outside and ordering food”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.3.6.L2. Pupils can bring information about the current content on “life in the city and the world with food items and meals, eating outside and ordering food” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.3.6.L3. Pupils can make meaning of/derive meaning from the current content on “life in the city and the world with food items and meals, eating outside and ordering food” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.3.6.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “life in the city and the world with food items and meals, eating outside and ordering food” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.3.6.P1. Pupils can select and use the target phonological elements of the current content about “life in the city and the world with food items and meals, eating outside and ordering food” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.3.6.R1. Pupils can get ready for the reading-comprehension process about the current content on “life in the city and the world with food items and meals, eating outside and ordering food”.

- a) Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.3.6.R2. Pupils can bring information about the current content on “life in the city and the world with food items and meals, eating outside and ordering food” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.3.6.R3. Pupils can make meaning of/derive meaning from the current content about “life in the city and the world with food items and meals, eating outside and ordering food” by reading it carefully.

- a) Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.3.6.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “life in the city and the world with food items and meals, eating outside and ordering food” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.3.6.V1. Pupils can select and use the target vocabulary of the current content about “life in the city and the world with food items and meals, eating outside and ordering food” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.3.6.G1. Pupils can select and use the language including target grammatical elements of the current content about “life in the city and the world with food items and meals, eating outside and ordering food” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*

- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.3.6.W1. Pupils can get ready for the writing-expression process about the current content on “life in the city and the world with food items and meals, eating outside and ordering food” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.3.6.W2. Pupils can copy the model/example on the writing task about the current content on “life in the city and the world with food items and meals, eating outside and ordering food” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.3.6.W3. Pupils can organise and form a content for the assigned writing task on the current content “life in the city and the world with food items and meals, eating outside and ordering food” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.3.6.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “life in the city and the world with food items and meals, eating outside and ordering food”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.3.6.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “life in the city and the world with food items and meals, eating outside and ordering food” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.3.6.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, "life in the city and the world with food items and meals, eating outside and ordering food" very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.3.6.S1. Pupils can get ready for speaking-expression process about the current content on "life in the city and the world with food items and meals, eating outside and ordering food" with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.3.6.S2. Pupils can imitate the model/example for producing verbal content about the current theme on "life in the city and the world with food items and meals, eating outside and ordering food".

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.3.6.S3. Pupils can organise simple new verbal content on "life in the city and the world with food items and meals, eating outside and ordering food" by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.3.6.S4. Pupils can form a simple new verbal content on "life in the city and the world with food items and meals, eating outside and ordering food" through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.3.6.S5. Pupils can reorganise and use information about the current theme on "life in the city and the world with food items and meals, eating outside and ordering food" by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*

- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.3.6.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the city and the world with food items and meals, eating outside and ordering food” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

LIFE IN THE CITY & THE WORLD:

Sub-themes: Food items and meals, eating outside and ordering food

Target Vocabulary in Use (with revisional vocabulary):

Meals: Breakfast, lunch, dinner.

Food Items: Water, milk, tea, bread, fruit juice/juice, cheese, cake, butter, pasta, soup, rice, salad, a sandwich, a pancake, a toast, an olive (s).

Vocabulary for eating outside: Fast food, takeaway, a restaurant, a café, a bill, a waiter, a waitress, to eat, to drink, to order, to have, to want.

Quantifiers: Some and any (to be used naturally and automatically with all food items, without explaining its grammatical function, with language chunks).

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

(Language Chunk: ("The Simple Present Tense"): (What do you want? I want some salad, please).

Function: Stating desires or preferences.

Language Chunk: ("Will"): (What do you want? I'll/will take some fruit, please).

Function: Stating spontaneous decisions.

Language Chunk: ("Can"): (Can I have some soup, please? Yes, you can. Can I see the menu, please? Yes, of course).

Function: Asking for permission or making requests.

Language Chunks: ("Have got/Has got"): Have you got any olives? Yes, I've/have got some olives.

Have you got any fruit juice? Yes, we've/have got some fruit juice.

What have you got for lunch? We've/have got some bread.

Function: Asking and answering about possession or availability of items.

Target Social Language in Use:

Dinner is ready!

What's for breakfast/dinner/lunch?

I am full.

Enjoy your meal!

Breakfast/Lunch/Dinner time!

Pass me the salt, please.

Here you are.

Target Phonological Sounds in Use:

Vowel: u

Consonants: w, x, y, z

Vowel: u: (/ju:/, /ʌ/, /ju:/)

w: (/w/); x: (/ɛks/, /ks/, /gz/); y: (/waɪ/, /j/, /ɪ/, /i:/); z: (/zed/ (Br), /zi:/ (AmE.), /z/)

*No pronunciation symbols will be provided in any material written for the pupils, only the sounds in the words including them will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of “life in the city and the world” is present in almost all languages because it is one of the most basic parts of human beings’ and almost all children’s lives in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 3 will know what “life in the city and the world” means as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Items, food, meals, food items and meals, eating, outside, eating outside, ordering, ordering food, eating outside and ordering food.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils will create a menu for a restaurant or cafe. They will design the menu by including a variety of food and drink items, and they will categorise the items into different sections such as breakfast, lunch, and dinner. They will use vocabulary words like bread, cheese, pasta, and salad to create meal options. Pupils will also include drinks such as water, milk, tea, and fruit juice. In addition to the food and drinks, pupils will write about dining experiences like ordering food from a waiter or waitress and having a meal at a restaurant or cafe. They will use phrases such as “Can I have...” or “what do you want” and use quantifiers like “some and any” naturally in their sentences. After designing the menu, pupils will present it to the class as if they are working in the restaurant, explaining the different food options and what customers can expect. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of “life in the city & the world” with its components food items and meals, eating outside and ordering food” in their own language. As the pupils are 8-year-old primary school children, they can know what food items and meals, eating outside and ordering food mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as “What do you want? I want some salad, please. What do you want? I’ll/will take some fruit, please. Can I have some soup please? Yes, you can. Have you got any olives? Yes, I’ve/have got some olives. Have you got any fruit juice? Yes, We’ve/have got some fruit juice. What have you got for lunch? We’ve/have got some bread” in English from the previous year. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about “life in the city and the world” as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of “food items and meals, eating outside and ordering food”. Therefore, a dialogue game can be played to revise “life in the city and the world, food items and meals, eating outside and ordering food” they learnt before.

Some language chunks such as “Dinner is ready! What’s for breakfast/dinner/lunch? I am full. Enjoy your meal! Breakfast/Lunch/Dinner time! Pass me the salt, please. Here you are” are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of “life in the city and the world” and its components such as “food items and meals, eating outside and ordering food”, by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.3.6.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “life in the city and the world” in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of life in the city and the world can also be created using Web 2.0 programmes.) They can guess the sub-concepts of life in the city and the world, so they can easily understand that the current theme will be “life in the city and the world” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.3.6.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “life in the city and the world with (extended) food items and meals, eating outside and ordering food” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V13.1, V14.1, V17.1, LS1, LS2, LS3, LS4, LS5, CS2.14, CS2.16.2**).

ENG.3.6.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about life in the city and the world and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for life in the city and the world with (extended) food items and meals, eating outside and ordering food) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V13.1, V14.1, V17.1, LS1, LS3, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “life in the city and the world” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “life in the city and the world” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “life in the city and the world” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/ He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**)). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.3.6.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.3.6.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme "life in the city and the world with (extended) food items and meals, eating outside and ordering food", the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V13.1, V14.1, V17.1, LS1, LS3, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about homes, houses and neighbourhood to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the homes, houses and neighbourhood and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These "life in the city and the world"-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.6.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and

speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "life in the city and the world with (extended) food items and meals, eating outside and ordering food" (**V3.3, V13.1, V14.1, V17.1, LS2, LS3, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.3.6.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "life in the city and the world" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.3.6.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "life in the city and the world with (extended) food items and meals, eating outside and ordering food" (**SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.6.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in

pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.3.6.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.3.6.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “life in the city and the world with (extended) food items and meals, eating outside and ordering food”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V13.1, V14.1, V17.1, LS3, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “life in the city and the world” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the life in the city and the world with (extended) food items and meals, eating outside and ordering food, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V13.1, V14.1, V17.1, LS3, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.3.6.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “school”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “life in the city and the world”. She/He prepares three boxes on one side of the screen and mixed images/ pictures for target vocabulary related to the “life in the city and the world” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “school” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “life in the city and the world” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “life in the city and the world” on the blackboard/whiteboard. She/He takes a flashcard at random and shows

it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of “school”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.6.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “life in the city and the world with (extended) food items and meals, eating outside and ordering food” **(D3.2, V13.1, V14.1, V17.1, LS3, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.3.6.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “life in the city and the world with (extended) food items and meals, eating outside and ordering food”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V10.3, V13.1, V14.1, V17.1, LS1, LS3, LS4, LS5, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils’ further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.3.6.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “life in the city and the world with (extended) food items and meals, eating outside and ordering food” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V13.1, V14.1, V17.1, LS1, LS3, LS4, LS5**).

ENG.3.6.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “life in the city and the world with (extended) food items and meals, eating outside and ordering food” next to their drawings on the model related to life in the city and the world. The teacher asks them to look at the Smart Board screen with the model related to life in the city and the world that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.4, V7.3, V13.1, V14.1, V17.1, LS3, LS4, LS5**).

ENG.3.6.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “life in the city and the world” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.3.6.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.3.6.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “life in the city and the world with (extended) food items and meals, eating outside and ordering food” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V13.1, V14.1, V15.1, V17.1, LS1, LS3, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple

digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.3.6.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.3.6.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "life in the city and the world with (extended) food items and meals, eating outside and ordering food" (**V3.2, V4.2, V13.1, V14.1, V17.1, LS1, LS3, LS4, LS5**).

ENG.3.6.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.3.6.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.3.6.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "life in the city and the world with (extended) food items and meals, eating outside and ordering food" (**SELS2.2, SELS3.2, V4.2, V11.1, V13.1, V14.1, V17.1, LS1, LS3, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.3.6.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities (**SELS2.3, CS2.20**). Picture strip stories can be used at the end of each theme to provide a consolidation

and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "life in the city and the world" and its components such as "(extended) food items and meals, eating outside and ordering food" (**SELS2.2, SELS3.2, V4.2, V7.2, V13.1, V14.1, V17.1, LS3, LS4, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.3.6.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To talk about food items in English by using the target vocabulary and target chunks.

Activity 1: The teacher says the names of the pictures of food while hanging them on the board and asks the pupils to repeat them. After the pictures are completed, she/he shows the words one by one and asks volunteer pupils to match the words with the images of food. After matching, the teacher removes the words related to the food and only the pictures remain on the board. The teacher asks a pupil to make a sentence with one of the words he/she has chosen, for example, "I have bread". Another pupil says the sentence her friend made and adds one of the food names on the board to the sentence; such as "I have got bread and cake". All the words on the board are completed by adding one food name at a time. Thus, food names are repeated. The pupils reflect on the activity by clapping loudly or softly. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To talk about food items in English by using the target vocabulary and target chunks.

Activity 2: The teacher says the names of the pictures of food while hanging them on the board and asks the pupils to repeat them. After the pictures are completed, she/he shows the words one by one and asks volunteer pupils to match the words with the images of food. After the matches, one pupil makes a sentence with one of the words she chose, such as "I have got bread". Another pupil says the sentence her friend

made and adds one of the food names on the board to the sentence, such as “I have got bread and cake”. All the words on the board are completed by adding one food name at a time. Thus, food names are repeated. The pupils reflect on the activity by clapping loudly or softly. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

PRIMARY-YEAR 4 (LEVEL: A1.3)

THEME 1: SCHOOL LIFE

Sub-themes: People at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations

This theme is centred on the concept of “school life” and covers the sub-themes of “people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS FLFS1. Listening/Watching-Comprehension
FLFS2. Reading-Comprehension
FLFS3. Speaking-Expression
FLFS4. Writing-Expression
FLSS1. Gramming: Selection and Use
FLSS2. Vocabulary: Selection and Use
FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS

DISPOSITIONS D1.1. Curiosity, D1.2. Independence, D1.3. Perseverance and Determination, D1.5. Self-Confidence, D1.6. Selectivity, D2.3. Assertiveness, D2.4. Trust, D2.5. Playfulness, D3.1. Reasoning, D3.2. Focus, D3.3. Creativity, D3.5. Open-Mindedness, D3.6. Analyticalness

Evaluation Skill, CS2.20. Synthesis Skill, CS3.1. Decision-Making Skill, CS3.3. Critical Thinking Skill

Year 4 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.4.1.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”.

- a) Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.4.1.L2. Pupils can bring information about the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” together with key details and main components while listening/watching it.

- a) Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.4.1.L3. Pupils can make meaning of/derive meaning from the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” through details by listening/watching it carefully.

- a) Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) Pupils locate the components of the current content within the whole by listening and watching it.*
- c) Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.4.1.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” in a very simple way.

- a) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*

- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.4.1.P1. Pupils can select and use the target phonological elements of the current content about “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.4.1.R1. Pupils can get ready for the reading-comprehension process about the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.4.1.R2. Pupils can bring information about the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.4.1.R3. Pupils can make meaning of/derive meaning from the current content about “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*

- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.4.1.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.4.1.V1. Pupils can select and use the target vocabulary of the current content about “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.4.1.G1. Pupils can select and use the language including target grammatical elements of the current content about “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*

- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.4.1.W1. Pupils can get ready for the writing-expression process about the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.4.1.W2. Pupils can copy the model/example on the writing task about the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.4.1.W3. Pupils can organise and form a content for the assigned writing task on the current content “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.4.1.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*

- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.4.1.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.4.1.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.4.1.S1. Pupils can get ready for speaking-expression process about the current content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” with the help of supplementary audio-visual materials.

- a) *ENG3.1.PC1. Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.4.1.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.4.1.S3. Pupils can organise simple new verbal content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.4.1.S4. Pupils can form a simple new verbal content on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*

- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.4.1.S5. Pupils can reorganise and use information about the current theme on “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) *Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.4.1.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “school life with people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

SCHOOL LIFE:

Sub-themes: people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations

Target Vocabulary in Use (with revisional vocabulary):

Vocabulary for People at school: A man, men, people, a woman, women, a child, children, a parent, parents, a school counsellor.

Vocabulary for school activities: To arrive at (school), to have (an assembly (homeroom-AmE.)), to attend (lessons), to have (a break (recess-AmE.)), to have breakfast/lunch, to leave (school), to meet, to do sports, to prepare, to participate in (drama performances, talent shows).

Other vocabulary: A club meeting, a school play, a sports day, a talent show, a parent-teacher meeting, a field trip, a main hall.

Days of the week: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday

Months of the year: January, February, March, April, May, June, July, August, September, October, November, December.

Greetings:

How are you? I'm doing well, thanks!

How is it going? It's going well, thank you!

Not bad, thanks!

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Background Language Chunks in Use:

"To be" present (am, is, are):

Language Chunks:

(Who is Mrs Clark? She's/is our new school headmistress. Where's/is she now? She's/is in her office now. What's/is your favourite school activity? My favourite school activity is the drama show. What's your favourite month? My favourite month is January.)

Functions: Telling who people are, where people and things are, telling what month it is; expressing preferences for favourite months.

The Simple Present Tense:

Language Chunks: (What do you do at school in the mornings/every day/on Mondays etc.

We have a school assembly every morning).

Functions: Describing daily routines and activities at school.

The Present Progressive Tense:

Language Chunks: (What are you doing at school now? We're having lunch at school now).

Functions: Describing activities at school at present time.

Personal Pronouns: I, we, he, she, it, we, you, they.

Functions: Referring to the speaker as the subject.

Target Language Chunks in Use:**The Simple Present Tense vs The Present Progressive Tense:**

(I always read books in the morning but I am listening to music today)

Functions: Contrasting habitual actions with temporary or current actions.

Comparing things-Superlative forms of adjectives (Regular adjectives):

(Maths was the hardest subject for her last year. This is the smartest student group in the school).

Function: Comparing more than two people, things, or places and expressing the highest or lowest degree of a quality.

Prepositions: in, on, at, during, between.

Functions: Indicating time, place, or position in relation to other objects or events.

Wh- question words: what, where, who, why, when, which, what kind of.

Functions: Asking for specific information about things, people, reasons, places, times, or choices.

Demonstrative pronouns: this, that

Functions:

This: Referring to something specific that is close to the speaker in space, time, or context; modifying a noun, indicating something nearby or immediately relevant.

That: Referring to something specific that is farther away in space, time, or context from the speaker.

Demonstrative pronouns: these, those

Functions:

These: Expressing the physical or metaphorical closeness of the referent.

Those: Referring things or people away from the speaker.

Linking words: Because

Target Social Language in Use:

See you next week!

It sounds great!

Come on!

What's going on?

What's up?

Thanks a lot!

Let's not be late!

I can't wait!

I hope so.

Target Phonological Sounds in Use:

Vowel: a

Consonant: b

Vowel a: (/æ/, /aeɪ/, /ə/, /ɑ:/, /eɪ/, /a:/, /a/, /ɔ:/, /eə/)

Consonant: b: (/b/, silent /b/)

*No pronunciation symbols will be included in any material written for the pupils, (only) the sounds will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts**Generalisations**

"School life" is present in almost all languages because it is one of the most basic parts of almost all human beings' and all children's lives in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 4 will know what "school life" means as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Routines, daily routines, activities, people, routines at school, activities at school, daily routines and activities at school, activities at present, favourites, favourite activities, months, favourite months, national days, celebrations, national days and celebrations.

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Pupils will create a School Life Diary to describe their typical day, favourite activities, and special celebrations. They will write about their daily routines, like what they do when they arrive at school, during assemblies, and their lunch or breaks. Pupils will also share their favourite activities such as sports or drama performances. Next, they will write about national holidays like the “Republic Day”, explaining how these are celebrated at school. Finally, pupils will describe what they are doing at present, by using phrases like, “We’re having lunch” and they will ask each other questions about school routines and share their answers. After completing their diaries, they will present them to the class. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES**Basic Acceptations: Preparedness/ Readiness**

This theme is based on the pupils’ knowledge of the “people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” in their own language. As the pupils are 9-year-old primary school children, they can know what “people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as “What’s/is your favourite school activity? My favourite school activity is the drama show. What’s your favourite month? My favourite month is January. What do you do at school in the mornings/every day/on Mondays etc. We have a school assembly every morning. What are you doing at school now? We’re having lunch at school now” in English from the previous year. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about “school life” as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of “people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”. Therefore, a dialogue game can be played to revise content about “school life” they learnt before. Some language chunks are also revised as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of “school life” and its components such as “people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”, by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures. In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.4.1.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “school life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2).** For instance, the teacher could bring into the classroom and show a card model of a school and

sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of school life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of school life, so they can easily understand that the current theme will be “school life” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.4.1.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.2, V3.3, V3.4, V4.1, V4.4, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS2, LS4, CS2.14, CS2.16.2**).

ENG.4.1.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about school life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.2, V3.3, V3.4, V4.1, V4.4, V10.3, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “school life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “school life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “school life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**)). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.4.1.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs

and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.4.1.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.2, V3.3, V3.4, V4.1, V4.4, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS4, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about school to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the school and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “school life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.1.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and

help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations" (**V3.2, V3.3, V3.4, V4.1, V4.4, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS2, LS4, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.4.1.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "school life" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.4.1.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations" (**SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V3.2, V3.3, V3.4, V4.1, V4.2, V4.4, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.1.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.4.1.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.4.1.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.2, V3.3, V3.4, V4.1, V4.4, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “school life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V3.2, V3.3, V3.4, V4.1, V4.2, V4.4, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS2, LS4**).

ENG.4.1.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “school”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “school life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “school life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “school” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “school life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “school life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1**,

SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5). To consolidate the meanings of the new vocabulary items for the concept of "school", the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King's game, Odd One out, etc. **(SELS2.2).** These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5).** This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling using the words written on the model school on the blackboard/Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4).** This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.1.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils' attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme "school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations" **(D3.2, V19.1, V19.2, CS2.2).** While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14).** She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils' identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say "Stop!" when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7).** The teacher stops if the pupils are correct, but not if they are not **(V3.2, V3.3, V3.4, V4.1, V4.4, V14.1, V16.1, V16.2, V18.2, V7.1, LS1, LS2, LS4).**

ENG.4.1.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme "school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V3.2, V3.3, V3.4, V4.1, V4.4, V10.3, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS4, CS2.4).** Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5).** To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13).** There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2).** For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2).**

ENG.4.1.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.3, V3.4, V4.1, V4.4, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS4**).

ENG.4.1.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” next to their drawings on the model related to school life. The teacher asks them to look at the Smart Board screen with the model related to school life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V3.2, V3.4, V4.1, V4.4, V7.3, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS4**).

ENG.4.1.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “school life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.4.1.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.4.1.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V3.2, V3.3**).

V3.4, V4.1, V4.2 V4.4, V10.3, V14.1, V15.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.20). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20).** These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.1.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15).** Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2).** The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4).**

ENG.4.1.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations" **(V3.2, V3.3, V3.4, V4.1, V4.2 V4.4, V10.3, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS4, LS5).**

ENG.4.1.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6).** They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4).** The spoken content of the model becomes a path for them to follow.

ENG.4.1.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13).**

ENG.4.1.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "school life with (extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations" **(SELS2.2, SELS3.2, V4.1, V4.2, V4.4, V11.1, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS1, LS4, LS5, CS2.20).** AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20).**

ENG.4.1.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "school life" and its components such as "(extended) people at school; daily routines and activities at school; activities at present, favourite activities; favourite months; national days and celebrations" **(SELS2.2, SELS3.2, V3.2, V3.3, V3.4, V4.1, V4.2, V4.4, V7.2, V10.3, V14.1, V16.1, V16.2, V18.2, V19.1, V19.2, LS4, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.4.1.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V4.2)**. Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V4.3, V10.3)**.

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION**Expansion**

Objective: To ask and answer about people at school; daily routines and activities at school; favourite activities at school, in English, by using the target vocabulary and target chunks.

Activity 1: Tap and Match

Pupils work in groups to match school-themed questions with their corresponding answers. The answer cards are placed face-up on the table, while the question cards are kept in a box face-down. Each group takes turns being the reader. The reader draws a question card, reads it aloud, and the other groups collaborate to quickly find and slap the correct answer card on the table.

Questions:

- What do you do at school in the morning?
- What is your favourite school activity?
- What are you doing at school now?

Answers:

- We have a school assembly every morning.
- My favourite school activity is the drama performance.
- We are having lunch now.

Each correct match earns a point for the group. The game continues until all questions are matched. The group with the most points wins, encouraging teamwork and helping pupils improve their understanding of school-themed vocabulary and sentence structures. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To identify people at school; daily routines and activities at school; favourite activities at school, in English, by using target vocabulary.

Activity 1: Tap and Match

“Tap and Match” is a fun game where pupils match school-themed words with corresponding images. Pupils play this game using image cards placed face-up on the table and word cards read aloud. In each round, one pupil acts as the “reader” and picks a word card to read aloud. Other pupils quickly identify and tap the correct image card. The first pupil to tap the correct card earns a point, while tapping the wrong card means losing their turn for that round. At the end of the game, the pupil or group with the most points wins. This activity supports vocabulary building and visual memory in a fun and engaging way. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

TEACHER REFLECTIONS

FOR MORE TEACHER REFLECTIONS SCAN THE QR CODE.

THEME 2: CLASSROOM LIFE

Sub-themes: School subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons

This theme is centred on the concept of “classroom life” and covers the sub-themes of “school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 4 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.4.2.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”.

- a) Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.4.2.L2. Pupils can bring information about the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” together with key details and main components while listening/watching it.

- a) Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.4.2.L3. Pupils can make meaning of/derive meaning from the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” through details by listening/watching it carefully.

- a) Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) Pupils locate the components of the current content within the whole by listening and watching it.*
- c) Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.4.2.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” in a very simple way.

- a) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.
- b) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.

ENG.4.2.P1. Pupils can select and use the target phonological elements of the current content about “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.
- b) Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.
- c) Pupils recognise the target phonological elements of the current content when they are heard in different contexts.
- d) Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.
- e) Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.

ENG.4.2.R1. Pupils can get ready for the reading-comprehension process about the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”.

- a) Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.
- b) Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.
- c) Pupils make simple preliminary predictions about the current content based on recognised relationships.

ENG.4.2.R2. Pupils can bring information about the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.
- b) Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.
- c) Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.

ENG.4.2.R3. Pupils can make meaning of/derive meaning from the current content about “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” by reading it carefully.

- a) Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.
- b) Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.

- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.4.2.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.4.2.V1. Pupils can select and use the target vocabulary of the current content about “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.4.2.G1. Pupils can select and use the language including target grammatical elements of the current content about “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*

- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.4.2.W1. Pupils can get ready for the writing-expression process about the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.4.2.W2. Pupils can copy the model/example on the writing task about the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.4.2.W3. Pupils can organise and form a content for the assigned writing task on the current content “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.4.2.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*

- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.4.2.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.4.2.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.4.2.S1. Pupils can get ready for speaking-expression process about the current content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.4.2.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.4.2.S3. Pupils can organise simple new verbal content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.4.2.S4. Pupils can form a simple new verbal content on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” through reconstruction by speaking accurately, efficiently, and authentically.

- a) Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.4.2.S5. Pupils can reorganise and use information about the current theme on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.4.2.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

CLASSROOM LIFE:

Sub-themes: School subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons

Target Vocabulary in Use (with revisional vocabulary):

Classroom objects: A folder, a board marker, a calculator, a highlighter, a stapler, a folder, a poster, a chart, a worksheet, an activity book.

Classroom devices: A projector, a calculator, speakers, a printer, a headphone.

Time: o'clock, time, a.m., p.m., in the morning, in the afternoon, in the evening, on Monday.

School subjects: a lesson (class-AmE.) Turkish, Maths, Social Sciences, Visual Arts, Music, Physical Education and Games, English

Verbs: To study, to write, to read, to listen, to talk, to speak.

Seasons: Summer, Autumn, Winter, Spring

Cardinal Numbers: 50-100

Ordinal numbers: 1-30

The alphabet song

Time expressions: Today, now, at present.

Verbs for preferences: To like, to love, to want, to dislike, to hate.

Possessive adjectives: My, her, his, its, our, your, their.

Object pronouns: Me, her, him, it, you, us, them.

Demonstrative pronouns: These, those.

Classroom instructions and classroom language (Not to teach as target language chunks with structural rules but to be used constantly by the teacher as meta-language):

Work quietly, please!

Look at the screen, please!

Listen carefully, please!

Turn to your peer, please!

Talk with your peers, please!

Pair up with your peer /friend, please!

Let's return to our seats, please.

Write this down, please!

Read this, please!

Check your answers, please!

Choose the correct answer, please!

Spell the words, please!

Finish the exercise, please!

Pack your things, please!

Classroom language:

Let me start the lesson!

It's time to finish the lesson!

I'm sorry for the mistake!

Time to line up!

What page are we on?

Time's ticking!

Do you get it?

I get/got it!

You're punctual/late!

Excellent!

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

***Local Cultural, Social and Moral Considerations of the Theme**

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Language Chunks: "To be" in the past (was, were): (What was your favourite lesson last year? My favourite lesson was Maths last year. What was there at school yesterday? There was a talent show at school yesterday. What was there on the desk yesterday? There was a map on the desk yesterday).

Functions of the Target Language Chunks:

was/were: Describing past states or conditions of things or people.

There was/ There were: Expressing the existence or presence of things or people in the past.

Asking and answering about past states, events, and existence of things or people.

Like + gerunds:

Language chunks: (What do you like doing in English lessons? I like learning new words.

Do you like doing sports in PE lessons? Yes, I do. No, I don't).

Functions: Expressing preference or enjoyment.

Background Language Chunks with the target topics:

"To be" (present) with time: (+), (-), (?):

Language Chunks:

(What's/is the time now? What time is it now? It's/is ten past five.

(What time/when is the science lesson? The science lesson is at half past nine. It's on Tuesday. It's at half past nine on Tuesday).

"To be" (present) with seasons:

What's/is the season now? It's Winter. What's/is your favourite? Which season is your favourite? My favourite season is Winter.

"To be" (present) with school subjects:

What lesson is it now? It's/is Maths. What is your favourite school subject? My favourite school subject is Maths.

Functions: Telling what things are, telling if there are or there are not any (existence of) lessons, telling number of things and people, telling how the weather is, telling the time, telling the preferences about favourite school subjects/lessons.

The Present Progressive Tense: (+), (-), (?):

Language Chunks:

(What are you doing in the classroom now? I'm studying English now).

Functions: Describing actions happening in the classroom now.

The Simple Present Tense: (+), (-), (?):

Language Chunks:

(What do you do in PE lesson? We do sports in PE lesson.

What lesson/school subject is your favourite? What's/is your favourite school subject? English is my favourite school subject/lesson).

(What season do you like? I like winter).

Function: Describing general preferences about lessons and school subjects.

Countable/ Uncountable nouns:

Language Chunks:

(There are five folders on the desk. There's some glue on the paper).

Functions: Differentiating between nouns that can be counted (countable) and those that cannot (uncountable), often in reference to quantity.

There are/there is: (+)(-)(?):

Language Chunks:

(Is there a Science lesson on Monday? Yes, there's/is a Science lesson on Monday. Yes, there is. How many lessons are there today? There are five lessons today).

Functions: Expressing the existence of things and people.

Whose and Possessive adjectives:

Language Chunks: (Whose pens are they? They are my pens).

Functions: Describing ownership by modifying a noun to show ownership.

Time expressions: yesterday, ago, last.

Function: Indicating when an action took place, specifically in the past.

Time: half past, quarter to, quarter past, (ten) past (five), (three) to (nine).

Function: Telling time in various forms.

Target Social Language in Use:

Good to see you!

Take care!

It's raining cats and dogs!

Let's break the ice!

That's one in a million!

I'm sorry to hear that!

What does that mean?

Make sure.

Target Phonological Sounds in Use:

Vowel: e

Consonants: c, d,

Vowel: e: (/e/, /i:/, /ə/)

Consonants: c: (/s/, /k/, /tʃ/, /z/); d: (/d/)

*No pronunciation symbols will be included in any material written for the pupils, (only) the sounds will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts**Generalisations**

The concept of "classroom life" is present in almost all languages because it is one of the most basic parts of almost all human beings' and all children's lives in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 4 will know what "classroom life" mean as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Activities, subjects, classroom, school, school subjects, classroom activities, favourite school subjects, favourite classroom activities, now, past, time, classroom activities now, classroom activities in the past, seasons, favourite seasons, weather, weather conditions, favourite weather, weather conditions now, weather conditions in the past.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils will create a Classroom Life News Report. In this activity, they will act as reporters and present a simple live report about their school day, classroom activities, and favourite subjects. First, they will introduce the school subjects they attend, saying what activities they do in each class, using sentences like “In Science, we study plants” or “In PE, we do sports”. Next, pupils will simply report the weather and mention how the weather affects their school day, like “Today, it’s sunny, so we had a break outside”. They will also discuss their favourite school subject and explain why they enjoy it, such as “I love Social Studies because I like learning about history”. Each pupil will present their report to the class, and the class will discuss the different activities and preferences shared. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils’ knowledge of the “school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” in their own language. As the pupils are 9-year-old primary school children, they can know what “school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as “What is your favourite lesson? My favourite lesson is Maths. What is there at school today? There is a talent show at school today. What is the weather like today? It is windy. What is there on the desk? There is a map on the desk” in English from the previous years. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require a lot of English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about “classroom life” as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of “school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”. Therefore, a dialogue game can be played to revise “classroom life” they learnt before. Some language chunks are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of “classroom life” and its components such as “school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”, by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.4.2.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “classroom life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2)**. For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic

meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of classroom life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of classroom life, so they can easily understand that the current theme will be “classroom life” (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.4.2.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.2, V3.3, V3.4, V5.2, V16.1, V16.2, LS1, LS2, LS4, CS2.14, CS2.16.2**).

ENG.4.2.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about classroom life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.2, V3.3, V3.4, V5.2, V16.1, V16.2, LS1**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “classroom life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “classroom life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “classroom life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.4.2.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.4.2.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.2, V3.3, V3.4, V5.2, V16.1, V16.2, LS1, LS4, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about classroom to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the classroom life and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “classroom life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.2.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils’ language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory

story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” (**V3.2, V3.3, V3.4, V5.2, V16.1, V16.2, LS2, LS4, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.4.2.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of “classroom life” (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.4.2.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” (**V3.2, V3.3, V3.4, V5.2, V16.1, V16.2, SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.2.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.4.2.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.4.2.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.2, V3.3, V3.4, V5.2, V16.1, V16.2**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “classroom life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V3.2, V3.3, V3.4, V5.2, V16.1, V16.2, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.4.2.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “classroom life”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “classroom life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “classroom life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “classroom life” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “classroom life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “classroom life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5**). To consolidate the meanings of the new

vocabulary items for the concept of “classroom life”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.2.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” **(D3.2, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.4.2.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V3.2, V3.3, V3.4, V5.2, V10.3, V16.1, V16.2, LS1, LS4, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils’ further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.4.2.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.3, V3.4, V5.2, V16.1, V16.2, LS1, LS4**).

ENG.4.2.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” next to their drawings on the model related to classroom life. The teacher asks them to look at the Smart Board screen with the model related to classroom life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.4, V7.3, LS4**).

ENG.4.2.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “classroom life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.4.2.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.4.2.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year,

favourite seasons” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V3.2, V3.3, V3.4, V4.2, V5.2, V15.1, V16.1, V16.2, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.2.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.4.2.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils’ learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” (**V3.2, V3.3, V3.4, V4.2, V5.2, V16.1, V16.2, LS1, LS4, LS5**).

ENG.4.2.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.4.2.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.4.2.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “classroom life with school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons” (**SELS2.2, SELS3.2, V3.2, V3.3, V3.4, V4.2, V5.2, V11.1, V16.1, V16.2, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.4.2.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "classroom life" and its components such as "school subjects and classroom activities; favourite school subjects and classroom activities now and in the past; time, seasons of the year, favourite seasons" **(SELS2.2, SELS3.2, V3.2, V3.3, V3.4, V4.2, V5.2, V7.2, V16.1, V16.2, LS4, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.4.2.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V4.2)**. Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V4.3, V10.3)**.

