Not: 1.sınıflarda zihinden toplama işlemi yaparken sadece 10 üzerinden ve 10'a tamamlama olarak yapılır. Zihinden toplama yöntemleri 1.sınıfta toplama işlemi kolaylaştırmamakta daha da zorlaştırmaktadır.

Diğer yöntemler öğrencilerin toplama işlemi karıştırmasına neden olacaktır. Daha fazla ayrıntıya girilmemesini öneririm. Zihinden işlemlerin 2.sınıflarda daha etkili olmaktadır.