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION**Expansion**

Objective: To describe seasons and weather conditions in English by using the target vocabulary and target chunks.

Activity 1: Hat Guessing Game

Pupils work in pairs. One pupil closes their eyes and randomly picks a hat with a picture of a weather condition or season on it (e.g., a sunny day, winter snow). The pupil puts the hat on without looking at the picture. Their peer looks at the hat and gives clues by saying sentences such as, "It's cold", or "It's cloudy". The pupil wearing the hat guesses by asking questions such as, "Is it snowy?" or "Is it summer?". Each correct guess earns the pair a point. The game continues with pairs taking turns, and the pair with the most points wins. This activity practices vocabulary in a fun and interactive way while encouraging speaking and listening skills. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To describe seasons and weather conditions in English by using the target vocabulary.

Activity 1: Hat Guessing Game with Mimics

Pupils work in pairs. One pupil closes their eyes and picks a hat with a picture of a weather condition or a season on it (e.g., a sun for sunny, snowflakes for winter). They put the hat on without seeing the picture. Their peer looks at the hat and uses only facial expressions, gestures, or mimics to help the other pupil guess the correct word from the list written on the board. To make it easier, the teacher writes all possible words (e.g., sunny, rainy, winter, spring) on the board beforehand. For example, if the hat shows “windy”, the peer might puff their cheeks and pretend to blow air. The pupil wearing the hat guesses by selecting the word from the board. If they guess correctly, the pair earns a point. The game continues with pairs taking turns. The teacher provides positive feedback to encourage them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 3: PERSONAL LIFE

Sub-themes: Physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons

This theme is centred on the concept of “personal life” and covers the sub-themes of “physical appearances and personality, clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.4.3.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.4.3.L2. Pupils can bring information about the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.4.3.L3. Pupils can make meaning of/derive meaning from the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.4.3.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.4.3.P1. Pupils can select and use the target phonological elements of the current content about “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.4.3.R1. Pupils can get ready for the reading-comprehension process about the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.4.3.R2. Pupils can bring information about the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.4.3.R3. Pupils can make meaning of/derive meaning from the current content about “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*

- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.4.3.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.4.3.V1. Pupils can select and use the target vocabulary of the current content about “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.4.3.G1. Pupils can select and use the language including target grammatical elements of the current content about “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*

- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.4.3.W1. Pupils can get ready for the writing-expression process about the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” in an age and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.4.3.W2. Pupils can copy the model/example on the writing task about the current content on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.4.3.W3. Pupils can organise and form a content for the assigned writing task on the current content “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.4.3.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.4.3.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.4.3.W.6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, "personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.4.3.S1. Pupils can get ready for the speaking-expression process about the current content on "personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.4.3.S2. Pupils can imitate the model/example for producing verbal content about the current theme on "personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons".

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.4.3.S3. Pupils can organise simple new verbal content on "personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.4.3.S4. Pupils can form a simple new verbal content on "personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*

- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.4.3.S5. Pupils can reorganise and use information about the current theme on “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) *Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.4.3.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

PERSONAL LIFE:

Sub-themes: physical appearances and personality, clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons

Target Vocabulary in Use (with revisional vocabulary):

Parts of the body: A stomach, a moustache, a beard, a tongue, a finger(s), a neck, a shoulder(s), a knee(s), a toe(s).

Adjectives: Thick, thin, huge, fair, wavy, bright, medium, round.

Personal traits for comparing people: Angry, kind, funny, friendly, clever, quiet, brave, careful, naughty, sweet.

Verbs for preferences about body parts, clothes, and dressing: (To like, to dislike) to enjoy, to prefer.

Infinitives after preference verbs: I prefer to wear /wearing cardigans.

Dates with ordinal numbers: 1st, 2nd, 3rd... 20th

Clothes: A wardrobe, Tops: a blouse, a hoodie Bottoms: shorts, leggings; Dresses: a dress, a sundress; Outwear: a raincoat, a cardigan; Footwear: sandals, slippers, flip-flops, trainers (sneakers-AmE.), flats; Sleepwear: pyjamas (pajamas-AmE.) Accessories: a bracelet, a ring, a tie, a belt, gloves, a helmet, a scarf, sunglasses.

Weather: Cloudy, foggy, cool, stormy, clear, misty, freezing, humid.

Quantifiers: All, both, none, no.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

The Simple Past Tense (+)(-)(?)(with regular verbs):

Language Chunks: (What did you do at school/home yesterday? I played games at school yesterday).

Functions: Describing completed actions or events that happened in the past.

"To be" in the Simple Past Tense (was, were):

Language Chunks:

(What were your hobbies when you were 6? My hobbies were playing basketball and playing the piano. How old were you last year? I was 8 years old last year. When was your birthday? It was on 5th March (fifth of March)).

Functions: Asking and answering about past states, ages, events, and personal experiences.

Could for ability in the past:

Language Chunks: (What could you do when you were 6? I could play the piano when I was 6. What sports could you play when you were 7? I could play basketball when I was 7).

Functions: Describing abilities or skills someone had in the past.

Comparative Adjectives (Regular & Irregular):

(Who was taller than you at six? My sister was taller than me at six. Who was more hardworking? My sister was more hardworking than me).

Function: Comparing people, animals, places, or things using adjectives to show differences in quality, size, or degree.

Background Language Chunks in Use:**"To be"-present (am-is-are):****Language Chunks:**

(How old are you? I'm/am nine years old).

(When is your birthday? It's 5th March (fifth of March)).

(What are your hobbies? My hobbies are basketball, volleyball, and table tennis).

(What's/is your favourite cloth? My favourite (clothing) is my blue dress. My blue dress is my favourite cloth/clothing).

Functions: Asking and answering about ages of people, birthday celebrations, physical clothing, dressing and appearance, preferences for clothing and dressing.

The Present Progressive Tense:

Language Chunks: (What are you wearing today? I'm/am wearing a blue cardigan today).

Functions: Describing what clothing people are wearing.

The Present Simple Tense:

Language Chunks: (What does she look like? She's/is tall and beautiful.

What kind of clothing do you like? I like short cardigans).

(What are your hobbies? My hobbies are playing basketball and volleyball).

Functions: Describing physical appearance, preferences for clothing, hobbies, daily routines at home and at school.

Articles: A, an, the.

Function: Indicating whether a noun is specific or nonspecific, and distinguishing singular countable nouns.

Pronouns: Something, anything.

Function: Referring to unspecified or unknown things in affirmative, negative, or interrogative contexts.

Target Social Language in Use:

It fits like a glove!

That's crazy!

What's new?

Keep in touch, please!

Feel free to use this!

Go ahead!

It's not fair!

Target Phonological Sounds in Use:

Vowel: i

Consonants: f, g, h, j

Vowel: i: (/aɪ/, /ɪ/, /i:/)

Consonants: f: (/f/); g: (/g/, /dʒ/); h: (/h/); j: (/dʒeɪ/, /dʒ/)

*No pronunciation symbols will be included in any material written for the pupils, (only) the sounds will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts**Generalisations**

The concept of "personal life" is present in almost all languages because it is one of the most basic parts of almost all human beings' lives and all children's lives in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 4 will know what "personal life" means as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Appearance, physical appearance, clothing, preferences, clothing preferences, celebration, personal celebration, hobbies, abilities, now, past, hobbies now, abilities now, hobbies in the past, abilities in the past, hobbies and abilities in the past.

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Pupils will design a brochure titled "All About Me". The brochure will include sections on their physical appearance, favourite clothing, hobbies, and memorable birthday celebrations in a simple way. They should use the target vocabulary and language chunks, such as "I've/have got short hair" "I've/have got glasses" or "My favourite clothing is my red cardigan". Pupils will also include a past event using sentences like, "I was eight years old last year and I enjoyed playing football". The brochure can include drawings, photos, or other visuals. Pupils will briefly share their brochures with the class. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES**Basic Acceptations: Preparedness/ Readiness**

This theme is based on the pupils' knowledge of the "physical appearances and personality, clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" in their own language. As the pupils are 9-year-old primary school children, they can know what "physical appearances and personality, clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as "What are your hobbies? I like table tennis/ basketball. How old are you? I am 9 years old. When is your birthday? It is on 5th March (fifth of March). What do you do at school/home every day? I play games at school every day. What can you do? I can play the piano" in English from the previous themes or themes from the previous years. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/ rhyme and so on which will not require any complex English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils' physical, cognitive, affective, and social factors are appropriate and suitable for learning about "personal life" as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of "physical appearances and personality, clothing, birthdays, and hobbies". Therefore, a dialogue game can be played to revise the content about theme they learnt before. Some language chunks are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists).

Establishing Links

Pupils are asked to recall the current (theme) concept of "personal life" and its components such as "physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons", by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme

in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.4.3.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “personal life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2).** For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory

digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of personal life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of personal life, so they can easily understand that the current theme will be “personal life” **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17)**.

ENG.4.3.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier **(CS2.11)**. The introductory digital story is watched to identify the target theme “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically **(D3.2, SELS1.1, V3.3, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1 LS1, LS2, LS4, CS2.14, CS2.16.2)**.

ENG.4.3.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about personal life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story **(V3.3, LS1)**. When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum **(D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8)**. After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “personal life” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “personal life” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “personal life” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while **(CS2.3)**. She/ He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils **(SELS2.2, V3.4, V4.2, LS1, LS2)**. When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard **(SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10)**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories **(D1.2, D1.6, D2.3, CS2.12)**.

ENG.4.3.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V7.2)**. Some volunteer pupils express what they

think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG.4.3.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class **(V3.4, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS1, LS4, CS2.16.3)**. The teacher could offer variations with some techniques, such as showing the picture of the target words about personal life to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing **(D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2 CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the personal life and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him **(SELS2.1, CS2.6)**. Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out **(V3.4, V4.2, V15.1, LS4)**. These “personal life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques **(SELS2.3, V11.1, V12.2, LS5, CS2.9)**. Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not **(D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.3.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write

about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" (**V3.3, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS2, LS4, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.4.3.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "personal life" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.4.3.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" (**SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.3.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.4.3.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.4.3.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “personal life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS1, LS2, LS4**).

ENG.4.3.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “personal life”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “personal life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “personal life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “personal life” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “personal life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “personal life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5**). To consolidate the meanings of the new

vocabulary items for the concept of “personal life”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.3.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” **(D3.2, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS1, LS2, LS4)**.

ENG.4.3.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS1, LS4, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils’ further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.4.3.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS1, LS4**).

ENG.4.3.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” next to their drawings on the model related to personal life. The teacher asks them to look at the Smart Board screen with the model related to personal life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.4, V7.3, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS4**).

ENG.4.3.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “personal life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.4.3.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.4.3.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather;

comparisons” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V15.1, V18.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.3.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.4.3.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils’ learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” (**V3.2, V4.2, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS1, LS4, LS5**).

ENG.4.3.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models (**CS2.6**). They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context (**D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4**). The spoken content of the model becomes a path for them to follow.

ENG.4.3.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. (**D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13**).

ENG.4.3.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “personal life with physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons” (**SELS2.2, SELS3.2, V4.2, V8.1, V10.1, V10.2, V10.3, V11.1, V14.1, V14.2, V18.1, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills (**D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20**).

ENG.4.3.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "personal life" and its components such as "physical appearances and personality; clothing and clothing preferences; hobbies and abilities now and in the past; weather; comparisons" **(SELS2.2, SELS3.2, V4.2, V7.2, V8.1, V10.1, V10.2, V10.3, V14.1, V14.2, V18.1, LS4, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.4.3.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V4.2)**. Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V4.3, V10.3)**.

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION**Expansion**

Objective: To describe and talk about clothing and clothing preferences in English by using the target vocabulary and target chunks.

Activity 1: Design the Character

Each pupil is given a paragraph describing a character's physical appearance, clothing, and personality traits. For example: "The character has wavy hair and blue eyes. She/He is wearing a raincoat, leggings, and slippers. She/He is very kind and enjoys quiet activities". Pupils use the description to design the character on a blank person template. They cut out pictures such as hairstyles, clothing, and accessories from the provided sheets, paste them onto the template, and label the parts, such as "raincoat" or "blue eyes". After completing the activity, pupils present their character by reading the paragraph. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To describe clothing and clothing preferences in English by using the target vocabulary.

Activity 1: Design Your Character

Pupils receive a blank person template and a sheet with pictures of clothing items, hairstyles, and eye colours. They cut out their chosen items, paste them onto the template, and label them with arrows, such as "raincoat", "blue eyes", or "short hair". After completing their characters, they describe them with simple sentences such as, "My character has blue eyes and is wearing a cardigan". Then, their works are displayed on the classroom notice board. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 4: FAMILY LIFE

Sub-themes: Family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons

This theme is centred on the concept of "family life" and covers the sub-themes of "family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons". These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners' developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS FLFS1. Listening/Watching-Comprehension
FLFS2. Reading-Comprehension
FLFS3. Speaking-Expression
FLFS4. Writing-Expression
FLSS1. Gramming: Selection and Use
FLSS2. Vocabulary: Selection and Use
FLSS3. Pronunciation: Selection and Use

Year 4 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.4.4.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons”.

- a) Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.4.4.L2. Pupils can bring information about the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” together with key details and main components while listening/watching it.

- a) Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.4.4.L3. Pupils can make meaning of/derive meaning from the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” through details by listening/watching it carefully.

- a) Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) Pupils locate the components of the current content within the whole by listening and watching it.*
- c) Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.4.4.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” in a very simple way.

- a) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*

- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.4.4.P1. Pupils can select and use the target phonological elements of the current content about “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.4.4.R1. Pupils can get ready for the reading-comprehension process about the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.4.4.R2. Pupils can bring information about the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.4.4.R3. Pupils can make meaning of/derive meaning from the current content about “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*

- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.4.4.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.4.4.V1. Pupils can select and use the target vocabulary of the current content about “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.4.4.G1. Pupils can select and use the language including target grammatical elements of the current content about “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*

- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*
- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.4.4.W1. Pupils can get ready for the writing-expression process about the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.4.4.W2. Pupils can copy the model/example on the writing task about the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.4.4.W3. Pupils can organise and form a content for the assigned writing task on the current content “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.4.4.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*

- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.4.4.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully, and individually reorganising it.*
- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.4.4.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.4.4.S1. Pupils can get ready for speaking-expression process about the current content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.4.4.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.4.4.S3. Pupils can organise simple new verbal content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.4.4.S4. Pupils can form a simple new verbal content on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*

- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.4.4.S5. Pupils can reorganise and use information about the current theme on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” by reconstructing it to communicate with other people.

- a) *Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) *Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.4.4.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands; places for services in the neighbourhood; comparisons” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

FAMILY LIFE:

Sub-themes: Family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons.

Target Vocabulary in Use (with revisional vocabulary):

Family members: Grandpa, grandma, mummy (mommy-AmE.), daddy, women, men, a person, people.

Jobs: A teacher, a doctor, a farmer, a dentist, an imam, a nurse, a police officer, a scientist, a singer, a waiter/waitress, a shop assistant, a secretary, a cook (chef), a worker, a writer, an artist, a cleaner, a driver.

Action verbs for jobs: To teach, to check, to grow, to help, to test, to sing, to sell, to write, to cook, to build, to draw, to paint, to clean, to drive.

Places and services in the neighbourhood: A theatre, a hospital, a restaurant, a museum, a park, a bank, a café, a library, a city, a shop, a hotel, a market, a station, a cinema, a post office, a chemist's (pharmacy-AmE.), a hairdresser's, a barber's, a greengrocer's, a bakery, a butcher's.

Action verbs for daily errands: To do the/to go shopping, to buy groceries, to pick up children from school, to take the rubbish (trash-AmE.) out, to take the dog for a walk, to help, to set the table.

Long-lasting habits: To read before bed, to visit the library every Saturday, to garden on Sundays, to watch films on Sundays, to ride a bike on Saturdays, to go for a walk, to drink milk every morning, to go to the cinema every Saturday, to meet friends, to listen to music.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

The Simple Past Tense (+)(-)(?)(with irregular verbs):

Language Chunks: (What did you read at home last night? I read a new book about animals last night).

Functions: Describing completed actions or events that happened in the past.

Comparisons with the regular forms of adjectives-Superlatives:

(Who is the kindest person in your family? My brother is the kindest person in our family).

Functions: Describing one person, animal, place, or thing as having the highest or lowest degree of a quality among three or more.

Like+love+Ving:

(What do you like doing at the weekend? I like riding my bike and playing football with my friends. What does your sister love doing? She loves reading books and drawing pictures).

Function: To express preferences, interests, or enjoyment of activities.

Background Language Chunks in Use:

"To be"-present:

Language Chunks:

(What's/is your father's job? He's/is a doctor). (What's/is your favourite habit? My favourite habit is reading).

Functions: Asking and answering about professions; expressing likes, interests, or personal habits.

The Present Progressive Tense:

Language Chunks: (What are you doing today? I'm/am going to the shops).

Functions: Describing ongoing actions, habits, errands or temporary activities in the present.

The Present Simple Tense:

Language Chunks: (What does your mother do (for a living?) She's/is a teacher).

(How often do you go for a walk? I go for a walk every Sunday).

Functions: Describing professions or habitual actions; expressing regular or repeated actions and their frequency.

Target Language Chunks in Use:**Target Social Language in Use:**

That's great!

Good job!

Catch you later!

Sounds fun!

Not this time.

Calm down!

Don't worry!

You look so cool!

Go ahead!

Excellent!

Target Phonological Sounds in Use:

Vowel: o

Consonants: k, l, m, n, p

Vowel: o: (/əʊ/, /ɒ/, /ɔ:/)

Consonants: k: (/k/); l: (/ɛl/ /l/); m: (/ɛm/, /m/); n: (/ɛn/, /n/); p: (/pi:/, /p/)

*No pronunciation symbols will be included in any material written for the pupils, (only) the sounds will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts**Generalisations**

The concept of "family life" is present in almost all languages because it is one of the most basic parts of almost all human beings' and children's lives in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 4 will know what "family life" means as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Jobs, habits, errands, members, family members, family members' jobs, family members' long-lasting habits, family members' errands, services, places, neighbourhood, places for services, places for neighbourhood, places for services in the neighbourhood, comparisons.

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Pupils will create a poster or a flyer about their family. They will include pictures or drawings of their family members, their jobs, and long-lasting habits. They will write short descriptions like, "My dad is a doctor, and he helps people every day" or "My mom likes to read before bed". Pupils will also add information about family errands, such as, "We always go shopping on Saturdays". The poster will feature a map of their neighbourhood showing places like the hospital, the park, or the library, where their family members often go. Pupils will present their posters to the class, explaining each part in

their own words. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils' knowledge of the "family members' jobs; family members' long-lasting habits; family members' errands; places for services in the neighbourhood; comparisons" in their own language. As the pupils are 9-year-old primary school children, they can know what "family members' jobs; family members' long-lasting habits; family members' errands; places for services in the neighbourhood; comparisons" mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing school curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt some basic things to talk about what things are and what people do etc. by using language chunks such as "Do you live in this neighbourhood? Yes, we live here. Do you watch this series? Yes, I do. No, I don't. What's/is your father's job? He's/is a doctor" in English from the previous themes or years. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require any further English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils' physical, cognitive, affective, and social factors are appropriate and suitable for learning about "family life" as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of "family life". Therefore, a dialogue game can be played to revise some words and chunks about "family life" they learnt before. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of "family life" and its components such as "family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons", by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds)

in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.4.4.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “family life” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2).** For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8).** For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of family life can also be created using Web 2.0 programmes.) They can guess the sub-concepts of family life, so they can easily understand that the current theme will be “family life” **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17).**

ENG.4.4.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier **(CS2.11).** The introductory digital story is watched to identify the target theme “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands (now and in the past); places for services in the neighbourhood; comparisons” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically **(D3.2, SELS1.1, V2.1, V2.2, V2.3, V2.4, V3.3, V5.1, V8.3, V16.1, V16.2, LS1, LS2, LS4, CS2.14, CS2.16.2).**

ENG.4.4.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils' attention to the content about family life and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for family life with family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V2.1, V2.2, V2.3, V2.4, V3.3, V5.1, V8.3, V16.1, V16.2, LS1**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word "family life" several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme "family life" is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the "family life" in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.4.4.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.4.4.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme "family life with family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons", the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V2.1, V2.2, V2.3, V2.4, V3.4, V5.1, V8.3, V16.1, V16.2, LS1, LS4, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about family life to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in

which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the family life and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “family life”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.4.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils’ language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands(now and in the past); places for services in the neighbourhood; comparisons” (**V2.1, V2.2, V2.3, V2.4, V3.3, V5.1, V8.3, V16.1, V16.2, LS2, LS4, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.4.4.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of “family life” (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.4.4.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands (now and in the past); places for services in the neighbourhood; comparisons” (**SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V2.1, V2.2, V2.3, V2.4, V4.2, V5.1, V8.3, V16.1, V16.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.4.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.4.4.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.4.4.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands (now and in the past); places for services in the neighbourhood; comparisons”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V2.1, V2.2, V2.3, V2.4, V3.3, V3.4, V5.1, V8.3, V16.1, V16.2**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “family life” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the family life with family members’ jobs; family members’ long-lasting habits; family members’ errands (now and in the past); places for services in the neighbourhood; comparisons, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.4.4.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “family life”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “family life”. She/He prepares three boxes on one side of the screen and mixed images/pictures for target vocabulary related to the “family life” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them (**CS2.4**). She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions (**CS2.5**). When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “family life” to the correct empty boxes on the screen (**SELS1.2, CS2.5**). In this way, images/pictures that are relevant to the concept of the theme “family life” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “family life” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class (**SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5**). To consolidate the meanings of the new vocabulary items for the concept of “family life”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. (**SELS2.2**). These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities (**D2.5, SELS3.1, V4.2, V7.2, LS5**). This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words

in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling using the words written on the model school on the blackboard/Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.4.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils' attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme "family life with family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons" **(D3.2, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils' identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say "Stop!" when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V2.1, V2.2, V2.3, V2.4, V3.3, V4.1, V5.1, V8.3, V7.1, V16.1, V16.2, LS1, LS2, LS4)**.

ENG.4.4.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme "family life with family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V2.1, V2.2, V2.3, V2.4, V3.1, V5.1, V8.3, V10.3, V16.1, V16.2, LS1, LS4, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.4.4.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "family life with family members' jobs; family members' long-lasting habits; family members' errands

(now and in the past); places for services in the neighbourhood; comparisons” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V2.1, V2.2, V2.3, V2.4, V3.2, V3.4, V5.1, V8.3, V16.1, V16.2, LS1, LS4**).

ENG.4.4.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands (now and in the past); places for services in the neighbourhood; comparisons” next to their drawings on the model related to family life. The teacher asks them to look at the Smart Board screen with the model related to family life that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V2.1, V2.2, V2.3, V2.4, V4.4, V5.1, V7.3, V8.3, V16.1, V16.2, LS4**).

ENG.4.4.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “family life” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.4.4.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.4.4.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “family life with family members’ jobs; family members’ long-lasting habits; family members’ errands (now and in the past); places for services in the neighbourhood; comparisons” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V2.1, V2.2, V2.3, V2.4, V4.2, V5.1, V8.3, V15.1, V16.1, V16.2, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.4.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15)**. Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4)**.

ENG.4.4.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "family life with family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons" **(V2.1, V2.2, V2.3, V2.4, V3.2, V4.2, V5.1, V8.3, V16.1, V16.2, LS1, LS4, LS5)**.

ENG.4.4.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4)**. The spoken content of the model becomes a path for them to follow.

ENG.4.4.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13)**.

ENG.4.4.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "family life with family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons" **(SELS2.2, SELS3.2, V2.1, V2.2, V2.3, V2.4, V4.2, V5.1, V8.3, V11.1, V16.1, V16.2, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20)**.

ENG.4.4.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the

pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme (**V3.4, V15.1, LS1**). Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "family life" and its components such as "family members' jobs; family members' long-lasting habits; family members' errands (now and in the past); places for services in the neighbourhood; comparisons" (**SELS2.2, SELS3.2, V2.1, V2.2, V2.3, V2.4, V4.2, V5.1, V7.2, V8.3, V16.1, V16.2, LS4, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.4.4.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To identify family members' jobs and talk about them in English by using the target vocabulary and target chunks.

Activity 1: Jobs Match and Say

The teacher decorates the classroom walls with a large family tree showing names and jobs (e.g., "Uncle John - doctor", "Aunt Janet - teacher"). Job titles (e.g., doctor, teacher, farmer) are written on small pieces of paper and placed in a box. Each pupil draws a job from the box, finds the matching family member on the wall, and forms a sentence using the job. Pupils are not given action verbs and must think of them independently. For example:

- If a pupil draws "doctor", they say: "Uncle John is a doctor. He helps people".
- If a pupil draws "teacher", they say: "Aunt Janet is a teacher. She teaches students".

The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To identify family members' jobs and describe them in English by using the target vocabulary and target chunks.

Activity 1: Jobs Match and Say

The teacher writes job titles (e.g., doctor, teacher, farmer) on small pieces of paper and places them in a box, then writes action verbs (e.g., help people, teach) on the board. Each pupil picks a job from the box, checks the corresponding action on the board, and forms a sentence about a family member. For example, if a pupil picks "doctor" and sees "help people" on the board, they might say: "My uncle is a doctor. He helps people". This activity encourages pupils to use both job vocabulary and action verbs in meaningful sentences. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

TEACHER REFLECTIONS

THEME 5: HOMES & HOUSES & THE NEIGHBOURHOOD

Sub-themes: Life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water

This theme is centred on the concept of “homes, houses, and the neighbourhood” and covers the sub-themes of “life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS

- FLFS1. Listening/Watching-Comprehension
- FLFS2. Reading-Comprehension
- FLFS3. Speaking-Expression
- FLFS4. Writing-Expression
- FLSS1. Grammar: Selection and Use
- FLSS2. Vocabulary: Selection and Use
- FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS

DISPOSITIONS D1.1. Curiosity, D1.2. Independence, D1.3. Perseverance and Determination, D1.5. Self-Confidence, D1.6. Selectivity, D2.3. Assertiveness, D2.4. Trust, D2.5. Playfulness, D3.1. Reasoning, D3.2. Focus, D3.3. Creativity, D3.5. Open-Mindedness, D3.6. Analyticalness, D3.7. Being Systematic

INTERCURRICULAR COMPONENTS

Social-Emotional Learning Skills

SELS1.1. Self-Awareness Skill, SELS1.2. Self-Regulation Skill, SELS1.3. Self-Reflection Skill, SELS2.1. Communication Skill, SELS2.2. Cooperation Skill, SELS2.3. Social Awareness Skill, SELS3.1. Adaptability Skill, SELS3.2. Flexibility Skill, SELS3.3. Responsible Decision-Making Skill

Values V3. Diligence, V4. Friendship, V5. Sensitivity, V6. Honesty, V7. Aesthetics, V9. Compassion, V10. Modesty, V11. Independence, V12. Patience, V14. Respect, V15. Love and Affection, V18. Cleanliness, V20. Benevolence

Literacy Skills LS1. Information Literacy, LS2. Digital Literacy, LS4. Visual Literacy, LS5. Cultural Literacy, LS6. Civic Literacy, LS8. Sustainability Literacy

INTERDISCIPLINARY**RELATIONS**

Turkish, Maths, Social Sciences, Visual Arts, Music, Physical Education and Games

INTERSKILLS

CS2.2. Observation Skill, CS2.3. Summarising Skill, CS2.4. Analysis Skill, CS2.5. Classification Skill, CS2.6. Information Gathering Skill, CS2.7. Comparison Skill, CS2.8. Inquiry Skill, CS2.9. Generalisation Skill, CS2.10. Inference Skill, CS2.11. Observation-Based Prediction Skill, CS2.12. Data-Based Prediction Skill, CS2.13. Structuring Skill, CS2.14. Interpretation Skill, CS2.15. Reflective Thinking Skill, CS2.16.1. Inductive Reasoning Skill, CS2.16.2. Deductive Reasoning Skill, CS2.16.3. Analogical Reasoning Skill, CS2.17. Evaluation Skill, CS2.20. Synthesis Skill, CS3.1. Decision-Making Skill, CS3.3. Critical Thinking Skill

Year 4 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.4.5.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water”.

- a) Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.4.5.L2. Pupils can bring information about the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” together with key details and main components while listening/watching it.

- a) Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.4.5.L3. Pupils can make meaning of/derive meaning from the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” through details by listening/watching it carefully.

- a) Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) Pupils locate the components of the current content within the whole by listening and watching it.*
- c) Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.4.5.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” in a very simple way.

- a) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.
- b) Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.

ENG.4.5.P1. Pupils can select and use the target phonological elements of the current content about “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.
- b) Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.
- c) Pupils recognise the target phonological elements of the current content when they are heard in different contexts.
- d) Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.
- e) Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.

ENG.4.5.R1. Pupils can get ready for the reading-comprehension process about the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water”.

- a) Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.
- b) Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.
- c) Pupils make simple preliminary predictions about the current content based on recognised relationships.

ENG.4.5.R2. Pupils can bring information about the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.
- b) Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.
- c) Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.

ENG.4.5.R3. Pupils can make meaning of/derive meaning from the current content about “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” by reading it carefully.

- a) Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.

- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*
- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.4.5.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.4.5.V1. Pupils can select and use the target vocabulary of the current content about “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.4.5.G1. Pupils can select and use the language including target grammatical elements of the current content about “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) Pupils become familiar with the current content by listening, viewing, and reading it several times.
- b) Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.
- c) Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.
- d) Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.
- e) Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.
- f) Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.
- g) Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.
- h) Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.
- i) Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.

ENG.4.5.W1. Pupils can get ready for the writing-expression process about the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” in an age- and level-appropriate way.

- a) Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.
- b) Pupils understand correctly what the current writing task is as guided and assigned.

ENG.4.5.W2. Pupils can copy the model/example on the writing task about the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” based on the model/example provided to practise for further writing activities.

- a) Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.

ENG.4.5.W3. Pupils can organise and form a content for the assigned writing task on the current content “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” based on the model/example provided.

- a) Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.

ENG.4.5.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water”.

- a) Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.
- b) Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.
- c) Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.

ENG.4.5.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” to communicate with other people.

- a) Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.
- b) Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.

ENG.4.5.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.

ENG.4.5.S1. Pupils can get ready for speaking-expression process about the current content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” with the help of supplementary audio-visual materials.

- a) Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.

ENG.4.5.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water”.

- a) Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.

ENG.4.5.S3. Pupils can organise simple new verbal content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” by speaking accurately, efficiently, and authentically.

- a) Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.
- b) Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.

ENG.4.5.S4. Pupils can form a simple new verbal content on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” through reconstruction by speaking accurately, efficiently, and authentically.

- a) Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.4.5.S5. Pupils can reorganise and use information about the current theme on “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.4.5.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “homes, houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

HOMES & HOUSES & THE NEIGHBOURHOOD:

Sub-themes: Life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water

Target Vocabulary in Use (with revisional vocabulary):

Sea/marine animals: A whale, a shark, a fish, a dolphin, a sea turtle, a jellyfish, an octopus, a crab, a starfish, a jellyfish, a seal.

Habitats for marine animals: An ocean, a river, a lake, a sea, a lagoon.

Activities in the marine habitats: To swim, to splash, to dive, to jump, to hide, to play, to crawl.

Dangers for marine animals: Plastic, waste, a fishing net, pollution, hunting, climate change.

Types of houses by the water: A beach house, a lake house, a houseboat.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Language Chunks: Will for the Simple Future: (What do you think) the weather will be like tomorrow? I think it will be sunny).

Function: Talking about things that will happen in the future, especially for decisions and predictions.

Language Chunks: Superlative forms of Adjectives: (Who is the best cook in your family? My sister is the best cook in our family),(What was the worst film you watched last year? It was The Haunted House. It was the worst).

Functions: Describing one person, animal, place, or thing as having the highest or lowest degree of a quality, when the adjective does not follow the regular -est pattern.

Should:

Language Chunks: (What should we do to protect sea-marine animals? We should not throw plastic in the ocean. We should keep the seas clean).

Function: Giving advice or suggestions.

(Mustn't):

Language Chunks: (You mustn't throw rubbish into the sea).

Function: Describing prohibition.

Quantifiers: Many, much, a lot of, no.

Function: Indicating the quantity or amount of countable and uncountable nouns.

Past versus present:

Language Chunks: (There were a lot of seals on the beach last Friday. There are no seals on the beach today). (There was not much clean water in the sea last year. There is some clean water in the sea this year). (There were many fish in the sea last year. There are no fish in the sea this year).

Functions: Comparing past and present conditions or situations.

Revisional Target Language Chunks in Use:

Where do you live? We live in a beach house.

What do you do in your beach house? I watch the sea and the sea animals.

Where do whales live? They live in the ocean.

What do whales eat? Whales eat small fish.

What are the dangers for whales? The dangers for whales are plastic and pollution.

Target Social Language in Use:

What a shame!

That's interesting.

Guess what?

Don't worry!

That's a good point.

Target Phonological Sounds in Use:

q, r, s, t, v

Consonants: q: /kju:/, r: /ɑ:/ (Br), /r/ (AmE.); s: (/s/, /ɛs/, /z/); t: (/ti:/, /t/); v: (/vi:/, /v/)

*No pronunciation symbols will be included in any material written for the pupils, (only) the sounds will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The concept of "homes, houses and the neighbourhood" is present in almost all languages because it is one of the most basic parts of almost all human beings' and children's lives in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 4 will know what "homes, houses and the neighbourhood" mean as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Sea, seaside, life, life on the seaside, activities, dangers, animals, habitats, sea/marine, sea/marine animals, activities of sea/marine animals, dangers for sea/marine animals, habitats of sea/marine animals, houses, types of houses, houses by the water, types of houses by the water.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Pupils will create a brochure titled "Life by the Water and Sea/Marine Protection". They will draw or include pictures of marine animals, describe their habitats in one sentence (e.g., "Dolphins live in the sea"), and list dangers like plastic and pollution with advice (e.g., "We must keep the sea clean"). They will also draw or glue pictures of houses by the water and write about what people can see or do there (e.g., "If you live in a houseboat, you can watch fish swimming"). Finally, they will include three sentences about protecting marine life. Pupils will present their brochures to the class. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the pupils' knowledge of the "life on the seaside and sea/marine animals" in their own language. As the pupils are 9-year-old primary school children, they can know what "life on the seaside and sea/marine animals and their habitats mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing foreign language curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as "There's/is some rubbish here. It's/is dangerous for animals. Keep the streets clean. All animals must

stay healthy. Don't throw rubbish! Animals can die. What can we do for animals? We cannot throw rubbish anywhere. You mustn't throw rubbish into the sea. There are some cats in the street today. There aren't/are not dogs in the street today" in English from the previous themes or years. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a dialogue work, an acting-out game, a physical activity, listening to a song/chant/rhyme and so on which will not require a high level of English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils' physical, cognitive, affective, and social factors are appropriate and suitable for learning about "homes, houses and the neighbourhood" as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of "life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water". Therefore, a dialogue game can be played to revise "homes, houses and the neighbourhood, life" they learnt before. Some language chunks are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of "life in the city and the world" and its components such as "healthy and unhealthy food; national and international dishes; countries; holidays", by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.4.5.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of “homes and houses and the neighbourhood” in their minds, so a further concept check would help them prepare for the current theme **(D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2)**. For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about **(V3.3, LS2, LS4, CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of homes and houses and the neighbourhood can also be created using Web 2.0 programmes.) They can guess the sub-concepts of homes and houses and the neighbourhood, so they can easily understand that the current theme will be “homes and houses and the neighbourhood” **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17)**.

ENG.4.5.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier **(CS2.11)**. The introductory digital story is watched to identify the target theme “homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically **(D3.2, SELS1.1, V3.3, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS1, LS2, LS4, CS2.14, CS2.16.2)**.

ENG.4.5.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils’ attention to the content about homes and houses and the neighbourhood and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story **(V3.3, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS1)**. When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its

components, which can be used to check their learning as described in item (8) in the section 1.2. Principles for the Implementation of the English Curriculum **(D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8)**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “homes and houses and the neighbourhood” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “homes and houses and the neighbourhood” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “homes and houses and the neighbourhood” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils **(SELS2.2, V3.4, V4.2, LS1, LS2)**. When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard **(SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10)**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories **(D1.2, D1.6, D2.3, CS2.12)**.

ENG.4.5.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V7.2)**. Some volunteer pupils express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG.4.5.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class **(V3.4, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS1, LS4, CS2.16.3)**. The teacher could offer variations with some techniques, such as showing the picture of the target words about homes and houses and the neighbourhood to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing **(D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the homes and houses and the neighbourhood and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him **(SELS2.1, CS2.6)**. Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out **(V3.4, V4.2, V15.1, LS4)**. These “homes and houses and the neighbourhood”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through

TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.5.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water" (**V3.3, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS2, LS4, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.4.5.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "homes and houses and the neighbourhood" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.4.5.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and

then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about "homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water" (**SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.5.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.4.5.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.4.5.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme "homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water", the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to "homes and houses and the neighbourhood" is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS1, LS2, LS4**).

ENG.4.5.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “homes and houses and the neighbourhood”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “homes and houses and the neighbourhood”. She/He prepares three boxes on one side of the screen and mixed images/ pictures for target vocabulary related to the “homes and houses and the neighbourhood” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them **(CS2.4)**. She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions **(CS2.5)**. When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “homes and houses and the neighbourhood” to the correct empty boxes on the screen **(SELS1.2, CS2.5)**. In this way, images/pictures that are relevant to the concept of the theme “homes and houses and the neighbourhood” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “homes and houses and the neighbourhood” on the blackboard/whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of “homes and houses and the neighbourhood”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.5.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” **(D3.2, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, V7.1, LS1, LS2, LS4)**.

ENG.4.5.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils' practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme "homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water", and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group (**SELS2.2, V3.1, V10.3, LS1, LS4, CS2.4**). Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems (**D2.5**). To organise the pupils' further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum (**CS2.13**). There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context (**SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2**). For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them (**V4.4, V7.2**).

ENG.4.5.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about "homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water" as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded (**V3.2, V3.4, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS1, LS4**).

ENG.4.5.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language (**D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3**). To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups (**SELS2.1, SELS2.2**) (of two, three, four etc.) and to write the names of the vocabulary items "homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water" next to their drawings on the model related to homes and houses and the neighbourhood. The teacher asks them to look at the Smart Board screen with the model related to homes and houses and the neighbourhood that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.4, V5.2, V7.3, V9.2, V9.3, V14.1, V18.2, V18.3, LS4**).

ENG.4.5.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “homes and houses and the neighbourhood” in fun, enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils’ age and language level (**D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20**).

ENG.4.5.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings (**D2.5, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level (**V3.4, V7.2, LS1, LS4**).

ENG.4.5.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme “homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” from simple to more expanded versions in their writing (**SELS2.2, SELS2.3, V4.2, V5.2, V9.2, V9.3, V14.1, V15.1, V18.2, V18.3, LS1, LS4, LS5, CS2.20**). AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20**). These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.5.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. (**D1.5, SELS1.3, V4.2, LS1, CS2.15**). Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs (**D2.4, D3.5, V12.1, V15.1, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3, LS4**).

ENG.4.5.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils’ learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about “homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water” (**V3.2, V4.2, V5.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS1, LS4, LS5**).

ENG.4.5.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4)**. The spoken content of the model becomes a path for them to follow.

ENG.4.5.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13)**.

ENG.4.5.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "homes and houses and the neighbourhood with life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water" **(SELS2.2, SELS3.2, V4.2, V5.2, V9.2, V9.3, V11.1, V14.1, V18.2, V18.3, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20)**.

ENG.4.5.S5.**RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING:**

Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1)**. Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme "homes and houses and the neighbourhood" and its components such as "life on the seaside; sea/marine animals and their habitats: activities of sea/marine animals: dangers for sea/marine animals; types of houses by the water" **(SELS2.2, SELS3.2, V4.2, V5.2, V7.2, V9.2, V9.3, V14.1, V18.2, V18.3, LS4, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.4.5.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V4.2**). Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.3, V10.3**).

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION**Expansion**

Objective: To identify and talk about life on the seaside; sea/marine animals and their habitats in English by using the target vocabulary and target chunks.

Activity 1: Marine Map

Pupils work in groups to complete a colourful map of the ocean and its habitats. Each group takes turns drawing a question from a box, such as "I have eight arms and can hide in small spaces. Who am I?" (Answer: OctopAmE.). Once they identify the correct sea animal, they select its picture from a pile of cards and stick it onto the corresponding habitat on the map, such as "Dolphin Lagoon" or "Jellyfish Cove". The group that completes the map the fastest and most accurately wins the game. They then repeat the words as a whole class. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To identify life on the seaside; sea/marine animals in English by using the target vocabulary.

Activity 1: Sea Animal Bingo

Pupils play "Sea Animal Bingo" by receiving bingo cards with pictures of sea animals such as jellyfish, crab, and dolphin. The teacher calls out the names of the animals, and pupils mark the matching pictures on their cards. The first pupil to complete their card shouts "Bingo!" and wins a small prize. They then repeat the words as a whole class. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

THEME 6: LIFE IN THE CITY & THE WORLD

Sub-themes: Healthy and unhealthy food; national and international dishes; countries; holidays

This theme is centred on the concept of “life in the city and the world” and covers the sub-themes of “healthy and unhealthy food; national and international dishes; countries; holidays”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 4 is structured based on holistic approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.4.6.L1. Pupils can get ready for the listening/watching-comprehension process for the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays”.

- a) *Pupils activate their pre-existing knowledge and experiences related to the current theme and content, by recalling it in her/his own language in their minds.*
- b) *Pupils recognise concrete and simple relationships between the previous knowledge and experience and the clues to the current content, by responding to simple questions with physical actions without speaking Turkish or without having a translation.*
- c) *Pupils make simple predictions about the current content, by using pre-existing knowledge and experience based on the realia, pictures and context.*

ENG.4.6.L2. Pupils can bring information about the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” together with key details and main components while listening/watching it.

- a) *Pupils make simple predictions about the current content based on the surrounding audio/visual elements scattered around the classroom in relation to the current theme.*
- b) *Pupils comprehend the topic of the current content by listening (to)/watching it as a whole without having intervals.*
- c) *Pupils recognise concrete/simple/basic details and components within the whole introductory content by watching and listening to it by noticing the basic components.*

ENG.4.6.L3. Pupils can make meaning of/derive meaning from the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” through details by listening/watching it carefully.

- a) *Pupils check all initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals about the concept.*
- b) *Pupils locate the components of the current content within the whole by listening and watching it.*
- c) *Pupils make simple and basic classifications of the current content when necessary by grouping components, words, and other aspects with the help of visuals.*
- d) *Pupils make very simple comparisons of the current content when necessary to be aware of the differences between components, words, and other aspects with the help of visuals.*
- e) *Pupils recognise very concrete/simple/basic horizontal and vertical relationships within the current content by being aware that some vocabulary relates to one set of components while another set relates to other components.*
- f) *Pupils internalise the current content personally in an age- and level-appropriate manner, recognising that it is about her/his present life at school.*

ENG.4.6.L4. Pupils can convey their knowledge, experience, thoughts, and feelings about the whole listening/watching-comprehension process in relation to the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” in a very simple way.

- a) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content in a very simple way.*
- b) *Pupils convey their personal knowledge, experiences, thoughts, and feelings in relation to the listening/watching-comprehension process about the current content by sharing them with others in a very simple way.*

ENG.4.6.P1. Pupils can select and use the target phonological elements of the current content about “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” accurately, authentically, and naturally through spontaneous selection and using it in an appropriate and effective way when communicating with others.

- a) *Pupils listen to/watch the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Pupils reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Pupils recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Pupils recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Pupils use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.4.6.R1. Pupils can get ready for the reading-comprehension process about the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays”.

- a) *Pupils activate their pre-existing knowledge and past experiences related to the current theme and content.*
- b) *Pupils recognise simple and basic relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Pupils make simple preliminary predictions about the current content based on recognised relationships.*

ENG.4.6.R2. Pupils can bring information about the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Pupils make simple predictions about the topic of the current content by exploring the audio-visual clues surrounding it.*
- b) *Pupils grasp the topic of the current content generally by looking at the surrounding audio/visual materials quickly through skimming.*
- c) *Pupils recognise simple and basic details through major components by reading the content very quickly and silently through scanning.*

ENG.4.6.R3. Pupils can make meaning of/derive meaning from the current content about “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” by reading it carefully.

- a) *Pupils check the current content in detail for the accuracy of initial predictions that are made earlier.*
- b) *Pupils classify the basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- c) *Pupils compare basic elements of the current content that contribute to the perception of it in a simple and meaningful way.*
- d) *Pupils recognise basic horizontal/vertical relationships within the current content that contribute to the perception of it in a simple and meaningful way.*
- e) *Pupils make simple, basic, and meaningful inferences from the information in the current content by examining it.*

- f) *Pupils internalise the information in the current content in an individualised and appropriate way according to their age and language level.*

ENG.4.6.R4. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current reading-comprehension content and process by sharing them with others very simply.*

ENG.4.6.V1. Pupils can select and use the target vocabulary of the current content about “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils hear/view target vocabulary in the current content as a whole in context.*
- b) *Pupils repeat the target vocabulary of the current content as a whole class and in groups after hearing/watching the target material and source, together with pointing to the pictures displayed in class.*
- c) *Pupils recognise the use of the target words in the target material and source, by listening/watching it several times and seeing how and where the target words are used to describe the current concept.*
- d) *Pupils associate the contextual meanings of target words reinforced and recognised through whole class, group and individual repetition, with pre-existing conceptual meanings in mind.*
- e) *Pupils recognise the meaning of the target vocabulary whose use is noticed and which are repeated through whole class, group and individual repetition.*
- f) *Pupils make use of the semantically related target vocabulary in a spontaneous, authentic and natural way in various contextual activities and exercises without analysis with the help of recalling their background knowledge (in Turkish in his/her mind).*
- g) *Pupils use the target words spontaneously and appropriately in different communicative contexts such as peers at school and friends, family and other people outside the school by being aware of their differences.*

ENG.4.6.G1. Pupils can select and use the language including target grammatical elements of the current content about “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Pupils become familiar with the current content by listening, viewing, and reading it several times.*
- b) *Pupils reinforce familiarity with the target content by listening to/watching it several more times if necessary, through the recognition of actions involved in it.*
- c) *Pupils listen to/watch an audio/visual/written presentation of current content with target language chunks representing target language use, narrated through body language and verbal repetition.*
- d) *Pupils gain auditory/visual awareness by listening/watching/reading the presentation of the content containing similar language chunks with common structures through body language and verbal repetition.*

- e) *Pupils repeat target language chunks many times in the current auditory/visual/written context many times, without knowing, analysing, or thinking about their rules, verbally, automatically and by pointing.*
- f) *Pupils repeat the auditory/visual/written content containing target language chunks many times automatically, naturally, and verbally within short, simple, and meaningful sentences without knowing, analysing, or thinking about their rules.*
- g) *Pupils act out physically the language chunks in the heard/viewed/seen content without knowing, analysing, or thinking about their rules.*
- h) *Pupils repeat the language chunks in the auditory/visual/written content automatically and act them out simultaneously and physically without knowing, analysing, or thinking about their rules.*
- i) *Pupils automatically select and use similar target language chunks related to the current content heard/seen/read in oral communication without knowing, analysing, or thinking about their rules.*

ENG.4.6.W1. Pupils can get ready for the writing-expression process about the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” in an age- and level-appropriate way.

- a) *Pupils activate their pre-existing knowledge and experiences used in the initial processes of listening/viewing (and/or reading) and associate it with the current content in a simple way.*
- b) *Pupils understand correctly what the current writing task is as guided and assigned.*

ENG.4.6.W2. Pupils can copy the model/example on the writing task about the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” based on the model/example provided to practise for further writing activities.

- a) *Pupils rewrite model/example content and some similar content by imitating it in order to gain familiarity with the content to be produced and to develop manual copying skills.*

ENG.4.6.W3. Pupils can organise and form a content for the assigned writing task on the current content “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” based on the model/example provided.

- a) *Pupils organise a very simple, short, and meaningful content for a prepared and/or unprepared writing task related to the current theme with suitable materials appropriate to the assigned writing type, age, and language level.*

ENG.4.6.W4. Pupils can practise writing by constructing content for the assigned writing task on the current content “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays”.

- a) *Pupils use materials, structural features, discourse forms, and punctuation appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task.*
- b) *Pupils select and use target words, language chunks, and social language expressions appropriate to the assigned writing type, age, and language level for a prepared and/or unprepared writing task related to the theme.*
- c) *Pupils express simple messages clearly for a prepared and/or unprepared writing task related to the current theme.*

ENG.4.6.W5. Pupils can reorganise and use information by reconstructing it in the new written tasks about the “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” to communicate with other people.

- a) *Pupils use similar information from the current content in different contexts by simply, meaningfully and individually reorganising it.*

- b) *Pupils engage in simple written communication by sharing reconstructed meaningful information related to the current theme with others.*

ENG.4.6.W6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) *Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process very simply.*
- b) *Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others very simply.*

ENG.4.6.S1. Pupils can get ready for speaking-expression process about the current content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” with the help of supplementary audio-visual materials.

- a) *Pupils become familiar with model/example content through repetition and imitation after completing the stage of recalling pre-existing knowledge and experience used during the initial processes of listening/watching/reading and associating it with the current content.*

ENG.4.6.S2. Pupils can imitate the model/example for producing verbal content about the current theme on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays”.

- a) *Pupils become familiar with the model/sample content through repetition and imitation in context while and after listening (to)/watching it with the help of audio-visual aids.*

ENG.4.6.S3. Pupils can organise simple new verbal content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” by speaking accurately, efficiently, and authentically.

- a) *Pupils design simple new verbal content by imitating model/sample content for prepared and/or unprepared speaking situations based on the model/sample that was listened (to)/watched earlier.*
- b) *Pupils organise simple new verbal content by imitating model/sample content for prepared/unprepared speaking situations, appropriate to the model/sample, context, age, and language level.*

ENG.4.6.S4. Pupils can form a simple new verbal content on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” through reconstruction by speaking accurately, efficiently, and authentically.

- a) *Pupils select and use accurate pronunciation, discourse forms, target words and language chunks for prepared and/or unprepared speaking situations, by imitating model/example content, appropriate to age and language level.*
- b) *Pupils select simple and contextually appropriate content/information quickly for impromptu speaking situations and present it in a natural and authentic way with appropriate and accurate materials and appropriate to the model/sample, age, language level, and context (question-answer, pointing and saying, selecting and saying, etc.) within the given (thinking) time.*
- c) *Pupils organise simple and contextually appropriate content for prepared speaking situations with accurate and appropriate materials and present it in a natural and authentic way (short monologues, dialogues, show and tell, pantomime drama, etc.).*
- d) *Pupils express messages in a concrete, simple and clear way for the listener in prepared and/or unprepared speaking situations together with mimics, gestures, and body language.*

ENG.4.6.S5. Pupils can reorganise and use information about the current theme on “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” by reconstructing it to communicate with other people.

- a) Pupils use the presented information in different contexts in a simple, natural, accurate and necessary way by reorganising it individually and verbally.*
- b) Pupils engage in verbal communication by sharing the reconstructed meaningful information with others.*

ENG.4.6.S6. Pupils can convey their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” very simply for reflection in relation to themselves or others, both individually and/or with others.

- a) Pupils convey individually the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process in a very simple way.*
- b) Pupils convey the knowledge, experiences, thoughts, and feelings that have been in relation to the current writing-expression content and process by sharing them with others in a very simple way.*

CONTENT FRAME

LIFE IN THE CITY AND THE WORLD:

Sub-themes: Healthy and unhealthy food; national and international dishes; countries; holidays

Target Vocabulary in Use (with revisional vocabulary):

Healthy food items: Green salad, fish, meat, eggs, soup, milk, fruit (an apple, an orange, a banana, a strawberry, grapes, a cherry, a pear, a plum, a lemon), yogurt, nuts, vegetables (lettuce, cucumber, spinach, broccoli, peas, cauliflower) chicken, turkey, brown rice.

Unhealthy food items: Chips (fries-AmE.), sweets (candies- AmE.), biscuits (cookies- AmE.), a soda, an ice-cream, a cake, a chocolate, noodles, a burger, a sausage, a pizza, lemonade, pasta.

Dishes: Fish and chips, kebab, moussaka, pizza, tacos, a burger, falafel.

Quantifiers:

Few: not many, (negative, countable)

A few: some (positive, countable)

Little: not much (negative, uncountable)

A little: some (positive, uncountable)

Countries:

Türkiye, Italy, England, Spain, Greece, Germany, the United States of America, Mexico, Algeria, Turkish Republic of Northern Cyprus, Azerbaijan.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Target Language Chunks in Use:

Be Going to Future" Tense: (+)(-)(?):

Language Chunks: (Where are you going to go on holiday next week? We're/are going to go to Italy next week).

(What are you going to eat in Italy on holiday? We're/are going to eat pizza in Italy on holiday.

Functions: Expressing future plans, intentions, or decisions made prior to speaking.

Countable and uncountable nouns with little, few, a little, a few, no:

Language Chunks: (We are going to make a salad with some lettuce and cucumbers.

We are going to put a few cucumbers in it).

Functions: Describing quantities of countable and uncountable nouns, often to emphasize scarcity or sufficiency.

Background Language in Use:

Superlative forms of adjectives:

Language Chunks:

What is the most delicious food for you in Italy?

Pasta is the most delicious food for me in Italy.

Where can you eat the most delicious pizza?

We can eat the most delicious pizza in Italy.

Functions: Comparing multiple items or choices to highlight the highest degree or quality.

Target Social Language in Use:

It tastes good.

Amazing!

I'm starving.

After you!

Never mind!

Thanks for everything.

That's enough.

Target Phonological Sounds in Use:

Vowel: u

Consonants: w, x, y, z

Vowel: u: (/ju:/, /ʌ/, /ju:/)

Consonants: w: (/w/); x: (/eks/, /ks/, /gz/); y: (/waɪ/, /j/, /ɪ/, /i:/); z: /zed/ (Br), /zi:/ (AmE.), /z/)

*No pronunciation symbols will be included in any material written for the pupils, (only) the sounds will be practised through pronunciation activities in the theme.

Generalisations/Principles/Key Concepts**Generalisations**

The concept of "life in the city and the world" is present in almost all languages because it is one of the important parts of some human beings' lives in different parts of the world. People who start to learn a new language bring with them their previous/pre-existing knowledge and transfer it to their new language learning. So, a primary school pupil in year 4 will know what "life in the city and the world" means as a concept but will not know its equivalents in another language if it has not been covered in their existing foreign language curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn it more easily in a foreign language, English in this case.

Key Concepts:

Food, dishes, healthy, unhealthy, healthy food, unhealthy food, national dishes, international dishes, countries, nationalities, holidays.

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Pupils will act as travel agents for "Taste the World Tours" for creating a brochure for a food-focused trip to countries like Türkiye or Italy. The brochure will describe famous dishes using superlatives, such as "Kebab is from Türkiye. The most delicious kebab is in Türkiye.. Pizza is from Italy. The most delicious pizza is in Italy" and includes healthy and unhealthy food options with quantifiers like "a few sweets". Pupils will also outline future plans using "be going to" such as "You are going to try moussaka in Türkiye" and mention holidays with traditional foods. They will present their brochures in a sales suggestion to their classmates. The class will rate the presentations through the rating scales or checklists given by the teacher.

LEARNING-TEACHING EXPERIENCES**Basic Acceptations: Preparedness/ Readiness**

This theme is based on the pupils' knowledge of the "healthy and unhealthy food; national and international dishes; countries; holidays" in their own language. As the pupils are 9-year-old primary school children, they can know what "healthy and unhealthy food; national and international dishes; countries; holidays" mean in their own language and to be able to express them in their own language. However, they would not know them in a foreign language, in this case English, if they were not covered in their existing English curriculum. This knowledge in their own language would prepare them to identify the same concepts in their foreign language, English, without speaking any Turkish. It is assumed that they have learnt how to ask what things are and how to introduce them using language chunks such as "Where are you going on holiday next week?"

We're/are going to Italy next week. What is your favourite food in Italy? Pasta is my favourite food for me in Italy. We are making a salad with some lettuce and cucumber" in English from the previous themes or years. These chunks can be used as a basis for learning the new language chunks in the current theme making the new chunks easier to learn. This can be an activity such as a short game, a physical activity, listening to a song/chant/rhyme and so on which will not require a high level of English knowledge and also there will not be a need to speak Turkish.

Pre-Evaluation Process

It is expected that pupils' physical, cognitive, affective, and social factors are appropriate and suitable for learning about "life in the city and the world" as a concept in English. Some previous themes from previous years would be helpful as a basis for moving on and learning the current content on the concept of "healthy and unhealthy food; national and international dishes; countries; holidays". Therefore, a dialogue game can be played to revise "life in the city and the world," they learnt before. Some language chunks are also revised by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use previously learnt vocabulary and language chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics and/or checklists.)

Establishing Links

Pupils are asked to recall the current (theme) concept of "life in the city and the world" and its components such as "healthy and unhealthy food; national and international dishes; countries; holidays", by remembering their previous/pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the theme in English without translating anything until they start learning the target words in the current concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept various visual materials such as a short digital cartoon, a picture, a poster can be prepared and shown (it can be a paper picture format if there are technological problems) before the main teaching/learning flow of the lesson begins. The pupils are facilitated through the materials they have learnt the concept of it in the previous years with various activities. Then they are asked in simple English what was it about. They get help from the teacher to be able remember and say. For example the teacher could show the pictures with the words next to them so that pupils can remember some vocabulary and language chunks from the previous years. The teacher asks them to wait until they see the next visual, which is the main entry material of the theme, the introductory digital story, without asking any further questions.

One of the example practices could be to point correctly to a picture of the current concept in it when they are given instructions by the teacher in simple English. Pupils give responses by pointing out relevant so-called pictures without speaking any Turkish but only in very simple English or with mimics and gestures.

In this way, connections are made between pre-existing knowledge about the current theme (in their minds) in their own language and the present information about the concept through meaningful contextualised activities with visuals within the theme.

Learning-Teaching Practices

WARM UP TO THE WHOLE THEME FOR WELL-BEING

Before starting to work on the theme, to prepare the pupils emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the pupils feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as playing a short game, doing a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, saying a tongue twister, etc. that has no relation or connection to the current theme and does not require any knowledge of English. This is done only for fun and relaxation. **(D2.5, SELS2.1, V12.1, LS2, LS4).**

INTEGRATION OF LANGUAGE SKILLS IN THE THEME:

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around a central topic and sub-themes, allowing pupils to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where pupils engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG.4.6.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: After having an activity about the current theme during the background recall session, pupils can have a vision of "life in the city and the world" in their minds, so a further concept check would help them prepare for the current theme (**D3.2, SELS1.1, V3.2, LS1, CS2.11, CS2.16.2**). For instance, the teacher could bring into the classroom and show a card model of a school and sets of pictures about the components of it. The teacher then asks the pupils to point to the pictures in or on the model. She/He asks what they think the topic of the main context of the theme, the introductory digital story, that they are going to watch is about (**V3.3, LS2, LS4, CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme. It is both an entry material and the main context to the whole theme at the same time. (A 3-D model of life in the city and the world can also be created using Web 2.0 programmes.) They can guess the sub-concepts of life in the city and the world, so they can easily understand that the current theme will be "life in the city and the world" (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.4, LS1, LS2, LS4, CS2.10, CS2.17**).

ENG.4.6.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: To have access to the current theme, the teacher asks the pupils to watch the introductory digital story carefully recalling the pictures shown earlier (**CS2.11**). The introductory digital story is watched to identify the target theme "life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays" as a whole, without stopping the video at any point, so that the pupils can understand the theme/topic holistically (**D3.2, SELS1.1, V3.3, V4.5, V5.1, V13.1, V14.3, V17.2, LS1, LS2, LS4, LS5, CS2.14, CS2.16.2**).

ENG.4.6.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw the pupils' attention to the content about life in the city and the world and its relevant components, some pictures are brought into the classroom by the teacher. The teacher brings a necessary number of large boxes for the pictures (some symbols are stuck on the boxes for life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays) and puts the boxes on the table. She/He puts the corresponding picture into the related box when the corresponding vocabulary is mentioned in the introductory digital story without stopping the video while the pupils watch the story (**V3.3, V4.5, V5.1, V13.1, V14.3, V17.2, LS1, LS5**). When they have watched the whole story, the teacher shows the items in the boxes on the table and asks some simple display questions about it. In this way, the teacher could carry out a monologue and also engage in a dialogue with the whole class to check that they have recognised the theme as a whole through its components, which can be used to check their learning as described in item (8) in the section

1.2. Principles for the Implementation of the English Curriculum (**D1.2, D1.6, SELS2.1, V4.2, V6.1, LS2, LS4, CS2.8**). After watching the introductory digital story, the teacher takes all the pictures out of the boxes and puts them back on the table again and says the word “life in the city and the world” several times aloud, and the pupils repeat after her/him. In this way, the main vocabulary of the theme “life in the city and the world” is introduced to the pupils in English. To remember the sequence of the scenes with the parts, places, and people in the “life in the city and the world” in the introductory digital story, the teacher shows the mixed images/pictures of the scenes on the Smart Board and asks the pupils to look at the images/ pictures of these scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs with the mixed paper pictures she has already given to the pupils (**SELS2.2, V3.4, V4.2, LS1, LS2**). When the pairs have finished sorting the pictures for scenes of the story, the teacher asks the pupils to take turns or volunteer to order the scenes on the screen of the Smart Board (or the pictures on the blackboard (**SELS1.2, V4.1, V14.1, V20.4, LS4, CS2.6, CS2.10**). This will help the teacher organise the story as a whole so that the pupils can identify the main theme and the components of the theme through their memories (**D1.2, D1.6, D2.3, CS2.12**).

ENG.4.6.L4.

REFLECTING ON THE LISTENING/WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V7.2**). Some volunteer pupils express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, V20.4, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V10.3**).

ENG.4.6.P1.

RECOGNITION OF TARGET PRONUNCIATION: To recognise the pronunciation of the new target words, language chunks, and social language expressions about the theme “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays”, the teacher puts on the table the pictures and boxes that she/he has previously used. She/He holds up each picture and asks the pupils to repeat each word aloud a few times as a whole class after listening to the recordings she/he has prepared beforehand using some Web 2.0 programmes. She/He puts the picture in the correct box about the group corresponding to the word while repeating the words with the whole class (**V3.4, V4.5, V5.1, V13.1, V14.3, V17.2, LS1, LS4, LS5, CS2.16.3**). The teacher could offer variations with some techniques, such as showing the picture of the target words about life in the city and the world to the pupils to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both. To help the pupils pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers, using the shadow technique, in which pupils immediately repeat whatever the teacher is saying or the story, without pausing (**D1.3, SELS1.2, SELS2.1, V3.4, V7.1, LS2, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be extended with different forms of TPR activities, e.g. first the teacher says the target words for the life in the city and the world and its components, the pupils listen; then the teacher says the target words and acts them out, the pupils repeat after her/him (**SELS2.1, CS2.6**). Then the teacher and the pupils say the target words and act them out together at the same time. Then the pupils say the words, and the teacher acts them out (**V3.4, V4.2, V15.1, LS4**). These “life in the city and the world”-related actions can be done through the actions which can be done in the school, but they are only used for acting without teaching them as verbs in English. For instance, they can pretend to do things according to the topic. As a variation, they can also repeat the words after the teacher happily, sadly, angrily etc. using different tones of voice through TPR techniques (**SELS2.3, V11.1, V12.2, LS5, CS2.9**). Then some groups of pupils say the words, some groups of pupils act them out. While doing the repetitions, they point to relevant pictures that the teacher has placed in different places

in the classroom. Some action sequences are also created through which the pupils can practise the social language expressions of the theme in a fun way by repeating, pointing, and miming in several games. Several fun pronunciation games could be played where pupils whisper a target word into the ears of their peers forming a chain and the last person says it aloud and the class checks if the word is pronounced correctly or not (**D2.5, SELS2.1, SELS2.2, V4.3, V4.4, V6.2, LS6, CS2.12**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.6.R1.

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading activities throughout the theme when and where necessary with precise techniques and the necessary amount. Reading is quite limited for this age group and it is done in two ways in the theme, by using a short extract from the written version of the introductory digital story and/or additional short reading texts in reading sections of the teaching materials to be used. The texts are very short, precise, and simple, as they are limited reading texts. Various reading styles including reading aloud, chorus reading, silent reading, and speed reading are used as main styles. Basic reading techniques such as skimming, scanning, and reading for detail are used in very simplified ways. Pre-reading, while-reading and post-reading phases are used in a simplified and age-appropriate way in the theme. The ultimate aim of reading practice is to increase comprehension, improve fluency, develop pre-critical thinking skills, support the ability to comprehend and help talk/write about the content in a meaningful and communicative way. In this way pupils' language and communicative competence improve gradually (**V3.2, LS1, LS4, CS2.3, CS2.6, CS3.3**). For the initial stage of reading, the teacher asks the pupils to look at quickly the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme on "life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays" (**V3.3, V4.5, V5.1, V13.1, V14.3, V17.2, LS2, LS4, LS5, CS2.8**). At this stage, the teacher could ask the pupils to read the title/heading of the content and ask the pupils which words they already know, and which come to mind in connection with the title by showing them a list of words and corresponding pictures to choose the ones they know (**SELS1.1, V3.4, LS1, CS2.16.2**). She/He reminds them not to ask for the meanings of new words or the words they do not know. She/He reminds them that this is only a recalling activity to check the words they know and that there will be time to work on the new words of the new theme later (**D3.2, D3.6, V12.1, CS2.10, CS2.12**).

ENG.4.6.R2.

BRINGING INFORMATION TOGETHER THROUGH READING: To see the written forms of the target words and to do some simple reading, the teacher asks the pupils to look at the Smart Board where she/he shows a 3-D house model of "life in the city and the world" (that she/he has used earlier). Next to each item, the written form of the word is provided on the model. The teacher asks the pupils to read the words first silently. The teacher then points to a word at random and asks the pupils to read it out loud as a whole class. Then she/he invites volunteers to come to the board and they point to different words and the rest of the class read them aloud as a chorus (**D2.3, SELS1, V3.4, V4.2, V20.4, LS1, LS2, LS4, CS2.12**).

ENG.4.6.R3.

MAKING MEANING THROUGH READING: The teacher then shows (a short extract from) the written version of the introductory digital story (or another text about the theme) on the blackboard/Smart Board. She/ He asks the pupils to read after her/him using the shadow reading technique as a whole class. She/He could also try different versions such as pyramid reading or radio reading techniques (reading silently for a while and then aloud, then silently, and so on) which are the combinations of silent and aloud reading using rhythms as prompts (**V3.4, V7.2**). After reading the words/word groups/clauses in the content, pupils proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively

with the help of the teacher. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones (**SELS2.1, V3.3, LS1, LS4, CS2.14**). From display to communicative open-ended, various types of questions are used to understand the meaning of the short and simple texts about “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” (**V4.5, V5.1, V13.1, V14.3, V17.2, LS5, SELS3.1, SELS3.2**). During this process pupils work collaboratively to exchange information, thoughts, and feelings (**SELS2.2, V4.2, CS2.6**). This is evaluated as described in items (6), (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.6.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY:

The teacher asks pupils to think about the reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3**). Some volunteer pupils express what they think and feel about them (**V20.4, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V12.2, LS1**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (**V4.4, V10.3**).

ENG.4.6.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, pupils remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions (**SELS1.1, V3.2, LS1, LS2, LS4**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme.

ENG.4.6.V2.

RECOGNITION OF THE TARGET VOCABULARY: To introduce the meaning of the vocabulary related to the theme “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays”, the teacher asks the pupils to watch the introductory digital story again. A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help pupils to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some pictures for the vocabulary about the main components of the theme that take place in the story/text (**V3.3, V3.4, V4.5, V5.1, V13.1, V14.3, V17.2, LS5**). Pupils circle or tick the ones that they have heard, seen and scanned (quickly read) in the story/text. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, CS2.4, CS2.6, CS2.7**). Then, from the beginning, whenever an item related to “life in the city and the world” is mentioned, the teacher stops the video and asks a question in the form of two options by showing their pictures (**CS2.16.1, CS2.6**). By guessing what they are based on the pictures, the scene, and the sound, pupils hear the English equivalents of the words for the life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays, and they answer as a whole class. In this way, they are introduced to the meaning of the target words (**D1.1, V4.5, V5.1, V13.1, V14.3, V17.2, LS5, CS2.10**). This is done in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**)(3) and (8) in the section 1.2. Principles for the Implementation of the English Curriculum (**V4.2, V14.1, LS1, LS2, LS4**).

ENG.4.6.V3.

SELECTION AND USE OF TARGET VOCABULARY: To check whether the pupils are aware of the components of the main theme “life in the city and the world”, the teacher prepares an activity using the Web 2.0 program with images/pictures of components of “life in the city and the world”. She/He prepares three boxes on one

side of the screen and mixed images/ pictures for target vocabulary related to the “life in the city and the world” on the other side. She/He asks the pupils to look at the mixed pile of images/pictures on the Smart Board screen and scan them for a while to remember them **(CS2.4)**. She/He asks the pupils to drag the objects about the components of the theme into the correct box on the screen. The boxes have the words for each component represented on them with symbolic pictures. The pupils are given the cut-out pictures and a large sheet of paper with the pictures of empty boxes. The teacher asks them to work in pairs and put the cut-out pictures in the right box and ask each other several display questions **(CS2.5)**. When the pupils have finished working with the cut-outs and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures as the components of the theme “life in the city and the world” to the correct empty boxes on the screen **(SELS1.2, CS2.5)**. In this way, images/pictures that are relevant to the concept of the theme “life in the city and the world” are consolidated through categorisation. The same activity can be done with real pictures on the white/blackboard if there is a problem with technology. To practise the meanings of the target words about the school, the teacher places several pictures for them in the different parts of the classroom. She/He then puts some flashcards with the target vocabulary for “life in the city and the world” on the blackboard/ whiteboard. She/He takes a flashcard at random and shows it to the pupils. Pupils, working in pairs, look at the flashcard, decide which picture on the classroom walls is relevant, they go to the picture together, pin the flashcard to the noticeboard and say the word together first in pairs, and then as a whole class **(SELS2.1, SELS2.2, V3.4, V7.1, LS1, LS2, LS4, CS2.5)**. To consolidate the meanings of the new vocabulary items for the concept of “life in the city and the world”, the teacher could organise several activities in pairs and groups with pictures and flashcards such as Bingo, Pelmanism, King’s game, Odd One out, etc. **(SELS2.2)**. These activities are closed and controlled so that pupils can practise the current (new) vocabulary about the current context in the beginning but later they work with simple and easy open-ended and communicative activities **(D2.5, SELS3.1, V4.2, V7.2, LS5)**. This is evaluated as described in items (1), (2), (3), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. The teacher asks the pupils to copy the words in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other’s spelling using the words written on the model school on the blackboard/ Smart Board **(SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS1, LS4)**. This is evaluated as described in items (3) and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.6.G1.

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the pupils’ attention to the target language chunks of the theme, the introductory digital story is played so that the pupils can notice the target language chunks about the theme “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” **(D3.2, V4.5, V5.1, V13.1, V14.3, V17.2, LS5, CS2.2)**. While the pupils watch the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the pupils to do the same **(CS2.14)**. She/He could hold up large pictures and ask the pupils questions about the pictures with the target chunks expecting the pupils to ask and answer by using the target chunks. To check the pupils’ identification of the target language chunks, the teacher shows some picture strips that she/he has prepared for this activity, using some Web 2.0 programmes, after the pupils have watched the introductory digital story and imitated the actions and said the target language chunks. She/He asks the pupils to listen to her/him saying a target language chunk and then to look at the screen and say “Stop!” when they see a scene in the picture strips with the target chunk that the teacher has just said **(SELS3.1, CS2.7)**. The teacher stops if the pupils are correct, but not if they are not **(V3.3, V4.1, V7.1, LS1, LS2, LS4)**.

ENG.4.6.G2.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate pupils’ practice with the target language chunks, the teacher prepares necessary number of headings on the screen with symbols for the components of the theme “life in the city and the world with healthy and unhealthy food; national and international dishes;

countries; holidays”, and writes the appropriate language chunks to be used with each of the groups. She/He also provides the vocabulary items on the Smart Board screen. The teacher wants the pupils to think for a while and talk with their peers about which target words can be used in which language chunk group **(SELS2.2, V3.1, V4.5, V5.1, V10.3, V13.1, V14.3, V17.2, LS1, LS4, LS5, CS2.4)**. Then the pupils go to the board and move the words under the correct heading and say the complete sentence with the target words and the chunks. They are then asked to say a sentence with the target chunk aloud as a class. Each sentence is repeated after each pair. Their learning can be checked as described in items (5), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. The same game can be played with pictures on the blackboard if there are technological/technical problems **(D2.5)**. To organise the pupils’ further practice to consolidate the target language chunks, the teacher could create some action sequences in context by repeating, saying, and acting out with different activity bundles where their learning can be checked as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(CS2.13)**. There is no analysis or teaching of grammatical structures at this stage. Pupils can automatically, spontaneously, and naturally select and use the target language chunks in the current context **(SELS3.1, V3.4, V4.2, V7.1, LS5, CS2.3, CS2.4, CS2.16.2)**. For consolidation of the target language chunks, the teacher can facilitate more fun activities and games so that the pupils can practise and consolidate them **(V4.4, V7.2)**.

ENG.4.6.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Writing activities help pupils produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme which is about “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” as in other themes. Writing activities are arranged according to age and level so they are quite limited and are gradually expanded **(V3.2, V3.4, V4.5, V5.1, V13.1, V14.3, V17.2, LS1, LS4, LS5)**.

ENG.4.6.W2.

COPYING FROM THE MODEL: Initially, pupils produce very limited and short pieces of writing, such as words and word groups to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening/watching and reading activities in the theme. They practise the language in a more controlled way in the beginning, by writing to repeat, answering simple questions with a limited number of words, or simply explaining in context what they hear and see and what they are asked to do. They are provided a written model/example to copy. By copying a simple written model, they get used to seeing and using the target words, language chunks, punctuation, spelling and so on in written language **(D3.1, SELS3.1, V3.4, LS1, CS2.4, CS2.16.3)**. To further practise guided and copied writing, the teacher gives all the pupils some paper/cardboard to make a model in groups **(SELS2.1, SELS2.2)** (of two, three, four etc.) and to write the names of the vocabulary items “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” next to their drawings on the model related to life in the city and the world. The teacher asks them to look at the Smart Board screen with the model related to life in the city and the world that she/he has made earlier so that the pupils can easily copy the target words for the items as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum **(V4.4, V7.3, V4.5, V5.1, V13.1, V14.3, V17.2, LS4, LS5)**.

ENG.4.6.W3.

CREATING CONTENT BASED ON THE MODEL: For practising more with the written forms of the target words, language chunks, and the social language for the theme, new contexts are created in the form of a new animated short story or a dialogue for the pupils to practise further by seeing/hearing/reading/writing (copying) the target words and language chunks about the concept of “life in the city and the world” in fun,

enjoyable, varied, and versatile activities. This new content is contextual, simple, practical, and appropriate to the pupils' age and language level **(D1.2, D1.6, SELS3.2, V3.4, V4.2, V4.4, LS1, LS4, CS2.20)**.

ENG.4.6.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Pupils are encouraged to produce a variety of written products such as clauses, sentences, acronyms, messages, posters, e-mails, poems, songs and so on to express their ideas, thoughts, and feelings **(D2.5, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the pupils' age, interests, and language level **(V3.4, V7.2, LS1, LS4)**.

ENG.4.6.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Pupils interact and communicate with peers and/or other people inside or outside school by using the written language including the target words, language chunks, and the social language for the theme "life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays" from simple to more expanded versions in their writing **(SELS2.2, SELS2.3, V4.2, V4.5, V5.1, V13.1, V14.3, V15.1, V17.2, LS1, LS4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce simple digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3, V3.4, V7.2, V11.1, LS2, CS2.20)**. These activities can be evaluated as described in items (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG.4.6.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing expression process and asks them to express their thoughts, ideas, and feelings about the process in simple ways, for instance by using emoticons, symbols, drawings, charts etc. **(D1.5, SELS1.3, V4.2, LS1, CS2.15)**. Pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs **(D2.4, D3.5, V12.1, V15.1, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3, LS4)**.

ENG.4.6.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance pupils' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures, and the social language expressions of the theme about "life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays" **(V3.2, V4.2, V4.5, V5.1, V13.1, V14.3, V17.2, LS1, LS4, LS5)**.

ENG.4.6.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, pupils recognise the language with the target language items through the models **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, and imitating what they hear and see in the context **(D1.3, D3.2, SELS3, V3.4, LS1, LS4, CS2.4)**. The spoken content of the model becomes a path for them to follow.

ENG.4.6.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new and simple photo/picture strip/pantomime/video stories, dialogues, etc. as new opportunities for the pupils to talk about them for practising further through questions, explanations, inferences etc. **(D1.3, SELS3.2, V3.4, V7.1, LS1, LS4, CS2.13).**

ENG.4.6.S4.

CONSTRUCTING SPOKEN MATERIALS: Pupils are encouraged to produce several spoken products related to the extended contexts such as simple dialogues, short texts etc. To interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “life in the city and the world with healthy and unhealthy food; national and international dishes; countries; holidays” **(SELS2.2, SELS3.2, V4.2, V4.5, V5.1, V11.1, V13.1, V14.3, V17.2, LS1, LS4, LS5, CS2.20).** AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings for developing their oral skills **(D1.2, D1.6, D3.3, SELS3.2, SELS3.3, V3.4, V7.2, LS2, CS2.20).**

ENG.4.6.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Pupils communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20).** Picture strip stories can be used at the end of each theme to provide a consolidation and revision. These new contents created are contextual, practical, authentic, real, and appropriate to the pupils’ age, interests, and language level. Storification, drama, and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme **(V3.4, V15.1, LS1).** Pupils are encouraged to produce several spoken products related to the extended contexts such as dialogues, show and tell activities, acting out activities to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme “life in the city and the world” and its components such as “healthy and unhealthy food; national and international dishes; countries; holidays” **(SELS2.2, SELS3.2, V4.2, V4.5, V5.1, V7.2, V13.1, V14.3, V17.2, LS4, LS5, CS3.1, CS2.20).** AI-based technologies can be used for various activities, giving pupils access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.2, SELS3.3, V11.1, LS2, CS2.20).** These are evaluated as described in items (7), (8), (9), (10), (11), and (12) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG.4.6.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks pupils to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V4.2).** Some volunteer pupils express what they think and feel about them. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(SELS1.2, SELS2.2, V12.1, V20.4, LS1, LS4, CS2.15).** The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V4.3, V10.3).**

TEACHER REFLECTION: She/He can keep a class journal in which she/he makes notes about what worked or didn't work in teaching the theme and pupils' learning and the potential reasons for this to find solutions. She/He can ask a colleague to observe her/his lessons and give feedback on the lessons (peer observation). She/He can also discuss the whole teaching process with her colleagues to specify the challenges faced throughout the whole current theme.

DIFFERENTIATION

Expansion

Objective: To identify and talk about national and international dishes and holidays in English by using the target vocabulary and target chunks.

Activity 1: Plan a Holiday Meal Activity

Pupils choose a country, such as Türkiye, Italy, or Greece, and describe the foods they plan to eat using the target language chunks. They answer questions such as, "Where are you going on holiday?", "What food are you going to eat there?" and "What is the most delicious food in that country?". For example, a pupil might say, "I am going to go to Türkiye. I am going to eat kebab and a little rice. Kebab is the most delicious food in Türkiye". This activity encourages pupils to practice target vocabulary and language chunks while discussing preferences and plans. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

Supporting

Objective: To identify national and international dishes in English by using the target vocabulary and target chunks.

Activity 1: World Food Map Activity

Pupils work with a blank world map and pictures of dishes such as kebab, tacos, pizza, falafel, and fish and chips. They match each dish to its corresponding country and create sentences to describe their findings. For example, they say, "Pizza is from Italy", "Kebab is from Türkiye". This activity helps pupils connect dishes with their countries of origin while practicing vocabulary and sentence structure. The teacher provides positive feedback to motivate them. Pupils reflect on their thoughts and feelings about the activity by using emoticons.

TEACHER REFLECTIONS

YEAR 5 (LEVEL: A2.1)

THEME 1: SCHOOL LIFE

Sub-themes: People, places and rules at school; school clubs; countries; national days and celebrations

This theme is centred on the concept of “school life” and covers the sub-themes of “school life with people, places and rules at school; school clubs; countries; national days and celebrations”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS	FLFS1. Listening/Watching-Comprehension
	FLFS2. Reading-Comprehension
	FLFS3. Speaking-Expression
	FLFS4. Writing-Expression
	FLSS1. Gramming: Selection and Use
	FLSS2. Vocabulary: Selection and Use
	FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS –

DISPOSITIONS	D1.1. Curiosity, D1.2. Independence, D1.3. Perseverance and Determination, D1.5. Self-Confidence, D1.6. Selectivity, D2.3. Assertiveness, D2.4. Trust, D2.5. Playfulness, D3.1. Reasoning, D3.2. Focus, D3.3. Creativity, D3.5. Open-Mindedness, D3.6. Analyticalness, D3.7. Being Systematic, D3.8. Questioning

INTERCURRICULAR COMPONENTS

Social-Emotional

Learning Skills	SELS1.1. Self-Awareness Skill, SELS1.2. Self-Regulation Skill, SELS1.3. Self-Reflection Skill, SELS2.1. Communication Skill, SELS2.2. Cooperation Skill, SELS2.3. Social Awareness Skill, SELS3.1 Adaptability Skill, SELS3.2 Flexibility Skill, SELS3.3. Responsible Decision-Making Skill

Values	V3. Diligence, V4. Friendship, V6. Honesty, V7. Aesthetics, V10. Modesty, V12. Patience, V14. Respect, V16. Responsibility, V19. Patriotism, V20. Benevolence

Literacy Skills	LS1. Information Literacy, LS2. Digital Literacy, LS4. Visual Literacy, LS5. Cultural Literacy, LS6. Civic Literacy, LS9. Art Literacy

Comparison Skill, CS2.8. Inquiry Skill, CS2.9. Generalisation Skill, CS2.10. Inference Skill, CS2.11. Observation-Based Prediction Skill, CS2.12. Data-Based Prediction Skill, CS2.13. Structuring Skill, CS2.14. Interpretation Skill, CS2.15. Reflective Thinking Skill, CS2.16.1. Inductive Reasoning Skill, CS2.16.2. Deductive Reasoning Skill, CS2.16.3. Analogical Reasoning Skill, CS2.17. Evaluation Skill, CS2.19. Logical Auditing Skill, CS2.20. Synthesis Skill, CS3.1. Decision-Making Skill, CS3.3. Critical Thinking Skill

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.5.1.L1. Students can get ready for the listening/watching-comprehension process for the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “school life” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.5.1.L2. Students can bring information about the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening (to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening (to) and watching it again in a careful manner.*

ENG.5.1.L3. Students can make meaning of/derive meaning from the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.5.1.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*

- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.5.1.P1. Students can select and use the target phonological elements of the current content about “school life with people, places and rules at school; school clubs; countries; national days and celebrations” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Listening to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.5.1.R1. Students can get ready for the reading-comprehension process about the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students make significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.5.1.R2. Students can bring information about the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.5.1.R3. Students can make meaning of / derive meaning from the current content about “school life with people, places and rules at school; school clubs; countries; national days and celebrations” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*

- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.5.1.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “school life with people, places and rules at school; school clubs; countries; national days and celebrations” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.1.V1. Students can select and use the target vocabulary of the current content about “school life with people, places and rules at school; school clubs; countries; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening (to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.5.1.G1. Students can select and use the target grammatical elements of the current content about “school life with people, places and rules at school; school clubs; countries; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*

- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.5.1.W1. Students can get ready for the writing-expression process about the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.5.1.W2. Students can understand the model/example for the writing task about the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.5.1.W3. Students can organise a content for the assigned writing task on the current content “school life with people, places and rules at school; school clubs; countries; national days and celebrations” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*
- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.5.1.W4. Students can individually construct/form content for the assigned writing task on the current content “school life with people, places and rules at school; school clubs; countries; national days and celebrations”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*

- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.5.1.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “school life with people, places and rules at school; school clubs; countries; national days and celebrations” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG.5.1.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “school life with people, places and rules at school; school clubs; countries; national days and celebrations” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.1.S1. Students can get ready for speaking-expression process about the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.5.1.S2. Students can use the model/example for producing verbal content about the current content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.5.1.S3. Students can organise a new verbal content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*

- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*
- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.5.1.S4. Students can construct a new verbal content on “school life with people, places and rules at school; school clubs; countries; national days and celebrations” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.5.1.S5. Students can reorganise (reconstruct) and use information about the “school life with people, places and rules at school; school clubs; countries; national days and celebrations” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.5.1.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “school life with people, places and rules at school; school clubs; countries; national days and celebrations” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

SCHOOL LIFE:

Sub-Themes: People, places and rules at school; school clubs; countries; national days and celebrations

Target Vocabulary in Use (with revisional vocabulary):

Vocabulary for people, places and rules at school: Nouns: A department, a gate, a noise, a uniform, a lab, a sports field, a secretary, a coach, an assistant, (no) shouting, a conference hall, a canteen, a library, a notice board, an administration department. Verbs: To fight.

Vocabulary for school clubs: Nouns: A drama club, a maths club, a technology club, an environment club, an art club, a music club, a sports club, a chess club, a science club, a film club, a ballet club, a folk dance club. Verbs: To organise, to solve, to arrange.

Vocabulary for countries: Türkiye, the United States of America (USA), the United Kingdom (UK) (England, Scotland, Northern Ireland, Wales), Canada, Australia, France, Italy, Spain, Argentina, Brazil, China, Japan, Mexico, Russia, South Korea, Azerbaijan, Uzbekistan, Turkmenistan, Turkish Republic of Northern Cyprus, Kazakhstan, Kyrgyzstan.

Target Grammatical Structures in Use:

- The Simple Present Tense (do you like + ing): (Do you like reading books in your free time?).
- Modals "Mustn't & Can't" (prohibition): (You mustn't run in the classroom).
- “To be Present”: (I am a student at this school).
- Wh- questions (who, what): (What is your favourite subject in/at school?)
- A, an, the: (The Eiffel Tower is in France).
- Imperatives: (Please sit down and relax).
- Personal pronouns: I, you, he, she, we, you, they (He loves playing video games).

Functions of the Target Grammatical Structures in Use:

- Use of the Simple Present Tense (do you like + ing): Asking preferences about activities.
- Use of Modals "Mustn't & Can't" (prohibition): Expressing obligations or rules.
- Use of "To Be Present": Expressing a state, a condition, an identity or a location.
- Use of "a, an, the": Referring to a specific or non-specific noun.
- Use of Personal Pronouns: Indicating who is involved in the action, possession, or other relationships in a sentence.
- Use of Imperatives: Giving commands.
- Use of "Wh- questions (who, what)": Asking about people, things, actions, time and ideas.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Social Language in Use:

Let's get started!

Line up, nice and straight!

Follow the rules and play safe!

Target Phonological Sounds in Use:

-Intonation of positive statements

Generalisations/Principles/Key Concepts**Generalisations**

The target concept of this theme "school life" and its components such as "people, places and rules at school; school clubs; countries; national days and celebrations" is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what "school life" and its components such as "people, places and rules at school; school clubs; countries; national days and celebrations" means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts:

people, places, rules; people, places, and rules at school; school clubs; countries; national days, celebrations.

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Students will create a colourful poster about a fictional international school, including people, places, rules, school clubs, and countries. They will describe important school staff such as the headmaster/headmistress or teachers, highlight places such as the library or sports field, and list three key rules such as "Be on time" or "No running in the corridor". The poster will also include information about two school clubs with simple descriptions of their activities. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES**Basic Acceptations: Preparedness/ Readiness**

This theme is based on the students' knowledge of "school life" and its components such as "people, places and rules at school; school clubs; countries; national days and celebrations". As they are lower secondary school students in year 5 (five), they can know what "school life" and its components such as "people, places and rules at school; school clubs; countries; national days and celebrations" mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case English. As they are students in year 5 of lower secondary school, they can know some basic vocabulary about "school life" and also some necessary structures in English from the previous themes and/or years such as "a school, a teacher, a classroom etc." and "This is a school. This is my teacher etc." These grammatical items and vocabulary are revised during the "Revision Programme" at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students' physical, cognitive, affective, and social factors are appropriate and suitable for learning about the "school life" and its components such as "people, places and rules at school; school clubs; countries; national days and celebrations". Recalling and practising with relevant vocabulary and

grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of “school life”. Their knowledge of the “days of the week and holidays” will help them learn and practise important national holidays such as “the Republic Day of Türkiye”. Therefore, a dialogue game can be played to revise all vocabulary and language chunks from the previous themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices.)

Establishing Links

Students can recall the current (theme) concept of “school life” and its components such as “people, places and rules at school; school clubs; countries; national days and celebrations” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme “school life” in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around “school life” and sub-themes “school life with people, places and rules at school; school clubs; countries; national days and celebrations”, allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.1.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of ‘school life’ during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme **(D3.2, SELS1.1, V3.2, V4.5, V14.3, V19.1, V19.2, LS1, LS4, LS5, LS6, CS2.11, CS2.16.2)**. So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme **(CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme **(CS2.14)**. It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about **(CS2.8)**. As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.3, V3.4, V16.3, LS2, LS4, CS2.10, CS2.17)**.

ENG5.1.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) **(CS2.11)**. Students watch the introductory digital story to consolidate the identification of the theme ‘school life’ in it as a whole **(CS2.13)** without stopping the video at any point, so that the students can understand the theme holistically **(D3.2, SELS1.1, V3.3, V3.4, V4.5, V14.3, V16.3, V19.1, V19.2, LS2, LS4, LS5, LS6, CS2.14, CS2.16.2)**.

ENG5.1.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students’ attention to the content, some realia brought into the classroom by the teacher could be used **(V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6)**. The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme ‘school life’ is mentioned in the introductory digital story, without stopping the video while the students watch the story **(CS2.6)**. When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options **(CS2.5)**. As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily **(CS2.1)**. In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component **(CS2.8)**. Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components **(D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4)**.

To check whether the students understand the general topic of the theme ‘school life’ and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students **(SELS2.2, V3.4, V4.2, LS1, LS4, LS6)**. When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) **(SELS1.2, CS2.6, CS2.10)**. This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories **(D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12)**.

ENG5.1.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole listening–watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V3.4)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, LS5, LS6)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG5.1.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme ‘school life’ and the words and/or word groups for the sub-themes “school life with people, places and rules at school; school clubs; countries; national days and celebrations” the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced **(V3.3, V4.5, V14.3, V16.3, V19.1, V19.2, LS4, LS5, LS6, CS2.6)**. She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening to the recordings that she/he has prepared beforehand using some Web 2.0 programmes **(LS2, CS2.16.3)**. The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both **(CS2.8)**. To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers **(D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V20.4, LS1, CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for the sub-themes “school life with people, places and rules at school; school clubs; countries; national days and celebrations”, the students listen **(CS2.9)**; then the teacher says the target words/word groups and acts them out, the students repeat after her/him **(SELS2.1, CS2.14)**. Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes **(D2.3, D2.5, V3.3, V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6)**. As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice **(SELS2.3, CS2.8, CS2.11)**. They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom **(CS2.12)**. Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games **(SELS2.1, V7.2, LS5, LS6, LS9)**. The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically **(CS3.1)**. Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills **(SELS2.2)**. The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them **(CS2.13)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. **(D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4)**.

ENG5.1.R1

PREPARATION FOR THE READING–COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the

theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used **(V3.2, LS2, LS4)**. Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme **(V3.4, LS1, CS2.3, CS2.6)**. The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way **(V3.3, V7.2, LS5, CS3.3)**. For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.1.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.1.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, LS6, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.1.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(D 2.3, D3.5, V4.2, V6.2, V10.3, V12.1, LS1, LS6)**.

ENG5.1.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/ watching, and pre-reading sessions **(SELS1.1)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme **(V3.2, LS1)**.

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items **(D3.2, D3.6, LS1, LS2, LS4, LS5, CS2.4, CS2.6, CS2.7)**. Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme **(V16.3, CS2.8)**. They underline the words whose meaning they do not know while reading silently **(CS2.17)**. Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words **(D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7)**.

To introduce and practise the meanings of the target vocabulary related to the theme, that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know **(V4.5, V14.3, V19.1, V19.2, LS5, LS6, CS2.16.1, CS2.6)**. By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words **(D1.2, D1.6, D3.7, CS2.10)**. This is conducted in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)** (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V3.3, V3.4, V16.3, LS1, LS2, LS4)**. After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him **(D2.3, V4.5, V14.3, V19.1, V19.2, LS5, LS6, CS2.6, CS2.11)**. In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum.

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "school life ". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them **(V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6, CS2.4)**. She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly **(V3.3, L2, LS4, CS2.5)**. The teacher asks them to work in pairs and place the cut-out pictures in the right category and ask each other some questions about the theme **(D3.2, D3.8, SELS2.2, V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6)**. When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures

under the right category on the screen **(SELS1.2, V3.4, V20.4, LS1, LS4, CS2.5)**. In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling **(D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9)**. To consolidate the meaning, selection, and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures, flashcards, sounds, realia, and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students **(CS2.13)**. Students can be asked to create their own games to use the target vocabulary items in context **(D2.5, D.3.3, SELS3.1, SELS3.2, V4.2, V4.4, V4.5, V7.2, V14.3, V16.3, V19.1, V19.2, LS5, LS6, LS9, CS2.20)**. Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.1.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "school life", the introductory digital story or an extract from it played so that the students can notice the target language chunks **(D3.2, CS2.2)**. While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same **(V3.2, LS2, CS2.14)**. She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/blackboard/whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures **(SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2)**. To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board /blackboard/whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board **(D3.2, SELS3.2, V3.3)**. She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher **(CS2.7)**. These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them **(CS2.9)**. Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class **(SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2)**. Both the teacher and the class members give feedback to the students as they say their sentences **(CS2.19)**. The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V4.3, V6.2, V10.3, LS6)**.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "school life", the teacher shows some other sentences with these chunks in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V3.3, V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises

to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.1.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes. **(V3.2, V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6)**.

ENG5.1.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme "school life". They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it **(SELS3.1)**. While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on **(D3.1, V3.4, LS1, CS2.4, CS2.16.3)**.

ENG5.1.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher's feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(D1.3, D3.1, SELS3.2, V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20)**.

ENG5.1.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and feelings **(D2.5, D3.3, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the students' interests and language level. **(V3.4, V7.2, V12.1, LS1, LS4, LS9)**.

ENG5.1.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing **(SELS2.2, SELS2.3, V3.4, V4.2, V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6, LS9, CS2.20)**. AI- based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3.3, V7.2, LS2, CS2.20)**. These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.1.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(D1.5, SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1, LS6)**.

ENG5.1.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme. **(V3.2, V3.4, V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6)**.

ENG5.1.S2.

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4)**.

ENG5.1.S3.

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13)**.

ENG5.1.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V4.2, V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20)**.

ENG5.1.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "school life" in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in

or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components such as “people, places and rules at school; school clubs; countries; national days and celebrations” (**V3.4, V4.2, V4.5, V14.3, V16.3, V19.1, V19.2, LS4, LS5, LS6, CS3.1, CS2.20**). AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings (**D2.5, D3.3, SELS3.3, V7.2, LS2, CS2.20**). These are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.1.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them (**SELS1.3, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. (**V4.3, V6.2, V10.3, V20.4, LS1, LS6**).

DIFFERENTIATION

Expansion

Objective: To talk about social clubs, rules at school in English by the target language items.

Activity 1: Role-Play

The teacher gives each student a role card (“You are a drama club member who loves acting but doesn’t like strict rules”). Groups pretend to meet at a “School Clubs Fair”. Each student must introduce their club, talk about what they like or dislike, discuss the rules of their club. The teacher encourages them to explain why they like/dislike something or suggest new rules for their club. Students ask questions to each other about their likes/dislikes. The teacher tells students to exchange reflection sheets or give verbal feedback in pairs. They use sentence starters (“I like how you ___”, “You are good at ___”, “Next time, you can try ___”). For self-reflection activity students write answers to prompts like: “I can ask/answer questions about ___”, “I learned that ___”, “I’m good at ___”. Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To talk about social clubs, rules at school in English by using the target language items.

Activity: Role-Play

The teacher gives each student a role card (“You are a drama club member who loves acting but doesn’t like strict rules”). Groups pretend to meet at a “School Clubs Fair”. Each student must introduce their club, talk about what they like or dislike, and discuss the rules of their club. The teacher provides sentence starters and word banks (“I like/don’t like ___ because ___”).

After the teacher provides an example dialogue, students ask questions to each other about their likes/dislikes. The teacher tells students to exchange reflection sheets or give verbal feedback in pairs. They use sentence starters (“I like how you ___”, “You are good at ___”, “Next time, you can try ___”). For self-reflection activity students write answers to prompts like: “I can ask/answer questions about ___”, “I learned that ___”, “I’m good at ___”. Students reflect on their thoughts and feelings about the activity.

THEME 2: CLASSROOM LIFE

Sub-themes: Classroom rules and language; school subjects; timetables; classroom objects; days of the week; time

This theme is centred on the concept of “classroom life” and covers the sub-themes of “classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS	FLFS1. Listening/Watching-Comprehension
	FLFS2. Reading-Comprehension

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.5.2.L1. Students can get ready for the listening/watching-comprehension process for the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “classroom life” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.5.2.L2. Students can bring information about the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening(to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening(to) and watching it again in a careful manner.*

ENG.5.2.L3. Students can make meaning of/derive meaning from the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.5.2.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*
- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.5.2.P1. Students can select and use the target phonological elements of the current content about “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Listening to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.5.2.R1. Students can get ready for the reading-comprehension process about the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students make significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.5.2.R2. Students can bring information about the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.5.2.R3. Students can make meaning of / derive meaning from the current content about “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.5.2.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.2.V1. Students can select and use the target vocabulary of the current content about “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening (to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.5.2.G1. Students can select and use the target grammatical elements of the current content about “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*
- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.5.2.W1. Students can get ready for the writing-expression process about the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.5.2.W2. Students can understand the model/example for the writing task about the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.5.2.W3. Students can organise a content for the assigned writing task on the current content “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*

- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/or unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.5.2.W4. Students can individually construct/form content for the assigned writing task on the current content “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*
- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.5.2.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG.5.2.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.2.S1. Students can get ready for speaking-expression process about the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.5.2.S2. Students can use the model/example for producing verbal content about the current content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.5.2.S3. Students can organise a new verbal content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*
- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.5.2.S4. Students can construct a new verbal content on “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.5.2.S5. Students can reorganise (reconstruct) and use information about the “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.5.2.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “classroom life with classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

CLASSROOM LIFE:

Sub-Themes: Classroom rules and language; school subjects; timetables; classroom objects; days of the week; time

Target Vocabulary in Use (with revisional vocabulary):

Vocabulary for classroom rules and language: Nouns: Rubbish (trash-garbage-AmE), attention, (no) running. Adjectives: Careful. Verbs: To shout, to smile, to raise a hand, to follow, to borrow, to lend, to tidy (up), to leave, to forget, to bring, to hang (your coat), to hold on. Adverbs: Quietly, loudly, carefully, slowly.

Vocabulary for school subjects: Maths, Turkish, Science, Social Studies, Foreign Language, English, Religion and Morals, Art, Music, P.E. (Physical Education), IT (Information Technology), Drama.

Vocabulary for timetables: Nouns: A timetable, a day, a week, a weekday, a weekend, morning, afternoon, noon, a break, lunch, double lessons. Verbs: To start, to finish.

Vocabulary for classroom objects: Nouns: A rubbish bin (a trash/garbage can -AmE), a (smart)board, a poster, a seat, a bookshelf, a rubber (an eraser-AmE), a dictionary, a board marker, a pencil case, a (school) material, a sheet, a notebook (exercise book-AmE), a desk.

Vocabulary for days of the week: Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday.

Vocabulary for time: Half past, to, past, o'clock, quarter, a minute.

Vocabulary for numbers 50-100: From 50 to 100.

Target Grammatical Structures in Use:

- The Simple Present Tense: (We have got an Art class every Wednesday.)
- There is/are: (There is a new student in the class. There are fifty students in my class.)
- Object Pronouns: Me, you, him, her, us, you, them (Can you give me your eraser?)
- "To Be" for Time (What time is it?): (What time is it? It is half past four.)
- Wh questions (What time..?): (What time does the English class start?)

Functions of the Target Grammatical Structures in Use:

- Use of the Simple Present Tense: Describing the responsibilities of different roles in the classroom and daily routines and study routines in a classroom.
- Use of "There is/There are": Expressing the presence of something or somebody.
- Use of Object Pronouns: Replacing nouns that receive the action in a sentence.
- Use of "To Be" for time (What time is it?): Telling the time.
- Use of "Wh- questions" (What time..?): Asking about time of actions.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Social Language in Use:

Make the grade if you want to join the Sports Club!

Don't skip the lesson! (Please don't cut the class!)

Give me a hand for this homework!

I don't feel all right.

I'd love to.

Target Phonological Sounds in Use:

Intonation of negative statements.

Generalisations/Principles/Key Concepts**Generalisations**

The target concept of this theme "classroom life" and its components such as "classroom rules and language; school subjects; timetables; classroom objects; days of the week; time" is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what "classroom life" and its components such as "classroom rules and language; school subjects; timetables; classroom objects; days of the week; time" means but will not know how to say them in another language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts:

classroom, classroom rules, classroom language, school subjects, timetables, classroom objects, days of the week, time

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: The students will create a dream classroom. First, they will decide the schedule for their classroom, classroom rules, and subjects. Then, they will prepare a poster about these dream classes that include the lesson schedule and classroom rules. The posters may include photos, pictures or drawings. Finally, they will present their dream classes. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES**Basic Acceptations: Preparedness/ Readiness**

This theme is based on the students' knowledge of "classroom life" and its components such as "classroom rules and language; school subjects; timetables; classroom objects; days of the week; time". As they are lower secondary school students in year 5 (five), they can know what "classroom life" and its components such as "classroom rules and language; school subjects; timetables; classroom objects; days of the week; time" mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case English. As they are students in year 5 of lower secondary school, they can know some basic vocabulary about "classroom life" and also some necessary structures in English from the previous themes and/or years. These grammar items and vocabulary are revised during the "Revision Programme" at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students' physical, cognitive, affective, and social factors are appropriate and suitable for learning about the "classroom life" and its components such as "classroom rules and language; school

subjects; timetables; classroom objects; days of the week; time". Recalling and practising with relevant vocabulary and grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of "classroom life". Therefore, a dialogue game can be played to revise all vocabulary and language chunks from the previous themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices.)

Establishing Links

Students can recall the current (theme) concept of "classroom life" and its components such as "classroom rules and language; school subjects; timetables; classroom objects; days of the week; time" by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme "classroom life" in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around "classroom life" and sub-themes sub-themes of "classroom rules and language; school subjects; timetables;

classroom objects; days of the week; time"., allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.2.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of “classroom life” during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme (**D3.2, SELS1.1, V3.2, V4.5, V14.3, V19.1, V19.2, LS1, LS4, LS5, LS6, CS2.11, CS2.16.2**). So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme (**CS2.6, CS2.8**). For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme (**CS2.14**). It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about (**CS2.8**). As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true (**D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.3, V3.4, V16.3, LS2, LS4, CS2.10, CS2.17**).

ENG5.2.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) (**CS2.11**). Students watch the introductory digital story to consolidate the identification of the theme “school life” in it as a whole (**CS2.13**) without stopping the video at any point, so that the students can understand the theme holistically (**D3.2, SELS1.1, V3.3, V3.4, V4.5, V14.3, V16.3, V19.1, V19.2, LS2, LS4, LS5, LS6, CS2.14, CS2.16.2**).

ENG5.2.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students’ attention to the content, some realia brought into the classroom by the teacher could be used (**V4.5, V14.3, V16.3, V19.1, V19.2, LS5, LS6**). The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme “classroom life” is mentioned in the introductory digital story, without stopping the video while the students watch the story (**CS2.6**). When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options (**CS2.5**). As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily (**CS2.1**). In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component (**CS2.8**). Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components (**D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4**).

To check whether the students understand the general topic of the theme “classroom life” and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while (**CS2.3**). She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students (**SELS2.2, V3.4, V4.2, LS1, LS4, LS6**). When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) (**SELS1.2, CS2.6, CS2.10**). This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories (**D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12**).

ENG5.2.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole listening–watching process and asks them to express their thoughts, ideas, and feelings about the process (**SELS1.3, V3.4**). Some volunteer students express what they think and feel about them (**CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, LS5, LS6**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design (V10.3).

ENG5.2.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme “classroom life” and the words and/or word groups for sub-themes sub-themes of “classroom rules and language; school subjects; timetables; classroom objects; days of the week; time” the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced (**V3.3, V16.1, V16.3, LS4, CS2.6**). She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening to the recordings that she/he has prepared beforehand using some Web 2.0 programmes (**LS2, CS2.16.3**). The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both (**CS2.8**). To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers (**D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V20.4, LS1, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for sub-themes sub-themes of “classroom rules and language; school subjects; timetables; classroom objects; days of the week; time”, the students listen (**CS2.9**); then the teacher says the target words/word groups and acts them out, the students repeat after her/him (**SELS2.1, CS2.14**). Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes (**D2.3, D2.5, V3.3, V16.1, V16.3**). As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice (**SELS2.3, CS2.8, CS2.11**). They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom (**CS2.12**). Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games (**SELS2.1, V7.2, LS9**). The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically (**CS3.1**). Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills (**SELS2.2**). The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them (**CS2.13**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. (**D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4**).

ENG5.2.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the

theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used **(V3.2, LS2, LS4)**. Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme **(V3.4, LS1, CS2.3, CS2.6)**. The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way **(V3.3, V7.2, CS3.3)**. For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements

(e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.2.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.2.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.2.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different

activities for creating versatile reflection sessions in a fun and collaborative design (**D 2.3, D3.5, V4.2, V6.2, V10.3, V12.1, LS1, LS6**).

ENG5.2.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/ watching, and pre-reading sessions (**SELS1.1**). As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme (**V3.2, LS1**).

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items (**D3.2, D3.6, LS1, LS2, LS4, CS2.4, CS2.6, CS2.7**). Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme (**V16.1, V16.3, CS2.8**). They underline the words whose meaning they do not know while reading silently (**CS2.17**). Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words (**D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7**).

To introduce and practise the meanings of the target vocabulary related to the theme "classroom life", that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know (**V16.1, V16.3, CS2.16.1, CS2.6**). By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words (**D1.2, D1.6, D3.7, CS2.10**). This is conducted in the form of a dialogue where their learning can be checked as described in items (**SELS2.1**) (7), (8), and (9) in the section

1.2. Principles for the Implementation of the English Curriculum. (**V3.3, V3.4, V16.3, LS1, LS2, LS4**). After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him (**D2.3, V16.1, V16.3, CS2.6, CS2.11**). In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum. (**V16.1, V16.3**).

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "classroom life". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them (**V16.1, V16.3, CS2.4**). She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly (**V3.3, L2, LS4, CS2.5**). The teacher asks them to work in pairs and place the cut-

out pictures in the right category and ask each other some questions about the theme (**D3.2, D3.8, SELS2.2, V16.1, V16.3**). When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures under the right category on the screen (**SELS1.2, V3.4, V20.4, LS1, LS4, CS2.5**). In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling (**D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9**). To consolidate the meaning, selection, and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures, flashcards, sounds, realia, and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students (**CS2.13**). Students can be asked to create their own games to use the target vocabulary items in context (**D2.5, D.3.3, SELS3.1, SELS3.2, V4.2, V4.4, V7.2, V16.1, V16.3, LS9, CS2.20**). Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.2.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "classroom life", the introductory digital story or an extract from it played so that the students can notice the target language chunks (**D3.2, CS2.2**). While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same (**V3.2, LS2, CS2.14**). She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/blackboard/whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures (**SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2**). To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board /blackboard/whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board (**D3.2, SELS3.2, V3.3**). She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher (**CS2.7**). These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them (**CS2.9**). Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class (**SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2**). Both the teacher and the class members give feedback to the students as they say their sentences (**CS2.19**). The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. (**V4.3, V6.2, V10.3**).

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "classroom life", the teacher shows some other sentences with these chunks

in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V3.3, V16.1, V16.3, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.2.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes. **(V3.2, V16.1, V16.3)**.

ENG5.2.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme "classroom life". They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it **(SELS3.1)**. While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on **(D3.1, V3.4, LS1, CS2.4, CS2.16.3)**.

ENG5.2.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher's feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(D1.3, D3.1, SELS3.2, V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20)**.

ENG5.2.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and **feelings (D2.5, D3.3, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the students' interests and language level. **(V3.4, V7.2, V9.3, V12.1, LS1, LS4, LS9)**.

ENG5.2.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing **(SELS2.2, SELS2.3, V3.4, V4.2, V16.1, V16.3, LS9, CS2.20)**. AI- based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways

(D3.3, SELS3.2, SELS3.3, V7.2, LS2, CS2.20) These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.2.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(D1.5, SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

ENG5.2.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme. **(V3.2, V3.4, V16.1, V16.3)**.

ENG5.2.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4)**.

ENG5.1.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13)**.

ENG5.2.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V4.2, V16.1, V16.3, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20)**.

ENG5.2.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "classroom life", in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students

are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components **(V3.4, V4.2, V16.1, V16.3, LS4, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.3, V7.2, LS2, CS2.20)**. **These** are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.2.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

DIFFERENTIATION

Expansion

Objective: To ask and answer questions about the time of actions in English by using the target language items.

Activity 1: "A Class Survey"

To do a class survey students walk around the classroom and ask three classmates, "What time do you ____?" for different actions. They write down the answers in a chart (e.g., Name, Action, Time). Then, they analyse the results in writing, e.g., "Most students wake up at 7:00" and report them to the class by using simple present tense. Students share their charts in groups and give positive feedback to each other. As a self-reflection activity students are given a chart on which they circle or colour an emoji/emoticon that represents how they feel about their performance. Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To ask and answer questions about the time of actions in English by using the target language items.

Activity: A Class Survey

To do a class survey students walk around the classroom and ask three classmates, "What time do you ____?" for different actions. The teacher presents vocabulary for common actions (wake up, go to school, eat lunch, etc.) and common times (7:00 am, 12:30 pm, etc.) on a handout or classroom board. Students write down the answers in a chart (e.g., Name, Action, Time). The teacher provides a partially completed chart for them. Students write down a few sentences in simple present tense based on the chart. Students share their charts in groups and give positive feedback to each other. As a self-reflection activity students circle or colour an emoji/emoticon that represents how they feel about their performance. Students reflect on their thoughts and feelings about the activity.

TEACHER REFLECTIONS

THEME 3: PERSONAL LIFE

Sub-themes: Basic body parts and physical features; clothes; daily routines and activities

This theme is centred on the concept of “personal life” and covers the sub-themes of “basic body parts and physical features; clothes; daily routines and activities”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.5.3.L1. Students can get ready for the listening/watching-comprehension process for the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities” carefully.

- a) Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) Students make predictions about the current content on “personal life” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.5.3.L2. Students can bring information about the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities” together through significant details and main components while listening/watching it.

- a) Students comprehend the topic of the current content by listening(to)/watching it as a whole.*
- b) Students recognise the significant details and components within the whole current content by listening(to) and watching it again in a careful manner.*

ENG.5.3.L3. Students can make meaning of/derive meaning from the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities” through significant details by listening/watching it carefully.

- a) Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.5.3.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*
- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.5.3.P1. Students can select and use the target phonological elements of the current content about “personal life with basic body parts and physical features; clothes; daily routines and activities” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Listening to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.5.3.R1. Students can get ready for the reading-comprehension process about the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students make significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.5.3.R2. Students can bring information about the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.5.3.R3. Students can make meaning of / derive meaning from the current content about “personal life with basic body parts and physical features; clothes; daily routines and activities” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*

- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.5.3.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “personal life with basic body parts and physical features; clothes; daily routines and activities” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.3.V1. Students can select and use the target vocabulary of the current content about “personal life with basic body parts and physical features; clothes; daily routines and activities” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening(to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.5.3.G1. Students can select and use the target grammatical elements of the current content about “personal life with basic body parts and physical features; clothes; daily routines and activities” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*
- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.5.3.W1. Students can get ready for the writing-expression process about the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.5.3.W2. Students can understand the model/example for the writing task about the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.5.3.W3. Students can organise a content for the assigned writing task on the current content “personal life with basic body parts and physical features; clothes; daily routines and activities” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*
- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.5.3.W4. Students can individually construct/form content for the assigned writing task on the current content “personal life with basic body parts and physical features; clothes; daily routines and activities”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*
- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.5.3.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “personal life with basic body parts and physical features; clothes; daily routines and activities” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG.5.3.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “personal life with basic body parts and physical features; clothes; daily routines and activities” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.3.S1. Students can get ready for speaking-expression process about the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.5.3.S2. Students can use the model/example for producing verbal content about the current content on “personal life with basic body parts and physical features; clothes; daily routines and activities”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.5.3.S3. Students can organise a new verbal content on “personal life with basic body parts and physical features; clothes; daily routines and activities” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*

- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*
- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.5.3.S4. Students can construct a new verbal content on “personal life with basic body parts and physical features; clothes; daily routines and activities” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.5.3.S5. Students can reorganise (reconstruct) and use information about the “personal life with basic body parts and physical features; clothes; daily routines and activities” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.5.3.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “personal life with basic body parts and physical features; clothes; daily routines and activities” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

PERSONAL LIFE:

Sub-Themes: Basic body parts and physical features; clothes; daily routines and activities

Target Vocabulary in Use (with revisional vocabulary):

Vocabulary for basic body parts and physical features: Nouns: A neck, a finger, an arm, a body, an eye, a face, a foot, hair, a hand, a head, a nose, a tooth, teeth, height, a leg. Adjectives: Thin, average, curly, straight, round, square, tall, short, wavy, oval.

Vocabulary for clothes: Nouns: A belt, trousers (pants-AmE), a ring, a bag, boots, a cap, a coat, a (fancy dress) costume, a dress, earrings, fashion, glasses, gloves, a handbag, a hat, a jacket, jeans, a jumper (a sweater-AmE), a necklace, a raincoat, a scarf, a headscarf, a shirt, shoes, shorts, a skirt, a sock, sunglasses, a T-shirt, an umbrella, a watch, silver, clothing, a bow, an outfit. Verbs: To own, to try on, to wear, to create. Adjectives: Thick, thin, trendy, comfortable, ordinary, fancy, different, cool.

Vocabulary for daily routines and activities: Nouns: A computer, a book, a magazine, music, a video game, a map, a path, an adventure, an adventurer, a fashion show. Verbs: To watch, to draw, to read, to go shopping, to go out, to travel, to smile, to find. Adjectives: Daily, general.

Adverbs of frequency: rarely, sometimes, always, never

Target Grammatical Structures in Use:

- The Simple Present Tense: (She wears her blue coat every winter.)
- Question Tags for the Simple Present Tense: (She reads a book every evening, doesn't she?)
- Adverbs of Frequency (How often): (He usually wears sunglasses in summer.)
- Possessive adjectives: My, your, his, her, our, your, their (I love my bag.)

Functions of the Target Grammatical Structures in Use:

- Use of The Simple Present Tense: Describing daily routines or habits.
- Use of Question Tags for the Simple Present Tense: Checking or confirming general truths, actions or habits.
- Use of Adverbs of Frequency (How often): Expressing the frequency of actions or events.
- Use of Possessive Adjectives: Showing ownership in relation to nouns.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Social Language in Use :

- I'll pop round to see you later!
- Don't make fun of people!
- Let's sort out the problem!

Target Phonological Sounds in Use:

Intonation of questions and question tags.

Generalisations/Principles/Key Concepts**Generalisations**

The target concept of this theme “personal life” and its components such as “basic body parts and physical features; clothes; daily routines and activities” is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what “personal life” and its components such as “basic body parts and physical features; clothes; daily routines and activities” means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts

basic body parts, physical features, clothes, daily routines, daily activities

INDICATORS FOR LEARNING (Assessment and Evaluation)**EVALUATION FOR THE SKILLS AND THE CONTENT:**

PERFORMANCE ASSIGNMENT: Students will write a digital diary/journal describing their “daily routines, activities, and their timing in their personal lives” during a school term. They will present it with digital resources and/or realia by acting out the routines recorded in it. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES**Basic Acceptations: Preparedness/ Readiness**

This theme is based on the students’ knowledge of “personal life” and its components such as “basic body parts and physical features; clothes; daily routines and activities”. As they are lower secondary school students in year 5 (five), they can know what “personal life” and its components such as “basic body parts and physical features; clothes; daily routines and activities” mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case English.

As they are students in year 5 of lower secondary school, they can know some basic vocabulary about “personal life” and also some necessary structures in English from the previous themes and/or years. These grammar items and vocabulary are revised during the “Revision Programme” at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the “personal life” and its components such as “basic body parts and physical features; clothes; daily routines and activities”. Recalling and practising with relevant vocabulary and grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of “personal life”. Therefore, a dialogue game can be played to revise all vocabulary and language chunks from the previous themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices.)

Establishing Links

Students can recall the current (theme) concept of “personal life” and its components such as “basic body parts and physical features; clothes; daily routines and activities” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme “personal life” in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around “personal life” and sub-themes “basic body parts and physical features; clothes; daily routines and activities”, allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.3.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of “personal life” during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme **(D3.2, SELS1.1, V3.2, V12.3, V13.1, V13.4, V18.1, V18.2, LS1, LS4, LS5, CS2.11, CS2.16.2)**. So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme **(CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole

theme **(CS2.14)**. It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about **(CS2.8)**. As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.3, V3.4, V12.3, V13.1, V13.4, V18.1, V18.2, LS2, LS4, CS2.10, CS2.17)**.

ENG5.3.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) **(CS2.11)**. Students watch the introductory digital story to consolidate the identification of the “personal life” in it as a whole **(CS2.13)** without stopping the video at any point, so that the students can understand the theme holistically **(D3.2, SELS1.1, V3.3, V3.4, V12.3, V13.1, V13.4, V18.1, V18.2, LS2, LS4, LS5, CS2.14, CS2.16.2)**.

ENG5.3.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students’ attention to the content, some realia brought into the classroom by the teacher could be used **(V12.3, V13.1, V13.4, V18.1, V18.2, LS5)**. The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme “personal life” is mentioned in the introductory digital story, without stopping the video while the students watch the story **(CS2.6)**. When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options **(CS2.5)**. As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily **(CS2.1)**. In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component **(CS2.8)**. Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components **(D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4)**.

To check whether the students understand the general topic of the theme “personal life” and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students **(SELS2.2, V3.4, V4.2, LS1, LS4)**. When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) **(SELS1.2, V11.1, CS2.6, CS2.10)**. This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories **(D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12)**.

ENG5.3.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole listening–watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V3.4)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, LS5)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG5.3.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme “personal life” and the words and/or word groups for the sub-themes “basic body parts and physical features; clothes; daily routines and activities”, the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced (**V3.3, V12.3, V13.1, V13.4, V18.1, V18.2, LS4, LS5, CS2.6**). She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening to the recordings that she/he has prepared beforehand using some Web 2.0 programmes (**LS2, CS2.16.3**). The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both (**CS2.8**). To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers (**D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V11.1, V20.4, LS1, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for the sub-themes “basic body parts and physical features; clothes; daily routines and activities”, the students listen (**CS2.9**); then the teacher says the target words/word groups and acts them out, the students repeat after her/him (**SELS2.1, CS2.14**). Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes (**D2.3, D2.5, V3.3, V12.3, V13.1, V13.4, V18.1, V18.2, LS5**). As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice (**SELS2.3, CS2.8, CS2.11**). They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom (**CS2.12**). Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games (**SELS2.1, V7.2, LS5, LS9**). The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically (**CS3.1**). Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills (**SELS2.2**). The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them (**CS2.13**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. (**D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4**).

ENG5.3.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used (**V3.2, LS2, LS4**). Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme (**V3.4, LS1, CS2.3, CS2.6**). The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way (**V3.3, V7.2, LS5, CS3.3**). For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of

the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.3.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.3.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.3.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(D 2.3, D3.5, V4.2, V6.2, V10.3, V12.1, LS1)**.

ENG5.3.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/ watching, and pre-reading sessions **(SELS1.1)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme **(V3.2, LS1)**.

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items **(D3.2, D3.6, LS1, LS2, LS4, LS5, CS2.4, CS2.6, CS2.7)** Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme **(V12.3, V13.1, V13.4, V18.1, V18.2, CS2.8)**. They underline the words whose meaning they do not know while reading silently **(CS2.17)**. Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words **(D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7)**.

To introduce and practise the meanings of the target vocabulary related to the theme, that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know **(V12.3, V13.1, V13.4, V18.1, V18.2, LS5, CS2.16.1, CS2.6)**. By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words **(D1.2, D1.6, D3.7, CS2.10)**. This is conducted in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)** (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V3.3, V3.4, LS1, LS2, LS4)**. After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him **(D2.3, V12.3, V13.1, V13.4, V18.1, V18.2, LS5, CS2.6, CS2.11)**. In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum.

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "personal life". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them **(V12.3, V13.1, V13.4, V18.1, V18.2, LS5, CS2.4)**. She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly **(V3.3, L2, LS4, CS2.5)**. The teacher asks them to work in pairs and place the cut-out pictures in the right category and ask each other some questions about the theme **(D3.2, D3.8, SELS2.2, V12.3, V13.1, V13.4, V18.1, V18.2, LS5)**. When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures under the right category on the screen **(SELS1.2, V3.4, V11.1, V20.4, LS1, LS4, CS2.5)**. In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling **(D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9)**. To consolidate the meaning, selection, and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures, flashcards, sounds, realia,

and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students **(CS2.13)**. Students can be asked to create their own games to use the target vocabulary items in context **(D2.5, D.3.3, SELS3.1, SELS3.2, V4.2, V4.4, V7.2, V12.3, V13.1, V13.4, V18.1, V18.2, LS5, LS9, CS2.20)**. Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.3.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "personal life", the introductory digital story or an extract from it played so that the students can notice the target language chunks **(D3.2, CS2.2)**. While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same **(V3.2, LS2, CS2.14)**. She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/blackboard/ whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures **(SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2)**. To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board /blackboard/ whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board **(D3.2, SELS3.2, V3.3)**. She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher **(CS2.7)**. These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them **(CS2.9)**. Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class **(SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2)**. Both the teacher and the class members give feedback to the students as they say their sentences **(CS2.19)**. The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V4.3, V6.2, V10.3)**.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "personal life", the teacher shows some other sentences with these chunks in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V3.3, V12.3, V13.1, V13.4, V18.1, V18.2, LS5, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.3.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes **(V3.2, V12.3, V13.1, V13.4, V18.1, V18.2, LS5)**.

ENG5.3.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme "personal life". They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it **(SELS3.1)**. While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on **(D3.1, V3.4, LS1, CS2.4, CS2.16.3)**.

ENG5.3.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher's feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(D1.3, D3.1, SELS3.2, V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20)**.

ENG5.3.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and feelings **(D2.5, D3.3, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the students' interests and language level. **(V3.4, V7.2, V12.1, LS1, LS4, LS9)**.

ENG5.3.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing **(SELS2.2, SELS2.3, V3.4, V4.2, V12.3, V13.1, V13.4, V18.1, V18.2, LS5, LS9, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3.3, V7.2, LS2, CS2.20)**. These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.3.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel

about them **(D1.5, SELS1.3,V11.1, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

ENG5.3.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme **. (V3.2,V3.4, V12.3, V13.1, V13.4, V18.1, V18.2, LS5)**.

ENG5.3.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4)**.

ENG5.3.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13)**.

ENG5.3.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V4.2, V12.3, V13.1,V13.4, V18.1, V18.2, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20)**.

ENG5.3.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "personal life " in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components such as "basic body parts and physical features; clothes; daily routines and activities"**(V3.4, V4.2, V12.3, V13.1, V13.4,V18.1, V18.2, LS4, LS5, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.3, V7.2, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles

for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.3.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(SELS1.3, V11.1, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1, LS6)**.

DIFFERENTIATION

Expansion

Objective: To describe basic body parts, physical features, and clothes in English.

Activity 1: A Missing Person Poster

The teacher brings picture cards or cutouts with different people (diverse ages, physical features, and clothing). She/He tells students to work in pairs to create a missing person poster. Each pair gets a picture card of a person. Pairs write a short description of the person in the picture, including body parts, physical features, and clothing. The teacher shows the picture cards to the whole class or sticks them on the board. Pairs read their descriptive paragraphs aloud and students in the class match the descriptions with the pictures. Students give positive feedback to their friends for their clear descriptions. The teacher encourages students to reflect on their strengths and areas for improvement. Each student reflects on their performance during the activity and identifies: Three Stars (three things they did well) and One Wish (one thing they want to improve next time). Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To describe basic body parts, physical features, and clothes in English.

Activity: A Missing Person Poster

The teacher brings description cards that describe physical features, and clothing of a person. She/He tells students to work in pairs to create a missing person poster. Each pair gets a description card. Students read the given description paragraph and in pairs draw a picture of the missing person based on the paragraph. Students show their posters to their friends and give positive feedback to each other on their creativity and effort. The teacher encourages students to reflect on their strengths and areas for improvement. Each student reflects on their performance during the activity and identifies: Three Stars (three things they did well) and One Wish (one thing they want to improve next time). Students reflect on their thoughts and feelings about the activity.

THEME 4: FAMILY LIFE

Sub-themes: Family members' routines; family members' hobbies and activities

This theme is centred on the concept of "family life" and covers the sub-themes of "family members' routines; family members' hobbies and activities". These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners' developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.5.4.L1. Students can get ready for the listening/watching-comprehension process for the current content on “family life with family members’ routines; family members’ hobbies and activities” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “family life” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.5.4.L2. Students can bring information about the current content on “family life with family members’ routines; family members’ hobbies and activities” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening (to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening (to) and watching it again in a careful manner.*

ENG.5.4.L3. Students can make meaning of/derive meaning from the current content on “family life with family members’ routines; family members’ hobbies and activities” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/ comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.5.4.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “family life with family members’ routines; family members’ hobbies and activities”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*

- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.5.4.P1. Students can select and use the target phonological elements of the current content about “family life with family members’ routines; family members’ hobbies and activities” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Listening to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.5.4.R1. Students can get ready for the writing-comprehension process about the current content on “family life with family members’ routines; family members’ hobbies and activities”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences, and clues to the current content.*
- c) *Students make significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.5.4.R2. Students can bring information about the current content on “family life with family members’ routines; family members’ hobbies and activities” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.5.4.R3. Students can make meaning of / derive meaning from the current content about “family life with family members’ routines; family members’ hobbies and activities” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*

- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.5.4.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “family life with family members’ routines; family members’ hobbies and activities” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.4.V1. Students can select and use the target vocabulary of the current content about “family life with family members’ routines; family members’ hobbies and activities” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening (to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.5.4.G1. Students can select and use the target grammatical elements of the current content about “family life with family members’ routines; family members’ hobbies and activities” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*

- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.5.4.W1. Students can get ready for the writing-expression process about the current content on “family life with family members’ routines; family members’ hobbies and activities”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.5.4.W2. Students can understand the model/example for the writing task about the current content on “family life with family members’ routines; family members’ hobbies and activities”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.5.4.W3. Students can organise a content for the assigned writing task on the current content “family life with family members’ routines; family members’ hobbies and activities” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*
- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.5.4.W4. Students can individually construct/form content for the assigned writing task on the current content “family life with family members’ routines; family members’ hobbies and activities”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*

- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.5.4.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “family life with family members’ routines; family members’ hobbies and activities” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge with others.*

ENG.5.4.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “family life with family members’ routines; family members’ hobbies and activities” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.4.S1. Students can get ready for speaking-expression process about the current content on “family life with family members’ routines; family members’ hobbies and activities”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.5.4.S2. Students can use the model/example for producing verbal content about the current content on “family life with family members’ routines; family members’ hobbies and activities”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.5.4.S3. Students can organise a new verbal content on “family life with family members’ routines; family members’ hobbies and activities” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*

- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.5.4.S4. Students can construct a new verbal content on “family life with family members’ routines; family members’ hobbies and activities” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.5.4.S5. Students can reorganise (reconstruct) and use information about the “family life with family members’ routines; family members’ hobbies and activities” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.5.4.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “family life with family members’ routines; family members’ hobbies and activities” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

FAMILY LIFE:

Sub-Themes: Family members' routines; family members' hobbies and activities

Target Vocabulary in Use:

Vocabulary for Family members' Routines: Nouns: A couple, a role, a task, focus, resting, tidying, pet care, organisation. Verbs: To brush, to take care (of), to organise. Adjectives: Everyday, specific.

Pronouns: Hers, his, mine (belongs to me), yours.

Vocabulary for family members' hobbies and activities: Nouns: A board game, a beach, a barbecue, a bicycle, a camera, a festival, a guitar, a hobby, a holiday, a member, a museum, a photograph, a photo, a tent, a party, a computer game, a forest, a scooter, a piano, cooking, camping, cycling, dancing, fishing, playing golf, swimming, playing football. Verbs: To have a picnic, to relax, to join. Adjectives: Active, usual.

Target Grammatical Structures in Use:

-Present Progressive Tense: (She is brushing her teeth.)

-Present Progressive Tense vs Present Simple Tense: (We are camping in the forest this weekend, but we normally stay at home during holidays.)

-Question tags for the Present Progressive Tense: (She is brushing her teeth, isn't she?)

Functions of the Target Grammatical Structures in use:

-Use of the Present Progressive Tense: Expressing actions or events that are happening at the moment of speaking, temporary actions, or planned future actions.

-Use of the Present Progressive Tense vs Present Simple Tense: Contrasting ongoing or temporary actions (Present Progressive) with habitual actions, general truths, or permanent states (Present Simple).

-Use of question tags for Present Progressive Tense: Confirming or checking ongoing actions that match the tense, tone, or polarity of the statement.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Social Language in Use:

We always get on well as a family!

Can you lend your father a hand washing the car?

Let's tidy up the house together.

Target Phonological Sounds in Use:

a, b, c, d, e

Vowels: a: (/æ/, /ae/, /ə/, /a:/, /e/, /a:/, /a/, /ɔ:/, /eə/); e: (/e/, /i:/, /ə/)

Consonants: b: (/b/, silent /b/); c: (/si/, /k/); d: (/d/)

*(Phonetic symbols will not be taught. Only sounds will be practised through the target words in the theme)

Generalisations/Principles/Key Concepts

Generalisations

The target concept of this theme “family life” and its components such as “family members’ routines; family members’ hobbies and activities” is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what “family life” and its components such as “family members’ routines; family members’ hobbies and activities” means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts:

family members, routines, family members’ routines, hobbies, family members’ hobbies, activities, family members’ activities

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Students will conduct a questionnaire on the daily routines, free-time activities, and hobbies of their family members through interviews and present the written results with digital resources and/or realia by acting out some of the routines, free-time activities, and hobbies reported in the questionnaire. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the students’ knowledge of “family life” and its components such as “family members’ routines; family members’ hobbies and activities”. As they are lower secondary school students in year 5 (five), they can know what “family life” and its components such as “family members’ routines; family members’ hobbies and activities” mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case English.

As they are students in year 5 of lower secondary school, they can know some basic vocabulary about “family life” and also some necessary structures in English from the previous themes and/or years. These grammar items and vocabulary are revised during the “Revision Programme” at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the “family life” and its components such as “family members’ routines; family members’ hobbies and activities”. Recalling and practising with relevant vocabulary and grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of “family life”. Therefore, a dialogue game can be played to revise all vocabulary and language chunks from the previous themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices.)

Establishing Links

Students can recall the current (theme) concept of “family life” and its components such as “family members’ routines; family members’ hobbies and activities” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme “family life” in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around “family life” and sub-themes “family members’ routines; family members’ hobbies and activities”, allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.4.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of “family life” during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme **(D3.2, SELS1.1, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS1, LS4, LS5, CS2.11, CS2.16.2)**. So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme **(CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target

pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme **(CS2.14)**. It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about **(CS2.8)**. As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS2, LS4, CS2.10, CS2.17)**.

ENG5.4.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) **(CS2.11)**. Students watch the introductory digital story to consolidate the identification of the “family life” in it as a whole **(CS2.13)** without stopping the video at any point, so that the students can understand the theme holistically **(D3.2, SELS1.1, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS2, LS4, LS5, CS2.14, CS2.16.2)**.

ENG5.4.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students’ attention to the content, some realia brought into the classroom by the teacher could be used **(V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5)**. The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme “family life” is mentioned in the introductory digital story, without stopping the video while the students watch the story **(CS2.6)**. When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options **(CS2.5)**. As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily **(CS2.1)**. In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component **(CS2.8)**. Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components **(D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4)**.

To check whether the students understand the general topic of the theme “family life” and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students **(SELS2.2, V3.4, V4.2, LS1, LS4)**. When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) **(SELS1.2, V11.1, CS2.6, CS2.10)**. This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories **(D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12)**.

ENG5.4.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: Then teacher asks students to think about the whole listening–watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V3.4)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, LS5)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG5.4.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme “family life” and the words and/or word groups for the sub-themes “family members’ routines; family members’ hobbies and activities” the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced **(V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS4, LS5, CS2.6)**. She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening to the recordings that she/he has prepared beforehand using some Web 2.0 programmes **(LS2, CS2.16.3)**. The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both **(CS2.8)**. To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers **(D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V11.1, V20.4, LS1, CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for the sub-themes “family members’ routines; family members’ hobbies and activities”, the students listen **(CS2.9)**; then the teacher says the target words/word groups and acts them out, the students repeat after her/him **(SELS2.1, CS2.14)**. Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes activities” **(D2.3, D2.5, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5)** As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice **(SELS2.3, CS2.8, CS2.11)**. They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom **(CS2.12)**. Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games **(SELS2.1, V7.2, LS5, LS9)**. The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically **(CS3.1)**. Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills **(SELS2.2)**. The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them **(CS2.13)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. **(D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4)**.

ENG5.4.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used **(V3.2, LS2, LS4)**. Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme **(V3.4, LS1, CS2.3, CS2.6)**. The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way **(V3.3, V7.2, LS5, CS3.3)**. For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of

the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.4.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.4.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.4.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(D 2.3, D3.5, V4.2, V6.2, V10.3, V12.1, LS1)**.

ENG5.4.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions **(SELS1.1)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme **(V3.2, LS1)**.

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items **(D3.2, D3.6, LS1, LS2, LS4, LS5, CS2.4, CS2.6, CS2.7)**. Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme **(V16.3, CS2.8)**. They underline the words whose meaning they do not know while reading silently **(CS2.17)**. Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words **(D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7)**.

To introduce and practise the meanings of the target vocabulary related to the theme, that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know **(V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5, CS2.16.1, CS2.6)**. By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words **(D1.2, D1.6, D3.7, CS2.10)**. This is conducted in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)** (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V3.3, V3.4, V16.3, LS1, LS2, LS4)**. After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him **(D2.3, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5, CS2.6, CS2.11)**. In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum.

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "family life ". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them **(V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5, CS2.4)**. She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly **(V3.3, L2, LS4, CS2.5)**. The teacher asks them to work in pairs and place the cut-out pictures in the right category and ask each other some questions about the theme **(D3.2, D3.8, SELS2.2, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5)**. When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures under the right category on the screen **(SELS1.2, V3.4, V20.4, LS1, LS4, CS2.5)**. In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling **(D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9)**. To consolidate the meaning, selection, and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures,

flashcards, sounds, realia, and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students **(CS2.13)**. Students can be asked to create their own games to use the target vocabulary items in context **(D2.5, D.3.3, SELS3.1, SELS3.2, V4.2, V4.4, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5, LS9, CS2.20)**. Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.4.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "family life", the introductory digital story or an extract from it played so that the students can notice the target language chunks **(D3.2, CS2.2)**. While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same **(V3.2, LS2, CS2.14)**. She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/ blackboard/ whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures **(SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2)**. To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board /blackboard/whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board **(D3.2, SELS3.2, V3.3)**. She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher **(CS2.7)**. These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them **(CS2.9)**. Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class **(SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2)**. Both the teacher and the class members give feedback to the students as they say their sentences **(CS2.19)**. The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V4.3, V6.2, V10.3)**.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "family life", the teacher shows some other sentences with these chunks in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.4.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes. **(V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5).**

ENG5.4.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme "family life". They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it **(SELS3.1)**. While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on **(D3.1, V3.4, LS1, CS2.4, CS2.16.3)**.

ENG5.4.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher's feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(D1.3, D3.1, SELS3.2, V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20)**.

ENG5.4. W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and feelings **(D2.5, D3.3, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the students' interests and language level. **(V3.4, V7.2, V12.1, LS1, LS4, LS9)**.

ENG5.4.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing **(SELS2.2, SELS2.3, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5, LS9, CS2.20)** AI- based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3.3, V7.2, LS2, CS2.20)** These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.4.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel

about them **(D1.5, SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**

ENG5.4.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme **(V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5)**.

ENG5.4.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4)**.

ENG5.4.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13)**.

ENG5.4.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20)**.

ENG5.4.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "family life" in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components such as "family members' routines; family members' hobbies and activities" **(V2.2, V3.2, V3.4, V2.4, V4.4, V13.2, V16.1, LS4, LS5, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.3, V7.2,**

LS2, CS2.20). These are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.4.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them (**SELS1.3, CS2.15**). Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive (**D2.4, D3.5, SELS2.2**). The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. (**V4.3, V6.2, V10.3, V20.4, LS1**).

DIFFERENTIATION

Expansion

Objective: To describe family members' hobbies and routines in English by using visuals and sentences in the target language.

Activity 1: "A Family Poster"

Before the lesson, the teacher tells students to bring hobby-themed magazine cut-outs to use in the activity. The teacher asks students to work in small groups to create a family poster. Posters should include short descriptions of the family members. Students also draw pictures or paste magazine cut-outs that represent the hobbies and write sentences describing the hobbies on the poster. The teacher encourages students to elaborate on why their family member enjoys the hobby and when/how often they do it. The teacher allows students to organise their posters freely. She/He encourages creativity and asks students to write multiple sentences with connecting words. Students display the completed projects around the classroom on walls, desks, or boards. Students walk around the room in small groups, observing their classmates' work and asking questions. The teacher provides sticky notes for students to leave positive feedback or comments. Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To describe family members' hobbies and routines in English by using visuals and sentences in the target language.

Activity 1: "A Family Poster"

Before the lesson the teacher tells students to bring hobby-themed magazine cut-outs to use in the activity. The teacher asks students to work in small groups to create a family poster. Posters should include short descriptions of the family members. The teacher provides a template with guided sections to fill in: ("This is my __ mom, dad, sister", "They like to __ cook/ play ..."). Students also draw pictures or paste magazine cutouts that represent the hobbies and write sentences describing the hobbies on the poster. The teacher provides a word bank with key vocabulary and sentence starters (e.g., "My __ likes to __ because __"). The teacher allows students to organise their posters freely. She/He encourages creativity. Students display the completed projects around the classroom on walls, desks, or boards. Students walk around the room in small groups, observing and reading their classmates' work. The teacher provides sticky notes for students to leave positive feedback or comments. Students reflect on their thoughts and feelings about the activity.

THEME 5: LIFE IN THE NEIGHBOURHOOD & CITY

Sub-themes: Places for recreation and attractions in the neighbourhood and city; different types of houses

This theme is centred on the concept of “life in the neighbourhood and city” and covers the sub-themes of “places for recreation and attractions in the neighbourhood and city ; different types of houses”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.5.5.L1. Students can get ready for the listening/watching-comprehension process for the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “life in the neighbourhood and city” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.5.5.L2. Students can bring information about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening (to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening (to) and watching it again in a careful manner.*

ENG.5.5.L3. Students can make meaning of/derive meaning from the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.5.5.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*
- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.5.5.P1. Students can select and use the target phonological elements of the current content about “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Listening to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.5.5.R1. Students can get ready for the reading-comprehension process about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students making significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.5.5.R2. Students can bring information about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.5.5.R3. Students can make meaning of / derive meaning from the current content about “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.5.5.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.5.V1. Students can select and use the target vocabulary of the current content about “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening(to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.5.5.G1. Students can select and use the target grammatical elements of the current content about “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*
- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.5.5.W1. Students can get ready for the writing-expression process about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.5.5.W2. Students can understand the model/example for the writing task about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.5.5.W3. Students can organise a content for the assigned writing task on the current content “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*

- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/or unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.5.5.W4. Students can individually construct/form content for the assigned writing task on the current content “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*
- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.5.5.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG.5.5.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.5.S1. Students can get ready for speaking-expression process about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.5.5.S2. Students can use the model/example for producing verbal content about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ;different types of houses”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.5.5.S3. Students can organise a new verbal content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*
- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.5.5.S4. Students can construct a new verbal content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.5.5.S5. Students can reorganise(reconstruct)and use information about the “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.5.5.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

LIFE IN THE NEIGHBOURHOOD & CITY:

Sub-Themes: Places for recreation and attractions in the neighbourhood and city different types of houses.

Target Vocabulary in Use (with revisional vocabulary)

Vocabulary for places for recreation and attractions in the neighbourhood and city: Nouns: A corner, a square, a gym, a coast, a street fair, a hall, a sports centre, an art gallery, a shop (store-AmE), a castle, a tower, a site, a museum, a mosque, a town. Verbs: To cycle, to fish, to jump, to guide, to joke, to experience, to attend. Adjectives: Social, ancient, close, famous, crowded, quiet, modern, traditional, peaceful, brand-new, local. Adverbs: Best, easily. Phrases: To take a tour, to attend an event, to take a photograph, to hire (a bike)(rent-AmE).

Vocabulary for different types of houses and furniture and kitchen utensils: Nouns: A flat (apartment AmE), a kitchen, a bathroom, a bedroom, a sitting room (a living room-AmE), a dining room, a toilet, a garden, a garage), a balcony, a terrace, a corridor (hallway-AmE), a floor, a lift (elevator-AmE), a roof, a bookcase, a sofa, an armchair, a bed, a cupboard, a fridge, an oven (a stove-AmE), a lamp, a knife, a spoon, a fork, a plate, a wardrobe, a dishwasher, a shelf, ground. Verbs: To repair. Adjectives: Wide, wooden, metal, plastic, bright, light, comfortable, bottom, top, glass, steel, handmade. Adverbs: Inside, outside.

Target Grammatical Structures in Use:

- Comparatives of adjectives (regular-irregular): (The sofa is more comfortable than the armchair).
- Possessive 's': (This is Anna's bicycle; she uses it every day.)
- Present Simple Tense: (We cycle to the park every Saturday.)
- There is/are: (There are many paintings in the art gallery. There is a wide sofa in the living room.)

Functions of the Target Grammatical Structures in Use:

- Use of "Comparatives of Adjectives (regular-irregular)": Expressing comparisons between two people, objects, or ideas.
- Use of "Possessive 's'": Indicating ownership or relationship.
- Use of the Present Simple Tense: Expressing habitual actions, general truths, and permanent states.
- Use of "There is/There are": Indicating existence or location.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Social Language in Use:

- Where is the nearest library?
- Our kitchen is the heart of our house!
- Our new flat was ready to move into! (Our new flat was move-in-ready! AmE.)

Target Phonological Sounds in Use:

f, g, h, i, j, k,

Vowel: i (/aɪ/, /ɪ/, /i:/)

Consonants: f: (/f/); g: (/g/, /dʒ/); h: (/h/); j: (/dʒeɪ/, /dʒ/); k: (/k/);

*Phonetic symbols will not be taught. Only sounds will be practised through the target words in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The target concept of this theme “life in the neighbourhood and city” and its components such as “places for recreation and attractions in the neighbourhood and city; different types of houses” is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what “life in the neighbourhood and city” and its components such as “places for recreation and attractions in the neighbourhood and city; different types of houses” means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts:

recreation, attractions, places for recreation, places for attractions, neighbourhood, city, different types of houses, places for recreation and attractions in the neighbourhood and city.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Students will search the Internet for the types of the houses that they have learnt about in the theme so as to collect more information about them. Students will create a dream house for themselves, drawing it by hand or using pictures and/or digital sources. Then they will present it to the class. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the students’ knowledge of “life in the neighbourhood and city” and its components such as “places for recreation and attractions in the neighbourhood and city different types of houses”. As they are lower secondary school students in year 5 (five), they can know what “life in the neighbourhood and city” and its components such as “places for recreation and attractions in the neighbourhood and city different types of houses” mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case English.

As they are students in year 5 of lower secondary school, they can know some basic vocabulary such as “What is it? It is a shop. Where is it? It is in the city.” about “life in the neighbourhood and city” and also some necessary structures in English from the previous themes and/or years. These grammar items and vocabulary are revised during the “Revision Programme” at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the “life in the neighbourhood and city” and its components such as “places for recreation and attractions in the neighbourhood and city ; different types of houses”. Recalling and practising with relevant vocabulary and grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of “life in the neighbourhood and city”. Therefore, a game can be played to revise all vocabulary and language chunks from the previous themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new

vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices.)

Establishing Links

Students can recall the current (theme) concept of “life in the neighbourhood and city” and its components such as “places for recreation and attractions in the neighbourhood and city; different types of houses” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme “life in the neighbourhood and city” in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around “life in the neighbourhood and city” and sub-themes “places for recreation and attractions in the neighbourhood and city ; different types of houses”, allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.5.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of “life in the neighbourhood and city” during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme **(D3.2, SELS1.1, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS1, LS4, LS5, CS2.11, CS2.16.2)** So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme **(CS2.6, CS2.8)**. For each theme, a digitally constructed story is

used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme **(CS2.14)**. It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about **(CS2.8)**. As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS2, LS4, CS2.10, CS2.17)**

ENG5.5.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) **(CS2.11)**. Students watch the introductory digital story to consolidate the identification of the “life in the neighbourhood and city” in it as a whole **(CS2.13)** without stopping the video at any point, so that the students can understand the theme holistically **(D3.2, SELS1.1, V3.3, V3.4, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS2, LS4, LS5, CS2.14, CS2.16.2)**.

ENG5.5.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students’ attention to the content, some realia brought into the classroom by the teacher could be used **(V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5)**. The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme “life in the neighbourhood and city” is mentioned in the introductory digital story, without stopping the video while the students watch the story **(CS2.6)**. When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options **(CS2.5)**. As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily **(CS2.1)**. In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component **(CS2.8)**. Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components **(D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4)**.

To check whether the students understand the general topic of the theme “life in the neighbourhood and city” and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students **(SELS2.2, V3.4, V4.2, LS1, LS4)**. When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) **(SELS1.2, V11.1, CS2.6, CS2.10)**. This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories **(D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12)**.

ENG5.5.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V3.4)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, LS5)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG5.5.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme “life in the neighbourhood and city” and the words and/or word groups for the sub-themes topics “places for recreation and attractions in the neighbourhood and city ; different types of houses”, the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced (**V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS4, LS5, CS2.6**). She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening to the recordings that she/he has prepared beforehand using some Web 2.0 programmes (**LS2, CS2.16.3**). The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both (**CS2.8**). To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers (**D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V11.1, V20.4, LS1, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for the sub-themes topics “places for recreation and attractions in the neighbourhood and city ; different types of houses”, the students listen (**CS2.9**); then the teacher says the target words/word groups and acts them out, the students repeat after her/him (**SELS2.1, CS2.14**). Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes houses” (**D2.3, D2.5, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5**). As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice (**SELS2.3, CS2.8, CS2.11**). They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom (**CS2.12**). Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games (**SELS2.1, V7.2, LS5, LS9**). The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically (**CS3.1**). Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills (**SELS2.2**). The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them (**CS2.13**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. (**D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4**).

ENG5.5.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used (**V3.2, LS2, LS4**). Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme (**V3.4, LS1, CS2.3, CS2.6**). The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way (**V3.3, V7.2, LS5, CS3.3**). For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words)

surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.5.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.5.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.5.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(D 2.3, D3.5, V4.2, V6.2, V10.3, V12.1, LS1)**.

ENG5.5.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions **(SELS1.1)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme **(V3.2, LS1)**.

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items **(D3.2, D3.6, LS1, LS2, LS4, LS5, CS2.4, CS2.6, CS2.7)**. Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme **(CS2.8)**. They underline the words whose meaning they do not know while reading silently **(CS2.17)**. Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words **(D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7)**.

To introduce and practise the meanings of the target vocabulary related to the theme, that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know **(V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5, CS2.16.1, CS2.6)**. By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words **(D1.2, D1.6, D3.7, CS2.10)**. This is conducted in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)** (7), (8), and (9) in the section

1.2. Principles for the Implementation of the English Curriculum. **(V3.3, LS1, LS2, LS4)**. After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him **(D2.3, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5, CS2.6, CS2.11)**. In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum.

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "life in the neighbourhood and city". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them **(V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5, CS2.4)**. She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly **(V3.3, L2, LS4, CS2.5)**. The teacher asks them to work in pairs and place the cut-out pictures in the right category and ask each other some questions about the theme **(D3.2, D3.8, SELS2.2, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5)**. When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures under the right category on the screen **(SELS1.2, V3.4, V11.1, V20.4, LS1, LS4, CS2.5)**. In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling **(D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9)**. To consolidate the meaning, selection,

and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures, flashcards, sounds, realia, and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students **(CS2.13)**. Students can be asked to create their own games to use the target vocabulary items in context **(D2.5, D.3.3, SELS3.1, SELS3.2, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5, LS9, CS2.20)**. Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.5.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "life in the neighbourhood and city", the introductory digital story or an extract from it played so that the students can notice the target language chunks **(D3.2, CS2.2)**. While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same **(V3.2, LS2, CS2.14)**. She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/blackboard/whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures **(SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2)**. To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board/blackboard/whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board **(D3.2, SELS3.2, V3.3)**. She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher **(CS2.7)**. These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them **(CS2.9)**. Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class **(SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2)**. Both the teacher and the class members give feedback to the students as they say their sentences **(CS2.19)**. The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V4.3, V6.2, V10.3)**.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "life in the neighbourhood and city", the teacher shows some other sentences with these chunks in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.5.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes. **(V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5).**

ENG5.5.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme "life in the neighbourhood and city". They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it **(SELS3.1)**. While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on **(D3.1, V3.4, LS1, CS2.4, CS2.16.3)**.

ENG5.5.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher's feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(D1.3, D3.1, SELS3.2, V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20)**.

ENG5.5.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and feelings **(D2.5, D3.3, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the students' interests and language level. **(V3.4, V7.2, V12.1, LS1, LS4, LS9)**.

ENG5.5.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing **(SELS2.2, SELS2.3, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5, LS9, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3.3, V7.2, LS2, CS2.20)**. These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.5.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(D1.5, SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different

activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1).**

ENG5.5.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme. **(V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5).**

ENG5.5.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4).**

ENG5.5.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13).**

ENG5.5.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20).**

ENG5.5.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "life in the neighbourhood and city" in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components such as "places for recreation and attractions in the neighbourhood and city; different types of houses" **(V1.1, V5.2, V8.4, V10.2, V14.1, V20.4, LS4, LS5, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.3, V7.2, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.5.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

DIFFERENTIATION**Expansion**

Objective: To talk about attractions in the city in English by using comparative forms of adjectives.

Activity 1: The Best Attraction

The teacher divides the class into small groups. Each group selects a specific real or fictional attraction in the city (the art museum, the zoo, the amusement park...) Groups should gather information about their attractions, focusing on characteristics that can be compared. The teacher tells them to think about factors such as: size, popularity, activities available. Students prepare a short presentation using comparative forms. They should focus on why their attraction is the best choice for visitors. Each group presents their chosen attraction. After each presentation, the teacher allows time for questions from other groups and encourages them to challenge each other's claims using comparative language. ("Why is the park more exciting than the historical site?"). After each presentation, the teacher gives constructive feedback and encourages students to give feedback using specific criteria. For example, they could comment on the clarity of the comparisons made, the use of comparative language, and the overall presentation style. After completing the presentations, students can reflect on their experience by using emojis to express their thoughts and feelings. They can choose emojis to represent various aspects of the activity, such as what they learned, how they felt about their presentation, and what they found challenging. Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To talk about attractions in the city in English by using comparative forms of adjectives.

Activity: The Best Attraction

The teacher divides the class into small groups. Each group selects a specific attraction in the city (the art museum, the park, the amusement park...). The teacher provides a vocabulary list with simple adjectives, visuals and definitions. She/He also gives sentence starters to help them form sentences. Students write a few sentences using comparative forms. Each group presents their chosen attraction. After each presentation, the teacher gives constructive feedback and encourages students to give feedback using specific criteria. For example, they could comment on the clarity of the comparisons made, the use of comparative language, and the overall presentation style. After completing the presentations, students can reflect on their experience by using emojis to express their thoughts and feelings. They can choose emojis to represent various aspects of the activity, such as what they learned, how they felt about their presentation, and what they found challenging. Students reflect on their thoughts and feelings about the activity.

THEME 6: LIFE IN THE WORLD

Sub-themes: Basic food types; ordering in a restaurant; food events in the city

This theme is centred on the concept of “life in the world” and covers the sub-themes of “basic food types; ordering in a restaurant; food events in the city”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.5.6.L1. Students can get ready for the listening/watching-comprehension process for the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “life in the world” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.5.6.L2. Students can bring information about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening (to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening (to) and watching it again in a careful manner.*

ENG.5.6.L3. Students can make meaning of/derive meaning from the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.5.6.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*

- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.5.6.P1. Students can select and use the target phonological elements of the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Students listen to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.5.6.R1. Students can get ready for the reading-comprehension process about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students making significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.5.6.R2. Students can bring information about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.5.6.R3. Students can make meaning of / derive meaning from the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*

- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.5.6.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “life in the world with basic food types; ordering in a restaurant; food events in the city” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.6.V1. Students can select and use the target vocabulary of the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening (to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.5.6.G1. Students can select and use the target grammatical elements of the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*

- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.5.6.W1. Students can get ready for the writing-expression process about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.5.6.W2. Students can understand the model/example for the writing task about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.5.6.W3. Students can organise a content for the assigned writing task on the current content “life in the world with basic food types; ordering in a restaurant; food events in the city” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*
- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.5.6.W4. Students can individually construct/form content for the assigned writing task on the current content “life in the world with basic food types; ordering in a restaurant; food events in the city”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*

- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.5.6.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “life in the world with basic food types; ordering in a restaurant; food events in the city” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG.5.6.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the world with basic food types; ordering in a restaurant; food events in the city” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.6.S1. Students can get ready for speaking-expression process about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.5.6.S2. Students can use the model/example for producing verbal content about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.5.6.S3. Students can organise a new verbal content on “life in the world with basic food types; ordering in a restaurant; food events in the city” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*

- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.5.6.S4. Students can construct a new verbal content on “life in the world with basic food types; ordering in a restaurant; food events in the city” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.5.6.S5. Students can reorganise (reconstruct) and use information about the “life in the world with basic food types; ordering in a restaurant; food events in the city” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.5.6.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “life in the world with basic food types; ordering in a restaurant; food events in the city” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

LIFE IN THE WORLD:

Sub-Themes: Basic food types; ordering in a restaurant; food events the city.

Target Vocabulary in Use:

Vocabulary for basic food types: Nouns: Dairy, nuts, beef, beans, a sweet (candy-AmE), a biscuit (cookie-AmE), jam, oil, a lemon, a top, a bottom, a bit, amount, soup, a salad, spices, sugar, butter, salt, pasta, flour, bread, tuna, a tart, garlic, meat, a plate, a recipe. Verbs: To boil, to cut, to wash, to dry, to heat, to taste, to contain, to need, to mash, to prepare, to slice, to cook. Adjectives: Fresh, home-made, boiled, healthy, light, sweet, fatty, special. Adverbs: Carefully, slowly, quickly. Phrases: To put on weight, to lose weight, at/on the top of.

Vocabulary for ordering in a restaurant: Nouns: Sauce, tip, a bowl, a bit, a chef, a dessert, a drink (a beverage-AmE), an order, a service, a side, tasting, a recipe, a quality, amount, a meal, a main dish, a starter (an appetizer-AmE). Verbs: To order, to serve, to book, to taste, to pay, to smell, to recommend, to reserve. Adjectives: Empty, tasty, delicious. Phrases: To book a table, to pay in cash.

Target Grammatical Structures in Use:

-“Can” for Permission: (Can I pay in cash?)

-“Have got/Has got”: (She has got a new recipe.)

-Countable and Uncountable Nouns: (How many lemons do you need for the recipe?)

Functions of the Target Grammatical Structures in Use:

-Use of Modal “Can” for Permission: Asking or giving permission

-Use of Modal “Have got/Has got”: Expressing possession.

-Use of Countable and Uncountable nouns: Expressing the amount of quantity of nouns.

***National and Religious Days, Festivals, and Celebrations:** “29 October Republic Day”, “23 April National Sovereignty and Children’s Day”, “19 May Commemoration of Atatürk, Youth and Sports Day”, “15 July Democracy and National Unity Day”, “30 August Victory Day”, “Eid al-Fitr (Eid-al-Ramadan)”, “Festival of Sacrifice (Eid-al-Adha)”.
 *(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners’ social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Social Language in Use:

Let’s eat out!

This problem is a hot potato!

My sister is buttering my mother up to get permission to go to the cinema!

Target Phonological Sounds in Use:

l, m, n, (ng), o, p

Vowel: o: (/əʊ/, /ɒ/, /æʊ/)

Consonants: l: (/ɛl/, /l/); m (/ɛm/, /m/); n: (/ɛn/, /n/); ng: (/ng/); p: (/pi:/, /p/)

*Phonetic symbols will not be taught. Only sounds will be practised through the target words in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The target concept of this theme “life in the world” and its components such as “basic food types; ordering in a restaurant; food events in the city” is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what “life in the world” and its components such as

“basic food types; ordering in a restaurant; food events in the city” means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts:

food, food types, basic food types; ordering, restaurants, ordering in a restaurant; food events in the city.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Students will work in pairs to create a short dialogue about ordering food in different types of restaurants and cafés. Each pair will include things like greetings, asking about the menu, choosing food, and talking about preferences. Then they will act out their dialogue in front of the class. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the students’ knowledge of “life in the world” and its components such as “basic food types; ordering in a restaurant; food events in the city”. As they are lower secondary school students in year 5 (five), they can know what “life in the world” and its components such as “basic food types; ordering in a restaurant; food events in the city” mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case English.

As they are students in year 5 of lower secondary school, they can know some basic vocabulary about “life in the world” and also some necessary structures in English from the previous themes and/or years. These grammar items and vocabulary are revised during the “Revision Programme” at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the “life in the world” and its components such as “basic food types; ordering in a restaurant; food events in the city”. Recalling and practising with relevant vocabulary and grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of “life in the world”. Therefore, a dialogue game can be played to revise all vocabulary and language chunks from the previous themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices.)

Establishing Links

Students can recall the current (theme) concept of “life in the world” and its components such as “basic food types; ordering in a restaurant; food events in the city” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate

to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme “life in the world” in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around “life in the world” and sub-themes “basic food types; ordering in a restaurant; food events in the city”, allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.6.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of “life in the world” during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme **(D3.2, SELS1.1, V3.2, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS1, LS4, LS5, CS2.11, CS2.16.2)**. So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme **(CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme **(CS2.14)**. It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about **(CS2.8)**. As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.3, V3.4, LS2, LS4, CS2.10, CS2.17)**.

ENG5.6.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) **(CS2.11)**. Students watch the introductory digital story to consolidate the identification of the “life in the world” in it as a whole **(CS2.13)** without stopping the video at any point, so that the students can understand the theme holistically **(D3.2, SELS1.1, V3.3, V3.4, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS2, LS4, LS5, CS2.14, CS2.16.2)**.

ENG5.6.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students’ attention to the content, some realia brought into the classroom by the teacher could be used **(V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5)**. The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme “life in the world” is mentioned in the introductory digital story, without stopping the video while the students watch the story **(CS2.6)**. When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options **(CS2.5)**. As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily **(CS2.1)**. In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component **(CS2.8)**. Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components **(D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4)**.

To check whether the students understand the general topic of the theme “life in the world” and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students **(SELS2.2, V3.4, V4.2, LS1, LS4)**. When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) **(SELS1.2, V11.1, CS2.6, CS2.10)**. This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories **(D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12)**.

ENG5.6.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V3.4)**. Some volunteer students express what they think and feel about them **(V11.1, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, LS5)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG5.6.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme “life in the world” and the words and/or word groups for the sub-themes “basic food types; ordering in a restaurant; food events in the city”, the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced **(V3.3, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS4, LS5, CS2.6)**. She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening

to the recordings that she/he has prepared beforehand using some Web 2.0 programmes **(LS2, CS2.16.3)**. The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both **(CS2.8)**. To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers **(D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V11.1, V20.4, LS1, CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for the sub-themes “basic food types; ordering in a restaurant; food events in the city”, the students listen **(CS2.9)**; then the teacher says the target words/word groups and acts them out, the students repeat after her/him **(SELS2.1, CS2.14)**. Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes **(D2.3, D2.5, V3.3, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5)**. As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice **(SELS2.3, CS2.8, CS2.11)**. They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom **(CS2.12)**. Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games **(SELS2.1, V7.2, LS5, LS9)**. The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically **(CS3.1)**. Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills **(SELS2.2)**. The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them **(CS2.13)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. **(D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4)**.

ENG5.6.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used **(V3.2, LS2, LS4)**. Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme **(V3.4, LS1, CS2.3, CS2.6)**. The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way **(V3.3, V7.2, LS5, CS3.3)**. For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements

(e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.6.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.6.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.6.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(D 2.3 , D3.5, V4.2, V6.2, V10.3, V12.1, LS1)**.

ENG5.6.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/ watching, and pre-reading sessions **(SELS1.1)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme **(V3.2, LS1)**.

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items **(D3.2, D3.6, LS1, LS2, LS4, LS5, CS2.4, CS2.6, CS2.7)** Then the students read the written version of the digital story again silently,

(or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme **(V16.3, CS2.8)**. They underline the words whose meaning they do not know while reading silently **(CS2.17)**. Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words **(D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7)**.

To introduce and practise the meanings of the target vocabulary related to the theme, that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know **(V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5, CS2.16.1, CS2.6)**. By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words **(D1.2, D1.6, D3.7, CS2.10)**. This is conducted in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)** (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V3.3, V3.4, LS1, LS2, LS4)**. After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him **(D2.3, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5, CS2.6, CS2.11)**. In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum.

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "life in the world". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them **(V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5, CS2.4)**. She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly **(V3.3, L2, LS4, CS2.5)**. The teacher asks them to work in pairs and place the cut-out pictures in the right category and ask each other some questions about the theme **(D3.2, D3.8, SELS2.2, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5)**. When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures under the right category on the screen **(SELS1.2, V3.4, V11.1, V20.4, LS1, LS4, CS2.5)**. In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling **(D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9)**. To consolidate the meaning, selection, and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures, flashcards, sounds, realia, and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students **(CS2.13)**. Students can be asked to create their own games to use the target vocabulary items in context **(D2.5, D3.3, SELS3.1, SELS3.2, V4.2, V4.4, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5, LS9, CS2.20)**. Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.6.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "life in the world", the introductory digital story or an extract from it played so that the students can notice the target language chunks **(D3.2, CS2.2)**. While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same **(V3.2, LS2, CS2.14)**. She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/blackboard/ whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures **(SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2)**. To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board /blackboard/ whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board **(D3.2, SELS3.2, V3.3)**. She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher **(CS2.7)**. These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them **(CS2.9)**. Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class **(SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2)**. Both the teacher and the class members give feedback to the students as they say their sentences **(CS2.19)**. The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V4.3, V6.2, V10.3)**.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "life in the world", the teacher shows some other sentences with these chunks in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V3.3, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.6.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes. **(V3.2, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5)**.

ENG5.6.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme “life in the world” They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it **(SELS3.1)**. While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on **(D3.1, V3.4, LS1, CS2.4, CS2.16.3)**.

ENG5.6.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher’s feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(D1.3, D3.1, SELS3.2,V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20)**.

ENG5.6.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and feelings **(D2.5, D3.3, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the students’ interests and language level. **(V3.4, V7.2, V12.1, LS1, LS4, LS9)**.

ENG5.6.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing **(SELS2.2, SELS2.3, V3.4, V4.2, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5, LS9, CS2.20)**. AI- based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3.3,V7.2, LS2, CS2.20)**. These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.6.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(D1.5, SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

ENG5.6.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme **(V3.2, V3.4, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5)**.

ENG5.6.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4)**.

ENG5.6.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13)**.

ENG5.6.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V4.2, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20)**.

ENG5.6.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "life in the world" in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components such as "basic food types; ordering in a restaurant; food events in the city" **(V3.4, V4.2, V13.1, V13.4, V14.1, V15.5, V17.1, V17.2, LS4, LS5, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.3, V7.2, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.6.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

DIFFERENTIATION**Expansion**

Objective: To order food in a restaurant in English by using vocabulary and phrases related to food.

Activity 1: Restaurant Role-Play

The teacher provides a sample menu with prices for reference and asks students to work in small groups in order to create their own restaurant menus. Menus should include types of food (e.g., appetizers, main courses, desserts) with descriptions, images/drawings of food and prices. When the menus are ready, the teacher explains the role play activity. The teacher assigns roles within each group: waiter/waitress, customers. Each group creates a simple restaurant scenario. The teacher allows groups time to practice their role-play scenarios. Each group presents their role-play to the class, simulating a real restaurant experience. The teacher encourages other students to observe and give constructive feedback. To reflect on their learning experience, students write down one thing they did well and one thing they want to improve for next time. Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To order food in a restaurant in English by using target vocabulary and phrases related to food.

Activity: Restaurant Role-Play

The teacher provides a sample menu with prices for reference and asks students to work in small groups in order to create their own restaurant menus. Menus should include types of food (e.g., appetizers, main courses, desserts), images/drawings of food and prices. The teacher gives a list of common phrases and vocabulary, visual aids (like picture menu) to support their understanding. When the menus are ready, the teacher explains the role play activity. The teacher assigns roles within each group: waiter/waitress, customers. Each group creates a simple restaurant scenario. The teacher provides sentence frames to help students structure their conversations. (For example: Customer: "Hello! I would like to order the ____". Waiter: "Sure! Would you like anything to eat?" Customer: "Yes, I'll have a ____"). The teacher allows groups time to practice their role-play scenarios. Each group presents their role-play to the class, simulating a real restaurant experience. The teacher encourages other students to observe and give constructive feedback. To reflect on their learning experience, students write down one thing they did well and one thing they want to improve for next time. Students reflect on their thoughts and feelings about the activity.

TEACHER REFLECTIONS

THEME 7: LIFE IN NATURE

Sub-themes: Types of animals in nature; wild animals in nature; their habitats

This theme is centred on the concept of “life in nature” and covers the sub-themes of “types of animals in nature; wild animals in nature; their habitats”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG5.7.L1. Students can get ready for the listening/watching-comprehension process for the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “life in nature” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG5.7.L2. Students can bring information about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening (to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening (to) and watching it again in a careful manner.*

ENG5.7.L3. Students can make meaning of/derive meaning from the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG5.7.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*

- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG5.7.P1. Students can select and use the target phonological elements of the current content about “life in nature with types of animals in nature; wild animals in nature; their habitats” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Students listen to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG5.7.R1. Students can get ready for the reading-comprehension process about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students make significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG5.7.R2. Students can bring information about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG5.7.R 3. Students can make meaning of / derive meaning from the current content about “life in nature with types of animals in nature; wild animals in nature; their habitats” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*

- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG5.7.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “life in nature with types of animals in nature; wild animals in nature; their habitats” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG5.7.V1. Students can select and use the target vocabulary of the current content about “life in nature with types of animals in nature; wild animals in nature; their habitats” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening (to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG5.7.G1. Students can select and use the target grammatical elements of the current content about “life in nature with types of animals in nature; wild animals in nature; their habitats” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*

- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG5.7.W1. Students can get ready for the writing-expression process about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG5.7.W2. Students can understand the model/example for the writing task about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide by examining it carefully.*

ENG5.7.W3. Students can organise a content for the assigned writing task on the current content “life in nature with types of animals in nature; wild animals in nature; their habitats” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*
- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG5.7.W4. Students can individually construct/form content for the assigned writing task on the current content “life in nature with types of animals in nature; wild animals in nature; their habitats”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*
- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*

- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG5.7.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “life in nature with types of animals in nature; wild animals in nature; their habitats” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG5.7.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in nature with types of animals in nature; wild animals in nature; their habitats” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG5.7.S1. Students can get ready for speaking-expression process about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG5.7.S2. Students can use the model/example for producing verbal content about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG5.7.S3. Students can organise a new verbal content on “life in nature with types of animals in nature; wild animals in nature; their habitats” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*
- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG5.7.S4. Students can construct a new verbal content on “life in nature with types of animals in nature; wild animals in nature; their habitats” by speaking accurately, efficiently, and authentically.

- a) Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG5.7.S5. Students can reorganise (reconstruct) and use information about the “life in nature with types of animals in nature; wild animals in nature; their habitats” to communicate with other people.

- a) Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG5.7.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “life in nature with types of animals in nature; wild animals in nature; their habitats” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

LIFE IN NATURE:

Sub-themes: Types of animals in nature; wild animals in nature; their habitats

Target Vocabulary in Use:

Vocabulary for types of animals in nature: Nouns: A bird, an insect, a reptile, a mammal. Adjectives: Wild, huge, enormous, furry, quiet, scary, quick, strong, dangerous, fast, slow. Body parts of animals: Nouns: A tail, a tusk, a paw, a wing.

Vocabulary for wild animals in nature: Nouns: A bear, a lion, a tiger, a wolf, a giraffe, a monkey, an elephant, a zebra, a penguin, a parrot, a snake, a crocodile, a gorilla, a leopard, a whale, an eagle, a shark, a seal, a seagull. Verbs: To attack, to move, to hunt, to run, to survive, to talk, to fly, to climb, to swing.

Vocabulary for their habitats: Nouns: A farm, a field, a forest, a jungle, a river, a coast, a savanna (savannah-AmE), an ocean, the sky, national park.

Target Grammatical Structures in Use:

–“Can” for Capability and Ability: (Tigers can attack their prey in the open savanna.)

–“Must” for External Obligation: (Birds must travel long distances to find warmer habitats during the winter months.)

–“Wh- questions” (where): (Where can you find lions in their natural habitat?)

– Comparative and Superlative Adjectives: (A tiger is bigger than a monkey.) (The lion is the strongest animal in the forest.)

Functions of the Target Grammatical Structures in Use:

–Use of Modal “Can” for Capability and Ability: Expressing the ability of animals or people to do something (to perform an action).

–Use of Modal “Must” for External Obligation: Expressing an obligation or necessity arising from external circumstances or rules.

–Use of “Wh- questions” (where): Asking about the location or place where an action occurs or something exists.

–Use of Comparative and Superlative Adjectives: Comparing characteristics of animals, things, and/or people

***National and Religious Days, Festivals, and Celebrations:** “29 October Republic Day”, “23 April National Sovereignty and Children’s Day”, “19 May Commemoration of Atatürk, Youth and Sports Day”, “15 July Democracy and National Unity Day”, “30 August Victory Day”, “Eid al-Fitr (Eid-al-Ramadan)”, “Festival of Sacrifice (Eid-al-Adha)”.

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners’ social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Social Language in Use:

That is the lion’s share!

Don’t forget, curiosity killed the cat!

Please stop crying wolf!

Target Phonological Sounds in Use:

q, r, s, t, u

Vowel: u: (/ju:/, /ʌ/, /ju:/)

Consonants: q: /kju:/, r: /ɑ:/ (Br), /r/ (AmE); s: (/s/, /ɛs/, /z/); t: (/ti:/, /t/)

*Phonetic symbols will not be taught. Only sounds will be practised through the target words in the theme.

Generalisations/Principles/Key Concepts

Generalisations

The target concept of this theme “life in nature” and its components such as “types of animals in nature; wild animals in nature; their habitats” is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower secondary school student will know what “life in nature” and its components such as “types of animals in nature; wild animals in nature; their habitats” means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts:

animals, nature

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Students will write a project about wild animals in terms of their living conditions and their protection. The project could include Internet search, collecting pictures, recording sounds etc. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the students’ knowledge of “life in nature” and its components such as “types of animals in nature; wild animals in nature; their habitats”. As they are lower secondary school students in year 5 (five), they can know what “life in nature” and its components such as “types of animals in nature; wild animals in nature; their habitats” mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case, English.

As they are students in year 5 of lower secondary school, they can know some basic vocabulary about “life in nature” and also some necessary structures in English from the previous themes and/or years. These grammar items and vocabulary are revised during the “Revision Programme” at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the “life in nature” and its components such as “types of animals in nature; wild animals in nature; their habitats”. Recalling and practising with relevant vocabulary and grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of “life in nature”. Therefore, a dialogue game can be played to revise all vocabulary and language chunks from the themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices).

Establishing Links

Students can recall the current (theme) concept of “life in nature” and its components such as “types of animals in nature; wild animals in nature; their habitats” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme “life in nature” in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around “life in nature” and sub-themes “types of animals in nature; wild animals in nature; their habitats”, allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.7.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of “life in nature” during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme **(D3.2, SELS1.1, V3.2, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS1, LS4, LS8, CS2.11, CS2.16.2)**. So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme **(CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover target

pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme **(CS2.14)**. It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about **(CS2.8)**. As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.3, V3.4, V16.3, LS2, LS4, CS2.10, CS2.17)**.

ENG5.7.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) **(CS2.11)**. Students watch the introductory digital story to consolidate the identification of the “life in nature” in it as a whole **(CS2.13)** without stopping the video at any point, so that the students can understand the theme holistically **(D3.2, SELS1.1, V3.3, V3.4, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS2, LS4, CS2.14, CS2.16.2)**.

ENG5.7.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students’ attention to the content, some realia brought into the classroom by the teacher could be used **(V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3)**. The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme “life in nature” is mentioned in the introductory digital story, without stopping the video while the students watch the story **(CS2.6)**. When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options **(CS2.5)**. As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily **(CS2.1)**. In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component **(CS2.8)**. Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components **(D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4)**.

To check whether the students understand the general topic of the theme “life in nature” and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students **(SELS2.2, V3.4, V4.2, LS1, LS4)**. When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) **(SELS1.2, V11.1, CS2.6, CS2.10)**. This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories **(D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12)**.

ENG5.7.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole listening–watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V3.4)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG5.7.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme “life in nature” and the words and/or word groups for the sub-themes “types of animals in nature; wild animals in nature; their habitats” the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced **(V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS4, LS8, CS2.6.)** She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening to the recordings that she/he has prepared beforehand using some Web 2.0 programmes **(LS2, CS2.16.3)**. The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both **(CS2.8)**. To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers **(D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V11.1, V20.4, LS1, CS2.14)**.

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for the sub-themes “types of animals in nature; wild animals in nature; their habitats”, the students listen **(CS2.9)**; then the teacher says the target words/word groups and acts them out, the students repeat after her/him **(SELS2.1, CS2.14)**. Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes **(D2.3, D2.5, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8)**. As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice **(SELS2.3, CS2.8, CS2.11)**. They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom **(CS2.12)**. Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games **(SELS2.1, V7.2, LS5, LS9)**. The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically **(CS3.1)**. Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills **(SELS2.2)**. The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them **(CS2.13)**. Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. **(D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4)**.

ENG5.7.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used **(V3.2, LS2, LS4)**. Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme **(V3.4, LS1, CS2.3, CS2.6)**. The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way **(V3.3, V7.2, CS3.3)**. For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual introductory story or a new text in the reading section of

the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.7.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.7.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.7.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(D 2.3, D3.5, V4.2, V6.2, V10.3, V12.1, LS1)**.

ENG5.7.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions **(SELS1.1)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme **(V3.2, LS1)**.

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items **(D3.2, D3.6, LS1, LS2, LS4, CS2.4, CS2.6, CS2.7)**. Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme **(V16.3, CS2.8)**. They underline the words whose meaning they do not know while reading silently **(CS2.17)**. Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words **(D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7)**.

To introduce and practise the meanings of the target vocabulary related to the theme, that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know **(V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8, CS2.16.1, CS2.6)**. By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words **(D1.2, D1.6, D3.7, CS2.10)**. This is conducted in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)** (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V3.3, V3.4, LS1, LS2, LS4)**. After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him **(D2.3, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, CS2.6, CS2.11)**. In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum.

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "life in nature". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them **(V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8, CS2.4)**. She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly **(V3.3, L2, LS4, CS2.5)**. The teacher asks them to work in pairs and place the cut-out pictures in the right category and ask each other some questions about the theme **(D3.2, D3.8, SELS2.2, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8)**. When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures under the right category on the screen **(SELS1.2, V3.4, V11.1, V20.4, LS1, LS4, CS2.5)**. In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling **(D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9)**. To consolidate the meaning, selection, and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures,

flashcards, sounds, realia, and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students **(CS2.13)**. Students can be asked to create their own games to use the target vocabulary items in context **(D2.5, D.3.3, SELS3.1, SELS3.2, V4.2, V4.4, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8, LS9, CS2.20)**. Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.7.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "life in nature", the introductory digital story or an extract from it played so that the students can notice the target language chunks **(D3.2, CS2.2)**. While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same **(V3.2, LS2, CS2.14)**. She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/ blackboard/ whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures **(SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2)**. To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board /blackboard/whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board **(D3.2, SELS3.2, V3.3)**. She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher **(CS2.7)**. These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them **(CS2.9)**. Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class **(SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2)**. Both the teacher and the class members give feedback to the students as they say their sentences **(CS2.19)**. The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V4.3, V6.2, V10.3)**.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "life in nature", the teacher shows some other sentences with these chunks in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V3.3, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.7.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes. (**V3.2, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3**).

ENG5.7.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme "life in nature". They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it (**SELS3.1**). While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on (**D3.1, V3.4, LS1, CS2.4, CS2.16.3**).

ENG5.7.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher's feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities (**D1.3, D3.1, SELS3.2, V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20**).

ENG5.7.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and feelings (**D2.5, D3.3, SELS3.2, CS2.13**). All the content is expected to be contextual, practical, authentic, real, and appropriate to the students' interests and language level. (**V3.4, V7.2, V12.1, LS1, LS4, LS9**).

ENG5.7.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing (**SELS2.2, SELS2.3, V3.4, V4.2, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8, LS9, CS2.20**). AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways (**D3.3, SELS3.2, SELS3.3, V7.2, LS2, CS2.20**) These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.7.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel

about them **(D1.5, SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

ENG5.7.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme. **(V3.2, V3.4, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8)**

ENG5.7.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4)**.

ENG5.7.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13)**.

ENG5.7.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V4.2, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS8, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20)**.

ENG5.7.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "life in nature" in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components such as "types of animals in nature; wild animals in nature; their habitats" **(V3.4, V4.2, V5.2, V9.1, V9.2, V9.3, V13.4, V16.2, V18.3, LS4, LS8, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.3, V7.2, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles

for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.7.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

DIFFERENTIATION

Expansion

Objective: To engage in conversations about animals and their habitats in English by using the target vocabulary and the grammar chunks (Modal-Can).

Activity 1: Guess who I am!

The teacher divides the class into groups of three/four and distributes a set of picture cards about animals. She/He asks the students to make sentences about what type of animal that is (e.g., It is a reptile, It is a bird, It is a mammal) and where we can find it in its natural habitat (e.g., We can find it in a forest, We can find it in a river) in turns and the other group members to try to guess which animal it is by looking at the picture cards (e.g., It is a crocodile, It is a bear, It is a parrot). At the end of the session, the students raise their cards including the expressions Good, Very Good, Excellent to show their feelings about the activity. The teacher provides constructive feedback to the whole class. Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To engage in conversations about animals and their habitats in English by using the target vocabulary and the grammar chunks (Modal-Can).

Activity 1: Guess who I am!

The teacher divides the class into groups of three/four and distributes a set of picture cards about animals (e.g., a bear, a parrot, a crocodile) and slips of paper (e.g., It is a You can find it in a). She/He asks the students to complete the sentences about what type of animal that is (e.g., It is a reptile, It is a bird, It is a mammal) and where we can find it in its natural habitat (e.g., We can find it in a forest, We can find it in a river) in turns and the other group members to try to guess which animal it is by looking at the picture cards (e.g., It is a crocodile, It is a bear, It is a parrot). At the end of the session, the students raise their cards including the expressions Good, Very Good, Excellent to show their feelings about the activity. The teacher provides constructive feedback

THEME 8: LIFE IN THE UNIVERSE & FUTURE

Sub-themes: Planet Earth; holidays; school holidays, places, activities, and plans for holidays

This theme is centred on the concept of “life in the universe and future” and covers the sub-themes of “planet Earth; holidays; school holidays, places, activities, and plans for holidays”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

Year 5 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.5.8.L1. Students can get ready for the listening/watching-comprehension process for the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “life in the universe and future” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.5.8.L2. Students can bring information about the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening (to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening (to) and watching it again in a careful manner.*

ENG.5.8.L3. Students can make meaning of/derive meaning from the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.5.8.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*
- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.5.8.P1. Students can select and use the target phonological elements of the current content about “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Students listen to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously and effectively when communicating with others.*

ENG.5.8.R1. Students can get ready for the reading-comprehension process about the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students make significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.5.8.R2. Students can bring information about the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.5.8.R3. Students can make meaning of / derive meaning from the current content about “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.5.8.R 4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.8.V1. Students can select and use the target vocabulary of the current content about “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening (to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Repeating aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.5.8.G1. Students can select and use the target grammatical elements of the current content about “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Being familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*
- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.5.8.W1. Students can get ready for the writing-expression process about the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.5.8.W2. Students can understand the model/example for the writing task about the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.5.8.W3. Students can organise a content for the assigned writing task on the current content “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*

- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/or unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.5.8.W4. Students can individually construct/form content for the assigned writing task on the current content “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*
- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.5.8.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG.5.8.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.5.8.S1. Students can get ready for speaking-expression process about the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.5.8.S2. Students can use the model/example for producing verbal content about the current content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.5.8.S3. Students can organise a new verbal content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*
- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.5.8.S4. Students can construct a new verbal content on “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.5.8.S5. Students can reorganise (reconstruct) and use information about the “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.5.8.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

LIFE IN THE UNIVERSE & FUTURE

Sub-theme: Planet Earth; holidays; school holidays, places, activities, and plans for holidays

Target Vocabulary in Use:

Vocabulary for Planet Earth: Nouns: A climate, a continent, a desert, a valley, a lake, an ocean, a rock, a season, sky, a temperature, a sand dune, a river, a coral reef, a canyon, an island. Verbs: To rise.

Vocabulary for school holidays: Nouns: Tourism, a summer/winter/spring/half-term holiday. Verbs: To pack, to recommend, to need, to explore, to visit. Adjectives: Fun, peaceful, historical, magical, amazing, historical, famous, calm. Prepositions: Including.

Vocabulary for school holidays, places, activities, and plans for holidays: Nouns: An opportunity, a tower, a tour, a journey, a trip, sightseeing, a holiday (vacation-AmE), a beach, a museum, a zoo, an amusement park, a view, a bridge, a jolly, a seaside, a destination, a sandcastle, a seashell. Verbs: To invite, to involve, to rest, to book, to relax.

Target Grammatical Structures in Use:

–“Be Going to Future Tense” for plans: (My family is going to spend the holiday watching documentaries about life in the universe).

Functions of the Target Grammatical Structures in Use:

–Use of “Be Going to Future Tense” for plans: Expressing actions and/or events that have already planned and/or likely to happen in the future.

Target Social Language in Use:

Let’s take a stroll!

Let’s take a breather during the holiday!

We’re going on a jolly to the seaside!

***National and Religious Days, Festivals, and Celebrations:** “29 October Republic Day”, “23 April National Sovereignty and Children’s Day”, “19 May Commemoration of Atatürk, Youth and Sports Day”, “15 July Democracy and National Unity Day”, “30 August Victory Day”, “Eid al-Fitr (Eid-al-Ramadan)”, “Festival of Sacrifice (Eid-al-Adha)”.

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners’ social and cultural context in mind. A table of contents for this section is provided in the introduction to the whole English Language Curriculum.

Target Phonological Sounds in Use:

v, w, x, y, z

Consonants: v: (/vi:/, /v/); w: (/w/); x: (/eks/, /ks/, /gz/); y: (/waɪ/, /j/, /ɪ/, /i:/); z: /zed/ (Br), /zi:/, (AmE), /z/).

*(Phonetic symbols will not be taught. Only sounds will be practised through the target words in the theme.)

Generalisations/Principles/Key Concepts

Generalisations

The target concept of this theme “life in the universe and future” and its components such as “planet Earth; holidays; school holidays, places, activities, and plans for holidays” is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what “life in the universe and future” and its components such as “planet Earth; holidays; school holidays, places, activities, and plans for holidays” means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts:

Planet Earth; holidays, school holidays, places, activities, plans, places, activities, and plans for holidays.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:

PERFORMANCE ASSIGNMENT: Students will create a project about their dream summer holiday. The project will include an internet search to find interesting places, collecting pictures, and recording sounds that represent their ideal holiday. They can also add short descriptions and creative elements to show what activities, places, and experiences they would like to enjoy during their dream summer vacation. The assignment will be evaluated by using a rubric scheme, a rating scale, and/or a marking scheme.

LEARNING-TEACHING EXPERIENCES

Basic Acceptations: Preparedness/ Readiness

This theme is based on the students’ knowledge of “life in the universe and future” and its components such as “planet Earth; holidays; school holidays, places, activities, and plans for holidays”. As they are lower secondary school students in year 5 (five), they can know what “life in the universe and future” and its components mean in their own language as it is known that almost all people who start to learn a new language bring their pre-existing knowledge (in their own language) with them and transfer it to their new language learning context. However, they may not know how to say these things in a foreign language if this has not yet been covered in their existing curriculum. Fortunately, this existing knowledge in their own language can help them recognise, understand, and learn them more easily in a foreign language, in this case English.

As they are students in year 5 of lower secondary school, they can know some basic vocabulary about “life in the universe and future” and also some necessary structures in English from the previous themes and/or years. These grammar items and vocabulary are revised during the “Revision Programme” at the beginning of the year, and they can be used as a basis for learning the new vocabulary and grammatical items in the current theme, so that the new grammatical elements in the current theme can be learnt easily.

Pre-Evaluation Process

It is expected that students’ physical, cognitive, affective, and social factors are appropriate and suitable for learning about the “life in the universe and future” and its components such as “planet Earth; holidays; school holidays, places, activities, and plans for holidays”. Recalling and practising with relevant vocabulary and grammatical items in English that they have learnt in the previous years would be helpful as a basis for moving on and learning the current content on the concept of “life in the universe and future”. Therefore, a dialogue game can be played to revise all vocabulary and language chunks from the previous themes in previous years by giving instructions in English as a preparation practice. In this way, their performance can be evaluated by seeing how much they remember and how much they are able to understand and use the previously learnt vocabulary and chunks to build their competence in the current theme. It can be decided what to emphasise or practise in order to revise the previous knowledge and to facilitate the new vocabulary and chunks in the current theme. (Their performance can be evaluated by rubrics throughout these practices.)

Establishing Links

Students can recall the current (theme) concept of “life in the universe and future” and its components such as “planet Earth; holidays; school holidays, places, activities, and plans for holidays” by remembering their pre-existing background knowledge about it (imaginatively through thinking) in their own language to make links with the current activities in the current theme in English without translating anything until they start learning the target words in the current (new) concept in English.

To remind them of the pre-existing background knowledge they already have about the current concept, various materials such as short scene from a film, series, a part from a story, a poster etc. which is appropriate to the age, level, and pedagogy could be used before the main teaching/learning flow of the class begins. They would give a general idea of the theme. Students are facilitated with the relevant materials through various activities. When they have finished working on it, the teacher asks them in English if they understood what was it about. For checking their understanding, she can design several activities. For instance, they can write a related word that they know in English on a piece of paper and put it in the jar/box that she/he has prepared. Alternative ways can be tried.

The teacher asks them to wait for it until they see the next visual, which is the main entry material of the theme, the digital introductory story, to see if their thoughts/guesses are true or not without asking any further questions.

Learning-Teaching Practices

WARM-UP TO THE WHOLE THEME (WELL-BEING)

Before starting to work on the theme “life in the universe and future” in the classroom, to prepare the students emotionally, cognitively, psychologically, and physically, a fun non-theme warm-up activity can be done as an icebreaker to help the students feel positive and ready for the whole learning process in class for their well-being. This could be an activity such as a short game, a physical activity, listening to/singing a song/chant/rhyme, doing a riddle, solving a puzzle, saying a tongue twister, listening to an anecdote/a very short story, watching a pantomime/cartoon story, etc. that has no relation or connection to the current theme and does not require any knowledge of English **(D2.5, SELS2.1, V12.1, LS2, LS4)**.

INTEGRATION OF LANGUAGE SKILLS IN THE THEME

All language skills (listening/watching-comprehension, reading-comprehension, speaking-expression, writing-expression, vocabulary selection and use, grammar selection and use, pronunciation selection and use) are used in an integrated way around “life in the universe and future” and sub-themes “planet Earth; holidays; school holidays, places, activities, and plans for holidays”, allowing students to build background knowledge through receptive skills before moving on to productive tasks throughout the theme. They are combined in a meaningful and purposeful way and are integrated to support the learning outcomes of the theme. Although they are sequenced from receptive to productive in the teaching-learning practices, they are always used in a closely linked way that means each activity builds on the previous one to promote language development and to increase communicative competence. The theme is characterised by a balanced integration of all the skills, where students engage with input (listening/watching-comprehension and reading-comprehension) and respond through output (speaking-expression and writing-expression) with the help of their vocabulary, grammar and phonological selection and use skills.

ENG5.8.L1.

PREPARING FOR LISTENING/WATCHING-COMPREHENSION: Having seen a visual about and having guessed the topic of “life in the universe and future” during the background recall session, students can have a vision of the current theme as a general concept in the current (new) theme **(D3.2, SELS1.1, V3.2, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS1, LS4, LS5, CS2.11, CS2.16.2)**. So, a further concept check with listening/watching for gist activities including more guessing games using clues from some pictures, realia, short video clips etc. help them prepare for the current theme **(CS2.6, CS2.8)**. For each theme, a digitally constructed story is used as the main context of the theme, and it is visited several times while going through the theme to cover

target pronunciation, vocabulary, grammar, social language expressions, and semantic meaning of the whole theme **(CS2.14)**. It is both an entry material and the main context to the whole theme at the same time. The teacher asks them whether their guesses during the background recall session were correct and also what they think the introductory digital story that they are going to watch could be about **(CS2.8)**. As they have already seen a scene from a film about the theme and the pictures, realia, etc. they can easily answer what the current theme will be about and that their guesses were true **(D1.2, D1.6, D2.3, D3.2, SELS1.2, V3.3, V3.4, LS2, LS4, CS2.10, CS2.17)**.

ENG5.8.L2.

BRINGING INFORMATION TOGETHER THROUGH LISTENING/WATCHING: The teacher asks the students to watch the introductory digital story carefully, recalling the work done with visuals (the scene from a film, pictures, realia, or video clips about the theme shown earlier) **(CS2.11)**. Students watch the introductory digital story to consolidate the identification of the theme's life in the universe and future "in it as a whole" **(CS2.13)** without stopping the video at any point, so that the students can understand the theme holistically **(D3.2, SELS1.1, V3.3, V3.4, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS2, LS4, LS5, CS2.14, CS2.16.2)**.

ENG5.8.L3.

MAKING MEANING THROUGH LISTENING/WATCHING-COMPREHENSION: To draw students' attention to the content, some realia brought into the classroom by the teacher could be used **(V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5)**. The teacher could show the corresponding objects to the students when the corresponding vocabulary for the main components of the theme "life in the universe and future" is mentioned in the introductory digital story, without stopping the video while the students watch the story **(CS2.6)**. When they have watched the whole story, the teacher could show the realia items on the table and ask questions with two options **(CS2.5)**. As one of the words is from the previous themes, students could hear, understand, recognise and learn the (new) target vocabulary for each main component of the theme easily **(CS2.1)**. In this way, the teacher could engage in a dialogue with the whole class to check that they have recognised the components of the theme, and that they have understood each realia item is about one component **(CS2.8)**. Further activities and games can be played at this stage to reinforce the general meaning of the theme through its main components **(D1.1, D2.5, SELS2.1, V3.4, LS1, LS2, LS4)**.

To check whether the students understand the general topic of the theme "life in the universe and future" and remember the sequence of the scenes of the introductory digital story, the teacher shows an organiser with the mixed images/pictures of the scenes on the Smart Board and asks the students to look at the images/pictures of the scenes for a while **(CS2.3)**. She/He then asks them to order the scenes in pairs in their seats with the mixed paper pictures she/he has already given to the students **(SELS2.2, V3.4, V4.2, LS1, LS4)**. When the pairs have finished sorting the pictures for the scenes of the story, the teacher asks the students to take turns or volunteer to sort the scenes on the screen of the Smart Board (or the pictures on the blackboard) **(SELS1.2, V11.1, CS2.6, CS2.10)**. This will help the students to organise the story as a whole so that they can identify the main theme and the components of the theme from their memories **(D1.2, D1.6, D2.3, V16.3, V20.4, CS2.12)**.

ENG5.8.L4.

REFLECTING ON THE LISTENING/ WATCHING PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole listening-watching process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3, V3.4)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS1.2, SELS2.2, V4.2, V4.3, V12.1, LS5)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(V10.3)**.

ENG5.8.P1.

RECOGNITION OF TARGET PRONUNCIATION: To practise pronunciation of the new target words, word groups, language chunks, and social language expressions about the theme “life in the universe and future” and the words and/or word groups for the sub-themes “planet Earth; holidays; school holidays, places, activities, and plans for holidays”, the teacher asks the students to listen (to)/watch the whole or some extracts from the introductory digital story by noticing how words are pronounced (**V3.3, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS4, LS5, CS2.6**). She/He asks them to repeat the word aloud when she/he stops the video for a word and says it. The teacher then asks the students to listen and repeat the same words aloud a few times as a whole class after listening to the recordings that she/he has prepared beforehand using some Web 2.0 programmes (**LS2, CS2.16.3**). The teacher could offer variations with some techniques such as showing the picture of the target word to the students to say the word or pointing to the corresponding picture when they hear the word from the recording, and then both (**CS2.8**). To help the students pronounce the words accurately, the teacher asks them to repeat each target word aloud a few times as a whole class after her/him or the recording, then in large groups, then in small groups and then again as volunteers (**D3.2, D3.6, SELS1.2, SELS2.1, V4.2, V20.4, LS1, CS2.14**).

SELECTION AND USE OF TARGET PRONUNCIATION: Practice of pronunciation could be done with different forms of TPR, gamification and drama activities, e.g. first the teacher says the target words/word groups for the sub-themes “planet Earth; holidays; school holidays, places, activities, and plans for holidays”, the students listen (**CS2.9**); then the teacher says the target words/word groups and acts them out, the students repeat after her/him (**SELS2.1, CS2.14**). Then the teacher and the students say the target words/word groups and act them out together at the same time. Then the teacher says the words/word groups and acts them out. These activities can be done through the actions for the sub-themes (**D2.3, D2.5, V3.3, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5**). As a variation, they can also repeat the words after the teacher happily, sadly, angrily, etc. using different tones of voice (**SELS2.3, CS2.8, CS2.11**). They also practise for the target social language chunks using the same or similar techniques. During the repetitions, they point to relevant pictures that the teacher has placed in different places in the classroom (**CS2.12**). Some action sequences are also created in which the students can practise the social language in a fun way by repeating, pointing, miming, and acting out in several games (**SELS2.1, V7.2, LS5, LS9**). The teacher facilitates some activities with dialogues and games in which students can practice the target pronunciation by selecting and using them accurately, naturally, and authentically (**CS3.1**). Several fun pronunciation games could be played, such as shadow reading, bingo, odd one out, pronunciation maze, minimal pairs, rhyming games, and several sound drills (**SELS2.2**). The target sounds such as vowels, consonants, and diphthongs of the theme are practised through them (**CS2.13**). Their learning is evaluated as described in items (1) and (2) in the section 1.2. Principles for the Implementation of the English Curriculum. (**D1.2, D1.6, D2.5, V3.4, LS1, LS2, LS4**).

ENG5.8.R1

PREPARATION FOR THE READING-COMPREHENSION PROCESS: The teacher facilitates reading and writing activities throughout the theme from the first lesson to the end, when and where necessary with precise techniques and the necessary amount. Reading starts from earlier stages and continues throughout the theme in various forms and amounts. Reading is done in two ways in the theme by using the written version of the introductory digital story and additional reading texts in reading sections of the instructional material to be used (**V3.2, LS2, LS4**). Various reading styles including silent reading, speed reading, jigsaw reading and basic reading techniques including skimming, scanning, and reading for details during pre-reading, while-reading and post-reading phases are used in the theme (**V3.4, LS1, CS2.3, CS2.6**). The ultimate aim of reading practice is to enhance comprehension, improve fluency, develop pre-critical thinking skills and critical thinking skills and the ability to comprehend and talk/write about the content in a meaningful and communicative way (**V3.3, V7.2, LS5, CS3.3**). For the initial stage of reading, the teacher asks the students to look at the audio/visual/written elements (e.g. sound, voices, scenes, title of the text, written words) surrounding the written version of the contextual

introductory story or a new text in the reading section of the instructional material to be used for skimming to recall the conceptual meanings they already have about the theme **(CS2.8)**. At this stage, the teacher could ask the students to read the title of the theme and ask the students which words they already know, and which come to mind in connection with the title **(SELS1.1, CS2.16.2)**. She/He reminds them not to ask the meanings of any new words or the words they do not know. She/He reminds them that this is just a guessing activity by using the words they know and that there is time to work on the new words of the new theme later **(D3.2, D3.6, V3.4, CS2.10, CS2.12)**.

ENG5.8.R2

BRINGING INFORMATION TOGETHER THROUGH READING: Students go on with a scanning activity to find out the most important details of the introductory digital story and/or a new text in the reading section which is organised to help students to know more about the reading content **(CS2.6, CS2.7)**. In this way they could be able to recognise the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story **(CS2.4)**. By doing so, they will be able to understand the story/text in general using the main elements **(D3.2, D3.6, V3.3, V3.4, LS1)**.

ENG5.8.R3.

MAKING MEANING THROUGH READING: Then the teacher asks the students to do a jigsaw reading activity, so she/he shows the written version of the introductory digital story or the text in the reading section on the blackboard/Smart Board (or in any other teaching material). She/He asks the students to work in pairs to share the text **(SELS2.2)**. One peer reads the first half of the text and the second peer reads the other half of the text in a given time **(CS2.6)**. They are then asked to share what they have understood from their part with their peer, also in a given time. In this way, they talk about the whole story after reading it silently, in the jigsaw reading style **(D2.4, D3.6, V3.4, V4.2, V16.2, LS1, LS6, CS2.8, CS2.9)**. Some speed-reading activities can be used to develop students' reading and comprehension skills. These activities can be evaluated as explained in the item (6) in the section 1.2. Principles for the Implementation of the English Curriculum. After sharing their parts, students proceed with the activities for dealing with the target vocabulary, grammatical chunks, and semantic meaning relatively with the help of the teacher **(CS2.14)**. For dealing with the semantic meaning, the teacher facilitates the lesson with meaningful activities including closed, semi-closed, free, open-ended, and communicative ones **(SELS2.1)**. From display to communicative open-ended, various types of questions are used to understand the meaning of the text **(SELS3.1, SELS3.2, CS2.6)**. During this process students work collaboratively to exchange information, thoughts, and feelings **(D3.2, D3.7, V3.3, V7.2, V20.2, LS2, LS4, CS2.8)**.

ENG5.8.R4.

REFLECTING ON THE READING-COMPREHENSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole reading-comprehension process and asks them to express their thoughts, ideas, and feelings about the process **(SELS1.3)**. Some volunteer students express what they think and feel about them **(CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design **(D 2.3, D3.5, V4.2, V6.2, V10.3, V12.1, LS1)**.

ENG5.8.V1.

PREPARATION TO WORK ON THE TARGET VOCABULARY: At this stage, students remember what the theme is about through the activities that they have done during the background knowledge, pre-listening/watching, and pre-reading sessions **(SELS1.1)**. As they know the main topic, they get ready to deal with the main components and target vocabulary of the theme **(V3.2, LS1)**.

RECOGNITION OF THE TARGET VOCABULARY: A scanning activity to find out the main details of the introductory digital story (and/or a new text in the reading section) is organised to help students to know more about the content. This could help them identify what the target words in the text could be about. The activity could be designed by listing some important pictures, words or events about the main components of the theme that take place in the story/text. Students circle or tick the ones that they have heard, seen and scanned (quickly read) in the story. In this way, they will be able to understand the story/text in general by using the main elements and also be ready to work on the target vocabulary items **(D3.2, D3.6, LS1, LS2, LS4, LS5, CS2.4, CS2.6, CS2.7)**. Then the students read the written version of the digital story again silently, (or the reading text in the reading section), to check whether they know any of the target vocabulary items about the theme **(CS2.8)**. They underline the words whose meaning they do not know while reading silently **(CS2.17)**. Students say these words when they finish reading and the teacher writes these words on the Smart Board/blackboard/ white board as they say them. The teacher writes only the target words on the Smart Board/blackboard as active words that the students have said. She/He quickly deals with the non-target passive vocabulary items by using pictures, mimics, gestures, imitations, examples, etc. But she/he takes time to facilitate the teaching of the target words **(D1.2, D1.6, D3.2, V3.3, V3.4, LS2, LS4, CS2.4, CS2.5, CS2.7)**.

To introduce and practise the meanings of the target vocabulary related to the theme, that the students do not know, the teacher asks the students to watch the introductory digital story (or the video of the reading text if there is one) again. From the beginning, whenever a target item is mentioned, the teacher stops the video and asks several questions in the form of two options, one of which is a word from the previous themes that they already know **(V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5, CS2.16.1, CS2.6)**. By guessing what they are, the students hear the English equivalents of the words for the theme and they answer as a whole class in chorus. In this way, they are introduced to the meanings of the target words **(D1.2, D1.6, D3.7, CS2.10)**. This is conducted in the form of a dialogue where their learning can be checked as described in items **(SELS2.1)** (7), (8), and (9) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V3.3, V3., LS1, LS2, LS4)**. After having watched the introductory digital story, the teacher shows some pictures for the sub-themes, on the walls as clues and says the words aloud several times in sentences by pointing to the pictures and the students repeat after her/him **(D2.3, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5, CS2.6, CS2.11)**. In this way, the main vocabulary items of the theme are introduced to the students in English as described in item (3) in the section 1.2. Principles for the Implementation of the English Curriculum.

SELECTION AND USE OF TARGET VOCABULARY: The teacher can prepare an activity using the Web 2.0 programme with images/pictures, and symbolic images for some categories about the components of the theme "life in the universe and future". She/He also prepares mixed images/pictures for target vocabulary items for the activities which can be done in relation to the components. She/He asks the students to look at the mixed pile of images/pictures of the main components of the theme on the Smart Board screen and scan them for a while to remember them **(V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5, CS2.4)**. She/He explains to the students that the items will be placed under the correct category, but first she/he gives the students the cut-out pictures of the activities and a large sheet of paper with the categories written on it and the cut-out pictures will be placed under each category correctly **(V3.3, L2, LS4, CS2.5)**. The teacher asks them to work in pairs and place the cut-out pictures in the right category and ask each other some questions about the theme **(D3.2, D3.8, SELS2.2, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5)**. When the students have finished working with the cut-out pictures and asking and answering questions about them, the teacher asks them to take turns or volunteer to go to the Smart Board and drag the corresponding images/pictures under the right category on the screen **(SELS1.2, V3.4, V20.4, LS1, LS4, CS2.5)**. In this way, images/pictures that are relevant to the main concept and its components are consolidated through categorisation. This activity can be done with real pictures on the white/blackboard if there is a problem with technology. The teacher asks the students to copy the words next to the pictures they have pasted or drawn in their picture dictionaries and then asks them to exchange their picture dictionaries with their peers and check each other's spelling **(D3.2, SELS1.2, SELS2.2, V4.2, V4.3, V6.2, LS9)**. To consolidate the meaning, selection, and use of the new target vocabulary items, the teacher could organise activities and tasks using pictures, flashcards, sounds, realia,

and any other materials to play games such as Bingo, Pelmanism, King's game, Odd One out, Wordscapes, Scrabble, Pictionary, Letter Scramble, Acronyms, Charades etc. Games could be adapted according to the teacher's objectives (pronunciation, spelling, meaning, selection, use etc.), age, interests and language level of the students **(CS2.13)**. Students can be asked to create their own games to use the target vocabulary items in context **(D2.5, D.3.3, SELS3.1, SELS3.2, V4.2, V4.4, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5, LS9, CS2.20)**. Students' learning can be checked as described in items (3), and (4) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.8.G1

RECOGNITION OF TARGET GRAMMATICAL ITEMS: To draw the students' attention to the target language chunks of the theme "life in the universe and future" the introductory digital story or an extract from it played so that the students can notice the target language chunks **(D3.2, CS2.2)**. While watching the introductory digital story, the teacher stops at the scenes where the target language chunks are used. She/He imitates the action by showing the scene, saying the chunk, and asking the students to do the same **(V3.2, LS2, CS2.14)**. She could hold up large pictures corresponding to the chunks when they are mentioned in the digital story to draw the students' attention. The sentences with the target chunks are also written and placed on the Smart Board/blackboard/ whiteboard. The teacher also points to these sentences while pointing to the scenes in the story where they appear. There is no analysis or teaching of grammatical structures at this stage. Students can automatically and naturally identify the use of the target language chunks in the current context created in the introductory digital story without working on any rules or structures **(SELS3.1, V3.4, LS1, LS4, CS2.3, CS2.4, CS2.16.2)**. To check the students' identification of the target language chunks, after the students have finished watching the introductory digital story, the teacher asks them to read the sentences with the target language chunks written by the teacher on the Smart Board /blackboard/ whiteboard and asks them to find the same or similar sentences in the written version of the introductory digital story or another text that is shown on the Smart Board **(D3.2, SELS3.2, V3.3)**. She/He also asks them to find the same or similar sentences with these chunks which are given in different types of tables prepared by the teacher **(CS2.7)**. These tables do not include any explanations of grammatical rules, explanations, or formulas, and they only contain example sentences with target chunks in which important words with the target grammar are written in bold or different colours to attract students' attention. The teacher asks them to look at the words in bold or in different colours and asks students to examine them **(CS2.9)**. Then the teacher asks the students to copy these sentences with target chunks written in bold or different colours into their notebooks. The teacher asks the students to make very similar sentences using the target words and asks them to share their sentences with each other in pairs, and then with the class **(SELS2.2, SELS3.2, D3.2, V4.2, CS2.13, CS2.14, CS2.16.1, CS2.16.2)** Both the teacher and the class members give feedback to the students as they say their sentences **(CS2.19)**. The teacher gives all students a checklist with simple symbols to evaluate each other's work as explained in the items (5) and (6) in the section 1.2. Principles for the Implementation of the English Curriculum. **(V4.3, V6.2, V10.3)**.

SELECTION AND USE OF THE TARGET GRAMMAR: To facilitate students' further practice with the target language chunks in the theme "life in the universe and future", the teacher shows some other sentences with these chunks in another context such as a short story, a short paragraph, and a short dialogue etc. and asks students to find the sentences with the target chunks in them and asks if they understand them **(SELS3.2, V3.3, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5, CS2.4, CS2.6, CS2.8)**. She/He gives some written activities and exercises to practise the target chunks in context. She/He also facilitates more fun activities and as described in items (5), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. To consolidate the target language chunks, the teacher organises different fun activity and game bundles that the students can practise and consolidate them **(CS2.13)** where their learning can be checked as described in item (10) in the section 1.2. Principles for the Implementation of the English Curriculum **(D2.5, V4.4)**.

ENG5.8.W1.

PREPARATION FOR THE WRITING-EXPRESSION SESSION: Practising through writing: Writing activities help students to produce and display meaningful written language for their personal expression and communication with others, by using language including target words, grammatical structures in use and the social language in this theme, as in other themes. **(V3.2, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5).**

ENG5.8.W2.

RECOGNISING THE MODEL: Initially, students produce very limited and short pieces of writing such as sentences to practise the language including the target vocabulary and grammatical structures, after hearing and seeing them through listening and reading activities in the theme “life in the universe and future”. They practise the language in a more controlled way in the beginning, by writing to repeat or simply explain what they hear and see in context and what they are asked to do. They are provided a written model/example to copy to be able to notice significant points and elements in it **(SELS3.1)**. While copying a short model writing, they become aware of the aspects such as the use of words, language chunks, punctuation, spelling and so on **(D3.1, V3.4, LS1, CS2.4, CS2.16.3)**.

ENG5.8.W3.

CREATING THE WRITING CONTENT: Controlled writing of words and sentences turns to short paragraphs in a process writing manner with the support of the teacher’s feedback in the theme. This process is expanded and supported by several practical activities. New contexts in the form of written/photo-picture strip/pantomime/video stories, dialogues, etc. for students to write responses, lines, parts, answers, scripts, etc. to practise further by writing with the language including the target words and grammatical structures related to the theme in fun, enjoyable, varied, and versatile activities **(D1.3, D3.1, SELS3.2, V3.4, V4.4, V7.2, LS2, LS4, LS9, CS2.20)**.

ENG5.8.W4.

CONSTRUCTING AND PRACTISING WRITING: Storification and gamification techniques are actively and extensively used for further writing practice tasks. Students are encouraged to produce a variety of written products such as sentences, acronyms, paragraphs, messages, posters, e-mails, quotes, poems, songs, projects, scripts for plays, diaries/journals, blogs, very short film scenarios, etc. to express their ideas, thoughts, and feelings **(D2.5, D3.3, SELS3.2, CS2.13)**. All the content is expected to be contextual, practical, authentic, real, and appropriate to the students’ interests and language level. **(V3.4, V7.2, V9.3, V12.1, LS1, LS4, LS9)**.

ENG5.8.W5.

RECONSTRUCTING AND COMMUNICATING THROUGH WRITING: Students interact and communicate with peers and/or other people inside or outside school by using the language including the target words, language chunks, and the social language for the theme in their writing **(SELS2.2, SELS2.3, V3.4, V4.2, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5, LS9, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home in a variety of ways **(D3.3, SELS3.2, SELS3.3, V7.2, LS2, CS2.20)**. These activities are evaluated as described in items (11) and (12) in the section 1.2. Principles for the Implementation of the English Curriculum.

ENG5.8.W6.

REFLECTING ON THE WRITING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole writing-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel

about them **(D1.5, SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

ENG5.8.S1.

PREPARATION FOR SPEAKING: The teacher facilitates speaking activities throughout the theme from the first lesson to the end. Speaking activities enhance students' learning and help them produce and display meaningful language for personal expression and communication with others by using the language including the target words, grammatical structures in use and the social language expressions of the theme. **(V3.2, V3.4, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5)**.

ENG5.8.S2

RECOGNISING AND USING THE MODEL: In the beginning, through listening/watching and reading, students recognise how the language with the target language items is used **(CS2.6)**. They practise the language in a controlled way, by telling, repeating, explaining what they hear and see in the context **(D1.3, D3.2, SELS3.1, V3.3, LS1, LS2, LS4, CS2.4)**.

ENG5.8.S3

CONSTRUCTING SPOKEN CONTENT: In the later stages of the lessons after controlled practice sessions, the teacher creates new contexts in the form of new written/photo-picture strip/pantomime/video stories, dialogues etc. as new opportunities for the students to talk about them for practising further through questions, explanations, inferences etc **(D1.3, SELS3.2, V3.4, V4.2, V7.2, V12.1, LS1, LS4, LS9, CS2.13)**.

ENG5.8.S4.

CONSTRUCTING SPOKEN MATERIALS: Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme **(SELS2.2, SELS3.2, V4.2, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS5, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D1.2, D1.6, D3.3, V7.2, LS2, LS9, CS2.20)**.

ENG5.8.S5.

RECONSTRUCTING AND COMMUNICATING THROUGH SPEAKING: Students communicate with each other by seeing/hearing/reading/using the language including the target words and grammatical structures related to the theme "life in the universe and future" in fun, enjoyable, varied, and versatile activities **(SELS2.3, CS2.20)**. Picture strip stories can be used at the end of each theme to provide a consolidation and revision **(V3.4, V4.2, V12.1, LS1, LS4, LS9, CS2.13, CS2.14)**. These new contents created are contextual, practical, authentic, real, and appropriate to the students' age, interests, and language level. Storification and gamification techniques are actively and extensively used together with other further speaking practice throughout the theme. Students are encouraged to produce several spoken products related to the extended contexts such as dialogues, speeches, presentations, short texts etc. to interact and to communicate with peers and/or other people in or outside the school by using the language including the target words, language grammar in use, and the social language for the theme and its components. **(V3.4, V4.2, V5.1, V5.2, V9.3, V16.2, V16.3, V18.3, LS4, LS5, CS3.1, CS2.20)**. AI-based technologies can be used for various activities, giving students access to authentic materials. They can also produce digital materials and projects at school and at home through recordings **(D2.5, D3.3, SELS3.3, V7.2, LS2, CS2.20)**. These are evaluated as described in items (7), (8), (9), and (10) in the section 1.2. Principles for the Implementation of the English Curriculum. Then they can expand their language use and practise by communicating with others.

ENG5.8.S6.

REFLECTING ON THE SPEAKING-EXPRESSION PROCESS INDIVIDUALLY AND COLLABORATIVELY: The teacher asks students to think about the whole speaking-expression process and asks them to express their thoughts, ideas, and feelings about the process. Some volunteer students express what they think and feel about them **(SELS1.3, CS2.15)**. Then they give feedback about their reflections to each other in pairs and take notes about the feedback they receive **(D2.4, D3.5, SELS2.2)**. The teacher facilitates different activities for creating versatile reflection sessions in a fun and collaborative design. **(V4.3, V6.2, V10.3, V20.4, LS1)**.

DIFFERENTIATION**Expansion**

Objective: To engage in conversations and to foster creativity about holidays and holiday plans in English by using the target vocabulary and grammar chunks (Be going to Future Tense).

Activity 1: That's so fun!

The teacher writes some words related to holiday plans (e.g., a tower, a museum, a desert, a lake, sky) on slips of paper and places them into a box. She/He divides the class into groups of three/four and distributes the boxes to each group. Then the students are asked to make sentences about their holiday plans by choosing the words from the box for each student in the group and one of the plans is going to be really fun. When they finish writing, each group is invited to the board to share their plans with the classmates (e.g., We are going to climb up a tower., We are going to visit a museum., We are going to watch the sky in a desert., We are going to swim in the sea with dolphins). Every one of the students tells a plan. The rest of the class is provided with a form including five stars, which can be used to evaluate pair/group performance. They will be engaged while listening to their classmates by colouring the stars to choose the most fun plan. The teacher provides constructive feedback to each group. Students reflect on their thoughts and feelings about the activity.

Supporting

Objective: To engage in conversations and to foster creativity about holidays and holiday plans in English by using the target vocabulary and the grammar chunks (Be going to Future Tense).

Activity 1: That's so fun!

The teacher writes some phrases related to holiday plans (e.g., climb up a tower, visit a museum, go to a park, watch the sky in a desert, swim in the sea with dolphins) on slips of paper and place them into a box. She/He divides the class into groups of three/four and distributes the boxes to each group. Then the students are asked to make sentences about their holiday plans by choosing the phrases from the box for each student in the group. When they finish writing, each group is invited to the board to share their plans with the classmates (e.g., We are going to climb up a tower, We are going to visit a museum., We are going to watch the sky in a desert., We are going to swim in the sea with dolphins.). Every one of the students tells a plan. The rest of the class is provided with a form including five stars, which can be used to evaluate pair/group performance. They will be engaged while listening to their classmates by colouring the stars to choose the most fun plan. The teacher provides constructive feedback to each group. Students reflect on their thoughts and feelings about the activity.

YEAR 6 (LEVEL: A2.2)

THEME 1: SCHOOL LIFE

Sub-themes: Roles, and responsibilities at school; school routines; national days and celebrations

This theme is centred on the concept of “school life” and covers the sub-themes of “roles, and responsibilities at school; school routines; national days and celebrations”. These components (sub-themes) are integrated into the learning process through the contextualised use of target vocabulary, grammatical structures, phonological features, and social language expressions. The learning and teaching activities are designed to be meaningful, collaborative, and communicative, and are tailored to align with the learners’ developmental level, interests, needs, and preferences. The ultimate aim of this theme is to equip learners with the knowledge, skills, and experiences needed to effectively use English in their daily lives, both within and beyond the school environment.

CLASS HOURS 10

FIELD SKILLS AND SUPPORTIVE SKILLS

- FLFS1. Listening/Watching-Comprehension
- FLFS2. Reading-Comprehension
- FLFS3. Speaking-Expression
- FLFS4. Writing-Expression
- FLSS1. Grammaticing: Selection and Use
- FLSS2. Vocabulary: Selection and Use
- FLSS3. Pronunciation: Selection and Use

CONCEPTUAL SKILLS _

DISPOSITIONS D1.1. Curiosity, D1.2. Independence, D1.3. Perseverance and Determination, D1.5. Self-Confidence, D1.6. Selectivity, D2.3. Assertiveness, D2.4. Trust, D2.5. Playfulness, D3.1. Reasoning, D3.2. Focus, D3.3. Creativity, D3.5. Open-Mindedness, D3.6. Analyticalness, D3.7. Being Systematic, D3.8. Questioning

INTERCURRICULAR COMPONENTS

Social-Emotional Learning Skills

SELS1.1. Self-Awareness Skill, SELS1.2. Self-Regulation Skill, SELS1.3. Self-Reflection Skill, SELS2.1. Communication Skill, SELS2.2. Cooperation Skill, SELS2.3. Social Awareness Skill, SELS3.1. Adaptability Skill, SELS3.2. Flexibility Skill, SELS3.3. Responsible Decision-Making Skill

Values V1. Justice, V3. Diligence, V4. Friendship, V6. Honesty, V7. Aesthetics, V9. Compassion, V10. Modesty, V12. Patience, V14. Respect, V16. Responsibility, V20. Benevolence

Literacy Skills LS1. Information Literacy, LS2. Digital Literacy, LS4. Visual Literacy, LS5. Cultural Literacy, LS6. Civic Literacy, LS7. Data Literacy, LS9. Art Literacy

INTERDISCIPLINARY

RELATIONS Turkish, Maths, Social Studies, Physical Education and Sports, Visual Arts, Music, Information Technologies and Software

INTERSKILLS CS2.1. Conflict Resolution Skill, CS2.2. Observation Skill, CS2.3. Summarising Skill, CS2.4. Analysis Skill, CS2.5. Classification Skill, CS2.6. Information Gathering Skill, CS2.7. Comparison Skill, CS2.8. Inquiry Skill, CS2.9. Generalisation Skill, CS2.10. Inference Skill, CS2.11. Observation-Based Prediction Skill, CS2.12. Data-Based Prediction Skill, CS2.13. Structuring Skill, CS2.14. Interpretation Skill, CS2.15. Reflective Thinking Skill, CS2.16.1. Inductive Reasoning Skill, CS2.16.2. Deductive Reasoning Skill, CS2.16.3. Analogical Reasoning Skill, CS2.17. Evaluation Skill, CS2.19. Logical Auditing Skill, CS2.20. Synthesis Skill, CS3.1. Decision-Making Skill, CS3.3. Critical Thinking Skill

Year 6 is structured based on semi-holistic/semi-inductive approach.

LEARNING OUTCOMES and PROCESS COMPONENTS

ENG.6.1.L1. Students can get ready for the listening/watching-comprehension process for the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations” carefully.

- a) *Students activate their pre-existing knowledge and experience related to the current theme and content by recalling their background knowledge imaginatively in her/his own language without speaking it.*
- b) *Students identify significant relationships between their pre-existing knowledge and experiences and the clues to the current content without translation.*
- c) *Students make predictions about the current content on “school life” by using the relationships that they recognised accurately by looking at the provided realia, pictures, and context.*
- d) *Students make predictions about the current content based on the surrounding audio/visual elements in relation to the current theme.*

ENG.6.1.L2. Students can bring information about the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations” together through significant details and main components while listening/watching it.

- a) *Students comprehend the topic of the current content by listening (to)/watching it as a whole.*
- b) *Students recognise the significant details and components within the whole current content by listening (to) and watching it again in a careful manner.*

ENG.6.1.L3. Students can make meaning of/derive meaning from the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations” through significant details by listening/watching it carefully.

- a) *Students check any initial predictions related to the current content by being aware of the commonalities between self-predictions and clues provided as visuals surrounding the current content.*
- b) *Students make important and necessary classifications in the current content that help them to understand it better with details.*
- c) *Students make important and necessary comparisons in the current content that help them to understand it better with details.*
- d) *Students recognise significant horizontal/vertical/spiral relationships (if any) within the generally perceived current content with the help of classifications and comparisons made earlier.*
- e) *Students make significant inferences that contribute to the understanding of the meaning of the generally perceived current content.*
- f) *Students construct the meaning of the current content in detail through the classifications/comparisons/inferences made earlier in relation to it.*
- g) *Students internalise the current content in an individualised and appropriate way according to age and language level.*

ENG.6.1.L4. Students can convey their knowledge, experience, thoughts, and feelings examined carefully about the whole listening/watching-comprehension process in relation to the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations”.

- a) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content.*

- b) *Students convey their personal knowledge, experiences, thoughts, and feelings examined carefully in relation to the listening/watching-comprehension process about the current content by sharing them with others.*

ENG.6.1.P1. Students can select and use the target phonological elements of the current content about “school life with roles, and responsibilities at school; school routines; national days and celebrations” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others.

- a) *Students listen to the current content by paying attention to the target phonological aspects including pronunciation and intonation of utterances.*
- b) *Students reinforce the target phonological elements by repeating them after the source several times as a whole class, in groups and individually.*
- c) *Students recognise the target phonological elements of the current content when they are heard in different contexts.*
- d) *Students recognise target phonological elements specific to the current content when they are heard in different contexts and use them accurately, authentically, and naturally through spontaneous decision-making processes.*
- e) *Students use the target theme-specific phonological elements of the current content appropriately, spontaneously, and effectively when communicating with others.*

ENG.6.1.R1. Students can get ready for the reading-comprehension process about the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations”.

- a) *Students activate their pre-existing knowledge and past experiences related to the current theme and content efficiently.*
- b) *Students recognise significant relationships between their pre-existing knowledge, past experiences and clues to the current content.*
- c) *Students make significant preliminary predictions about the current content based on recognised relationships.*
- d) *Students make detailed predictions about the current content by exploring the audio-visual clues surrounding it.*

ENG.6.1.R2. Students can bring information about the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly.

- a) *Students review the current content by looking at the surrounding audio/visual materials to identify what it is about in general through skimming.*
- b) *Students read the current content to scan the major components silently and quickly with the help of the clues provided.*
- c) *Students carefully read the current content silently and carefully to find significant details and components belonging to the theme.*

ENG.6.1.R3. Students can make meaning of / derive meaning from the current content about “school life with roles, and responsibilities at school; school routines; national days and celebrations” by reading it carefully.

- a) *Students carefully check the current content in detail for the accuracy of initial and detailed predictions that are made earlier.*
- b) *Students classify the significant elements of the current content that contribute to the perception of the content in a meaningful way.*
- c) *Students compare significant elements of the current content that contribute to the perception of the content in a meaningful way.*

- d) *Students recognise significant horizontal/vertical/spiral relationships within the current content that contribute to the perception of the content in a meaningful way.*
- e) *Students make meaningful inferences from the information in the current content by examining it carefully.*
- f) *Students internalise the information in the current content in an individualised and appropriate way according to age and language level.*

ENG.6.1.R4. Students can convey their knowledge, experiences, thoughts, and feelings related to the reading-comprehension process about the current content, “school life with roles, and responsibilities at school; school routines; national days and celebrations” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process.*
- b) *Students convey the knowledge, experiences, thoughts, and feelings that have been carefully examined in relation to the current reading-comprehension content and process by sharing them with others.*
- c) *Students produce new products related to the current reading-comprehension content and process by revising their personal work carefully after participating in reflective activities.*

ENG.6.1.V1. Students can select and use the target vocabulary of the current content about “school life with roles, and responsibilities at school; school routines; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students guess the main topic of the current content from the audio/visual/written elements (e.g. sound, voices, scenes, written words) in the contextual material by listening (to)/watching/reading it several times for recognition.*
- b) *Students recognise sub-themes/key components of the target words to which they belong in the current content by scanning.*
- c) *Students recognise the target words related to the main components of the current content with the help of the audio/visual/written elements and other clues.*
- d) *Students repeat aloud the relevant target key components and target vocabulary in the current content with the whole class, in groups, and then individually together with or after listening (to)/watching/reading the source material.*
- e) *Students recognise the use of target words and expressions in the current content by making various guesses with the help of supplementary elements.*
- f) *Students make context-appropriate selections automatically by associating target words with their pre-existing conceptual meanings in the mind without analysing their contextual meaning in detail.*
- g) *Students use the target words spontaneously and appropriately in different communicative contexts by being aware of their differences when communicating with others.*

ENG.6.1.G1. Students can select and use the target grammatical elements of the current content about “school life with roles, and responsibilities at school; school routines; national days and celebrations” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others.

- a) *Students become familiar with the current content by listening (to)/watching/reading it a few times attentively.*
- b) *Students listen (to)/watch/read the same content, attentively and mindfully, including the use of target grammatical chunks presented verbally in context with the help of body language.*

- c) *Students verbally and automatically repeat simple and meaningful clauses/sentences containing target grammatical chunks that they have noticed in the current content that they have heard/viewed/read without explicit knowledge of the rules.*
- d) *Students act out physically the clauses/sentences containing the target grammatical chunks in the current content heard/viewed/read by repeating them several times without knowing, analysing, and thinking about their rules.*
- e) *Students see and read the example sentences containing target grammatical chunks provided for language awareness carefully.*
- f) *Students gain awareness of clauses/sentences that contain target grammatical chunks that are presented for the purpose of raising language awareness.*
- g) *Students recognise the clauses/sentences containing the target grammatical chunks when they encounter them by seeing and/or hearing them in different contexts.*
- h) *Students use the recognised target grammatical chunks naturally, authentically, and automatically in new contextual tasks and activities without analysing their rules.*
- i) *Students produce new and meaningful verbal/written content about the current theme by using the target grammatical chunks in meaningful tasks without knowing and analysing their rules.*
- j) *Students use the target language chunks authentically, automatically, and naturally in communication processes without analysing their rules in meaningful contexts.*

ENG.6.1.W1. Students can get ready for the writing-expression process about the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations”.

- a) *Students relate their pre-existing knowledge and experience used in the initial processes of writing-expression skills to the current content by activating them in relation with the current content.*
- b) *Students understand what the writing task and its content are in relation to the current content correctly by making use of their pre-existing knowledge and experience as guided and assigned.*

ENG.6.1.W2. Students can understand the model/example for the writing task about the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations”.

- a) *Students understand the components and details of the content in the provided model/sample which is displayed as a guide, by examining it carefully.*

ENG.6.1.W3. Students can organise a content for the assigned writing task on the current content “school life with roles, and responsibilities at school; school routines; national days and celebrations” based on the model/example provided.

- a) *Students conduct preliminary research for a prepared writing situation according to the current content appropriate to the assigned writing type, age, and language level.*
- b) *Students develop a simple draft for a prepared/or unprepared writing task about the current content appropriate to the assigned writing type, age, and language level.*
- c) *Students organise and/or produce materials relevant to the content for a prepared/unprepared writing task, appropriate to the assigned writing type, age, and language level.*

ENG.6.1.W4. Students can individually construct/form content for the assigned writing task on the current content “school life with roles, and responsibilities at school; school routines; national days and celebrations”.

- a) *Students present appropriate and accurate materials for a prepared and/or unprepared writing task about the current theme according to the assigned writing type, age, and language level.*

- b) *Students use appropriate discourse forms, styles, and rules relevant to the assigned writing type for a prepared and/or unprepared writing task.*
- c) *Students use target words and grammatical language chunks accurately and appropriately for a prepared and/or unprepared writing task about the current content by selecting them according to the assigned writing type, age, and language level.*
- d) *Students express important messages in the written current content to the reader accurately and appropriately for a prepared and/or unprepared writing task.*

ENG.6.1.W5. Students can reorganise (reconstruct) and use information in the new written tasks about the “school life with roles, and responsibilities at school; school routines; national days and celebrations” to communicate with other people.

- a) *Students use the information in the current content or similar information in a different content by internalising and selecting it individually and reorganising it as required and meaningfully in different contexts.*
- b) *Students exchange information/ideas in written communication by sharing reconstructed meaningful knowledge meaningfully with others.*

ENG.6.1.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “school life with roles, and responsibilities at school; school routines; national days and celebrations” in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings reviewed in relation to the current writing-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings reviewed in relation to the writing-expression process about the current content with others.*
- c) *Students produce new written products related to the current writing-expression content and process by revising their personal work carefully after participating in reflective activities.*

ENG.6.1.S1. Students can get ready for speaking-expression process about the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations”.

- a) *Students make connections with the current content by activating their pre-existing knowledge and experiences that they have recalled in the listening (to)/watching/reading sections previously.*

ENG.6.1.S2. Students can use the model/example for producing verbal content about the current content on “school life with roles, and responsibilities at school; school routines; national days and celebrations”.

- a) *Students listen (to)/watch/read the model/example for the current content with the help of audio/visual/written elements.*

ENG.6.1.S3. Students can organise a new verbal content on “school life with roles, and responsibilities at school; school routines; national days and celebrations” by speaking accurately, efficiently, and authentically.

- a) *Students recognise what form and type of content is expected and assigned for prepared/unprepared speaking situations based on audio/visual/written content as provided in the model/example.*
- b) *Students organise the content for prepared/unprepared speaking situations in an appropriate and accurate way as they have heard/seen/read in the model/example.*
- c) *Students develop a draft for prepared/unprepared speaking situations, appropriate to the age and language level as presented in the model/sample content.*
- d) *Students organise supplementary audio/visual/written materials for prepared/or unprepared speaking situations, appropriate to age and language level, as provided in the model/sample content.*

- e) *Students organise the information about the current content to be presented for prepared/or unprepared speaking situations in an appropriate way as required.*

ENG.6.1.S4. Students can construct a new verbal content on “school life with roles, and responsibilities at school; school routines; national days and celebrations” by speaking accurately, efficiently, and authentically.

- a) *Students use target pronunciation, vocabulary, language chunks, and forms of discourse related to the current content effectively by selecting them accurately and appropriately for prepared/unprepared speaking situations.*
- b) *Students present individually prepared content in an accurate and efficient way as presented in the model/example for prepared speaking situations clearly, efficiently, and appropriately.*
- c) *Students present individually prepared information in an accurate and efficient way as presented in the model/example for unprepared speaking situations.*
- d) *Students express the message about the current content clearly to the reader by using all supplementary elements and body language in an appropriate and accurate way in context for prepared and/or unprepared speaking situations.*

ENG.6.1.S5. Students can reorganise (reconstruct) and use information about the “school life with roles, and responsibilities at school; school routines; national days and celebrations” to communicate with other people.

- a) *Students use the information presented in the current content by reorganising it appropriately, efficiently, individually, and verbally in different contexts.*
- b) *Students engage in appropriate and efficient verbal communication by sharing the reconstructed meaningful information about the current content with others.*

ENG.6.1.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “school life with roles, and responsibilities at school; school routines; national days and celebrations” to communicate with other people in relation to themselves or others, both individually and/or with others.

- a) *Students convey individually the knowledge, experiences, thoughts, and feelings examined carefully in relation to the current speaking-expression content and process.*
- b) *Students share the knowledge, experiences, thoughts, and feelings examined carefully in relation to the speaking-expression process about the current content with others.*

CONTENT FRAME

SCHOOL LIFE

Sub-themes: Roles, and responsibilities at school; school routines; national days and celebrations

Target Vocabulary in Use (with revisional vocabulary):

Vocabulary for roles, and responsibilities at school:

Nouns: A permission, a leader, a manner, a guide, a celebration, an interview, a celebration, a festival, a school ceremony, an assembly, a speech.

Verbs: To support, to lead, to care, to volunteer, to celebrate.

Adjectives: Helpful, successful, keen.

Adverbs: Carefully, willingly, cheerfully.

Vocabulary for school routines:

Nouns: An instruction, a listener, a term, a follow-up, a ceremony, national anthem, a parade, a flag.

Verbs: To enter, to greet, to pack, to pass, to fail, to try, to follow.

Adjectives: Later, soon.

Adverbs: Before, regularly.

***National and Religious Days, Festivals, and Celebrations:** "29 October Republic Day", "23 April National Sovereignty and Children's Day", "19 May Commemoration of Atatürk, Youth and Sports Day", "15 July Democracy and National Unity Day", "30 August Victory Day", "Eid al-Fitr (Eid-al-Ramadan)", "Festival of Sacrifice (Eid-al-Adha)".

*(Relevant language content and (communicative) activities related to these national and religious days, festivals, and celebrations will be developed and integrated across all themes and in all appropriate sections wherever and whenever possible.)

*Local Cultural, Social, and Moral Considerations of the Theme

In this theme, specific examples, cases, situations, events, and practices reflecting Turkish social, cultural, and moral customs, traditions, and heritage will be included across all sub-themes. This consideration will be age-and-level appropriate and selected with the Turkish learners' social and cultural context in mind. A table for this section is provided in the introduction to the whole English Language Curriculum.

Background Grammatical Structures in Use:

-Articles (a/an/the): (A leader, an instruction, the permission)

-Imperatives: (Enter the classroom quietly).

-Personal pronouns: (He listens carefully to the teacher's instructions).

-There is/There are: (There is a leader in every group. There are instructions written on the board).

-Wh- questions (who-when-what-where): (Who is the leader of the class? Where do we enter the building?)

Target Grammatical Structures in Use:

-The Present Simple Tense: (A leader always cares for the team).

-Adverbs of frequency: (Students often greet their teachers before entering the class).

-Object pronouns: (The teacher supports them in their work).

Functions of the Grammatical Structures in Use:

-Use of articles (a/an/the): Expressing non-specific or general items and specific or definite items.

-Use of imperatives: Giving commands.

-Use of The Present Simple Tense: Expressing routines, habits, general truths, and facts.

-Use of adverbs of frequency: Expressing the frequency of actions or events.

-Use of personal pronouns: Indicating who is involved in the action, possession, or other relationships in a sentence.

-Use of there is/there are: Introducing existence or presence, specifying objects, people, or places in a location.

-Use of wh- questions (who-when-what-where): Asking about things, actions, ideas, a time of an event, about people in an action.

Use of object pronouns: Replacing nouns that receive the action in a sentence.

Target Social Language in Use:

She's such a team player during all school projects!

You need to work harder to make the grade!

The choir is always in the spotlight during the Republic Day celebrations!

Target Phonological Sounds in Use:

Intonation of positive statements

Generalisations/Principles/Key Concepts

Generalisations

The target concept of this theme "school life" and its components such as "roles, and responsibilities at school; school routines; national days and celebrations" is present in almost all languages. People who start to learn a new language bring their pre-existing knowledge with them and transfer it to their new language learning. For instance, a lower-secondary school student will know what "school life" and its components such as "roles, and responsibilities at school; school routines; national days and celebrations" means but will not know how to say them in a foreign language if this has not yet been covered in their existing curriculum. However, this existing knowledge in their own language will help them recognise, understand, and learn the new information more easily in a foreign language, in this case, English.

Key Concepts

roles, responsibilities, routines, roles and responsibilities at school, routines, routines at school, national days, celebrations.

INDICATORS FOR LEARNING (Assessment and Evaluation)

EVALUATION FOR THE SKILLS AND THE CONTENT:
